ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 17TH DAY OF AUGUST, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Abbott Incorporated. (See Abbott, William E., assignor.)

Abbott, William E., assignor to Abbott Incorporated, Bend, Oreg. Check-book attachment. No. 1,350,203; Aug. 17; v. 277; p. 528.

Abelson, Abraham, Brooklyn, N. Y. Restaurant-service device. No. 1,349,647; Aug. 17; v. 277; p. 421.

Ackermann, Oscar A., St. Paul, Minn. Stock-car. No. 1,349,747; Aug. 17; v. 277; p. 441.

Agee, Arthur E. (See Sharpnack, M. C., and Crisman, assignors.)

Ahlbom, Oscar W., Salt Lake City, Utah. Bicycle-sled. No. 1,350,052; Aug. 17; v. 277; p. 499.

Aktiebolaget Svenska Kullager-Fabriken. (See Palmgren, Nils A., assignor.)

Albrecht, Albert W., St. Louis, Mo. Collapsible burial-casket. No. 1,349,799; Aug. 17; v. 277; p. 451.

Alderson, William, Kimberley, South Africa. Construction of ships. No. 1,349,800; Aug. 17; v. 277; p. 451.

Allen, Charles, El Paso, Tex. Slime-pulp thickener. No. 1,350,204; Aug. 17; v. 277; p. 529.

Allen, Charles J., Moorestown, N. J., assignor to S. L. Allen & Co., Inc. Self-propelled vehicle. No. 1,349,997; Aug. 17; v. 277; p. 488.

Allen, Herbert L., and K. R. Fox, assignors to Electron Chemical Company, Portland, Me. Electrolytic cell. No. 1,349,597; Aug. 17; v. 277; p. 411.

Allen, S. L., & Co. (See Allen, Charles J., assignor.)

Allison, Carl F., Woodlawn, Pa. Solder composition. No. 1,349,648; Aug. 17; v. 277; p. 421.

Alsten, Alfred O., assignor of one-third to F. A. Sanderson and one-third to A. L. Johnson, Worcester, Mass. Jack. No. 1,349,801; Aug. 17; v. 277; p. 451.

Althouse, Charles S., Reading, Pa. Dyeing. No. 1,349,867; Aug. 17; v. 277; p. 464.

American Automatic Products Corporation. (See Woodward, Garrett W., assignor.)

American Can Company. (See Grey, James A., assignor.)

American Can Company. (See Halloway, William M., assignor.)

American Can Company. (See Johnson, Axel, assignor.)

American Clearing Company. (See Barber, Harry E., assignor.)

American District Telegraph Company. (See Hopkins, Richard M., assignor.)

American Laundry Machinery Company, The. (See Carroll Emil J., assignor.)

American Steam Gauge & Valve Manufacturing Company. (See Hopkins, Frank H., assignor.)

Anagnostopoulos, Theodore D. (See Theodore, Anostopoulo D.)

Anderson, Chester H., assignor of one-fourth to C. L. Hill and two-fourths to H. R. Kleinbach, Los Angeles, Calif. Clock. No. 1,350,131; Aug. 17; v. 277; p. 514.

Anderson, John E., Jamestown, N. D. Hose-reel. No. 1,350,205; Aug. 17; v. 277; p. 529.

Apsley Rubber Company. (See Wrestling, Herman, assignor.)

Armstrong, Victor C. (See Payne, Ralph W., assignor.)

Armour, Robert, Providence, R. I. Trick pocket-knife. No. 1,350,251; Aug. 17; v. 277; p. 537.

Arnold, Charles E., assignor to du Pont Fabrikoid Company, Wilmington, Del. Forming artificial leather and product thereof. No. 1,350,271; Aug. 17; v. 277; p. 541.

Arthur, Kemp B., Norfolk, Va. Adjustable and separable stud or button. No. 1,349,649; Aug. 17; v. 277; p. 421.

Ashcroft, Edgar A., London, England. Manufacture of potassium chlorid from natural silicates, rocks, minerals, residues, or wastes containing potassium. No. 1,350,091; Aug. 17; v. 277; p. 506.

Ashley, Walter A., Chillicothe, Ohio. Fitting for domestic gas-meters. No. 1,350,132; Aug. 17; v. 27; p. 514.

Atlantic Metal Hose Company. (See Siegel, Samuel, assignor.)

Atterbury, Grosvenor, New York, N. Y. Reinforced cellular structure. No. 1,349,868; Aug. 17; v. 277; p. 464.

Austin, Eber C., Wahoo, Nebr. Valve-spring lifter. No. 1,349,934; Aug. 17; v. 277; p. 476.

Austin, Frederick C. (See Bentson, Hans J., assignor.)

Auto Slyde & Moving Picture Machine Co. (See Klaiber, Maximilian, assignor.)

Awischus, August, Filley, Nebr. Lifting-grapple. No. 1,350,053; Aug. 17; v. 277; p. 499.

Aylward, Henry W., Brooklyn, N. Y. Expansion-bolt. No. 1,349,998; Aug. 17; v. 277; p. 489.

Ayotte, Joseph R., Chicago, Ill. Hand-tool. No. 1,349,553; Aug. 17; v. 277; p. 403.

Ayraud, Jules J. (See McCullar, W. A., and Ayrand.)

Badenhausen, John P., Philadelphia, Pa. Superheater. No. 1,349,554; Aug. 17; v. 277; p. 403.

Badier, Louis G., and L. B. Holliday, assignors to L. B. Holliday & Co., Limited, Huddersfield, England. Manufacture of picric acid. No. 1,349,802; Aug. 17; v. 277; p. 451.

Baker, Edward J., Chicago, Ill. Advertising device. No. 1,350,054; Aug. 17; v. 277; p. 499.

Balke, Clarence W., Highland Park, assignor to Pfanstiehl Company, Inc., North Chicago, Ill. Amalgamating steel bodies. No. 1,349,999; Aug. 17; v. 277; p. 489.

Ballman, Edwin C., assignor to Valley Electric Company, Wilmington, Del. Cartridge-type fuse. No. 1,350,065; Aug. 17; v. 277; p. 500.

Bancarel, Charles, Levallois-Perret, France. Portable cinematographic apparatus. No. 1,349,650; Aug. 17; v. 277; p. 421.

Barber, Harry E., Green Cove Springs, Fla., assignor, by mesne assignments, to The American Clearing Company, Hamilton, Ohio. Stump-pulling machine. No. 1,349,803; Aug. 17; v. 277; p. 451.

Barnes, Ira W., East Liverpool, Ohio. Rivet-cutter. No. 1,350,206; Aug. 17; v. 277; p. 529.

Barnhart, Mollie E. (See Freeman, Alpheus J., assignor.)

Barnum, Raymond. (See Wilson, Walter, assignor.)

Baron, Robert R., assignor of one-half to G. A. Hug, Indianapolis, Ind. Variable-speed device for cycles. No. 1,350,288; Aug. 17; v. 277; p. 544.

Barry, John E., Jr., Chicago, Ill. Electric-lamp support. No. 1,350,056; Aug. 17; v. 277; p. 500.

Barstow, Edwin O., assignor to The Dow Chemical Company, Midland, Mich. Making lead arsenate. No. 1,349,707; Aug. 17; v. 277; p. 433.

Bartlett, Percy H., assignor of one-third to J. B. Seaman and one-third to B. Currier, Philadelphia, Pa. Indicating and testing supply switch-box. No. 1,349,651; Aug. 17; v. 277; p. 422.

Basset, Lucien P., Paris, France. Treating ores in blast-furnaces. No. 1,349,598; Aug. 17; v. 277; p. 412.

Bastian, Charles L., Chicago, Ill. Drum-valve. No. 1,349,748; Aug. 17; v. 277; p. 441.

Bates, Harry, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting-machine. No. 1,350,000; Aug. 17; v. 277; p. 489.

Baumann, Ferdinand P., Küsnacht, Switzerland, assignor, by mesne assignments, to G. H. Rein, New York, N. Y. Dry battery. (Reissue.) No. 14,929; Aug. 17; v. 277; p. 544.

Beach, Benson C., and J. H. Beeby, Ottawa, Ontario, Canada. Combined heating, cooking, and baking stove. No. 1,349,652; Aug. 17; v. 277; p. 422.

Beatty, Roland A., New York, N. Y. Clothes-sprinkler. No. 1,350,133; Aug. 17; v. 277; p. 514.

Beckwith, Charles E., deceased, Peoria, Ill.; M. L. Beckwith, administratrix. Automatic signaling device for trains. No. 1,349,708; Aug. 17; v. 277; p. 433.

Beckwith, Charles E., deceased, Peoria, Ill.; M. L. Beckwith, administratrix. Signaling mechanism for trains. No. 1,349,709; Aug. 17; v. 277; p. 433.

Beckwith, Mame L., administratrix. (See Beckwith, Charles E.)

Beeby, John H. (See Beach, B. C., and Beeby.)

Beer, Guido, *et al.*, executors. (See Salvati, Michele N.)

Beeson, Byron P., assignor of one-half to T. W. Mace, Sapulpa, Okla. Bookkeeper's work-table. No. 1,349,710; Aug. 17; v. 277; p. 434.

Bell, Frank B., Chicago Heights, Ill., assignor to Edgewater Steel Company, Pittsburgh, Pa. Rolling-mill. No. 1,350,057; Aug. 17; v. 277; p. 500.

Bell, John E., Brooklyn, assignor, by mesne assignments, to Foster Marine Boiler Corporation, New York, N. Y. Marine boiler. No. 1,349,869; Aug. 17; v. 277; p. 464.

Bell, William H., Mount Vernon, N. Y. System for indicating and recording orders. No. 1,349,555; Aug. 17; v. 277; p. 403.

Bellican, Robert P., Natchez, Miss. Gate closer and supporter. No. 1,350,134; Aug. 17; v. 277; p. 515.

Bender, John H., Kansas City, Mo. Card-holder. No. 1,349,935; Aug. 17; v. 277; p. 476.

Bendix, Frederick. (See Phelan, R., and Bendix.)

Benedict, James Z., Cedar Rapids, Iowa. Hand-cart. No. 1,350,058; Aug. 17; v. 277; p. 500.

Benner, Charles. (See Evits, C., and Benner.)
Bennett Injector Company. (See Wood, A. J., assignor.)
Benson, Jesse M., Concord, Tenn. Automobile steering mechanism. No. 1,349,653; Aug. 17; v. 277; p. 422.
Bentson, Hans J., La Jolla, Calif., assignor to F. C. Austin, Chicago, Ill. Trenching-machine. No. 1,349,936; Aug. 17; v. 277; p. 476.
Beran, Rud F. (See Kaspar, J., and Beran.)
Berg, Karl A. T., Högänäs, Sweden. Two-stroke-internal-combustion engine. No. 1,350,135; Aug. 17; v. 277; p. 515.
Bergen, John C., New Brunswick, N. J. Bag. No. 1,349,654; Aug. 17; v. 277; p. 422.
Berger, Joseph, Jr., Utica, N. Y., assignor to Union Special Machine Company, Chicago, Ill. Uniting fabric-sections. No. 1,349,711; Aug. 17; v. 277; p. 434.
Berger, Joseph, Jr., Utica, N. Y., assignor to Union Special Machine Company, Chicago, Ill. Uniting fabric sections. No. 1,349,712; Aug. 17; v. 277; p. 434.
Bernet, Joseph W., New London, Conn. Foot-operable-impression throw-off. No. 1,350,272; Aug. 17; v. 277; p. 541.
Berry, Frank, *et al.* (See Olney, Lillian B., assignor.)
Berry, Herbert H., and J. W. Reid, London, England. Electric fire. No. 1,349,804; Aug. 17; v. 277; p. 451.
Bickings, William A., Detroit, Mich. Puzzle. No. 1,349,937; Aug. 17; v. 277; p. 476.
Bierbower, Richard C., assignor to Testall Electric Manufacturing Co., San Antonio, Tex. Electrical testing device. No. 1,349,655; Aug. 17; v. 277; p. 423.
Bierbower, Richard C., assignor to Testall Electric Manufacturing Co., San Antonio, Tex. Electrical testing device. No. 1,349,656; Aug. 17; v. 277; p. 423.
Big Four Wheel Company. (See Jessen, Arnold H., assignor.)
Bijur, Joseph, assignor, by mesne assignments, to Bijur Motor Appliance Company, New York, N. Y. Electrical starting apparatus. No. 1,349,870; Aug. 17; v. 277; p. 464.
Bijur, Joseph, assignor, by mesne assignments, to Bijur Motor Appliance Company, New York, N. Y. Lubricating device for dynamos and the like. No. 1,349,871; Aug. 17; v. 277; p. 464.
Bijur Motor Appliance Company. (See Bijur, Joseph, assignor.)
Bijur Motor Appliance Company. (See Wolffsohn, Lionel M., assignor.)
Billings, Frank, Cleveland, Ohio. Loading-machine. No. 1,349,749; Aug. 17; v. 277; p. 441.
Billings, Harry E., assignor of one-half to C. J. Searle, Lead, S. D. Belt-buckle. No. 1,350,207; Aug. 17; v. 277; p. 529.
Billy, Paul, Linden, N. J. Life-protector. No. 1,350,136; Aug. 17; v. 277; p. 515.
Birch, Gustaf B. (See Cameron, J. A., and Birch.)
Blacker, William, Staleybridge, England. Mechanical or power actuated hammer. No. 1,349,939; Aug. 17; v. 277; p. 477.
Blackwell, Henry F., assignor of one-half to W. H. Strawn and one-half to M. A. Blackwell, New York, N. Y. Drilling device. No. 1,350,059; Aug. 17; v. 277; p. 500.
Blackwell, Maude A., *et al.* (See Blackwell, Henry F., assignor.)
Blair, Wesley W., Newtonville, Mass. Treating peat. No. 1,349,713; Aug. 17; v. 277; p. 434.
Blair, Wesley W., Newtonville, Mass. Treating peat. No. 1,349,714; Aug. 17; v. 277; p. 435.
Blake, Clinton F., Portland, Oreg. Luggage-rack. No. 1,349,938; Aug. 17; v. 277; p. 477.
Blattberg, Nathan, assignor of one-half to S. Lachs, New York, N. Y. Collar-button. No. 1,349,872; Aug. 17; v. 277; p. 465.
Blauser, Henry A., Pickerington, Ohio. Cultivator. No. 1,349,657; Aug. 17; v. 277; p. 423.
Blaw-Knox Company. (See Venable, William M., assignor.)
Bley, Herbert G., Waterloo, Iowa. Dirigible light. No. 1,349,658; Aug. 17; v. 277; p. 423.

United Rubber Company, The, Akron, Ohio. Rubber vehicle-tire casing and tubes. No. 133,339; Aug. 17; v. 277; p. 571.
United Sales Syndicate Ltd., San Francisco, Calif. Face, toilet, sachet, &c., powders, toilet water, colognes, &c. No. 113,270; Aug. 17; v. 277; p. 554.
Universal Boring Machine Company, Hudson, Mass. Metal-boring machines. No. 134,045; Aug. 17; v. 277; p. 575.
Varsity Underwear Company, Baltimore, Md. Pajamas, night shirts and robes, underwear, &c. No. 122,029; Aug. 17; v. 277; p. 556.
Vibroplex Company, Inc., The, New York, N. Y. Telegraphic sending-machines. No. 132,331; Aug. 17; v. 277; p. 569.
Voorhees Rubber Mfg. Co., Jersey City, N. J. Hose. No. 110,636; Aug. 17; v. 277; p. 553.
Westinghouse Union Battery Co., Swissvale, Pa. Secondary batteries, and connectors therefor. No. 134,681; Aug. 17; v. 277; p. 578.
Washington Motor Company, The, Eaton, Ohio. Automobiles. No. 133,597; Aug. 17; v. 277; p. 571.
Whitman, Stephen F., & Son, Philadelphia, Pa. Candy. No. 130,936; Aug. 17; v. 277; p. 567.
White, Fred H., Charlotte, N. C. Cocoa-pudding. No. 119,690; Aug. 17; v. 277; p. 556.
Wippel, Elsie, Cincinnati, Ohio. Body-tissue tonic, headache-powder, laxative tablets, &c. No. 127,071; Aug. 17; v. 277; p. 558.
York Chemical Works, York, Pa. Fertilizers. No. 134,100; Aug. 17; v. 277; p. 575.
York Manufacturing Company, York, Pa. Refrigerating and ice-making systems and parts thereof. No. 134,166; Aug. 17; v. 277; p. 575.
Zatso Chemical Company, Ashland, Wis. Preparation for the treatment of corns. No. 129,034; Aug. 17; v. 277; p. 561.
Zell-Straub Laboratories, Chicago, Ill. Antiseptic and bactericidal agent for use in both human and veterinary fields. No. 129,117; Aug. 17; v. 277; p. 561.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 17TH DAY OF AUGUST, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Acid and other nitrogen compounds from atmospheric air, Manufacturing nitric. J. F. Sanders. No. 1,349,919; Aug. 17; v. 277; p. 473.
Acid, Manufacture of picric. L. G. Badier. No. 1,349,802; Aug. 17; v. 277; p. 451.
Adjustable cutter. F. H. Korff and S. H. Humphrey. No. 1,349,967; Aug. 17; v. 277; p. 483.
Adjustable wrench. E. M. Pauley. No. 1,349,852; Aug. 17; v. 277; p. 461.
Advertising device. E. J. Baker. No. 1,350,054; Aug. 17; v. 277; p. 499.
Advertisement and other papers, Holder for. R. Neddo. No. 1,349,906; Aug. 17; v. 277; p. 471.
Aerial condenser. L. P. Litzinger, P. F. Conerty, and W. Snodgrass. No. 1,349,681; Aug. 17; v. 277; p. 428.
Aeroplane-controlling device. C. R. Fairey. No. 1,350,145; Aug. 17; v. 277; p. 517.
Air-brakes, Cut-off and relief valve for. E. P. Clauss. No. 1,350,138; Aug. 17; v. 277; p. 515.
Air-compressor. S. A. Johnson. No. 1,350,159; Aug. 17; v. 277; p. 519.
Air-vent. C. F. Nystrom. No. 1,350,109; Aug. 17; v. 277; p. 510.
Air-washer. W. H. L. Donaldson. No. 1,349,608; Aug. 17; v. 277; p. 414.
Aircraft seat-support. A. V. Roe. No. 1,350,266; Aug. 17; v. 277; p. 540.
Alarm: *See*—
Burglar-alarm.
Alarm device. W. W. Miller. No. 1,349,904; Aug. 17; v. 277; p. 470.
Alcohol and making same, Absolute. G. B. Frankforter. No. 1,350,254; Aug. 17; v. 277; p. 538.
Alloy. F. Milliken. No. 1,350,166; Aug. 17; v. 277; p. 521.
Alloys containing nickel, Producing metallic. M. N. Salvati. No. 1,349,918; Aug. 17; v. 277; p. 473.
Aluminium from aluminic oxid, Producing. V. Gerber. No. 1,350,150; Aug. 17; v. 277; p. 518.
Aluminium from materials containing aluminic oxid, Porducing nitrid of. V. Gerber. No. 1,350,149; Aug. 17; v. 277; p. 518.
Ammonia synthesis, Forming a mixture of hydrogen and nitrogen for. G. P. Gerfin and M. Mauran. No. 1,349,756; Aug. 17; v. 277; p. 443.
Amusement device. A. Pinto. No. 1,350,176; Aug. 17; v. 277; p. 523.
Amusement device. J. Stanley and J. C. Porter. No. 1,350,086; Aug. 17; v. 277; p. 506.
Anvil attachment. H. Trouts. No. 1,349,927; Aug. 17; v. 277; p. 474.
Armor, Bullet-proof. G. O. Brewster. No. 1,350,062; Aug. 17; v. 277; p. 501.
Auto-theft signal. J. W. Marr. No. 1,350,032; Aug. 17; v. 277; p. 495.
Automobile-cowl attachment. J. H. Coffman. No. 1,349,715; Aug. 17; v. 277; p. 435.
Automobile-creeper. W. J. Broome. No. 1,349,941; Aug. 17; v. 277; p. 477.
Automobile-locking device. C. F. Norton. No. 1,349,849; Aug. 17; v. 277; p. 460.
Automobile-rim, Collapsible. L. B. Olney. No. 1,350,262; Aug. 17; v. 277; p. 539.
Automobile-running-board truss-rods, Repair-clamp for. G. K. Caviness. No. 1,350,253; Aug. 17; v. 277; p. 538.
Automobile-sled-runner attachment. G. W. Corsepius. No. 1,350,069; Aug. 17; v. 277; p. 502.
Automobile traffic-signal. S. Olszewski. No. 1,349,689; Aug. 17; v. 277; p. 430.
Automobiles and other vehicles, Shock-absorber for. J. B. Moore. No. 1,349,781; Aug. 17; v. 277; p. 447.
Aviator's safety device. J. R. Navarre. No. 1,349,782; Aug. 17; v. 277; p. 447.
Axle implements, Power-lift for crank-. F. M. Mecum. No. 1,349,900; Aug. 17; v. 277; p. 470.
Axle-stand. J. H. Staley. No. 1,350,119; Aug. 17; v. 277; p. 512.
Bag. J. C. Bergen. No. 1,349,654; Aug. 17; v. 277; p. 422.
Baked goods, Manufacture of. A. F. Härtzell. No. 1,350,278; Aug. 17; v. 277; p. 543.
Balance-wheel, Compensating. I. Povelsen. No. 1,350,035; Aug. 17; v. 277; p. 496.
Ball: *See*—
Darning-ball.
Basket-nailing machine. O. H. Kilmer and P. Madison. No. 1,349,965; Aug. 17; v. 277; p. 482.
Bass-drum-operating mechanism. J. D. Williams. No. 1,350,195; Aug. 17; v. 277; p. 527.
Battery-terminal fastening. A. F. Hawkins. No. 1,349,957; Aug. 17; v. 277; p. 480.
Bed. R. F. Hellweg. No. 1,350,155; Aug. 17; v. 277; p. 519.
Bed-canopy. C. L. Van Tuyl. No. 1,349,929; Aug. 17; v. 277; p. 475.
Bed, Folding. N. B. Douglass. No. 1,349,946; Aug. 17; v. 277; p. 478.
Bed, Folding davenport-. O. A. Honsinger. No. 1,349,883; Aug. 17; v. 277; p. 467.
Bed, Wall-. J. Sorensen. No. 1,349,738; Aug. 17; v. 277; p. 439.
Bearing. J. F. Stachowski. No. 1,350,245; Aug. 17; v. 277; p. 536.
Bearing, Roller-. N. A. Palmgren. No. 1,350,263; Aug. 17; v. 277; p. 540.
Bell. A. Roy. No. 1,349,694; Aug. 17; v. 277; p. 431.
Berth. R. Phelan and F. Bendix. No. 1,350,081; Aug. 17; v. 277; p. 505.
Binder attachment. H. H. Roberts. No. 1,349,855; Aug. 17; v. 277; p. 461.
Binder-board. F. E. Crompton. No. 1,350,141; Aug. 17; v. 277; p. 516.
Blood removing and etherizing apparatus. A. C. Hunt. No. 1,349,766; Aug. 17; v. 277; p. 444.
Board: *See*—
Binder-board. Sounding-board.
Boat detector, Sunken-. E. G. Haun. No. 1,350,224; Aug. 17; v. 277; p. 532.
Boiler: *See*—
Marine boiler.
Boiler-unit-assembling rack. J. Pierce, Jr. No. 1,350,236; Aug. 17; v. 277; p. 534.
Boilers, Baffle for water-tube. E. Kidwell. No. 1,349,574; Aug. 17; v. 277; p. 407.
Boilers, Circulation in water-tube. H. E. Yarrow. No. 1,350,200; Aug. 17; v. 277; p. 528.
Bolt: *See*—
Expansion-bolt.
Bolt holder, Wall-. J. J. Mulkern. No. 1,349,977; Aug. 17; v. 277; p. 485.
Book-lock. S. Salop. No. 1,349,857; Aug. 17; v. 277; p. 462.
Boot. C. W. Hubbell. No. 1,349,572; Aug. 17; v. 277; p. 406.
Boots and shoes, Vulcanizing-mold for. D. F. Wilhelmi. No. 1,349,796; Aug. 17; v. 277; p. 450.
Booth, Marking, listing, and assorting. R. H. Tyner. No. 1,349,699; Aug. 17; v. 277; p. 431.
Borax from potassium chlorid, Separating. N. Wrinkle and W. A. Kubnert. No. 1,350,090; Aug. 17; v. 277; p. 506.
Bottle-cap. C. M. Rice. No. 1,350,238; Aug. 17; v. 277; p. 535.
Bottle-closure. H. Goldstein. No. 1,349,830; Aug. 17; v. 277; p. 456.
Bottle cover, Milk-. C. W. Mosley. No. 1,350,167; Aug. 17; v. 277; p. 521.
Bottling-machine. A. E. Swanson. No. 1,350,249; Aug. 17; v. 277; p. 537.
Box: *See*—
Cardboard box. Sand-box.
Piston-rod packing-box. Tool-box.
Salt and pepper box. Vanity-box.
Boxes, Cover for service-. J. W. Gibney. No. 1,349,610; Aug. 17; v. 277; p. 414.
Bracket and clamp, Combined. A. A. H. Griffin. No. 1,350,221; Aug. 17; v. 277; p. 532.
Brazing and welding compound and preparing same. J. Klein. No. 1,349,966; Aug. 17; v. 277; p. 483.
Breast-drill. K. Drozd. No. 1,350,144; Aug. 17; v. 277; p. 516.
Brush-making machines, Mouthpiece for. J. W. Mayer. No. 1,349,845; Aug. 17; v. 277; p. 459.
Buckle, Belt-. H. E. Billings. No. 1,350,207; Aug. 17; v. 277; p. 529.
Buckle, Belt-. F. W. Lewis. No. 1,350,076; Aug. 17; v. 277; p. 504.
Bucket, Excavating-. W. M. Venable. No. 1,350,124; Aug. 17; v. 277; p. 513.

Building construction. D. C. Patterson. No. 1,349,850; Aug. 17; v. 277; p. 460.
Building, Storage-. F. E. d'Humy. No. 1,349,604; Aug. 17; v. 277; p. 424.
Building structure. J. Harkness. No. 1,350,019; Aug. 17; v. 277; p. 492.
Bunk. C. G. Janson and C. J. Braun. No. 1,349,962; Aug. 17; v. 277; p. 482.
Burglar-alarm, Automatic. F. A. Terry. No. 1,350,188; Aug. 17; v. 277; p. 525.
Burner: *See*—
Fuel-burner. Hydrocarbon-fuel burner.
Gas-burner.
Burnishing machine, Top-lift-. F. J. Tisdell. No. 1,349,863; Aug. 17; v. 277; p. 463.
Button. H. H. Helwig. No. 1,349,761; Aug. 17; v. 277; p. 443.
Button, Collar-. N. Blattberg. No. 1,349,872; Aug. 17; v. 277; p. 465.
Button, Collar-. A. J. Freeman. No. 1,349,825; Aug. 17; v. 277; p. 455.
Cabinet, Electric sewing-machine. E. A. Kopf and M. Hemleb. No. 1,349,678; Aug. 17; v. 277; p. 427.
Cable-recorder attachment. F. S. Whitney. No. 1,350,193; Aug. 17; v. 277; p. 526.
Cabinet, Food-service. M. J. Stern. No. 1,349,634; Aug. 17; v. 277; p. 419.
Cabinet, Record-. E. C. Fremaux. No. 1,350,146; Aug. 17; v. 277; p. 517.
Cabinet, Sewing-machine. E. A. Kopf and M. Hemleb. No. 1,349,679; Aug. 17; v. 277; p. 427.
Caffein, Manufacture of. R. L. Datta. No. 1,350,092; Aug. 17; v. 277; p. 507.
Calculating-machine gears, Over-rotation check for. E. E. Phinney. No. 1,349,628; Aug. 17; v. 277; p. 417.
Calendar. P. Rice. No. 1,350,114; Aug. 17; v. 277; p. 511.
Caliper, Micrometer-. F. O. Jaques, Sr. No. 1,349,612; Aug. 17; v. 277; p. 414.
Cam. W. Buhl. No. 1,349,661; Aug. 17; v. 277; p. 424.
Can-end feed mechanism. J. A. Gray. No. 1,349,833; Aug. 17; v. 277; p. 457.
Cans, Covering for condensed-milk. K. M. Tiefenbrun. No. 1,349,591; Aug. 17; v. 277; p. 410.
Car annunciators, Street-. J. L. Scroggins. No. 1,350,038; Aug. 17; v. 277; p. 496.
Carbureter. C. C. Bradbury. No. 1,350,001; Aug. 17; v. 277; p. 489.
Carbureter. J. T. Jennings. No. 1,349,835; Aug. 17; v. 277; p. 457.
Carbureter, Dust fuel. H. N. Cross. No. 1,349,751; Aug. 17; v. 277; p. 442.
Carbureter, Vacuum-feed. P. P. Gilles. No. 1,350,151; Aug. 17; v. 277; p. 518.
Car, Stock-. O. A. Ackerman. No. 1,349,747; Aug. 17; v. 277; p. 441.
Cars, Adjustable deck-support for. J. B. Shelton. No. 1,349,735; Aug. 17; v. 277; p. 439.
Card-holder. J. H. Bender. No. 1,349,935; Aug. 17; v. 277; p. 476.
Cardboard box. M. M. Martos. No. 1,349,780; Aug. 17; v. 277; p. 447.
Cart, Hand-. J. Z. Benedict. No. 1,350,058; Aug. 17; v. 277; p. 506.
Casket, Collapsible burial-. A. W. Albrecht. No. 1,349,799; Aug. 17; v. 277; p. 451.
Cellular structure, Reinforced. G. Atterbury. No. 1,349,868; Aug. 17; v. 277; p. 464.
Celluloid products, Treating. F. W. Horton. No. 1,350,157; Aug. 17; v. 277; p. 519.
Chain clamp and tightener. G. J. Weldeman and J. H. Hughes. No. 1,349,702; Aug. 17; v. 277; p. 432.
Chain-protector. W. Noess. No. 1,350,234; Aug. 17; v. 277; p. 534.
Chair. J. R. Holliday. No. 1,350,021; Aug. 17; v. 277; p. 493.
Chair. G. L. Squire. No. 1,350,041; Aug. 17; v. 277; p. 497.
Chairs, Adjustable headrest for barbers'. W. T. Switzer. No. 1,349,637; Aug. 17; v. 277; p. 419.
Changeable sign. H. Kahn. No. 1,349,769; Aug. 17; v. 277; p. 445.
Check-book attachment. W. E. Abbott. No. 1,350,203; Aug. 17; vol. 277; p. 528.
Check-writer. L. E. Gronseth. No. 1,349,880; Aug. 17; v. 277; p. 466.
Chisel Cold-. W. T. Routh. No. 1,350,241; Aug. 17; v. 277; p. 535.
Chocolate and candy machine. S. S. Marvin and W. Munz. No. 1,349,844; Aug. 17; v. 277; p. 459.
Cinematographic apparatus, Portable. C. Bancarel. No. 1,349,650; Aug. 17; v. 277; p. 421.
Cinematography, Color. F. W. Donisthorpe. No. 1,350,143; Aug. 17; v. 277; p. 516.
Clamp: *See*—
Printing-plate clamp. Tool-clamp.
Clamp. C. H. Schub. No. 1,350,084; Aug. 17; v. 277; p. 505.
Clarifier, Centrifugal. A. M. del Valle. No. 1,350,009; Aug. 17; v. 277; p. 491.
Clasp: *See*—
Printing-plate clasp.
Clasp-hook. W. Monroe. No. 1,350,033; Aug. 17; v. 277; p. 495.
Cleaner: *See*—
Windshield-cleaner.
Cleaners, Method of and apparatus for protecting the bearings of suction. H. W. Hoover. No. 1,349,765; Aug. 17; v. 277; p. 444.
Clip: *See*—
Laundry-marking clip.
Clock. C. H. Anderson. No. 1,350,131; Aug. 17; v. 277; p. 514.
Cloth cutting or shearing machine. A. E. Sellers. No. 1,349,788; Aug. 17; v. 277; p. 449.
Clothes-rack. M. Feldman. No. 1,350,017; Aug. 17; v. 277; p. 492.
Clothes-sprinkler. R. A. Beatty. No. 1,350,133; Aug. 17; v. 277; p. 514.
Clutch. D. Lake. (Reissue.) No. 14,933; Aug. 17; v. 277; p. 547.
Coil-forming machine. A. W. Miller. No. 1,349,903; Aug. 17; v. 277; p. 470.
Coin changing and delivering machine. J. Garami. No. 1,350,148; Aug. 17; v. 277; p. 518.
Collar-holder. B. F. Burgoyne. No. 1,350,063; Aug. 17; v. 277; p. 501.
Collars, Retaining device for laundried. I. F. Willey. No. 1,349,643; Aug. 17; v. 277; p. 420.
Color-filter negative and preparing same. J. A. H. Hatt. No. 1,349,956; Aug. 17; v. 277; p. 480.
Computing-machine. C. B. Corell. No. 1,349,561; Aug. 17; v. 277; p. 404.
Concrete construction. L. Brandt. No. 1,349,600; Aug. 17; v. 277; p. 412.
Concrete-construction plant. J. S. Williams. No. 1,349,992; Aug. 17; v. 277; p. 487.
Concrete-cooker. F. A. Saunders. No. 1,349,784. Aug. 17; v. 277; p. 448.
Concrete-form. H. O. Davidson. No. 1,349,819; Aug. 17; v. 277; p. 454.
Concrete-mixing apparatus. A. W. Ransome. No. 1,350,179; Aug. 17; v. 277; p. 523.
Condenser. R. W. Stearns. No. 1,349,792; Aug. 17; v. 277; p. 449.
Condenser, Adjustable. P. J. Howe. No. 1,360,279; Aug. 17; v. 277; p. 543.
Condenser, Self-protecting. W. Dubilier. No. 1,350,010; Aug. 17; v. 277; p. 491.
Condiment-holder. A. Stone. No. 1,350,120; Aug. 17; v. 277; p. 512.
Connecting-rods, Making. A. R. Pribil. No. 1,350,177; Aug. 17; v. 277; p. 523.
Connecting-rods, Making. A. R. Pribil. No. 1,350,178; Aug. 17; v. 277; p. 523.

Tires, Signal for indicating subnormal pressure in pneumatic. C. T. and A. G. Ewing. No. 1,350,016; Aug. 17; v. 277; p. 492.
Tongs, Clothes-. L. M. Larson and C. J. Carlson. No. 1,350,028; Aug. 17; v. 277; p. 494.
Tongs, Shield for button-cutters' shell-. W. J. Koch. No. 1,349,889; Aug. 17; v. 277; p. 468.
Tool-box. S. R. Smith. No. 1,349,859; Aug. 17; v. 277; p. 462.
Tool-box, Knockdown. P. T. Hewey. No. 1,350,099; Aug. 17; v. 277; p. 508.
Tool-clamp. W. L. Ross. No. 1,350,240; Aug. 17; v. 277; p. 535.
Tool, Hand-. J. R. Ayotte. No. 1,349,553; Aug. 17; v. 277; p. 403.
Tooth-filling. W. G. Turner. No. 1,349,592; Aug. 17; v. 277; p. 410.
Torpedo, Land-. E. Graham. No. 1,350,220; Aug. 17; v. 277; p. 532.
Towing device. A. L. Blomquist. No. 1,349,556; Aug. 17; v. 277; p. 403.
Toy. G. Lehmann. No. 1,350,103; Aug. 17; v. 277; p. 509.
Toy and game. R. Sato. No. 1,350,082; Aug. 17; v. 277; p. 505.
Toy, Educational. A. L. Mackintosh. No. 1,349,776; Aug. 17; v. 277; p. 446.
Toy tractor. E. J. Kingsbury. No. 1,350,026; Aug. 17; v. 277; p. 494.
Toy vehicle. W. Moir. No. 1,350,232; Apr. 17; v. 277; p. 234.
Tractor. C. J. White. No. 1,349,930; Aug. 17; v. 277; p. 475.
Tractors, Multiple-wheel drive for. L. J. Davies. No. 1,350,071; Aug. 17; v. 277; p. 503.
Train-pipe couplings, Gasket for. E. H. Gold. No. 1,350,074; Aug. 17; v. 277; p. 503.
Trap: *See*—
Game-trap. Jaw-trap.
Trenching-machine. H. J. Bentson. No. 1,349,936; Aug. 17; v. 277; p. 476.
Trolley control. M. Shukites, Jr. No. 1,350,243; Aug. 17; v. 277; p. 536.
Trough and producing same. A. J. Luedke. No. 1,349,841; Aug. 17; v. 277; p. 458.
Truck attachment for automobiles. A. E. Cook. No. 1,350,006; Aug. 17; v. 277; p. 490.
Truck-dumping mechanism. C. L. Trapp. No. 1,350,087; Aug. 17; v. 277; p. 506.
Truck, Inking-roll. L. J. Warner. No. 1,350,127; Aug. 17; v. 277; p. 513.
Truck, Tractor-. W. Strait. No. 1,349,791; Aug. 17; v. 277; p. 449.
Trucks, Platform for use with elevating-. R. M. Roberts. No. 1,349,917; Aug. 17; v. 277; p. 473.
Tubing, Channel-. J. A. McIntosh. No. 1,349,684; Aug. 17; v. 277; p. 429.
Turbine, Elastic-fluid. O. Junggren. No. 1,349,886; Aug. 17; v. 277; p. 467.
Turbine, Extraction and mixed-pressure. J. H. Doran. No. 1,349,878; Aug. 17; v. 277; p. 466.
Typewriter-underscorer. A. E. Lastinger. No. 1,350,029; Aug. 17; v. 277; p. 495.
Typewriting and computing machine, Combined. C. E. Norin. No. 1,350,173; Aug. 17; v. 277; p. 522.
Typewriting-machine. H. Bates. No. 1,350,000; Aug. 17; v. 277; p. 489.
Typewriting-machine. A. G. F. Kurowski. No. 1,349,890; Aug. 17; v. 277; p. 468.
Typewriting-machine. J. Waldheim. No. 1,349,864; Aug. 17; v. 277; p. 463.
Typewriting - machines, Shock-absorbers for. No. 1,350,014; Aug. 17; v. 277; p. 494.
Undergarment. H. S. Moses. No. 1,349,976; Aug. 17; v. 277; p. 484.
Upholstering. A. T. Reynolds. No. 1,349,629; Aug. 17; v. 277; p. 418.
Vacuum cleaning-machine. O. A. Kalbfus. No. 1,349,964; Aug. 17; v. 277; p. 482.
Vacuum-tank. L. A. Williams. No. 1,349,993; Aug. 17; v. 277; p. 488.
Valve. H. N. Cupp. No. 1,349,605; Aug. 17; v. 277; p. 413.
Valve. A. E. Shackleford and G. A. Franklin. No. 1,350,040; Aug. 17; v. 277; p. 497.
Valve, Automatic-control. J. M. Cammack. No. 1,350,065; Aug. 17; v. 277; p. 502.
Valve construction, Plate-. J. G. Keller. No. 1,350,101; Aug. 17; v. 277; p. 508.
Valve-extractor. E. T. Liess. No. 1,350,163; Aug. 17; v. 277; p. 520.
Valve for fluid-pressure tools, Throttle-. H. J. Kimman. No. 1,350,102; Aug. 17; v. 277; p. 508.
Valve - operating mechanism. W. P. Loudon. No. 1,350,077; Aug. 17; v. 277; p. 504.
Valve-spring lifter. E. C. Austin. No. 1,349,934; Aug. 17; v. 277; p. 476.
Vanity-box. F. S. Hyatt. No. 1,349,672; Aug. 17; v. 277; p. 426.
Vanity-box. F. S. Hyatt. No. 1,349,673; Aug. 17; v. 277; p. 426.
Vehicle-body. F. M. Hoblitt. No. 1,349,959; Aug. 17; v. 277; p. 481.
Vehicle, Dumping-. G. L. Hancock. No. 1,349,760; Aug. 17; v. 277; p. 443.
Vehicle, Motor-. E. E. Sweet. No. 1,349,589; Aug. 17; v. 277; p. 410.
Vehicle, Motor-. A. G. Vair. No. 1,349,743; Aug. 17; v. 277; p. 440.
Vehicle-route-indicator device. E. Siegel. No. 1,350,244; Aug. 17; v. 277; p. 536.
Vehicle, Self-propelled. C. J. Allen. No. 1,349,997; Aug. 17; v. 277; p. 488.
Vehicle, Tractor-. H. J. Burke. No. 1,349,812; Aug. 17; v. 277; p. 453.
Vehicle-wheel. W. M. Parham. No. 1,349,730; Aug. 17; v. 277; p. 438.
Vehicles, Differential mechanism for front and rear driven. I. I. Wiggins. No. 1,350,194; Aug. 17; v. 277; p. 527.
Vending apparatus. R. A. Tribble. No. 1,350,088; Aug. 17; v. 277; p. 506.
Vending - machine, Coin - controlled. H. Hanson. No. 1,349,953; Aug. 17; v. 277; p. 479.
Ventilator. C. Hofstetter. No. 1,349,764; Aug. 17; v. 277; p. 444.
Vessel, Marine. W. P. Lay. No. 1,350,259; Aug. 17; v. 277; p. 539.
Vine turner and lifter. C. T. McCready. No. 1,349,896; Aug. 17; v. 277; p. 469.
Vise, Auto-piston-clamping. J. H. Staley. No. 1,349,682; Aug. 17; v. 277; p. 418.
Vise, Machine or other. J. H. Jerrim. No. 1,349,963; Aug. 17; vol. 277; p. 482.
Vulcanized article and producing same. W. B. Pratt. No. 1,349,911; Aug. 17; v. 277; p. 472.
Vulcanizing apparatus. W. S. Robinett. No. 1,349,693; Aug. 17; v. 277; p. 430.
Wagon, Slumber-. G. A. Congdon. No. 1,349,602; Aug. 17; v. 277; p. 412.
Washer: *See*—
Air-washer.
Washing-machine. W. H. Sargent. No. 1,350,115; Aug. 17; v. 277; p. 511.
Washing-machine. W. H. Sargent. No. 1,350,116; Aug. 17; v. 277; p. 511.
Water cut-off, Reversible rain-. T. H. Brison. No. 1,349,808; Aug. 17; v. 277; p. 452.
Water-circulator, Vacuum. A. C. Taylor. No. 1,349,638; Aug. 17; v. 277; p. 419.
Water-heater. N. Hubbard. No. 1,349,571; Aug. 17; v. 277; p. 406.
Water-level. J. Kaspar and R. F. Beran. No. 1,349,613; Aug. 17; v. 277; p. 414.
Water-motor. W. J. Kinback. No. 1,350,025; Aug. 17; v. 277; p. 494.
Water-power device, Submersible. J. C. Streibich and G. F. Gruver. No. 1,350,187; Aug. 17; v. 277; p. 525.
Wall-board and manufacturing same. J. F. Makowski. No. 1,349,778; Aug. 17; v. 277; p. 447.
Wall construction. K. Torosian. No. 1,349,793; Aug. 17; v. 277; p. 449.
Waterproofed fabric. W. B. Pratt. No. 1,349,910; Aug. 17; v. 277; p. 471.
Wax polish, Non-cumulative. W. H. Damon. (Reissue.) No. 14,930; Aug. 17; v. 277; p. 545.
Wheel: *See*—
Balance-wheel. Vehicle-wheel.
Resilient wheel.
Wheel and axle construction. J. A. Carter. No. 1,349,559; Aug. 17; v. 277; p. 404.
Wheel-lifting device. Demountable-. A. O. Peltier. No. 1,349,581; Aug. 17; v. 277; p. 408.
Window attachment. J. E. Galbraith. No. 1,350,147; Aug. 17; v. 277; p. 517.
Window-screen, Metal. A. M. Lane. No. 1,350,027; Aug. 17; v. 277; p. 494.
Windshield-cleaner. J. F. White. No. 1,349,989; Aug. 17; v. 277; p. 487.
Wire-stretcher. B. Nortwed. No. 1,350,287; Aug. 17; v. 277; p. 544.
Wire-stripper. C. T. Day. No. 1,349,563; Aug. 17; v. 277; p. 405.
Wood, Sorting device for sawn. G. E. Johanson. No. 1,349,836; Aug. 17; v. 277; p. 457.
Work-holder. F. B. Glover. No. 1,350,097; Aug. 17; v. 277; p. 507.
Work-positioning means for upper-forming machines. G. J. Gorsuch. No. 1,349,669; Aug. 17; v. 277; p. 426.
Work-table, Bookkeeper's. B. P. Beeson. No. 1,349,710; Aug. 17; v. 277; p. 431.

Wreck-salvaging apparatus. W. M. Neeper. No. 1,349,578; Aug. 17; v. 277; p. 408.
Wrench: *See*—
Adjustable wrench.
Wrench. C. Evits and C. Benner. No. 1,349,564; Aug. 17; v. 277; p. 405.
Wrench, D. Herlihy and M. H. Fisher. No. 1,349,762; Aug. 17; v. 277; p. 444.
Wrench. R. W. Payne. No. 1,349,691; Aug. 17; v. 277; p. 430.
Wrench. W. H. Spanier. No. 1,349,631; Aug. 17; v. 277; p. 418.
X-ray and other negatives, Apparatus for the examination of. E. R. Stealy. No. 1,350,042; Aug. 17; v. 277; p. 497.
Yarn-waxing device. T. Cunningham. No. 1,350,007; Aug. 17; v. 277; p. 490.

ALPHABETICAL LIST OF DESIGNS.

Automobile splash-board. E. H. Belden. No. 56,094; Aug. 17; v. 277; p. 548.
Bottle. H. R. Weller. No. 56,110; Aug. 17; v. 277; p. 550.
Bottle-stopper. F. Rustant. Nos. 56,107–8; Aug. 17; v. 277; p. 550.
Casket, Burial-. J. E. Case. No. 56,096; Aug. 17; v. 277; p. 548.
Cigar-holder, Pocket. F. Wojciechowski. No. 56,112; Aug. 17; v. 277; p. 551.
Cigar lighter and inkstand, Combined. L. V. Aronson. No. 56,093; Aug. 17; v. 277; p. 548.
Container. H. Brill. No. 56,095; Aug. 17; v. 277; p. 548.
Cup, Metal sponge-. H. Merkel and R. W. Guy. No. 56,101; Aug. 17; v. 277; p. 549.
Curtain, Automobile side-. R. K. Thomson. No. 56,109; Aug. 17; v. 277; p. 550.
Highway-guide device. W. E. McMullan and H. J. Hickey. No. 56,102; Aug. 17; v. 277; p. 549.
Lamp. C. E. Godley. No. 56,098; Aug. 17; v. 277; p. 548.
Shingle, Roofing-. C. Russell. No. 56,106; Aug. 17; v. 277; p. 550.
Stand. W. F. Faas. No. 56,097; Aug. 17; v. 277; p. 548.
Statuette. J. J. Kearney and G. H. Winter. No. 56,100; Aug. 17; v. 277; p. 549.
Stove, Oil-. F. E. White. No. 56,111; Aug. 17; v. 277; p. 551.
Tire. A. J. Pennington. Nos. 56,103–5; Aug. 17; v. 277; pp. 549–50.
Watch-dial. F. A. Goodrow. No. 56,099; Aug. 17; v. 277; p. 549.

ALPHABETICAL LIST OF TRADE-MARKS.

Adding, listing, and calculating machines. Wales Adding Machine Company. No. 134,199; Aug. 17; v. 277; p. 582.
Alloys, Aluminum. Continental Castings Corp. No. 134,163; Aug. 17; v. 277; p. 581.
Automobile accessory. Orange Manufacturing Company. No. 134,186; Aug. 17; v. 277; p. 582.
Belt conveyers, Roller-brackets for. Stephens-Adamson Manufacturing Co. No. 134,194 Aug. 17; v. 277; p. 582.
Braiding-machines and parts thereof. Wardwell Braiding Machine Company. No. 134,200; Aug. 17; v. 277; p. 582.
Carbureters. The Aero Products Company. No. 134,148; Aug. 17; v. 277; p. 581.
Castings, Malleable-iron. West Virginia Malleable Iron Co. No. 134,204; Aug. 17; v. 277; p. 582.
Cookers, Animal-feed. The Hartman Company. No. 134,168; Aug. 17; v. 277; p. 581.
Coverings for attachment to the platens or rolls of typewriters and adding-machines, Protective. C. I. Hendricks. No. 134,170; Aug. 17; v. 277; p. 581.
Cranes, Chesapeake Iron Works. No. 134,155; Aug. 17; v. 277; p. 581.
Cutlery. C. F. Maus. Nos. 134,182-3; Aug. 17; v. 277; p. 582.
Cutlery and dies for engraving stationery, &c. Tiffany & Company. No. 134,196; Aug. 17; v. 277; p. 582.
Cutlery, machinery, tools. Aktiebolaget Ingenlörsfirman G. A. Lindstedt & Co. No. 134,149; Aug. 17; v. 277; p. 581.
Die-heads, collapsible taps, threading, and screw machines, Automatic. The Eastern Machine Screw Corporation. No. 134,165; Aug. 17; v. 277; p. 581.
Dish-washing and metal-parts-washing machines. Bromley Mcreles Mfg. Co. No. 134,207; Aug. 17; v. 277; p. 582.
Enameled ware, Steel. The Jacob J. Vollrath Mfg. Co. No. 134,198; Aug. 17; v. 277; p. 582.
Films, Cinematographic. Treefilm Company, Inc. No. 134,197; Aug. 17; v. 277; p. 582.
Fire-extinguishers, Hand. The Ralko Products Company. No. 134,189; Aug. 17; v. 277; p. 582.
Fishing-tools for wells. Arthur H. Brandon & Co. No. 134,154; Aug. 17; v. 277; p. 581.
Foods, drugs, and chemicals, Machinery and appliances used in their manufacture. Petri and Jones Company. No. 134,187; Aug. 17; v. 277; p. 582.
Forgings, Heat-treated. Heppenstall Forge and Knife Company. No. 134,171; Aug. 17; v. 277; p. 581.
Gas-engines and hoists for same, Marine and stationary. Standard Gas Engine Co. No. 134,193; Aug. 17; v. 277; p. 582.
Grain-drills, broadcast fertilizer-sowers, &c. The American Seeding-Machine Company. No. 134,152; Aug. 17; v. 277; p. 581.
Grease-cups. Hunter Pressed Steel Co. No. 134,174; Aug. 17; v. 277; p. 581.
Grinding machines, Stock-feed-. S. Cheney & Son. No. 134,161; Aug. 17; v. 277; p. 581.
Insecticide and fungicide. J. M. Jones. No. 134,177; Aug. 17; v. 277; p. 582.
Iron and steel, plain, corrugated, round, square, and flat. Tennessee Coal, Iron & Railroad Company. No. 134,195; Aug. 17; v. 277; p. 582.
Lenses for spectacles and eyeglasses, Optical. L. A. Heilig. No. 134,159; Aug. 17; v. 277; p. 581.
Machinery. Keystone Driller Company. No. 134,179; Aug. 17; v. 277; p. 582.
Machinery. Meisel Press Manufacturing Company. No. 134,184; Aug. 17; v. 277; p. 582.
Machinery and parts thereof. Jabez Burns & Sons. No. 134,160; Aug. 17; v. 277; p. 581.
Machinery and parts thereof. Machinenfabrik Schweiter A.-G. No. 134,180; Aug. 17; v. 277; p. 582.
Machinery, tools, and parts thereof. The Farm Equipment Co. No. 134,156; Aug. 17; v. 277; p. 581.
Machines and parts thereof. The Holt Manufacturing Company. No. 134,172; Aug. 17; v. 277; p. 581.
Machines, Calculating-. The American Calculating Machine Co. No. 134,150; Aug. 17; v. 277; p. 581.
Metals, Babbitt. Premium Metal & Packing Co. No. 134,188; Aug. 17; v. 277; p. 582.
Metals, Babbitt, bearing, and type. Great Western Smelting & Refining Company. No. 134,167; Aug. 17; v. 277; p. 581.
Milling, turning, and the like, Metal-working machinery, Blades and cutters for. The Haynes Stellite Co. No. 134,138; Aug. 17; v. 277; p. 581.
Motors and engines, Internal-combustion aviation-. Societe des Moteurs Gnome et Rhone. No. 134,192; Aug. 17; v. 277; p. 582.
Optical goods. J. C. Kahan. No. 134,178; Aug. 17; v. 277; p. 582.
Pipes, pipe-couplings, reducers, unions, and elbows, Metal. T. R. E. Miller. No. 134,185; Aug. 17; v. 277; p. 582.
Pulleys. Williams Patent Crusher & Pulverizer Co. No. 134,202; Aug. 17; v. 277; p. 582.
Pumps, Vacuum suction-. American Device Manufacturing Company. No. 134,151; Aug. 17; v. 277; p. 581.
Razor blades, Safety-. Simmons Hardware Company. No. 134,191; Aug. 17; v. 277; p. 582.
Saw-sets. N. O. Hedman. No. 134,169; Aug. 17; v. 277; p. 581.
Saws, Drag-. W. H. Worden Company. No. 134,205; Aug. 17; v. 277; p. 582.
Scoops, Sink-. S. Berger. No. 134,153; Aug. 17; v. 277; p. 581.
Soda-fountains and soda-water carbonators. The Russ Manufacturing Company. No. 134,190; Aug. 17; v. 277; p. 582.
Soldering compounds in powder form. R. S. Churchill. No. 134,162; Aug. 17; v. 277; p. 581.
Spraying devices. W. N. Matthews and Brother. No. 134,181; Aug. 17; v. 277; p. 582.
Steel bars, rods, billets, blooms, forgings, &c. Crucible Steel Company of America. No. 134,164; Aug. 17; v. 277; p. 581.
Steel, Cold-drawn. Wyckoff Drawn Steel Co. No. 134,206; Aug. 17; v. 277; p. 582.

Steel, Tool-. Edgar T. Ward's Sons Co. No. 134,203; Aug. 17; v. 277; p. 582.

Tank-balls. Essex Rubber Company. No. 134,166; Aug. 17; v. 277; p. 581.

Taps and valves of metal for general use with fluids. J. Jackson, Limited. No. 134,175; Aug. 17; v. 277; p. 581.

Tools. R. L. Johnson. No. 134,176; Aug. 17; v. 277; p. 581.

Tools. The Greb Company. No. 134,157; Aug. 17; v. 277; p. 581.

Tools. The Warren Tool and Forge Company. No. 134,201; Aug. 17; v. 277; p. 582.

Tractor accessories. Hughes & Curren Co. No. 134,173; Aug. 17; v. 277; p. 581.

ALPHABETICAL LIST OF LABELS.

Remedy for piles. The K-W Medicine Co. No. 129,554; Aug. 17; v. 277; p. 562.
Robes, Infants' bath-. Ideal Bath Robe Co. No. 133,736; Aug. 17; v. 277; p. 572.
Roller-covers. Boston Belting Company. No. 134,005; Aug. 17; v. 277; p. 574.
Rubber baby-pants and diaper-covers. The Miller Rubber Company. No. 131,743; Aug. 17; v. 277; p. 568.
Rubber boots. George F. Dittmann Boot & Shoe Co. No. 133,611; Aug. 17; v. 277; p. 571.
Rubber sheeting in the piece or roll. H. L. Kaufmann. No. 127,968; Aug. 17; v. 277; p. 559.
Salt. Alex. Kerr Bros. & Co. Nos. 128,096–7; Aug. 17; v. 277; p. 560.
Salve. J. Abramson. No. 130,010; Aug. 17; v. 277; p. 564.
Salve. E. F. Russ. No. 134,791; Aug. 17; v. 277; p. 578.
Scrapers, grading-plows, road-graders, Wheel-. Smith & Sons Manufacturing Company. No. 133,029; Aug. 17; v. 277; p. 570.
Shirts, dress-shirts, and shirt-waists, Work-. Penn Garment Company. No. 124,946; Aug. 17; v. 277; p. 557.
Shirts, Work-. Farmers Union State Exchange. No. 128,771; Aug. 17; v. 277; p. 561.
Shock-absorbers. Burpee-Johnson Company. No. 132,135; Aug. 17; v. 277; p. 569.
Silk, cotton, wool, &c., piece goods. The Bloom Textile Co. No. 127,168; Aug. 17; v. 277; p. 558.
Silk piece goods. Coudurier, Fructus & Descher. No. 134,109; Aug. 17; v. 277; p. 575.
Silk, wool, linen, cotton piece goods, and china-grass. Bianchini, Férier. No. 130,792; Aug. 17; v. 277; p. 566.
Slippers for babies. M. Perfect. No. 132,608; Aug. 17; v. 277; p. 569.
Smocks, dresses, shirt-waists, and hats. T. Roelofsna. No. 133,228; Aug. 17; v. 277; p. 570.
Soaps, scouring powder, emery cake, &c., Auto, bar, &c. Hachmeister-Lind Chemical Company. No. 129,715; Aug. 17; v. 277; p. 563.
Soap flakes. The Procter and Gamble Company. No. 135,017; Aug. 17; v. 277; p. 579.
Soap powder. Louisville Food Products Company. No. 134,025; Aug. 17; v. 277; p. 575.
Sodium silicate. Philadelphia Quartz Company. Nos. 129,741–2; Aug. 17; v. 277; p. 563–4.
Syrups, Table-. Lexington Syrup Canning Mfg. Co. No. 134,476; Aug. 17; v. 277; p. 576.
Stockings, socks, vests, pants, &c. A. J. Morton. No. 132,313; Aug. 17; v. 277; p. 569.
Sugar and a syrup thereof. O. W. Bonn. No. 121,655; Aug. 17; v. 277; p. 556.
Suits and overcoats, Boys'. Cohen & Lang. No. 133,764; Aug. 17; v. 277; p. 572.
Suits and overcoats, Men's. Cohen & Lang. No. 133,765; Aug. 17; v. 277; p. 572.
Suits, Children's and boys' play-. Sorosis Garment Company. No. 129,425; Aug. 17; v. 277; p. 562.
Sulfur, Flowers of. California Wine Association. No. 129,697; Aug. 17; v. 277; p. 563.
Tags, Blank or partly-printed. H. S. Balson. No. 113,461; Aug. 17; v. 277; p. 554.
Telegraphic sending-machines. The Vibroplex Company. No. 132,331; Aug. 17; v. 277; p. 569.
Textile fabrics in the piece for tires. Jenckes Spinning Company. No. 123,740; Aug. 17; v. 277; p. 557.
Tire casings and tubes, Rubber vehicle-. The United Rubber Company. No. 133,339; Aug. 17; v. 277; p. 571.
Tires, Inner tubes for pneumatic. McRae Wholesale Hardware Company. No. 122,220; Aug. 17; v. 277; p. 557.

Tobacco, cigars, and cigarettes. Carreras Limited. No. 129,623; Aug. 17; v. 277; p. 563.
Toilet water. The Atlanta Barbers' Supply Co. No. 111,687; Aug. 17; v. 277; p. 554.
Tonic, headache-powders, laxative tablets, &c., Body-tissue. E. Wippel. No. 127,071; Aug. 17; v. 277; p. 558.
Treatment of blood, Medicine used in the. W. Peterson. No. 129,602; Aug. 17; v. 277; p. 563.
Trunks. J. Blei. No. 129,442; Aug. 17; v. 277; p. 562.
Typewriters. Lincoln Typewriter Co. No. 120,837; Aug. 17; v. 277; p. 556.
Underwear. J. A. Firsching. No. 132,784; Aug. 17; v. 277; p. 570.
Velvets and plushes in the piece. The Salt's Textile Manufacturing Company. No. 119,753; Aug. 17; v. 277; p. 556.
Veilings, nettings, and chiffons in the piece. Thurm, Browne & Cohen. No. 127,743; Aug. 17; v. 277; p. 559.
Wafers, Sugar. The Lakeside Biscuit Co. No. 133,740; Aug. 17; v. 277; p. 572.
Waists, Ladies'. Henry Cohen & Co. No. 132,082; Aug. 17; v. 277; p. 569.
Waists, Outer. Tedmor Waist Company. No. 130,497; Aug. 17; v. 277; p. 566.
Waists, Suspender-. Ridenour Garment Co. No. 133,682; Aug. 17; v. 277; p. 572.
Yarns, Dyed. Solway Dyeing & Textile Company. No. 129,289; Aug. 17; v. 277; p. 561.

CLASSIFICATION OF PATENTS

ISSUED AUGUST 17, 1920.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 7: 1,349,662
2— 34: 1,350,192
41: 1,350,169
42: 1,349,879
79: 1,349,987
144: 1,349,976
1,350,020
4— 5: 1,349,683

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 24TH DAY OF AUGUST, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Abbott, Arthur, Toronto, Ontario, Canada. Tableware-drainer. No. 1,350,351; Aug. 24; v. 277; p. 603.

Abbott, Charles C., Pittsfield, Mass., assignor to General Electric Company. Electric heating unit. No. 1,350,910; Aug. 24; v. 277; p. 711.

Abbott, F. J., Jr. (See Vance, Arlyn T.)

Acme Oil & Drill Company. (See Pace, Jefferson D., assignor.)

Adams, James, R., Somerset, Pa. Wheel-hub and bearing. No. 1,350,851; Aug. 24; v. 277; p. 700.

Aikman, Burton S., assignor to National Brake & Electric Company, Milwaukee, Wis. Pump and plumbing system. (Reissue.) No. 14,935; Aug. 24; v. 277; p. 731.

Ailes, Adrian S., assignor of sixty per cent. to J. H. Taft, Chicago, Ill. Auxiliary safe-lock. No. 1,350,766; Aug. 24; v. 277; p. 685.

Aktiebolaget Svenska Kullargerfabriken. (See Rydbeck, Patrik S., assignor.)

Albrecht, Hermen E., What Cheer, Iowa. Gambrel. No. 1,350,632; Aug. 24; v. 277; p. 659.

Alexander, Roy A., Bellingham, Wash. Varnished-surface burnisher. No. 1,350,537; Aug. 24; v. 277; p. 640.

Alexanderson, Ernst F. W., Schenectady, N. Y., assignor to General Electric Company. Wireless signaling system. No. 1,350,911; Aug. 24; v. 277; p. 711.

Alexanderson, Ernst F. W., Schenectady, N. Y., assignor to General Electric Company. Radioreceiving system. No. 1,350,912; Aug. 24; v. 277; p. 711.

Allen, Joseph C., *et al.* (See Cox, A., and Evans.)

Allen, Marion, *et al.* (See Davis, Claude B., assignor.)

Allsworth, Robert I., New York, N. Y. Wall construction. No. 1,350,633; Aug. 24; v. 277; p. 659.

Alton, William H., New York, N. Y. and A. C. Battelle, assignors, by mesne assignments, to A. C. Battelle, Chicago, Ill. Filler. No. 1,350,694; Aug. 24; v. 277; p. 671.

American Concrete Forms Company. (See Belt, W. M., and Smith, assignors.)

American Laundry Machinery Company, The. (See Braley, C. L., and Waream, assignors.)

American Machine & Manufacturing Company. (See Davidson, Joseph, assignor.)

American Optical Company. (See Arnold, Arthur A., assignor.)

American Photo Player Company. (See Van Valkenburg, Burt B., assignor.)

American Rubber Company. (See Gibbons, Willis A., assignor.)

American Steel Foundries. (See Carscadin, Charles A., assignor.)

American Steel Foundries. (See Trowbridge, William S., assignor.)

Anchor Rubber Company, The. (See Pastor, Frank, assignor.)

Anderson, David G., Columbus, Ohio, assignor to The Ohio Malleable Iron Company. Casting-machine. No. 1,350,352; Aug. 24; v. 277; p. 603.

Angle, Lloyd. (See Eby, P., and Angle.)

Arndt, Franklin E., assignor of one-half to D. C. Boyd, Galion, Ohio. Engine-manifold. No. 1,350,431; Aug. 24; v. 277; p. 619.

Arndt, John P., Milwaukee, Wis. Fuse-switch. No. 1,350,432; Aug. 24; v. 277; p. 619.

Arnold, Arthur A., Southbridge, Mass., assignor to American Optical Company. Swaging-machine. No. 1,350,634; Aug. 24; v. 277; p. 659.

Arnold, Arthur E., Llandudno, Wales. Coal cabinet, scuttle, and the like. No. 1,350,913; Aug. 24; v. 277; p. 711.

Arnold-Creager Company. (See Graham, Henry W. B., assignor.)

Arnold Wahl Institute, The. (See Wahl, Arnold S., assignor.)

Arrow Bottlers Machinery Company, trustee. (See Gaynor, John J., assignor.)

Arrow-Grip Manufacturing Company. (See Avery, True M., assignor.)

Arrow Phonograph Corporation. (See Matthews, Frederick W., assignor.)

Art in Buttons. (See Eby and Angle, assignors.)

Artmaier, Hans, Racine, Wis. Dental-instrument-grinding device. No. 1,350,951; Aug. 24, v. 277; p. 719.

Aschburner, Fredrick C., Chicago, Ill. Stethoscope. No. 1,350,767; Aug. 24; v. 277; p. 685.

Asselstine, Burton, *et al.* (See Mowatt, Alexander, assignor.)

Atkins, Earl F. (See Atkins, Frank K., and E. F.)

Atkins, Frank K. and E. F., New York, N. Y. Filter. No. 1,350,433; Aug. 24; v. 277; p. 620.

Auto-Ordnance Corporation. (See Eickhoff, Theodore H., assignor.)

Auto-Ordnance Corporation. (See Payne, Oscar V., assignor.)

Automatic Electric Company. (See Martin, Talbot G., assignor.)

Automatic Electric Company. (See Powell, Winfred T., assignor.)

Avery Company. (See Van Valkenburg, Lester R., assignor.)

Avery, True M., assignor to Arrow-Grip Manufacturing Co., Inc., Glens Falls, N. Y. Chain-connector. No. 1,350,952; Aug. 24; v. 277; p. 719.

Ayres, Richard S., Brookline, Mass. Process and apparatus for heel manufacture. No. 1,350,852; Aug. 24; v. 277; p. 701.

Bailey, William F. A., assignor, by mesne assignments, to Non Skid Company of America, Boston, Mass. Anti-skidding device for tires. No. 1,350,484; Aug. 24; v. 277; p. 630.

Bair, Joseph H., Haddonfield, N. J. Washing-machine. No. 1,350,353; Aug. 24; v. 277; p. 603.

Baker, George R., assignor to Joseph Baker and Sons Limited, London, England. Coating confections and the like. No. 1,350,538; Aug. 24; v. 277; p. 640.

Baker, John S., Los Angeles, Calif. Ballot. No. 1,350,914; Aug. 24; v. 277; p. 712.

Baker, Joseph, and Sons. (See Baker, George R., assignor.)

Baker, Malcolm H., deceased, Braintree; M. H. Baker, administratrix, assignor to K. W. Crosby, trustee, Boston, Mass. Thermodynamically-controlled socket-switch for electric lights. No. 1,350,587; Aug. 24; v. 277; p. 651.

Baker, Malcolm H., deceased, Braintree; M. H. Baker, administratrix, assignor to K. W. Crosby, trustee, Boston, Mass. Thermodynamic extinguishing device for lamps. No. 1,350,588; Aug. 24; v. 277; p. 651.

Baker, Malcolm H., deceased, Braintree; M. H. Baker, administratrix, assignor to K. W. Crosby, trustee, Boston, Mass. Time-retarded extinguishing device for gas-burners. No. 1,350,589; Aug. 24; v. 277; p. 651.

Baker, Marie H., administratrix. (See Baker, Malcolm H., assignor.)

Baker, Newton D., Secretary of War, trustee. (See Carothers, John N., assignor.)

Baker, R & L Company, The. (See Gruenfeldt, Emil, assignor.)

Bakke, Carl O., Fertile, Minn. Belt. No. 1,350,915; Aug. 24; v. 277; p. 712.

Ball, Arthur T., Ranger, Tex. Shaft-bearing. No. 1,350,953; Aug. 24; v. 277; p. 720.

Baltes, Walter H., Milwaukee, Wis. Signal-light for automobiles. No. 1,350,539; Aug. 24; v. 277; p. 641.

Bar and Stroud. (See Barr, A., Stroud, and d'Albe, assignors.)

Barbour, William T., and W. L. Mersfelder, assignors to Detroit Stove Works, Detroit, Mich. Stove-door. No. 1,350,768; Aug. 24; v. 277; p. 685.

Bard, Jacob W., and O. White, assignors to Sangamo Electric Company, Springfield, Ill. Graphic recording [illegible] No. 1,350,485; Aug. 24; v. 277; p. 630.

Barletta, Peter, Lyndhurst, N. J. Alarm-clock. No. 1,350,693; Aug. 24; v. 277; p. 671.

Barnett, Otto R. (See Sponenburg, Hiram H., assignor.)

Barr, Archibald. W. Stroud, Anniesland, Glasgow, Scotland, and E. E. F. d'Albe, London, England, assignors to Barr and Stroud, Limited, Glasgow, Scotland. Optophone. No. 1,350,954; Aug. 24; v. 277; p. 720.

Barrett, Ferdinand A., Jr., Niagara Falls, N. Y. Switch. No. 1,350,916; Aug. 24; v. 277; p. 712.

Parsness, Herman J., Black Earth, Wis. Cement section for circular buildings. No. 1,350,434; Aug. 24; v. 277; p. 620.

Bartlett, Henry B., assignor to B. F. Perkins & Son, Inc., Holyoke, Mass. Thickness-gage. No. 1,350,769; Aug. 24; v. 277; p. 685.

Bates, W. B., and E. L. Stone, Roanoke, Va. Community-mail-box support. No. 1,350,770; Aug. 24; v. 277; p. 686.

Battelle, Albert C. (See Alton, W. H., and Alton.)

Bausch & Lomb Optical Company. (See Drescher, Theodore B., assignor.)

Bayne, George G., Bushnell, Ill. Auxiliary radius-truss for automobiles. No. 1,350,771; Aug. 24; v. 277; p. 686.

Beal, Ralph B., Palo Alto, assignor to Federal Telegraph Company, San Francisco, Calif. Radiotelegraphy. No. 1,350,695; Aug. 24; v. 277; p. 671.

Beaty, Wilbur L., South Butte, Mont. Reel-seat. No. 1,350,635; Aug. 24; v. 277; p. 659.

Beaty, Wilbur L., South Butte, Mont. Reel-seat for fishing-rods. No. 1,350,636; Aug. 24; v. 277; p. 660.

Beaty, Wilbur L., South Butte, Mont. Reel-seat for fishing-rods. No. 1,350,637; Aug. 24; v. 277; p. 660.

Beck, Oscar F., Lawndale, J. W. Speers and R. E. Jones, assignors to The Firestone Tire and Rubber Company, Akron, Ohio. Vulcanizing apparatus. No. 1,350,696; Aug. 24; v. 277; p. 671.

Becker, Rudolph, assignor to The Singer Manufacturing Company, Roselle Park, N. J. Work-holder. No. 1,350,290; Aug. 24; v. 277; p. 591.

Beckman, William, Sealy, Tex. Oil-burner. No. 1,350,917; Aug. 24; v. 277; p. 713.

Bell, Mary V., Oakland, Calif. Ripping-needle. No. 1,351,010; Aug. 24; v. 277; p. 730.

Belt, William M., and H. C. Smith, assignors, by mesne assignments, to American Concrete Forms Company, Bloomington, Ill. Centering means and forming monolithic arches. No. 1,350,772; Aug. 24; v. 277; p. 686.

Belvin, Preston, Richmond, Va. Floor-oiler. No. 1,350,638; Aug. 24; v. 277; p. 660.

Bentley, Joseph H., Bridgeport, Conn. Vise-handle. No. 1,350,773; Aug. 24; v. 277; p. 686.

Bereznay, John, Throop, Pa. Railway-gate. No. 1,350,639; Aug. 24; v. 277; p. 660.

Berliner, Abraham. (See Berliner, Isidor, A., and S.)

Berliner, Isidor, A., and S., Toronto, Ontario, Canada. Telephonic apparatus. No. 1,350,291; Aug. 24; v. 277; p. 591.

Berliner, Samuel. (See Berliner, Isidor, A., and S.)

Berrigan, John J., Orange, N. J., assignor to Henry R. Worthington, New York, N. Y. Filtering materials. No. 1,350,292; Aug. 24; v. 277; p. 591.

Bertrand, Frederic E., Lynn, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Sole-fitting machine. No. 1,350,354; Aug. 24; v. 277; p. 604.

Beurrier, Alexis, E. Bigourdan, and L. Lacoin, Paris, France. Flying-machine with revolving wings. No. 1,350,982; Aug. 24; v. 277; p. 725.

Bickley, Everett H., Southbridge, Mass. Means employed in production and material control systems. No. 1,350,955; Aug. 24; v. 277; p. 720.

Bigourdan, Edouard. (See Beurrier, A., Bigourdan, and Lacoin.)

Bissell, Carl H., assignor to Crouse-Hinds Company, Syracuse, N. Y. Electric switch and box. No. 1,350,486; Aug. 24; v. 277; p. 631.

Bjorn, Jens A., Jamestown, N. Y. Machine for graining wood. No. 1,350,918; Aug. 24; v. 277; p. 713.

Blackman, Horace L., Janesville, Wis. Pencil. No. 1,350,983; Aug. 24; v. 277; p. 725.

Blaine, Joseph R., Oak Park, assignor to Miehle Printing Press and Manufacturing Company, Chicago, Ill. Plural-sheet detector. No. 1,350,487; Aug. 24; v. 277; p. 631.

Blaine, Joseph R., Oak Park, assignor to Miehle Printing Press and Manufacturing Company, Chicago, Ill. Shifting plate-clamp. No. 1,350,488; Aug. 24; v. 277; p. 631.

Blank, Martin R., and L. F. Sitkiewitz, Thiensville, Wis. Can-handling device. No. 1,350,984; Aug. 24; v. 277; p. 726.

Blair, Wiley A., *et al.* (See Herrington, John A. D., assignor.)

Blasdale, Frederick W. (See Muschenheim, F. A., and Blasdale.)

Blood, Harold L., Plainfield, assignor to Niles-Bement-Pond Company, Jersey City, N. J. Feed mechanism for planers. No. 1,350,540; Aug. 24; v. 277; p. 641.

Blumrick, George, assignor to Weisbach Company, Gloucester, N. J. Gas-lighting device and making same. No. 1,350,853; Aug. 24; v. 277; p. 701.

Bock, Herman, Meriden, Conn. Machine for hardening knife-blades. No. 1,350,697; Aug. 24; v. 277; p. 671.

Boedtcher, Franz A., Bergenfield, N. J. Elevator-door lock. No. 1,350,698; Aug. 24; v. 277; p. 671.

Bond, John P., Portland, Oreg. Brake-band. No. 1,350,985; Aug. 24; v. 277; p. 726.

Booth, Earl C., Indianapolis, Ind., assignor to Holcomb & Hoke Manufacturing Company. Peanut-roaster. No. 1,350,541; Aug. 24; v. 277; p. 641.

Booth, Earl C., Indianapolis, Ind., assignor to Holcomb & Hoke Manufacturing Company. Display device. No. 1,350,542; Aug. 24; v. 277; p. 641.

Bouvier, George A., Detroit, Mich. Adjustable frame for shipping vehicles. No. 1,350,699; Aug. 24; v. 277; p. 672.

Boyd, David C. (See Arndt, Franklin E., assignor.)

Brach, Leon S., New York, N. Y. Recording apparatus for railway-signals. No. 1,350,355; Aug. 24; v. 277; p. 604.

Brackenbury, E. W., assignor to The T. L. Smith Company, Milwaukee, Wis. Concrete-mixer. No. 1,350,293; Aug. 24; v. 277; p. 591.

Bradford Dyers Association. (See Whitaker, Harold, assignor.)

Bragg, Willie T., *et al.* (See Davis, Claude B., assignor.)

Braley, Charles L., and C. E. Waream, Cincinnati, assignors to The American Laundry Machinery Company, Norwood, Ohio. Chain conveyer. No. 1,350,774; Aug. 24; v. 277; p. 686.

Brauer, August, deceased, Independence, assignor of one-half to G. P. A. Weisenborn, Kansas City, Mo.; C. Brauer, executrix. Rotary pump. No. 1,350,775; Aug. 24; v. 277; p. 687.

Brauer, Charlotta, executrix. (See Brauer, August.)

Bräuning, Karl A., Zaandam, Netherlands. Automatic firearm. No. 1,350,543; Aug. 24; v. 277; p. 641.

Brecht, Frank v., and H. W. Tohts, assignors to Gus V. Brecht Butchers' Supply Company, St. Louis, Mo. Carcass scraping and polishing machine. No. 1,350,435; Aug. 24; v. 277; p. 620.

Brecht, Gus V., Butchers' Supply Company. (See Brecht, F. v., and Tohts, assignors.)

Brill, Ira D., Marlington, W. Va. Lock. No. 1,350,356; Aug. 24; v. 277; p. 604.

Brilliant, Mark L., San Francisco, Calif., assignor of one-half to C. E. Brinkman. Davenport-bed. No. 1,351,011; Aug. 24; v. 277; p. 731.

Brinkman, Charles E. (See Brilliant, Mark L., assignor.)

Brogden, Joseph T., Providence, R. I., assignor to Revere Rubber Company. Bathing-hat. No. 1,350,776; Aug. 24; v. 277; p. 687.

Brown Bag Filling Machine Company. (See Brown, Benjamin F., assignor.)

Brown, Benjamin F., assignor to Brown Bag Filling Machine Co., Fitchburg, Mass. Conveyer for bags. No. 1,350,777; Aug. 24; v. 277; p. 687.

Brooks, Robert O. (See Hughes, William E., assignor.)

Brooks, Thomas A., Newton, Kans. Gas-screen. No. 1,350,700; Aug. 24; v. 277; p. 672.

Bropson, James, Cleveland, Ohio. Repair-plug. No. 1,350,489; Aug. 24; v. 277; p. 631.

Brown, Carl D., assignor to Draper Corporation, Hopedale, Mass. Filling-replenishing loom. No. 1,350,640; Aug. 24; v. 277; p. 660.

Brown, Henry C., Merion, and E. John, Ardmore, Pa., assignors to Victor Talking Machine Company. Container for talking-machine styli. No. 1,350,294; Aug. 24; v. 277; p. 592.

Brown, M. Lewis, assignor to Universal Metal Company, Detroit, Mich. Channel-tubing. No. 1,350,544; Aug. 24; v. 277; p. 642.

Brown, William H. (See Kennedy, James G., assignor.)

Buckham, George T. (See Dawson, A. T., and Buckham.)

Buffalo Truck and Tractor Corporation, The. (See Oversmith, Elmer H., assignor.)

Burgess, Tom, Corinth, Miss. Harness-hook. No. 1,350,778; Aug. 24; v. 277; p. 687.

Burton, Charles S., Oak Park, Ill. Container for music-rolls and the like. No. 1,350,701; Aug. 24; v. 277; p. 672.

Burton, Isaac F., Philadelphia, Pa., assignor to Victor Talking Machine Company. Sound-box for sound recording and reproducing machines. No. 1,350,590; Aug. 24; v. 277; p. 651.

Cannon, Francis P. (See Wilbur, M. D., Cannon, and Murphy.)

Cardinell, Thomas, Mound City, Mo. Tire-casing spreader. No. 1,350,779; Aug. 24; v. 277; p. 687.

Carlson, Frederick E., assignor to Landers, Frary & Clark, New Britain, Conn. Detachable handle. No. 1,350,641; Aug. 24; v. 277; p. 660.

Carlson, John. (See Johnson, Dolph, assignor.)

Carlson, John M., Sandstone, Minn. Car-door. No. 1,350,919; Aug. 24; v. 277; p. 713.

Carothers, John N., Washington, D. C., assignor to N. D. Baker, Secretary of War, trustee. Fertilizer and making same. No. 1,350,591; Aug. 24; v. 277; p. 652.

Carroll, Andrew L., assignor of one-half to G. McKenzie, St. Louis, Mo. Shock-absorbing wheel. No. 1,350,642; Aug. 24; v. 277; p. 661.

Carscadin, Charles A., assignor, by mesne assignments, to American Steel Foundries, Chicago, Ill. Yoke for draft-gears. No. 1,350,436; Aug. 24; v. 277; p. 620.

Carter, Harry G., Northfield, N. H. Business-record and income-tax book. No. 1,350,854; Aug. 24; v. 277; p. 701.

Carter, John P., Carter, Mont. Bolster-stirrup. No. 1,350,780; Aug. 24; v. 277; p. 687.

Catucci, Pliny, and A. Vasselli, Newark, N. J., assignor, by mesne assignments, to The Harriman National Bank of the City of New York, trustee. Stop mechanism for talking-machines. No. 1,350,781; Aug. 24; v. 277; p. 688.

Catucci, Pliny, and L. D. Nadel, Newark, N. J., assignors, by mesne assignments, to Harriman National Bank of the City of New York, trustee. Fluid-regulator. No. 1,350,782; Aug. 24; v. 277; p. 688.

Caudron, René, Issy-les-Moulineaux, France. Arrangement of flexible members. No. 1,350,986; Aug. 24; v. 277; p. 726.

Cave, Antoine M., St. Etienne, France. Alkaline accumulator. No. 1,350,956; Aug. 24; v. 277; p. 720.

Central Scientific Company. (See de Khotinsky, Achilles, assignor.)

Cereghino, Louis J., Alameda, Calif. Combined flytrap and garbage-can. No. 1,350,402; Aug. 24; v. 277; p. 613.

Champeau, Lawrence X., Jersey City, N. J., assignor to Kirby, Champeau Co., Inc., New York, N. Y. Illuminating means. No. 1,350,295; Aug. 24; v. 277; p. 592.

Champion Ignition Company. (See Schmidt, Albert, assignor.)

Champion, John W., Pueblo, Colo. Rail-clamping device for metal ties. No. 1,350,855; Aug. 24; v. 277; p. 701.

Chase, Rutherford B., Chicago, Ill. Cleaning and polishing apparatus. No. 1,350,403; Aug. 24; v. 277; p. 613.

Chemical Foundation, The. (See Klever, H., Lautenschläger, and Göhring, assignors.)

Chemical Foundation, The. (See Lilienfeld, Leon, assignor.)

Chemical Foundation, The. (See Meyerhofer, Albert F., assignor.)

Cherry, Verner A., Granite City, Ill. Child's bicycle-seat. No. 1,350,987; Aug. 24; v. 277; p. 726.

Chicago Flexible Shaft Company. (See Kocourek, Henry, assignor.)

Chlorine Products Company. (See Jewell, William M., assignor.)

Chomyn, Harry, Fox Valley, Saskatchewan, Canada. Railway joint. No. 1,350,783; Aug. 24; v. 277; p. 688.

Church, Edmund S., Chicago, Ill. Oil-can. No. 1,350,702; Aug. 24; v. 277; p. 672.

Churchward, Alexander, New York, N. Y. Starting mechanism for internal-combustion engines. No. 1,350,703; Aug. 24; v. 277; p. 673.

Clark, Edward O., assignor of one-half to E. S. Redeker, Spokane, Wash. Piston-ring clamp. No. 1,350,704; Aug. 24; v. 277; p. 673.

Clarke, Athol W., Chorlton-cum-Hardy, near Manchester, England. Apparatus for recording or indicating the movements of a mass. No. 1,350,705; Aug. 24; v. 277; p. 673.

Cleveland Tractor Company, The. (Reissue.) (See White, Rollin H., assignor.)

Cobb, Charles H., Great Falls, Mont. Railway signal-lamp. No. 1,350,357; Aug. 24; v. 277; p. 604.

Cobb, Schuyler C. (See Frazier, George E., assignor.)

Coes, Harold V. (See Rhodes, G. I., and Coes.)

Colburn, Temple H., Minneapolis, Minn. Soap-cake retainer. No. 1,350,784; Aug. 24; v. 277; p. 688.

Commercial Cars Construction Company. (See Rogers, Solomon D., assignor.)

Cone, Thomas H. S., Boundbrook, N. J. Testing system. No. 1,350,358; Aug. 24; v. 277; p. 605.

Continental Motors Corporation. (See Weinhardt, Robert A., assignor.)

Cook, Walter H., London, England. Combined nut and washer. No. 1,350,545; Aug. 24; v. 277; p. 642.

Cook, Willard J., Des Moines, Iowa. Manure-spreader. No. 1,350,296; Aug. 24; v. 277; p. 592.

Cooke, Neil A. (See Miller, William L., and E. A. F., Jr., assignors.)

Cooley, James F., Richmond, Calif. Self-assisting apparatus for invalids. No. 1,350,297; Aug. 24; v. 277; p. 592.

Cooper, Hugh S., Cleveland, Ohio, assignor, by mesne assignments, to Zircon Tool & Alloy Corporation. Alloy. No. 1,350,359; Aug. 24; v. 277; p. 605.

Corduan, Adolph, Roselle Park, N. J. Needle-threader for sewing-machines. No. 1,350,592; Aug. 24; v. 277; p. 652.

Cornu, Ami, La Chaux-de-Fonds, Switzerland. Clasp. No. 1,350,785; Aug. 24; v. 277; p. 688.

Cosey, Henry M., Flint, Mich. Switch-operating mechanism. No. 1,350,786; Aug. 24; v. 277; p. 689.

Cosgray, Mark C., assignor to The Matthews Engineering Company, Sandusky, Ohio. Electric system. No. 1,350,437; Aug. 24; v. 277; p. 620.

Cosgrove, John W., Medford, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Cementing-machine. No. 1,350,298; Aug. 24; v. 277; p. 593.

Costa, Anthony, East Cleveland, assignor to The Gravity Carbureter Company, Cleveland, Ohio. Oiling system. No. 1,350,643; Aug. 24; v. 277; p. 661.

Cotton, James H. (See Martin, C. C., and Cotton.)

Coulson, William T., Anerley, London, England. Construction of lenses for lamps, projectors, and the like. No. 1,350,957; Aug. 24; v. 277; p. 721.

Cox, Allen E., assignor of one-fourth to J. C. Allen and one-fourth to R. C. Evans, Portland, Oreg. Lock. No. 1,350,989; Aug. 24; v. 277; p. 726.

Craighead, James R., and H. R. Summerhayes, Schenectady, N. Y., assignors to General Electric Company. Electrical system of power transmission. No. 1,350,920; Aug. 24; v. 277; p. 713.

Craighead, James R., Schenectady, N. Y., assignor to General Electric Company. Power-limiting system. No. 1,350,921; Aug. 24; v. 277; p. 713.

Crane, Robert W., Los Angeles, Calif. Hinge. No. 1,350,360; Aug. 24; v. 277; p. 605.

Cranford, Frederick L. (See Meem, James C., assignor.)

Cronau, Otto, New York, N. Y. Relieving attachment for lathes. No. 1,350,361; Aug. 24; v. 277; p. 605.

Cronin, Charles I., *et al.*, executors. (See Hirst, Charles S.)

Crosby, Kenneth W., trustee. (See Baker, Malcolm H., assignor.)

Crouch, Thomas E., assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Rim night-latch. No. 1,350,299; Aug. 24; v. 277; p. 593.

Crouse-Hinds Company. (See Bissell, Carl H., assignor.)

Crumpton, William J., Evanston, Ill. Interrupter spark-suppression method and device. No. 1,350,300; Aug. 24; v. 277; p. 593.

Culver, Charles B., Cherry Valley, Ill. Tread-mill play-cart. No. 1,350,546; Aug. 24. v. 277; p. 642.

Cunningham, Michael F., *et al.* (See McGrath, Lawrence A., assignor.)

D'Albe, Edmund E. F. (See Barr, A., Stroud, and D'Albe.)

Dalén, Gustaf, Lidingön, assignor to Svenska Aktiebolaget Gassaccumulator, Stockholm, Sweden. Search-light apparatus. No. 1,350,547; Aug. 24; v. 277; p. 642.

Danville Brick Company, The. (See Wood, Frank W., assignor.)

Darby, John, assignor of one-half to E. F. Flindell, Summit, N. J. Film gate and tension means for motion-picture machines. No. 1,350,548; Aug. 24; v. 277; p. 642.

Darkes, David J., Fredericksburg, Pa. Snap-hook. No. 1,350,787; Aug. 24; v. 277; p. 689.

Davidson, Joseph. East Point, Ga. Fluid-pressure valve. No. 1,350,438; Aug. 24; v. 277; p. 621.

Davidson, Joseph, Greenville, S. C., assignor of one-half to American Machine & Manufacturing Company. Lint-collecting system. No. 1,350,439; Aug. 24; v. 277; p. 621.

Davis, Charles E., assignor to Goodman Manufacturing Company, Chicago, Ill. Mining-machine. No. 1,350,706; Aug. 24; v. 277; p. 673.

Davis, Claude B., assignor of one-half to M. Allen, and one-fourth to W. T. Bragg, Richmond, Va. Toll-collecting mechanism. No. 1,350,958. Aug. 24; v. 277; p. 721.

Davis, Edward W., Duluth, Minn. Apparatus for agglomerating ores. No. 1,350,440; Aug. 24; v. 277; p. 622.

Davis, Elmer A., assignor to Whiting Foundry Equipment Company, Harvey, Ill. Expansion-joint for electric-current-collector bars. No. 1,350,856; Aug. 24; v. 277; p. 701.

Davis, George P., Fresno, Calif. Typesetting-machine. No. 1,350,707; Aug. 24; v. 277; p. 673.

Davis, Hanley M., Cambridge, Mass. Fire-escape. No. 1,350,708; Aug. 24; v. 277; p. 674.

Davis, Madison T., Jr., assignor to Kanawha Manufacturing Company, Charleston, W. Va. Furnace-grate. No. 1,350,990; Aug. 24; v. 277; p. 727.

Dawson, Arthur T., and G. T. Buckham, assignors to Vickers Limited, Westminister, London, England. Recoil apparatus of ordnance. No. 1,350,593; Aug. 24; v. 277; p. 652.

Day, George H., Cuba, Ill. Apparatus for continuously separating juices from materials. No. 1,350,788; Aug. 24. v. 277; p. 689.

Dean, William W., Rochester, N. Y., assignor to Stromberg-Carlson Telephone Manufacturing Company. Telephone-receiver. No. 1,350,594; Aug. 24; v. 277; p. 652.

De Cano, Victor M., Chicago, assignor of one-half to W. H. Hinz, Oak Park, and one-half to R. F. Starr, Chicago, Ill. Folding ironing-board. No. 1,350,857; Aug. 24; v. 277; p. 701.

Decker, George W., assignor of one-third to E. A. Kern and one-third to G. A. Friedricks, Erie, Pa. Stop and waste cock. No. 1,350,362; Aug. 24; v. 277; p. 605.

De Khotinsky Achilles, assignor to Central Scientific Company, Chicago, Ill. Circuit-controlling mechanism. No. 1,350,369; Aug. 24; v. 277; p. 606.

Delany, Patrick B., South Orange, N. J., and L. W. Shumaker, New York, N. Y., assignors to Telepost Company, New York, N. Y. Apparatus for treating telegraph-tape. No. 1,350,789; Aug. 24; v. 277; p. 689.

Delany, Patrick B., South Orange, N. J., and L. W. Shumaker, New York, N. Y., assignors to Telepost Company, New York, N. Y. Telegraphy. No. 1,350,790; Aug. 24; v. 277; p. 689.

Demerath, Joseph M., Rochester, N. Y. Nut-blanching machine. No. 1,350,549; Aug. 24; v. 277; p. 642.

Denneby, William H., *et al.* (See McGrath, Lawrence A., assignor.)

Deppeler, John H., Weehawken, assignor to Metal & Thermit Corporation, Chrome, N. J. Method of and article for alloying tungsten. No. 1,350,709; Aug. 24; v. 277; p. 674.

Dequede, William, New Orleans, La. Mop-wringer. No. 1,350,791; Aug. 24; v. 277; p. 690.

Detroit Stove Works. (See Barbour, W. T., and Mersfelder, assignors.)

De Witt, George W. (See Nelson, Frank C., assignor.)

De Witt, William P. (See La France, D. J., and De Witt.)

De Witt-La France Co. (See La France, D. J., and De Witt, assignors.)

Diamond State Fibre Company. (See Taylor, John M., assignor.)

Dick, Ralph H., C. F. Wolters, Marietta, Ohio, and R. B. Sutter, Newark, N. J., assignors to The Safe-Cabinet Company, Marietta, Ohio. Heat-resisting safe or cabinet. No. 1,350,363; Aug. 24; v. 277; p. 605.

Dicus, Charles M., Mill Spring, N. C. Road-scraper. No. 1,350,991; Aug. 24; v. 277; p. 727.
Diehl, Albert C., Pensauken, N. J., assignor to Victor Talking Machine Company. Sound-box for sound-reproducing and sound-recording machines. No. 1,350,595; Aug. 24; v. 277; p. 652.
Diehl, Albert C., Pensauken, N. J., assignor to Victor Talking Machine Company. Sound-box for talking-machines. No. 1,350,596; Aug. 24; v. 277; p. 652.
Dietze, Carl H., Jr., Newark, N. J. Candle-holder. No. 1,350,710; Aug. 24; v. 277; p. 674.
Dixon, John, Gary, Ind. Window-ventilator. No. 1,350,792; Aug. 24; v. 277; p. 690.
Doble, Frank C., Winchester, Mass. High-tension telephone system. No. 1,350,922; Aug. 24; v. 277; p. 714.
Dominguez, Zacarias, Los Angeles, Calif. Garden sidehill-plow. No. 1,350,923; Aug. 24; v. 277; p. 714.
Dondo, Mathurin M., New York, N. Y. Marionette. No. 1,350,711; Aug. 24; v. 277; p. 674.
Dorneth, Julius, assignor to Typograph G. m. b. H., Berlin, Germany. Matrix setting and distributing machine. No. 1,350,793; Aug. 24; v. 277; p. 690.
Dosenbach, Benjamin H., deceased, Butte, Mont.; E. M. Dosenbach, executrix, assignor to E. M. Dosenbach. Ore concentration. No. 1,350,364; Aug. 24; v. 277; p. 606.
Dosenbach, Edna M., executrix. (See Dosenbach, Benjamin H.)
Dove, Walter T., U. S. Army. Artillery-truck. No. 1,350,644; Aug. 24; v. 277; p. 661.
Dow Chemical Company, The. (See Dow, H. H., and Strosaker, assignor.)
Dow, Herbert H., and C. J. Strosacker, assignors to The Dow Chemical Company, Midland, Mich. Making carbon disulfid. No. 1,350,858; Aug. 24; v. 277; p. 702.
Downie, Robert M., assignor to Keystone Driller Company, Beaver Falls, Pa. Means for leveling and staying excavating-machines. No. 1,350,992; Aug. 24; v. 277; p. 727.
Doyle, Edward J. (See McCarthy, John H., assignor.)
Draper Corporation. (See Brown, Carl D., assignor.)
Draper Corporation. (See Lacey, Fred, assignor.)
Draper Corporation. (See Wild, Arnold, assignor.)
Drescher, Theodore B., assignor to Bausch & Lomb Optical Company, Rochester, N. Y. Manufacture of lenses. No. 1,350,441; Aug. 24; v. 277; p. 622.
Drouillard, Elzear J., Detroit, Mich. Cone-rolling machine. No. 1,350,859; Aug. 24; v. 277; p. 702.
Dryden Rubber Company. (See Reeves, George C., assignor.)
Duncan, John Boone, Iowa. Car end construction. No. 1,350,442; Aug. 24; v. 277; p. 622.
Dupont, Jean G, Chicago, Ill Bonnet No 1,350,712; Aug. 24; v. 277; p. 674.
De Voe, Albert H., Westfield, N. J., assignor to The Singer Manufacturing Company. Presser mechanisms for sewing-machines. No. 1,350,301; Aug. 24; v. 277; p. 593.
Dyer, Robert J., Oakland, assignor of one-third to H. B. Williams, San Francisco, Calif. Interlocking wall-block. No. 1,350,490; Aug. 24; v. 277; p. 631.
Eaton, John, Schenectady, N. Y., assignor to General Electric Company. Control-switch. No. 1,350,924; Aug. 24; v. 277; p. 714.
Eby, Philip, and L. Angle, assignors to Art in Buttons, Inc., Rochester, N. Y. Machine for separating button-blanks. No. 1,350,794; Aug. 24; v. 277; p. 690.
Economy Fuse & Manufacturing Company. (See Eustice, Alfred L., assignor.)
Edstrom, Albert, Duluth, Minn. Bag-holder. No. 1,350,443; Aug. 24; v. 277; p. 622.
Eickhoff, Theodore H., Cleveland, Ohio, assignor, by mesne assignments, to Auto-Ordnance Corporation, New York, N. Y. Apparatus for lubricating ammunition. No. 1,350,645; Aug. 24; v. 277; p. 661.
Eickhoff, Theodore H., Cleveland, Ohio, assignor to Auto-Ordnance Corporation, New York, N. Y. Magazine. No. 1,350,646; Aug. 24; v. 277; p. 661.
Eldridge, George L., New Brunswick, N. J. Sign. No. 1,350,302; Aug. 24; v. 277; p. 594.
Elias, Abraham J. (See Stupar, Max, assignor.)

Youngstown Pressed Steel Company, The, Youngstown, Ohio. Metal lath. No. 134,993; Aug. 24; v. 277; p. 775.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 24TH DAY OF AUGUST, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Acids, Thienylquinolin carboxylic. M. Hartmann and E. Wybert. No. 1,350,408; Aug. 24; v. 277; p. 614.
Address-stencil. G. J. Evans. No. 1,350,993; Aug. 24; v. 277; p. 727.
Aeroplane. M. Petersen. No. 1,350,938; Aug. 24; v. 277; p. 717.
Air-cushion, Hydraulic. J. D. Langdon. No. 1,350,414; Aug. 24; v. 277; p. 616.
Air or gas, Storage cylinder or vessel for compressed. S. J. Murphy. No. 1,350,666; Aug. 24; v. 277; p. 665.
Alkaline accumulator. A. M. Cave. No. 1,350,956; Aug. 24; v. 277; p. 720.
Alkyl ether of starches and similar carbohydrates and producing same. L. Lilienfeld. No. 1,350,820; Aug. 24; v. 277; p. 695.
Alloy. H. S. Cooper. No. 1,350,359; Aug. 24; v. 277; p. 605.
Alloy. V. P. Taylor. No. 1,350,891; Aug. 24; v. 277; p. 708.
Alloy for electric welding. E. J. Kingsbury. No. 1,350,317; Aug. 24; v. 277; p. 596.
Alloy, Zinc. A. Tedesco. No. 1,350,892; Aug. 24; v. 277; p. 708.
Alloys, Manufacturing aluminium. A. Tedesco. No. 1,350,893; Aug. 24; v. 277; p. 708.
Ammunition, Apparatus for lubricating. T. H. Eickhoff. No. 1,350,645; Aug. 24; v. 277; p. 661.
Amusement device. C. Lombardo. No. 1,350,873; Aug. 24; v. 277; p. 704.
Ammunition, Primer for small-arms. H. T. Peck. No. 1,350,465; Aug. 24; v. 277; p. 626.
Anilin black upon vegetable textile fibers, Production of. E. A. Fourneaux. No. 1,350,600; Aug. 24; v. 277; p. 653.
Antiseptics, Capsule for. L. E. Evslin. No. 1,350,304; Aug. 24; v. 277; p. 594.
Antiskidding device. W. E. Glover. No. 1,350,966; Aug. 24; v. 277; p. 722.
Article of manufacture and making same. C. Weber. No. 1,350,533; Aug. 24; v. 277; p. 640.
Asphalt-kettle and steam-generating plant, Combined. C. F. Hetherington. No. 1,350,502; Aug. 24; v. 277; p. 634.
Atomizer. A. M. Holmes. No. 1,351,012; Aug. 24; v. 277; p. 731.
Automobile-brake. E. V. Lawrence. No. 1,350,318; Aug. 24; v. 277; p. 596.
Automobile brake attachment. H. W. Haapanen. No. 1,350,726; Aug. 24; v. 277; p. 677.
Automobile direction-signal. W. L. and E. A. F. Miller, Jr. No. 1,350,463; Aug. 24; v. 277; p. 626.
Automobile-lock. L. B. Halliday. No. 1,350,497; Aug. 24; v. 277; p. 633.
Automobile-lock. A. W. Kemmling. No. 1,350,316; Aug. 24; v. 277; p. 596.
Automobile-lock, Safety. J. G. Schwartz. No. 1,350,741; Aug. 24; v. 277; p. 680.
Automobile-signal. C. J. Hughes. No. 1,350,998; Aug. 24; v. 277; p. 728.
Automobile signal-light. W. H. Baites. No. 1,350,539; Aug. 24; v. 277; p. 641.
Automobile-tractor. L. S. Szumkowski. No. 1,350,889; Aug. 24; v. 277; p. 707.
Automobile vehicle. C. C. Martin and J. H. Cotton. No. 1,350,462; Aug. 24; v. 277; p. 626.
Automobiles, Auxiliary radius-truss for. G. G. Bayne. No. 1,350,771; Aug. 24; v. 277; p. 686.
Automobiles, Device for holding extra wheels on bodies of. C. M. Trammell. No. 1,350,896; Aug. 24; v. 277; p. 708.
Automobiles, Device for holding tires upon. C. M. Trammell. No. 1,350,897; Aug. 24; v. 277; p. 708.
Automobiles, Electrical control system for. W. P. Seng. No. 1,350,426; Aug. 24; v. 277; p. 618.
Automobiles, Transmission-lock for. J. Malcolm. No. 1,351,001; Aug. 24; v. 277; p. 729.
Bag: *See*—
Flash-light bag.
Baby-walker. S. Zoch. No. 1,350,401; Aug. 24; v. 277; p. 613.
Bag and twine holder. E. Lorange. No. 1,350,874; Aug. 24; v. 277; p. 704.
Bag-conveyer. B. F. Brown. No. 1,350,777; Aug. 24; v. 277; p. 687.
Bag-holder. A. Edstrom. No. 1,350,443; Aug. 24; v. 277; p. 622.
Bale-tie. A. J. Ersted. No. 1,350,860; Aug. 24; v. 277; p. 702.
Ball: *See*—
Fuller ball.
Ballet. J. S. Baker. No. 1,350,914; Aug. 24; v. 277; p. 712.
Band, Brake-. J. P. Bond. No. 1,350,985; Aug. 24; v. 277; p. 726.
Band-cutter and feeder. C. H. Hill. No. 1,350,802; Aug. 24; v. 277; p. 692.
Banjo-tailpiece. A. D. Grover. No. 1,350,310; Aug. 24; v. 277; p. 595.
Bath-water, Means for agitating. R. E. Kolshorn. No. 1,350,974; Aug. 24; v. 277; p. 724.
Battery: *See*—
Storage battery.
Bearings, Assembling antifriction-. A. H. Miller. No. 1,350,325; Aug. 24; v. 277; p. 598.
Bearing, Roller-. F. W. Stewart. No. 1,350,680; Aug. 24; v. 277; p. 668.
Bed, Davenport-. M. L. Brilliant. No. 1,351,011; Aug. 24; v. 277; p. 731.
Bed. M. Moir. No. 1,350,327; Aug. 24; v. 277; p. 598.
Bed and bureau, Combined folding. A. Ghittino. No. 1,350,720; Aug. 24; v. 277; p. 676.
Belt. C. O. Bakke. No. 1,350,915; Aug. 24; v. 277; p. 712.

Brisling and slid. The Oversea Export Co. No. 129,654; Aug. 24; v. 277; p. 762.

Brooms. The Morey Mercantile Company. No. 131,225; Aug. 24; v. 277; p. 767.

Brooms. Re-Filit Broom Company. No. 128,743; Aug. 24; v. 277; p. 761.

Building material, Steel. Newport Rolling Mill Co. No. 130,912; Aug. 24; v. 277; p. 765.

Burial Caskets and cases therefor. J. S. Waterman & Sons. No. 131,365; Aug. 24; v. 277; p. 767.

Calculating-machines. C. Merryman. No. 129,733; Aug. 24; v. 277; p. 762.

Candy. Western Martha Washington Candies Co. No. 133,389; Aug. 24; v. 277; p. 771.

Canned fruits and vegetables. California Co-Operative Canneries. No. 131,776; Aug. 24; v. 277; p. 767.

Canned goods, vinegar, olives, &c. California Packing Corporation. No. 109,744; Aug. 24; v. 277; p. 753.

Canned goods, pickles, olives, &c. John Blaul's Sons Co. No. 132,161; Aug. 24; v. 277; p. 768.

Canned vegetables. Vidalia Grocery Company. No. 122,197; Aug. 24; v. 277; p. 757.

Carving sets. The Robeson Cutlery Co. No. 134,093; Aug. 24; v. 277; p. 772.

Celluloid frames, rims, nose-pieces, and parts of eyeglasses. Optical Products Corporation. No. 132,314; Aug. 24; v. 277; p. 769.

Cement, Roof-. Kling-Tite Products Company. No. 132,794; Aug. 24; v. 277; p. 769.

Churns, cream-separators, &c. Bessire & Company. No. 122,961; Aug. 24; v. 277; p. 757.

Cigars. C. J. Spietz. No. 130,930; Aug. 24; v. 277; p. 765.

Cigars and cigarettes. D. S. Saqui. No. 132,203; Aug. 24; v. 277; p. 768.

Cleaning compound. United Drug Company. No. 134,441; Aug. 24; v. 277; p. 774.

Cleaning preparation for white shoes, clothes, &c. W. A. Shabel. No. 128,296; Aug. 24; v. 277; p. 760.

Coats and suits, Ladies'. Edward Kolbert & Sons. No. No. 129,636; Aug. 24; v. 277; p. 762.

Coats, cloaks, and suits, Ladies'. H. Goldberg. No. 125,656; Aug. 24; v. 277; p. 758.

Coats, vests, trousers, top and overcoats, Men's. Z. Solomon. No. 121,699; Aug. 24; v. 277; p. 757.

Collars, cuffs, shirts, shirt-fronts. A. Rice & Company. No. 130,117; Aug. 24; v. 277; p. 763.

Collar-holders. Freeman-Daughaday Co. No. 118,261; Aug. 24; v. 277; p. 754.

Conveyers. Guarantee Construction Company. No. 129,258; Aug. 24; v. 277; p. 761.

Cords, Braided. Silver Lake Company. No. 130,982; Aug. 24; v. 277; p. 766.

Cream separators and centrifugal machinery. The Sharples Separator Co. No. 121,418; Aug. 24; v. 277; p. 757.

Cribs and high chairs, tables, desks, &c., Children's. Hitz, Jacobs & Company. No. 120,456; Aug. 24; v. 277; p. 756.

Cultivators and separate parts thereof. International Harvester Company. No. 134,315; Aug. 24; v. 277; p. 773.

Custard-powder, sponge-cake flour, &c. A. S. Price & Co. No. 116,897; Aug. 24; v. 277; p. 754.

Cutlery, machinery, and tools. E. James. No. 131,734; Aug. 24; v. 277; p. 767.

Cutting-tools for metal-working machines. The Bullard Machine Tool Co. No. 134,179; Aug. 24; v. 277; p. 773.

Dress-shields. J. J. Beyerle Mfg. Co. No. 132,292; Aug. 24; v. 277; p. 769.

Dresses and coats, Ladies'. Louis Katzman, Inc. No. 129,980; Aug. 24; v. 277; p. 763.

Dressings, olive-naise, &c., Russian and salad. S. Mervis. No. 125,967; Aug. 24; v. 277; p. 759.

Drills, reamers, lathes, &c. M. Wardlow. No. 116,117; Aug. 24; v. 277; p. 754.

Elevating, conveying, and power-transmission machinery. The Union Chain & Manufacturing Company. No. 119,782; Aug. 24; v. 277; p. 755.

Explosives. E. I. du Pont de Nemours & Company. No. 119,156; Aug. 24; v. 277; p. 755.

Eyeglasses and spectacle frames, Non-metallic. New Jersey Optical Co. No. 98,341; Aug. 24; v. 277; p. 753.

Feed, Stock. Great Western Milling Company. No. 130,960–1; Aug. 24; v. 277; p. 766.

Fiber-decorticating machinery. Prieto Machine Company. No. 134,325; Aug. 24; v. 277; p. 773.

Fish, Dried cod-. Knapp & Van Nostrand. No. 132,254; Aug. 24; v. 277; p. 768.

Flour, Wheat-. American Trading Co. No. 134,343; Aug. 24; v. 277; p. 773.

Flour, Wheat-. Charleston Milling Company. No. 128,653; Aug. 24; v. 277; p. 761.

Flour, Wheat-. Miller Flour Mills. No. 134,081; Aug. 24; v. 277; p. 772.

Food and cakes for stock-feeding, fats and oils for food, Cattle. Naamlooze Vennootschap Anton Jurgens' Margarinefabrieken. No. 117,891; Aug. 24; v. 277; p. 754.

Food ingredients. Benchley Brothers. No. 127,236; Aug. 24; v. 277; p. 759.

Foods and food ingredients. A. Engelhard & Sons Company. No. 130,666; Aug. 24; v. 277; p. 764.

Foods, Animal. J. B. Rosefield. No. 134,527; Aug. 24; v. 277; p. 774.

Furniture, &c., polishing material. P. Rosenzweig. No. 122,614; Aug. 24; v. 277; p. 757.

Game-board. G. Trippe. No. 104,534; Aug. 24; v. 277; p. 753.

Garments, Outer. Stanley E. Selonick & Co. No. 131,043; Aug. 24; v. 277; p. 766.

Garters and hose-supporters. A. Stein & Company. No. 134,488; Aug. 24; v. 277; p. 774.

Glazing, roofing, and calking compounds, &c. The Quality Brands Company. No. 133,227; Aug. 24; v. 277; p. 770.

Gloves. T. H. Hall. No. 117,137; Aug. 24; v. 277; p. 754.

Gloves and underwear, Silk. Mohawk Silk Fabric Co. No. 132,256; Aug. 24; v. 277; p. 769.

Gloves, Cotton. Wells-Lamont Manufacturing Company. No. 120,335; Aug. 24; v. 277; p. 756.

Grape-juice, lemon-soda, birch-beer, &c. Serv-Us Grocery Products Corporation. No. 134,037; Aug. 24; v. 277; p. 772.

Grinding-machines, Metal-working. Bryant Chucking Grinder Company. No. 128,829; Aug. 24; v. 277; p. 761.

Gum, Chewing-. The Shelby Supply and Manufacturing Company. No. 111,190; Aug. 24; v. 277; p. 753.

Hams, bacon, lard, &c. Arnold Brothers. No. 127,419; Aug. 24; v. 277; p. 759.

Hatbands, skirt and dress beltings, &c. The Owl Specialty Co. No. 134,846; Aug. 24; v. 277; p. 775.

Hats, Ladies'. Engle & Zelner. No. 126,311; Aug. 24; v. 277; p. 759.

ALPHABETICAL LIST OF TRADE-MARK TITLES.

(REGISTRATION APPLIED FOR.)

Heat regulating devices, Electric. Electric Controller Co. No. 132,232; Aug. 24; v. 277; p. 768.
Heaters, transformers, &c., Electric. Empire Transformer Company. No. 129,543; Aug. 24; v. 277; p. 761.
Heel and sole edge finishing machines and parts thereof. United-Xpedite Finishing Company. No. 134,047; Aug. 24; v. 277; p. 772.
Incubators and brooders. The Buckeye Incubator Company. No. 134,555; Aug. 24; v. 277; p. 774.
Iron, steels, &c. John Kenyon & Co. (Sheffield). No. 119,896; Aug. 24; v. 277; p. 755.
Iron, steels, &c. John Kenyon & Co. (Sheffield). No. 119,901; Aug. 24; v. 277; p. 755.
Iron, steels, &c. John Kenyon & Co. (Sheffield). No. 119,903; Aug. 24; v. 277; p. 755.
Ironing machines, Laundry-. Hurley Machine Company. No. 130,591; Aug. 24; v. 277; p. 764.
Jacks, Lifting-. The Pierce-Arrow Motor Car Company. No. 134,428; Aug. 24; v. 277; p. 773.
Jewelry, Molds, and parts used in casting. Everlast Ring Cast Company. No. 133,730; Aug. 24; v. 277; p. 771.
Knitted and woven wearing-apparel. Dr. Jaeger's Sanitary Woolen System. No. 130,368; Aug. 24; v. 277; p. 764.
Lath, Metal. The Youngstown Pressed Steel Company. No. 134,993; Aug. 24; v. 277; p. 775.
Life-preservers and swimming-floats. International Cork Company. No. 126,124; Aug. 24; v. 277; p. 759.
Lumber, Finished. American Pitch Pine Export Company. 134,049; Aug. 24; v. 277; p. 772.
Lumber, Pine and cypress. Manasota Lumber Corporation. No. 123,547; Aug. 24; v. 277; p. 757.
Lumber, Rough. Foxley Stave & Lumber Co. Nos. 135,362–3; Aug. 24; v. 277; p. 776.
Machines and tools. Nestor Manufacturing Co. No. 114,027; Aug. 24; v. 277; p. 753.
Malt extract. P. Ballantine & Sons. Nos. 133,198–9; Aug. 24; v. 277; p. 770.
Measuring and price-computing machines, Cloth and ribbon combination. Grand Rapids Show Case Company. No. 130,366; Aug. 24; v. 277; p. 764.
Measuring and scientific appliances. Henry Hughes & Son. No. 119,975; Aug. 24; v. 277; p. 756.
Meat and sauce extracts, soup preparations, &c. Vitamon A/S. No. 130,735; Aug. 24; v. 277; p. 765.
Metal and plain-metal sheets, Corrugated. Newport Rolling Mill Co. No. 130,911; Aug. 24; v. 277; p. 765.
Milk, Cultured. M. C. Reynolds. No. 127,934; Aug. 24; v. 277; p. 760.
Milking machinery. The De Laval Separator Company. No. 132,775; Aug. 24; v. 277; p. 769.
Mortar, lime, &c. Léukolith, G. m. b. H. No. 134,513; Aug. 24; v. 277; p. 774.
Mops. Massasoit Manufacturing Company. No. 129,234; Aug. 24; v. 277; p. 761.
Mucilage, Stick-. Stickalene Company. No. 128,472; Aug. 24; v. 277; p. 760.
Nuts, Frosted. M. M. Burton. No. 124,467; Aug. 24; v. 277; p. 758.
Oil, Canned olive-. Cavanna & Company. No. 134,107; Aug. 24; v. 277; p. 772.
Oils and fats, Edible. De Bruyn, Limited. No. 131,946; Aug. 24; v. 277; p. 768.
Oleomargarin. Wm. J. Moxley, Inc. No. 114,701; Aug. 24; v. 277; p. 754.
Paints. H. H. Hall. No. 131,732; Aug. 24; v. 277; p. 767.
Paints and painters' materials. Katzenbach & Bullock Co. No. 130,597; Aug. 24; v. 277; p. 764.
Paints, Ready-mixed. H. H. Hall. No. 131,731; Aug. 24; v. 277; p. 767.
Paints, varnishes, and stains. L. Born & Son. No. 123,604; Aug. 24; v. 277; p. 757.
Paints, wood-stains, varnishes. Brandram-Henderson Limited. No. 131,554; Aug. 24; v. 277; p. 767.
Pamphlets, circulars, &c. Duncan Lumber Company. No. 128,202; Aug. 24; v. 277; p. 760.
Phonographic reproducers. M. McTighe Company. No. 133,018; Aug. 24; v. 277; p. 770.
Pickles, vinegars, &c., Mixed. Maine Pickling Co. No. 130,147; Aug. 24; v. 277; p. 763.
Picture screens, Moving. The Ludcke Picture Screen Co. No. 131,339; Aug. 24; v. 277; p. 767.
Pin for men's soft collars, Bar-. John S. Sampson & Son. No. 128,371; Aug. 24; v. 277; p. 760.
Pipe-coverings, roofing-shingles, &c. Stowell Manufacturing Co. No. 130,852; Aug. 24; v. 277; p. 765.
Pipes, cigar and cigarette holders, Tobacco-. Kapp & Peterson. No. 129,896; Aug. 24; v. 277; p. 763.
Plows, cultivators, &c. La Crosse Plow Company. No. 120,490; Aug. 24; v. 277; p. 756.
131,165; Aug. 24; v. 277; p. 767.
Plug-caps, Convertible. Harvey Hubbell, Inc. Nos. 134,585–6; Aug. 24; v. 277; pp. 774–5.
Plumbing fixtures and supplies. The McRae & Roberts Co. No. 129,902; Aug. 24; v. 277; p. 763.
Polish for varnished, waxed, &c., surfaces. The Varnitone Manufacturing Company. No. 132,134; Aug. 24; v. 277; p. 768.
Posters, display-cards, &c. Tullograph Art Company. No. 131,510; Aug. 24; v. 277; p. 767.
Publication, Monthly. The Searchlight Publishing Company. No. 133,990; Aug. 24; v. 277; p. 772.
Pulleys, Window-. Ideal Window Pulley Corporation. No. 133,542; Aug. 24; v. 277; p. 771.
Pumps, &c. Kellogg Manufacturing Co. No. 130,189; Aug. 24; v. 277; p. 763.
Railway-spikes. American Spike Company. No. 130,353; Aug. 24; v. 277; p. 763.
Razors and stroppers, Safety-. Collins Safety Razor Company. No. 129,829; Aug. 24; v. 277; p. 762.
Reamers. Kor-Doh Manufacturing Corporation. No. 132,538; Aug. 24; v. 277; p. 769.
Roofing and roofing-cements, Felt. Texas Company. No. 119,480; Aug. 24; v. 277; p. 755.
Root-beer, ginger-ale, apple cider, &c. United Beverage Company. No. 132,830; Aug. 24; v. 277; p. 769.
Rubber soles and heels. Kleistone Rubber Co. Nos. 130,421–2; Aug. 24; v. 277; p. 764.
Rubberized cloth and blankets made therefrom. United States Rubber Company. No. 125,637; Aug. 24; v. 277; p. 758.
Sheets, plates, and castings made from metal alloys. Supplee-Biddle Hardware Company. Nos. 135,022–7; Aug. 24; v. 277; pp. 775–6.
Shoes. Maryland Shoe Corporation. No. 129,562; Aug. 24; v. 277; p. 762.
Shoes, Boys' leather. A. Starr Best, Inc. No. 118,824; Aug. 24; v. 277; p. 755.
Shoes, Children's. Brown Shoe Company. No. 119,624; Aug. 24; v. 277; p. 755.
Snap-fasteners. The Guarantee Specialty Manufacturing Company. No. 133,878; Aug. 24; v. 277; p. 771.
Soap. Société Anonyme des Savons de Marseille. No. 125,730; Aug. 24; v. 277; p. 759.
Soap. A. W. Tarson. No. 133,717; Aug. 24; v. 277; p. 771.
Soap in cans. The Wink-O Products Co. No. 134,400; Aug. 24; v. 277; p. 773.
Soap powder, &c. The Red Ball Company. No. 134,432; Aug. 24; v. 277; p. 774.
Soap-powder dispensers. Re-Be Soap Co. No. 127,521; Aug. 24; v. 277; p. 759.
Spaghetti, macaroni, &c. Fortune Products Company. No. 127,804; Aug. 24; v. 277; p. 760.
Spaghetti, noodles, &c. Pan American Manufacturing Co. No. 132,881; Aug. 24; v. 277; p. 769.
Sprinkler systems for lawns and gardens. P. Sattelkau. No. 124,672; Aug. 24; v. 277; p. 758.
Steel. Spear & Jackson. Nos. 120,972–3; Aug. 24; v. 277; p. 756.
Steel and anvils. Tool, high-speed, &c. M. Wardlow. No. 116,116; Aug. 24; v. 277; p. 754.
Steel and carbon twist-drill steel, Drill-. Ludlum Steel Company. No. 133,271; Aug. 24; v. 277; p. 770.
Steel, Ball-bearing. Ludlum Steel Company. No. 133,268; Aug. 24; v. 277; p. 770.
Steel, Ball-bearing. Ludlum Steel Company. No. 133,272; Aug. 24; v. 277; p. 770.
Steel, Magnet-. Ludlum Steel Company. No. 133,265; Aug. 24; v. 277; p. 770.
Steel, Non-corrosive. Ludlum Steel Company. No. 133,270; Aug. 24; v. 277; p. 770.
Suitcases and traveling bags. W. R. Dickson. No. 131,107; Aug 24; v. 277; p. 766.
Suits, rompers, middy-blouses, Wash-. J. B. Branch. No. 111,090; Aug. 24; v. 277; p. 753.
Swings and suspending-hangers. The Au-To Play Goods Company. No. 116,435; Aug. 24; v. 277; p. 754.
Syrup of malt and hops, Non-alcoholic. United States Syrup Co. No. 129,687; Aug. 24; v. 277; p. 762.
Syrup, Table-. Bliss Syrup Refining Co. No. 130,512; Aug. 24; v. 277; p. 764.
Syrups, flavors, and flavoring extracts for soft drinks. H. J. Stein. No 133,002; Aug. 24; v. 277; p. 770.
Toilet-seat covers, Flexible. Wagner Manufacturing Company. No. 133,645; Aug. 24; v. 277; p. 771.
Toy vehicle. H. G. Bishop. No. 123,837; Aug. 24; v. 277; p. 758.
Toys, Musical. L. V. Aronson. No. 130,943; Aug. 24; v. 277; p. 766.
Trucks and trailers, Motor-. Illinois Auto Truck Co. No. 118,148; Aug. 24; v. 277; p. 754.
Tubes and pipes. Supplee-Biddle Hardware Company. Nos. 128,568–73; Aug. 24; v. 277; pp. 760–1.
Valve-spring lifters. K-D Manufacturing Co. No. 132,253; Aug. 24; v. 277; p. 768.
Valves carried on automobile-radiator caps, Indicator-. G. B. Hutchings. No. 129,892; Aug. 24; v. 277; p. 762.
Valves for shower-baths. W. G. Solomon. No. 124,013; Aug. 24; v. 277; p. 758.
Varnish or polish for furniture, automobiles, &c. G. Tuschel. No. 119,921; Aug. 24; v. 277; p. 756.
Waists and garters, Combined. A. Stein & Company. No. 134,489; Aug. 24; v. 277; p. 774.
Watches and watch-movements. R. A. Gsell. No.
Wine, Imitation. C. L. Beardsley. No. 134,177; Aug. 24; v. 277; p. 773.
Wrenches. Romaro Machine & Tool Co. No. 134,326; Aug. 24; v. 277; p. 773.

CLASSIFICATION OF PATENTS

ISSUED AUGUST 24, 1920.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 46: 1,350,371
50: 1,350,826
2— 42: 1,350,848
67: 1,350,609
106: 1,350,776
1,350,868
1,350,869
114: 1,350,535
116: 1,350,494
118: 1,350,712
3— 2: 1,350,743
6: 1,350,518
4— 2: 1,350,974
5— 5: 1,350,516
13: 1,350,333
18: 1,350,327
44: 1,350,297
51: 1,351,011

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED DURING THE MONTH OF AUGUST, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

A.-C. Manufacturing Company. (See Sebastian, A. A., and Capes, assignors.)
A. G. A. Railway Light & Signal Co. (See Medén, Elof H., assignor.)
A/S Mekano. (See Schepeler, Herman A., assignor.)
Abbott, Arthur, Toronto, Ontario, Canada. Tableware-drainer. No. 1,350,351; Aug. 24; v. 277; p. 603.
Abbott, Charles C., Pittsfield, Mass., assignor to General Electric Company. Electric heating unit. No. 1,350,910; Aug. 24; v. 277; p. 711.
Abbott, F. J., Jr. (See Vance, Arlyn T.)
Abbott Incorporated. (See Abbott, William E., assignor.)
Abbott, Tom, Pontyclun, Llantrisant, Wales. Means for oiling the wheels of tramway and like vehicles. No. 1,351,196; Aug. 31; v. 277; p. 830.
Abbott, William E., assignor to Abbott Incorporated, Bend, Oreg. Check-book attachment. No. 1,350,203; Aug. 17; v. 277; p. 528.
Abelson, Abraham, Brooklyn, N. Y. Restaurant-service device. No. 1,349,647; Aug. 17; v. 277; p. 421.
Accounting Devices Company. (See Potwin, George H., assignor.)
Ackermann, Oscar A., St. Paul, Minn. Stock-car. No. 1,349,747; Aug. 17; v. 277; p. 441.
Acme Oil & Drill Company. (See Pace, Jefferson D., assignor.)
Adams, Arthur J., Milwaukee, Wis. Battery-plate. No. 1,348,467; Aug. 3; v. 277; p. 66.
Adams, Edward M., assignor to M. H. Petigor, New York, N. Y. Dispensing-pump and mixer. No. 1,349,543; Aug. 10; v. 277; p. 328.
Adams, Horace T., and H. Altmayer, San Francisco, Calif. Split pulley. No. 1,351,197; Aug. 31; v. 277; p. 830.
Adams, James, R., Somerset, Pa. Wheel-hub and bearing. No. 1,350,851; Aug. 24; v. 277; p. 700.
Adams & Westlake Company, The. (See Krohn, Nels, assignor.)
Adams, William A. (See Skublin, Charles P., assignor.)
Adams-Williams Manufacturing Corporation. (See Bresin, Louis, assignor.)
Adelson, Samuel L., Chicago, Ill. Combination-shaker. No. 1,348,468; Aug. 3; v. 277; p. 66.
Adelson, Samuel L., New York, N. Y. Protective socket. No. 1,348,620; Aug. 3; v. 277; p. 95.
Adelsperger, Dow L., assignor to The Bauer Brothers Company, Springfield, Ohio. Method of and apparatus for treating cotton-seed. No. 1,349,034; Aug. 10; v. 277; p. 227.
Agee, Arthur E. (See Sharpnack, M. C., and Crisman, assignors.)
Ahlbom, Oscar W., Salt Lake City, Utah. Bicycle-sled. No. 1,350,952; Aug. 17; v. 277; p. 499.
Aikman, Burton S., assignor to National Brake & Electric Company, Milwaukee, Wis. Pump and plumbing system. (Reissue.) No. 14,935; Aug. 24; v. 277; p. 781.
Alles, Adrian S., assignor of sixty per cent. to J. H. Taft, Chicago, Ill. Auxiliary safe-lock. No. 1,350,766; Aug. 24; v. 277; p. 685.
Ainsworth, William A., Utica, N. Y. Dyeing-machine. No. 1,348,974; Aug. 10; v. 277; p. 215.
Aktiebolaget Svenska Kullager-Fabriken. (See Palmgren, Nils A., assignor.)
Aktiebolaget Svenska Kullagerfabriken. (See Olsson, Nils J., assignor.)
Aktiebolaget Svenska Kullargerfabriken. (See Rydbeck, Patrik S., assignor.)
Albee, Honestus M., Nutley, N. J. Machine for carving, routing, and similar operations. No. 1,349,250; Aug. 10; v. 277; p. 271.
Albrecht, Albert W., St. Louis, Mo. Collapsible burial-casket. No. 1,349,799; Aug. 17; v. 277; p. 451.
Albrecht, Hermen E., What Cheer, Iowa. Gambrel. No. 1,350,632; Aug. 24; v. 277; p. 659.
Alden, Herbert W., assignor to The Timken-Detroit Axle Company, Detroit, Mich. Tractor. No. 1,349,249; Aug. 10; v. 277; p. 270.
Aldenbruck, Herbert G., and L. E. Webber, St. Paul, Minn.; said Webber assignor to said Aldenbruck. Rolling device for scrubbing, &c. No. 1,348,683; Aug. 3; v. 277; p. 107.
Aldendorff, Fritz, Wilmersdorf, Berlin, Germany. Switching apparatus. No. 1,348,835; Aug. 3; v. 277; p. 135.
Alder, Frederick T., Mt. Vernon, N. Y. Vehicle wheel and spoke. No. 1,349,035; Aug. 10; v. 277; p. 227.
Alderson, William, Kimberley, South Africa. Construction of ships. No. 1,349,800; Aug. 17; v. 277; p. 451.
Alexander, John E., Port Edwards, Wis. Cylinder for paper-drying machines. No. 1,348,469; Aug. 3; v. 277; p. 66.
Alexander, Roy A., Bellingham, Wash. Varnished-surface burnisher. No. 1,350,537; Aug. 24; v. 277; p. 640.
Alexander, Verne P., Chicago, Ill. Work-clamp. No. 1,351,148; Aug. 31; v. 277; p. 820.
Alexanderson, Ernst F. W., Schenectady, N. Y., assignor to General Electric Company. Wireless signaling system. No. 1,350,911; Aug. 24; v. 277; p. 711.
Alexanderson, Ernst F. W., Schenectady, N. Y., assignor to General Electric Company. Radioreceiving system. No. 1,350,912; Aug. 24; v. 277; p. 711.
Allen, Alida E., Brooklyn, N. Y. Oil-absorbing device. No. 1,351,601; Aug. 31; v. 277; p. 911.
Allen, Charles, El Paso, Tex. Slime-pulp thickener. No. 1,350,204; Aug. 17; v. 277; p. 529.
Allen, Charles J., Moorestown, N. J., assignor to S. L. Allen & Co., Inc. Self-propelled vehicle. No. 1,349,997; Aug. 17; v. 277; p. 488.
Allen, Guy L., assignor of one-half to J. G. Clark, Boulder, Colo. Vibratory movement. No. 1,348,770; Aug. 3; v. 277; p. 123.
Allen, Herbert I., and K. R. Fox, assignors to Electron Chemical Company, Portland, Me. Electrolytic cell. No. 1,349,597; Aug. 17; v. 277; p. 411.
Allen, Joseph C., *et al.* (See Cox, A., and Evans.)
Allen, Lewis H., West Springfield, Mass. Sterilising device. No. 1,348,837; Aug. 10; v. 277; p. 189.
Allen, Marion, *et al.* (See Davis, Claude B., assignor.)
Allen, S. L., & Co. (See Allen, Charles J., assignor.)
Allis-Chalmers Manufacturing Company. (See Wilkinson, Nathan, assignor.)
Allison, Carl F., Woodlawn, Pa. Solder composition. No. 1,349,648; Aug. 17; v. 277; p. 421.
Allith Prouty Company. (See Rhines, George, assignor.)
Allsworth, Robert I., New York, N. Y. Wall construction. No. 1,350,633; Aug. 24; v. 277; p. 659.
Almetal Manufacturing Company, The. (See Nunn, Nevvens N., assignor.)
Alquist, Karl, Schenectady, N. Y. Gearing. No. 1,351,317; Aug. 31; v. 277; p. 854.
Alquist, Karl, Schenectady, N. Y. Gearing. No. 1,351,318; Aug. 31; v. 277; p. 855.
Alquist, Karl, Schenectady, N. Y. Gearing for double-rotation turbines. No. 1,351,319; Aug. 31; v. 277; p. 855.
Alquist, Karl, Schenectady, N. Y. Gearing. No. 1,351,320; Aug. 31; v. 277; p. 855.
Alquist, Karl, Schenectady, N. Y. Gearing. No. 1,351,321; Aug. 31; v. 277; p. 855.
Alquist, Karl, Schenectady, N. Y. Gearing. No. 1,351,322; Aug. 31; v. 277; p. 856.
Alsatian Machine Company. (See Tunstall, Harry, assignor.)
Alstad, George C., Chicago, Ill. Compressed-air power-drive. No. 1,349,036; Aug. 10; v. 277; p. 227.
Alsten, Alfred O., assignor of one-third to F. A. Sanderson and one-third to A. L. Johnson, Worcester, Mass. Jack. No. 1,349,801; Aug. 17; v. 277; p. 451.
Altaffer, John F., Aline, Okla. Rail-tie. No. 1,349,310; Aug. 10; v. 277; p. 282.
Althouse, Charles S., Reading, Pa. Dyeing. No. 1,349,867; Aug. 17; v. 277; p. 464.
Altmayer, Hugo. (See Adams, H. T., and Altmayer.)
Alton, William H., New York, N. Y. and A. C. Battelle, assignors, by mesne assignments, to A. C. Battelle, Chicago, Ill. Filler. No. 1,350,694; Aug. 24; v. 277; p. 671.
Alvo, Florencio. (See Butty, C., and Alvo.)
Amadio, Harry H., Bedfern, near Sydney, New South Wales, Australia. Foot for crutches, walking-sticks, ladders, and the like. No. 1,348,531; Aug. 3; v. 277; p. 78.
Amdursky, Samuel S. (See Steinmetz, Robert, assignor.)
American Auto Alarm, The. (See Morgan, Lewis H., assignor.)

American Automatic Products Corporation. (See Woodward, Garrett W., assignor.)
American Brake Company, The. (See Burton, Thomas L., assignor.)
American Can Company. (See Dister, Joseph, assignor.)
American Can Company. (See Graham, Charles W., assignor.)
American Can Company. (See Grey, James A., assignor.)
American Can Company. (See Halloway, William M., assignor.)
American Can Company. (See Holloway, William M., assignor.)
American Can Company. (See Johnson, Axel, assignor.)
American Can Company. (See Levander, Swan N., assignor.)
American Casting and Manufacturing Corporation. (See Dietze, Emil, assignor.)
American Clearing Company. (See Barber, Harry E., assignor.)
American Concrete Forms Company. (See Belt, W. M., and Smith, assignors.)
American District Telegraph Company. (See Hopkins, Richard M., assignor.)
American Dressler Tunnel Kilns. (See Dressler, Philip D., assignor.)
American Dressler Tunnel Kilns. (See Meehan, Paul A., assignor.)
American Laundry-Machinery Company, The. (See Braley, C. L., and Waream, assignors.)
American Laundry Machinery Company, The. (See Carroll Emil J., assignor.)
American Laundry Machinery Company, The. (See Waream, C. E., and Benjamin, assignors.)
American Machine & Manufacturing Company. (See Davidson, Joseph, assignor.)
American Mine Door Company, The. (See Bowman, Newton K., assignor.)
American Optical Company. (See Arnold, Arthur A., assignor.)
American Optical Company. (See Herbert, Pitt H., assignor.)
American Optical Company. (See Hill, Harry W., assignor.)
American Paper Bottle and Can Company. (See Stephenson, Leonard D., assignor.)
American Photo Player Company. (See Van Valkenburg, Burt R., assignor.)
American Rubber Company. (See Gibbons, Willis A., assignor.)
American Steam Gauge & Valve Manufacturing Company. (See Hopkins, Frank H., assignor.)
American Steel Foundries. (See Carscadin, Charles A., assignor.)
American Steel Foundries. (See Trowbridge, William S., assignor.)
American Steel & Wire Company, The. (See Weaver, A. T., Laufer, and von Wintzingerode, assignors.)
American Telephone and Telegraph Company. (See Toomey, John F., assignor.)
American Wagon Company. (See Kuhnen, Alexander F., assignor.)
American Well Works, The. (See Chapman, Matthew T. and M. C., assignors.)
Amsler, Walter O., Edgewood, Pa. Annealing furnace or leer. No. 1,351,323; Aug. 31; v. 277; p. 856.
Amstutz, Noah S. (See Simpson, David J., assignor.)
Anagnostopoulos, Theodore D. (See Theodore, Anostopoulo D.)
Anchor Rubber Company, The. (See Pastor, Frank, assignor.)
Anderson, Albert O. (See Bradley, Jacob A., assignor.)
Anderson, Arthur V., and A. M. Morgan, assignors to Ford Tire & Rubber Company, Fort Worth, Tex. Tire-casing. No. 1,351,015; Aug. 31; v. 277; p. 795.
Anderson, Axel. (See Gahring, Frederick A., assignor.)
Anderson, Carl E. E., assignor to The Bryant Electric Company, Bridgeport, Conn. Electric switch. No. 1,348,684; Aug. 3; v. 277; p. 107.
Anderson, Carl O., Springfield, assignor to Thorne Bros., Inc., Chicago, Ill. Cream-separator bowl. No. 1,351,198; Aug. 31; v. 277; p. 830.
Anderson, Chester H., assignor of one-fourth to C. L. Hill and two-fourths to H. R. Kleinbach, Los Angeles, Calif. Clock. No. 1,350,131; Aug. 17; v. 277; p. 514.
Anderson, David G., Columbus, Ohio, assignor to The Ohio Malleable Iron Company. Casting-machine. No. 1,350,352; Aug. 24; v. 277; p. 603.
Anderson, E. D., Inc. (See Beckmann, Carl, assignor.)
Anderson Electric Specialty Company. (See Anderson, Ernst G. K., assignor.)
Anderson, Ernst G. K., assignor to Anderson Electric Specialty Company, Chicago, Ill. Actuating member for switches. No. 1,349,251; Aug. 10; v. 277; p. 271.
Anderson, Hans. (See Lund, J. M., and Anderson.)
Anderson, James B., Philadelphia, Pa. Mine pulley or roller. No. 1,349,183; Aug. 10; v. 277; p. 257.

Merkel, Arthur E., *et al.* (See Stringer, Melvin, assignor.)

Merriman, Grove R., assignor to J. R. Vander Putten, Akron, Ohio. Brush for carpet-sweepers. No. 1,350,064; Aug. 24; v. 277; p. 665.

Mersch, Bernard H., Covington, Ky. Demountable-rim breaker. No. 1,350,418; Aug. 24; v. 277; p. 617.

Mersfelder, William L. (See Barbour, W. T., and Mersfelder.)

Mershon, Ralph D., New York, N. Y., and P. A. Ross, Norwalk, Conn.; said Ross assignor to said Mershon. Welding condenser parts. No. 1,350,557; Aug. 24; v. 277; p. 644.

Merwin, Joseph B., Lincoln, Nebr. Signal for motor-vehicles. No. 1,351,260; Aug. 31; v. 277; p. 842.

Messenger, Isaiah L., McGraw, N. Y. Screw driver and placer. No. 1,350,558; Aug. 24; v. 277; p. 644.

Metal & Thermit Corporation. (See Deppeler, John H., assignor.)

Metcalf, William F., *et al.* (See Holmes, Anderson M., assignor.)

Metropolitan Sewing Machine Corporation. (See Weis, John P., assignor.)

Metzler, Jacob P., Geneva, N. Y. Occupant-propelled vehicle. No. 1,348,888; Aug. 10; v. 277; p. 198.

Meutsch, Charles C., Chicago, Ill., and E. A. Christoph, Buffalo, N. Y. Cushion-spring-assembling machine. No. 1,348,654; Aug. 3; v. 277; p. 102.

Meyer, Charles W., and F. G. Herrmann, Sheboygan, Wis. Bed-davenport. No. 1,349,620; Aug. 17; v. 277; p. 416.

Meyer, Charles W., and F. G. Herrmann, assignors to Sheboygan Couch Company, Sheboygan, Wis. Bed-davenport. No. 1,349,621; Aug. 17; v. 277; p. 416.

Meyer, Charles W., and F. G. Herrmann, assignors to Sheboygan Couch Company, Sheboygan, Wis. Bed-davenport. No. 1,349,622; Aug. 17; v. 277; p. 416.

Meyer, August, Wellston, assignor to Handlan-Buck Manufacturing Company, St. Louis, Mo. Signal-lamp. No. 1,351,113; Aug. 31; v. 277; p. 813.

Meyer, Erwin E. A. G., Detroit, Mich., assignor to Morgan & Wright, Vulcanizing rubber. No. 1,350,824; Aug. 24; v. 277; p. 696.

Meyer, George L., Milwaukee, Wis. Gas-engine ignition. No. 1,439,846; Aug. 17; v. 277; p. 459.

Meyer, George U. (See Lederer, S. L., and Meyer.)

Meyer, Trygve E., Lombard, assignor to Automatic Electric Company, Chicago, Ill. Automatic telephone system. No. 1,351,531; Aug. 31; v. 277; p. 897.

Meyerhofer, Albert F., Mannheim, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Manufacturing dense ware from bauxite. No. 1,350,825; Aug. 24; v. 277; p. 696.

Michal, Alexander, West Orange, N. J. Belt-stapling device. No. 1,350,826; Aug. 24; v. 277; p. 696.

Michalek, Rudolph B., Newark, N. J. Cinematograph. No. 1,350,374; Aug. 24; v. 277; p. 608.

Middlebrook, Leslie E., Hall, N. Y. Timer for automobiles. No. 1,349,523; Aug. 10; v. 277; p. 324.

Middleton, Alfred S., assignor of one-half to W. M. Toole, Des Moines, Iowa. Spring-hub. No. 1,348,437; Aug. 3; v. 277; p. 60.

Middleton, Charles S., Blakely, Ga. Interest-calculator. No. 1,349,061; Aug. 10; v. 277; p. 236.

Middleton, Edward C., assignor to Triumph Cycle Company Limited, Coventry, England. Transmission shock-absorber. No. 1,349,082; Aug. 10; v. 277; p. 236.

Midgley, Albert H., assignor of one-half to S. A. Vandervell & Company Limited, Acton Vale, England. Ignition system for internal-combustion engines. No. 1,351,396; Aug. 31; v. 277; p. 870.

Midgley, Thomas, Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Tire-bead. No. 1,349,902; Aug. 17; v. 277; p. 470.

Miehle Printing Press and Manufacturing Company. (See Blaine, Joseph R., assignor.)

Miles, Con L. (See Kain, H. Miles and Wilkinson.)

Millar, Charles, Vancouver, British Columbia, Canada. Automobile-signal. No. 1,349,289; Aug. 10; v. 277; p. 278.

Miller, Albert W., assignor of one-half to E. C. Bryan, Riverside, Calif. Coil-forming machine. No. 1,349,903; Aug. 17; v. 277; p. 470.

Miller, Alfred H., Philadelphia, Pa., assignor to Wright Roller Bearing Company. Assembling antifriction-bearings. No. 1,350,325; Aug. 24; v. 277; p. 598.

Miller, Edward, Columbus, Ohio, assignor to C. J. Root, Terre Haute, Ind. Glass-working machine. No. 1,350,375; Aug. 24; v. 277; p. 608.

Miller, Edwin, Hartford, Conn. Electric sadiron. No. 1,351,054; Aug. 31; v. 277; p. 802.

Miller, Edwin E., Tyrone, Pa. Shield for wheels. No. 1,351,261; Aug. 31; v. 277; p. 842.

Miller, Elton W., Washington, D. C. Gas-mask. No. 1,348,819; Aug. 3; v. 277; p. 132.

Miller, Ernest A. F., Jr. (See Miller, William L., and E. A. F., Jr.)

Miller, Harry M., Milwaukee, Wis. Outlet-valve. No. 1,348,233; Aug. 3; v. 277; p. 21.

Miller, Henry S., Washington, D. C. Perforating-rule. No. 1,351,002; Aug. 24; v. 277; p. 729.

Miller, John H. K., Clapham, London, S., England. Divider, caliper, and like instrument. No. 1,350,511; Aug. 24; v. 277; p. 635.

Miller, Oscar L. (See Hahn, L. R., and Miller.)

Miller Rubber Company, The. (See Willis, Glenn H., assignor.)

Miller, Samuel H., La Junta, Colo. Latch. No. 1,351,300; Aug. 31; v. 277; p. 851.

Miller, Solomon M., Chicago, Ill. Hair-clipper. No. 1,348,293; Aug. 3; v. 277; p. 32.

Miller, Walter H., Orange, N. J. Phonograph. No. 1,350,616; Aug. 24; v. 277; p. 656.

Miller, William L., and E. A. F., Jr., assignors of one-third to N. A. Cooke, Coffeyville, Kans. Direction-signal for automobiles. No. 1,350,463; Aug. 24; v. 277; p. 626.

Miller, Wilmer W., Ardmore, Pa. Alarm device. No. 1,349,004; Aug. 17; v. 277; p. 470.

Milliken, Foster, *et al.*, trustees. (See Milliken, Foster, assignor.)

Milliken, Foster, Lawrence, N. Y., assignor to F. Milliken, S. F. Weaver, and J. M. Ripplier, trustees. Alloy. No. 1,350,166; Aug. 17; v. 277; p. 521.

Milliken, Foster, Lawrence, N. Y., assignor to Foster Milliken, S. F. Weaver, and J. M. Kepplier, trustees. Alloy. No. 1,351,673; Aug. 31; v. 277; p. 925.

Mills, Arthur, Sacramento, Calif. Vehicle-wheel. No. 1,350,617; Aug. 24; v. 277; p. 656.

Mills, Byron T., Las Vegas, N. Mex. Copy-holder. No. 1,349,905; Aug. 17; v. 277; p. 471.

Mills, Claud E., Des Moines, Iowa. Front-end-suspension structure for self-propelled vehicles. No. 1,348,512; Aug. 3; v. 277; p. 74.

Milne, George G., Rye, and J. L. Creveling, White Plains, N. Y., assignors to Gould Coupler Company. Electric regulation. No. 1,351,055; Aug. 31; v. 277; p. 803.

Milwaukee Corrugating Company. (See Luedke, August J., assignor.)

Miner, Carl S., assignor to Quaker Oats Company, Chicago, Ill. Alimentary paste. No. 1,349,524; Aug. 10; v. 277; p. 324.

Minerals Separation North American Corporation. (See Cole, David, assignor.)

Mingle, John R., Anthony, Kans. Corn-header. No. 1,349,847; Aug. 17; v. 277; p. 460.

Minneapolis Threshing Machine Co. (See Hill, Chauncy H., assignor.)

Misener & Irving Manufacturing Co. (See Misener, John I., assignor.)

Misener, John I., assignor to Misener & Irving Manufacturing Co. Inc., Syracuse, N. Y. Conduit-seal. No. 1,351,724; Aug. 31; v. 277; p. 934.

Missouri, John M., Montrose, Minn. Air force-pump. No. 1,351,397; Aug. 31; v. 277; p. 871.

Mitchell, Ernest R., Philadelphia, Pa. Door rabbet-strip. No. 1,350,108; Aug. 17; v. 277; p. 510.

Mitchell, Eugene F., Spokane, Wash. Folding table. No. 1,349,687; Aug. 17; v. 277; p. 429.

Mitchiner, James I., Atlanta, Ga. Relay-armature. No. 1,351,674; Aug. 31; v. 277; p. 925.

Moats, Ortus E., Chicago, and J. D. Benbow, Aurora, assignors to Western Wheeled Scraper Company, Aurora, Ill. Dump-car. No. 1,351,114; Aug. 31; v. 277; p. 813.

Mock, Hugo, New York, N. Y. Heat-insulating device. No. 1,349,727; Aug. 17; v. 277; p. 437.

Mock, James C., and B. F. Williston, Detroit, Mich., assignors to J. M. Fitzgerald, River Forest, Ill. Lock. No. 1,348,234; Aug. 3; v. 277; p. 21.

Model Form Company. (See Luery, M., and Nelson, assignors.)

Modrell, Arthur E., near Saxton, Mo. Automatic tractor-oiler. No. 1,350,559; Aug. 24; v. 277; p. 645.

Moeller, Joseph F., assignor to Moeller Machine Company, Chicago, Ill. Jack-truck. No. 1,348,294; Aug. 3; v. 277; p. 33.

Moeller Machine Company. (See Moeller, Joseph F., assignor.)

Moffat, James W., Toronto, Ontario, Canada. Process and apparatus for the reduction of metallic oxid ores. No. 1,348,889; Aug. 10; v. 277; p. 198.

Moffatt, James R., Chicago, Ill., assignor to Union Special Machine Company. Stitch-forming mechanism for sewing-machines. No. 1,350,326; Aug. 24; v. 277; p. 598.

Moffatt, James R., and R. S. Kelso, assignors to Union Special Machine Company, Chicago, Ill. Loop-retainer for sewing-machines. No. 1,350,931; Aug. 24; v. 277; p. 715.

Moffett, Thomas S., assignor of one-half to A. O. Johnson, Walla Walla, Wash. Weeding implement. No. 1,348,438; Aug. 3; v. 277; p. 61.

Moir, Mabel, San Francisco, Calif. Bed. No. 1,350,827; Aug. 24; v. 277; p. 598.

Moir, William, Chicago, Ill. Toy vehicle. No. 1,350,232; Aug. 17; v. 277; p. 534.

Monahan, Thomas G. (See Cupp, Harry N., assignor.)

Monahan, William P., *et al.* (See Bonney, Bick R., assignor.)

Monarch Metal Products Company. (See Lane, Alfred M., assignor.)

Money, William C., assignor of one-half to H. Bogorad, Washington, D. C. Lighting attachment for phonographs. No. 1,351,675; Aug. 31; v. 277; p. 925.

Monroe Calculating Machine Company. (See Phinney, Edgar E., assignor.)

Monroe, William, Hooper, Nebr. Clasp-hook. No. 1,350,033; Aug. 17; v. 277; p. 495.

Montgomery, James W., Thomasville, Ga. Combined harrow and cultivator. No. 1,350,876; Aug. 24; v. 277; p. 608.

Moody, Philip E., *et al.* (See Hachmann, Frederick, assignor.)

Mook, Joseph O., Kankakee, Ill. Traction attachment for automobiles. No. 1,349,083; Aug. 10; v. 277; p. 236.

Moon, Frank, Oakland, Calif., assignor to Moon Tractor Co., San Francisco, Calif. Transmission mechanism for tractors. No. 1,351,485; Aug. 31; v. 277; p. 888.

Moon, John C., St. Louis, Mo. Pump. No. 1,349,218; Aug. 10; v. 277; p. 263.

Moon Tractor Co. (See Moon, Frank, assignor.)

Mooney, Dermot J. (See Brown, E. E., and Mooney.)

Mooney, William H., Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company. Ignition apparatus. No. 1,348,368; Aug. 3; v. 277; p. 47.

Moore, Asbury, Seneca, S. C. Plow. No. 1,349,623; Aug. 17; v. 277; p. 416.

Moore Brothers Company. (See Dabrowski, Joseph M., assignor.)

Moore, George R., and C. S. Leonard, Philadelphia, Pa. Pipe-bender. No. 1,349,219; Aug. 10; v. 277; p. 263.

Moore, Julius B., Durango, Colo. Shock-absorber for automobiles and other vehicles. No. 1,349,781; Aug. 17; v. 277; p. 447.

Moore, Lee R. (See Manning, R. B., and Moore.)

Moore, Lena C., Binghamton, N. Y. Kettle-cover drainer and holder. No. 1,349,084; Aug. 10; v. 277; p. 237.

Moore, Roy W., Schenectady, N. Y., assignor to General Electric Company. Making silicon tetrachlorid. No. 1,350,932; Aug. 24; v. 277; p. 716.

Moore, Walter A., Welland, Ontario, Canada. Rolling-perspective rule. No. 1,348,655; Aug. 3; v. 277; p. 102.

Moosmann, Paul, Brooklyn, N. Y. Watchman's time-detector. No. 1,351,056; Aug. 31; v. 277; p. 803.

Moran, John L., Worcester, Mass., assignor to Heald Machine Company. Magnetic chuck. No. 1,349,343; Aug. 10; v. 277; p. 288.

Morey, Worthie W., Columbus, Ohio. Ventilator. No. 1,348,513; Aug. 3; v. 277; p. 74.

Morgan, Alfred M. (See Anderson, A. V., and Morgan.)

Morgan, Henry S., assignor to Pouvailsmith Corporation, Poughkeepsie, N. Y. Cap for automobile-radiators and the like. No. 1,349,137; Aug. 10; v. 277; p. 247.

Morgan, John D., assignor to Steel Utilities, Summit, N. J. Metal-punching machine. No. 1,349,975; Aug. 17; v. 277; p. 484.

Morgan, Lewis H., assignor to The American Auto Alarm Company, Cleveland, Ohio. Audible alarm for vehicles. No. 1,349,467; Aug. 10; v. 277; p. 312.

Morgan & Wright. (See Jury, Alfred E., assignor.)

Morgan & Wright. (See Meyer, Edwin E. A. G., assignor.)

Morrill, Alfred R., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Inseam sewing-machine. No. 1,350,377; Aug. 24; v. 277; p. 608.

Morris, Harry F., Collingswood, N. J. Forced-draft water-grate. No. 1,348,235; Aug. 3; v. 277; p. 21.

Morrison, Alfred J., Denver, Colo., assignor to Stokes & Smith Company, Summerdale, Philadelphia, Pa. Extension-bottom-box-wrapping apparatus. No. 1,348,369; Aug. 3; v. 277; p. 47.

Morrison, Andrew, Pittsburgh, Pa., assignor to Dilworth Porter & Company, Pittsburgh, Pa. Tie-plate. No. 1,348,370; Aug. 3; v. 277; p. 48.

Morrison, Walter L., Los Angeles, Calif. Process and apparatus for reducing metallic oxids. No. 1,350,419; Aug. 24; v. 277; p. 617.

Morrison, William F., Vallejo, Calif. Concrete tie. No. 1,350,420; Aug. 24; v. 277; p. 617.

Morrison, William N., St. Louis, Mo. Key-ring holder. No. 1,349,468; Aug. 10; v. 277; p. 313.

Morrow, Samuel W., Baltimore, Md. Burner. No. 1,348,574; Aug. 3; v. 277; p. 86.

Morrow, Samuel W., assignor to The Reus Bros. Company, Baltimore, Md. Piston packing-ring. No. 1,349,728; Aug. 17; v. 277; p. 437.

Morse Instrument Company. (See Morse, Robert V., assignor.)

Morse, Robert V., assignor to Morse Instrument Company, Inc., Ithaca, N. Y. Automatic fuse-setter for anti-aircraft artillery. No. 1,349,220; Aug. 10; v. 277; p. 264.

Morse, William F., assignor to S. R. Parry, Rochester, N. Y. Adjustable cutting-knife. No. 1,351,115; Aug. 31; v. 277; p. 813.

Morse, William F., assignor to S. R. Parry, Rochester, N. Y. Corner-cutter. No. 1,351,116; Aug. 31; v. 277; p. 814.

Morse, Willis S., New York, N. Y., and C. T. Evans, Milwaukee, Wis. Circuit-controller. No. 1,351,184; Aug. 31; v. 277; p. 827.

Mosby, Alfred D., assignor to Equipment Corporation of America, Chicago, Ill. Mixing-machine. No. 1,351,725; Aug. 31; v. 277; p. 934.

Moses, Harry S., Hubbard Woods, Ill. Undergarment. No. 1,349,976; Aug. 17; v. 277; p. 484.

Mosler, Moses, Cincinnati, and C. Bartels, Hamilton, Ohio, assignors to The Mosler Safe Company, New York, N. Y. Vault-vestibule. No. 1,349,138; Aug. 10; v. 277; p. 247.

Mosler Safe Company, The. (See Mosler, M., and Bartels, assignors.)

Mosley, Charles W., Hollywood, Calif. Milk-bottle cover. No. 1,350,167; Aug. 17; v. 277; p. 521.

Motor Terminals Company. (See Fitch, Benjamin F., assignor.)

Motto, Joseph M. (See Dolan, John P., assignor.)

Motz, Charles F., Monaca, Pa. Sand-blast machine. No. 1,351,581; Aug. 31; v. 277; p. 907.

Moulder, Duncan, San Antonio, Tex. Steering-adjuster for automobiles. No. 1,349,460; Aug. 10; v. 277; p. 313.

Mouldin, George W., Danville, Ill. Motorcycle. No. 1,350,878; Aug. 24; v. 277; p. 705.

Mount Carmel Brass Foundry Works. (See Somers, William A., assignor.)

Mount, Thomas L., New York, N. Y. System for charging storage batteries. No. 1,348,236; Aug. 3; v. 277; p. 21.

Mouse, Harold E., Elkins, W. Va. Dirigible headlight. No. 1,349,085; Aug. 10; v. 277; p. 237.

Movnessian, Missak. (See Vincent, Joseph E., assignor.)

Mowatt, Alexander, Warkworth, assignor, by direct and mesne assignments, of one-third to J. H. E. Vrooman, one-third to B. Asselstine, and one-third to E. Mastin, Belleville, Ontario, Canada. Harrow for eliminating quack-grass and the like. No. 1,350,512; Aug. 24; v. 277; p. 635.

Moyer, Fredelia H., Westmont borough, Pa. Side frame. No. 1,349,624; Aug. 17; v. 277; p. 417.

Moyle, Henry D., *et al.* (See Watanabe, Bunzo, assignor.)

Mueller, Adolph, trustee. (See Mueller, Philip, assignor.)

Mueller, Albert B., Chicago, Ill. Picture-projection apparatus. No. 1,348,656; Aug. 3; v. 277; p. 102.

Mueller, August, New York, N. Y. Hatband-loom. No. 1,351,533; Aug. 31; v. 277; p. 897.

Mueller, Peter J. O., Peoria, Ill. Signaling device for vehicles. No. 1,351,532; Aug. 31; v. 277; p. 897.

Mueller, Philip, assignor to A. Mueller, trustee, Decatur, Ill. Fuller-ball. No. 1,350,378; Aug. 24; v. 277; p. 608.

Muentnich, Fred A. (See Tiemann, George, assignor.)

Mulinex, Chase, Tolley, N. D. Rotary engine. No. 1,350,168; Aug. 17; v. 277; p. 521.

Mulkern, John J., Cambridge, Mass. Wall bolt-holder. No. 1,349,977; Aug. 17; v. 277; p. 485.

Mulkern, Thomas A., Hollywood, assignor of one-half to C. E. Kerlee, Los Angeles, Calif. Vaporizer for internal-combustion engines. No. 1,350,079; Aug. 17; v. 277; p. 504.

Mullane, James P., Cambridge, Mass. Shirt. No. 1,350,169; Aug. 17; v. 277; p. 521.

Muller, Frank. (See Koval, Martin M., assignor.)

Müller, Friederich, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Milling-cutter. No. 1,348,295; Aug. 3; v. 277; p. 33.

Müller, Friederich, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Making milling-cutters. No. 1,348,296; Aug. 3; v. 277; p. 33.

Poole, Arthur F., Chicago, Ill. Speedometer. No. 1,351,585; Aug. 31; v. 277; p. 908.

Pope, Frederick J., New Rochelle, assignor to W. B. Thompson, Yonkers, N. Y. Illumination of pictures. No. 1,348,957; Aug. 10; v. 277; p. 212.

Popper, Isaac C., assignor to The Theros Company, New York, N. Y. Grill-stove. No. 1,351,682; Aug. 31; v. 277; p. 926.

Porter Chemical Company, The. (See Porter, Harold M., assignor.)

Porter, Harold M., Hagerstown, Md., assignor to The Porter Chemical Company. Educational device. No. 1,350,237; Aug. 17; v. 277; p. 535.

Porter, Henry K., Brookline, Mass. Cutting-tool. No. 1,348,735; Aug. 3; v. 277; p. 117.

Porter, James C. (See Stanley, J., and Porter.)

Porter, Wilson E., New Haven, Conn., assignor to New Haven Clock Co. Removable self-holding washer for clock-movements. No. 1,348,517; Aug. 3; v. 277; p. 75.

Posson, Edward, Chicago, Ill. Pneumatic-tire drive for dynamos of railway-cars. No. 1,350,467; Aug. 24; v. 277; p. 627.

Post, Elisha A., and E. F. Schmitz, Allegan, Mich. Burial-casket. No. 1,348,579; Aug. 3; v. 277; p. 87.

Post, Landon E., and D. A. Riedy, San Francisco, Calif. Dehydrating plant. No. 1,349,908; Aug. 17; v. 277; p. 471.

Postel-Vinay, Pierre J. R., assignor to Societe Des Moteurs Salmson. (Systeme Canton-Unne.) Paris, France. Magneto-frame. No. 1,349,962; Aug. 17; v. 277; p. 430.

Pottenger, Thomas T. (See Webb, G. C., and Pottenger.)

Potwin, George H., assignor to Accounting Devices Company, Chicago, Ill. Loose-leaf device. No. 1,351,487; Aug. 31; v. 277; p. 888.

Pouvaillsmith Corporation. (See Morgan, Henry S., assignor.)

Povelsen, Ingild, Washington, D. C. Compensating balance-wheel. No. 1,350,035; Aug. 17; v. 277; p. 486.

Powell, R. E. (See Marshall, Chilton M., assignor.)

Powell, Winfred T., assignor to Automatic Electric Company, Chicago, Ill. Automatic telephone system. No. 1,350,882; Aug. 24; v. 277; p. 706.

Pratt, Elmer M., and A. H. Rockefeller, Macksville, Kans.; said Pratt assignor to said Rockefeller. Portable nest structure. No. 1,350,264; Aug. 17; v. 277; p. 540.

Pratt & Whitney Company. (See Müller, Friederich, assignor.)

Pratt & Whitney Company. (See Thacker, John J., assignor.)

Pratt, William B., Wellesley, assignor to E. H. Clapp Rubber Company, Boston, Mass. Sulfur-terpene compound. No. 1,349,909; Aug. 17; v. 277; p. 471.

Pratt, William B., Wellesley, assignor to E. H. Clapp Rubber Company, Boston, Mass. Waterproofed fabric. No. 1,349,910; Aug. 17; v. 277; p. 471.

Pratt, William B., Wellesley, assignor to E. H. Clapp Rubber Company, Boston, Mass. Vulcanized article and producing same. No. 1,349,911; Aug. 17; v. 277; p. 472.

Pratt, William B., Wellesley, assignor to E. H. Clapp Rubber Company, Boston, Mass. Article and bonding metal and vulcanized rubber. No. 1,349,912; Aug. 17; v. 277; p. 472.

Pratt, William B., Wellesley, assignor to E. H. Clapp Rubber Company, Boston, Mass. Pneumatic tire and making same. No. 1,349,913; Aug. 17; v. 277; p. 472.

Pratt, William B., Wellesley, assignor to E. H. Clapp Rubber Company, Boston, Mass. Solid tire and making same. No. 1,349,914; Aug. 17; v. 277; p. 472.

Prebble, Andrew, Altoona, Kans. Game apparatus. No. 1,348,442; Aug. 3; v. 277; p. 61.

Press, Earle P., Lake Bluff, Ill. Reinforced concrete construction. No. 1,348,445; Aug. 3; v. 277; p. 62.

Press, Jacob H., Chicago, Ill. Motor-vehicle. No. 1,348,241; Aug. 3; v. 277; p. 22.

Pressed Metal Radiator Company. (See Sonneborn, Charles, assignor.)

Pressed Steel Car Company. (See Lockwood, Burns D., assignor.)

Pressed Steel Car Company. (See Lockwood, B. D., and Suckfield, assignors.)

Prest-O-Lite Company, The. (See Noble, I. M., and Gossling, assignors.)

Preston, Edward S., Chicago, Ill. Dashboard lamp-socket. No. 1,348,893; Aug. 10; v. 277; p. 199.

Pribil, Alexis R., Cleveland, Ohio. Making connecting-rods. No. 1,350,177; Aug. 17; v. 277; p. 523.

Pribil, Alexis R., Saginaw, Mich. Making connecting-rods. No. 1,350,178; Aug. 17; v. 277; p. 523.

Price, Nathan H., Shannon, Ala. Pipe. No. 1,351,683; Aug. 31; v. 277; p. 927.

Price, Walter B., Los Angeles, Calif., and E. Dietz, New Orleans, La. Apparatus for continuously cracking oils. No. 1,349,294; Aug. 10; v. 277; p. 279.

Price, William E. (See Pennefather, James S., assignor.)

Price, William T., New Rochelle, assignor to De La Vergne Machine Company, New York, N. Y. Combustion-engine. No. 1,351,718; Aug. 31; v. 277; p. 933.

Pridgen, Wiley H., Creek, N. C. Compressed-air device for handling gasolene. No. 1,350,517; Aug. 24; v. 277; p. 636.

Priest, Edward D., assignor to General Electric Company, Schenectady, N. Y. Commutator for dynamo-electric machines. No. 1,349,854; Aug. 17; v. 277; p. 461.

Prince, Clarence K., Westfield, Mass. Pipe-flange-turning machine. No. 1,349,434; Aug. 10; v. 277; p. 306.

Prince, John. (See Nilson, J. L., and Prince.)

Prisbrey, George W., assignor of one-third to Grant Prisbrey, St. George, Utah. Artificial leg. No. 1,350,518; Aug. 24; v. 277; p. 637.

Prisbrey, Grant. (See Prisbrey, G. W., assignor.)

Pritelli, Vincenzo, Rome, Italy. Airship. No. 1,351,301; Aug. 31; v. 277; p. 851.

Prisma Incorporated. (See Kelley, W. V. D., and Mason, assignors.)

Process Company, The. (See Coast, John W., Jr., assignor.)

Pröstler, Norbert, assignor, by mesne assignments, to The Chemical Foundation, Inc., Berlin, Germany. Method and apparatus for uniting together pieces of brass, aluminium, and similar metals or alloys by electric-resistance heating. No. 1,351,684; Aug. 31; v. 277; p. 927.

Providence Stock Company. (See Lederer, S. L., and Meyer, assignors.)

Prud'homme, Hippolyte M., assignor to L. F. Sherman, trustee, Boston, Mass. Method of and apparatus for producing stereoscopic motion-picture films. No. 1,350,886; Aug. 24; v. 277; p. 698.

Pruitt, Orin M., assignor to Indiana Air Pump Company, Indianapolis, Ind. Air-lift separator-pump. (Reissue.) No. 14,937; Aug. 24; v. 277; p. 730.

Pugniet, Paul, Paris, France. Stocking-suspender. No. 1,348,444; Aug. 3; v. 277; p. 62.

Pukell, Joseph M., Duluth, Minn. Pipe-flange wrench. No. 1,350,519; Aug. 24; v. 277; p. 637.

Purvis, George, Port Huron, Mich. Blow-off for boilers. No. 1,351,586; Aug. 31; v. 277; p. 908.

Putnam, Charlotte M., Falls City, Nebr. Reversible hand-covering. No. 1,351,685; Aug. 31; v. 277; p. 927.

Quaglia, Alberto. (See Lopez, G. M., and Quaglia.)

Quaker Oats Company. (See Miner, Carl S., assignor.)

Quast, Bruno, Cöln-Deutz, Germany. Block and bar shears. No. 1,349,915; Aug. 17; v. 277; p. 472.

Quick, Claude J., Pulaski, N. Y. Leaf-spring. No. 1,348,446; Aug. 3; v. 277; p. 62.

Quilty, John J. (See Bishop, William J., assignor.)

Quinan, Kenneth B., Somerset West, Cape Province, South Africa. Production of sulfuric acid. No. 1,348,736; Aug. 3; v. 277; p. 117.

Quinn, Patrick H., Somerville, Mass. Container. No. 1,351,187; Aug. 31; v. 277; p. 828.

Quintin, Clarence E., assignor to L. W. Riddle, Glen Riddle, Pa. Oil-cup. No. 1,349,098; Aug. 10; v. 277; p. 239.

Racolock Company, The. (See Raccio, Pasquale, assignor.)

Raccio, Pasquale, assignor to The Racolock Company, New Haven, Conn. Latch. No. 1,351,686; Aug. 31; v. 277; p. 927.

Radtke, Albert A., Chicago, Ill. Method of and means for establishing electrical circuits. No. 1,350,334; Aug. 24; v. 277; p. 600.

Ragona, Vincent. (See Cory, S. C., and Ragona.)

Rahne, Rudolf G. N., Gottenborg, Sweden. Finger-board for violins. No. 1,348,894; Aug. 10; v. 277; p. 200.

Rail Joint Company, The. (See McCaulley, Charles G., assignor.)

Rail, Lee, and W. Hebern; said Hebern assignor of one-fourth to E. J. McLaughlin and one-fourth to J. F. Sullivan, San Francisco, Calif. Steering-wheel mounting. No. 1,350,841; Aug. 24; v. 277; p. 699.

Ralston, Jasper N., Fitzgerald, Ga. Steam-boiler ash-pan. No. 1,348,737; Aug. 3; v. 277; p. 117.

Steinberger, Louis, Brooklyn, N. Y. Insulating-knob. No. 1,348,249; Aug. 3; v. 277; p. 24.
Steinmetz, Joseph A., Philadelphia, Pa. Submarine-destroying bomb. No. 1,349,014; Aug. 10; v. 277; p. 223.
Steinmetz, Robert, assignor of one-tenth to S. S. Amdursky, Rochester, N. Y. Cushion-cover for seats and backs of chairs. No. 1,349,347; Aug. 10; v. 277; p. 289.

Steinrok, Charles L., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Manufacture of treated stone. No. 1,349,389; Aug. 10; v. 277; p. 298.

Stelting, Carl W., assignor of one-half to C. B. Nelson, Medford, Okla. Gear-puller for automobiles and all other kinds of machinery. No. 1,351,307; Aug. 31; v. 277; p. 852.

Stenger, Francis J., assignor of one-half to L. J. Goyette, Detroit, Mich. Ball-joint piston-connecting rod. No. 1,350,747; Aug. 24; v. 277; p. 681.

Stephens, Richard H., assignor of one-half to Kynoch Limited, Birmingham, England. Vapor-stove. No. 1,348,759; Aug. 3; v. 277; p. 121.

Stephenson, Leonard D., New York, N. Y., assignor, by mesne assignments, to Paper Bottle and Can Company, Inc., Wilmington, Del. Machine for capping multisided paper bottles. No. 1,349,283; Aug. 10; v. 277; p. 267.

Stephenson, Leonard D., New York, N. Y., assignor, by mesne assignments, to American Paper Bottle and Can Company, Inc., Wilmington, Del. Machine for capping multisided paper bottles. No. 1,349,234; Aug. 10; v. 277; p. 267.

Stereoscopic Motion Picture Company. (See Ball, Waldon S., assignor.)

Sterling Manufacturing Company. (See Danke, Arthur E., assignor.)

Stern, Adolf, assignor to F. W. Stewart Mfg. Co., Chicago, Ill. Piston-ring and the like. No. 1,350,849; Aug. 24; v. 277; p. 700.

Stern, Morris J., Brooklyn, N. Y. Food-service cabinet. No. 1,349,634; Aug. 17; v. 277; p. 419.

Sterns, Edward, St. Louis, Mo., assignor, by mesne assignments, to Surety Tire & Rubber Company, Wilmington, Del. Tire-making device. No. 1,348,596; Aug. 3; v. 277; p. 91.

Stevens Brothers. (See Stevens, Robert H., assignor.)

Stevens, Frederick M., New York, N. Y., assignor to John Chatillon & Sons. Method and apparatus for wiring coil-springs. No. 1,351,448; Aug. 31; v. 277; p. 881.

Stevens, Frederick M., New York, N. Y., assignor to John Chatillon & Sons. Scale. No. 1,351,449; Aug. 31; v. 277; p. 881.

Stevens, George H., Woodbury Heights, N. J. Gas-burner. No. 1,350,678; Aug. 24; v. 277; p. 667.

Stevens, J. E., Company, The. (See Lorents, Hermann G., assignor.)

Stevens, Lawrence V., Pittsburgh, Pa. Push-pole for locomotives. No. 1,349,985; Aug. 17; v. 277; p. 486.

Stevens, Robert H., Larchmont, assignor to Stevens Brothers, New York, N. Y. Emulsifier. No. 1,351,352; Aug. 31; v. 277; p. 862.

Stevenson, Ashton G., New York, N. Y., assignor to Chicago Lino-Tabler Company, Chicago, Ill. Ruled printing-form. No. 1,349,536; Aug. 10; v. 277; p. 326.

Stevenson, Charles M., Rockford, Ill. Stanchion-fastener and shock-absorber. No. 1,350,679; Aug. 24; v. 277; p. 668.

Stevenson, John S., Baltimore, Md. Spark-indicator and plug-tester. No. 1,348,456; Aug. 3; v. 277; p. 64.

Steward Davit & Equipment Corporation. (See Hills, Harry B., assignor.)

Stewart, Arthur L. (See Gleason, J. E. and Stewart.)

Stewart, Clarence R., Spokane, Wash. Game apparatus. No. 1,348,597; Aug. 3; v. 277; p. 91.

Stewart, F. W., Mfg. Co. (See Stern, Adolf, assignor.)

Stewart, Franklin W., Chicago, Ill. Roller-bearing. No. 1,350,680; Aug. 24; v. 277; p. 668.

Stewart, Perez M. (See Hubbard, Norman, assignor.)

Stewart, Richard M., Chicago, Ill. Can-opener. No. 1,348,760; Aug. 3; v. 277; p. 121.

Stewart, William C., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Sole-preparing machine. No. 1,349,740; Aug. 17; v. 277; p. 440.

Stickney, Burnham C., Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting-machine. No. 1,349,015; Aug. 10; v. 277; p. 223.

Stickney, Burnham C., Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting-machine. No. 1,349,016; Aug. 10; v. 277; p. 223.

Stickney, Burnham C., Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Printing-press. No. 1,349,861; Aug. 17; v. 277; p. 463.

Stickney, Burnham C., Elizabeth, N. J., and A. A. Johnson, assignors to Underwood Typewriter Company, New York, N. Y. Typewriting-machine. No. 1,350,681; Aug. 24; v. 277; p. 668.

Stiefel, Herman, *et al.* (See Hachmann, Frederick, assignor.)

Stiles, Luster, Jr., Evansville, Ind. Oil-atomizer. No. 1,350,391; Aug. 24; v. 277; p. 611.

Stimatze, John B., St. John, Kans. Rail-lifter. No. 1,351,705; Aug. 31; v. 277; p. 931.

Stine, George E., Los Angeles, Calif. Folding furniture. No. 1,351,013; Aug. 24; v. 277; p. 731.

Stitt, Orlando, Toledo, Ill. Safety-drive for harvester-reels. No. 1,350,643; Aug. 17; v. 277; p. 497.

Stitzer, William E., Muskogee, Okla. Attachment for internal-combustion engines. No. 1,351,706; Aug. 31; v. 277; p. 921.

Stobs, Thomas, and W. Lightell, Maywood, Ill. Signaling-lamp for motor-vehicles. No. 1,350,682; Aug. 24; v. 277; p. 668.

Stockdale, Dorsey M., Carmichaels, Pa. Hatpin. No. 1,350,945; Aug. 24; v. 277; p. 718.

Stockdale, Dorsey M., Ellenboro, W. Va. Reel. No. 1,350,946; Aug. 24; v. 277; p. 718.

Stocker, William H., Philadelphia, Pa. Wicker-panel. No. 1,349,477; Aug. 10; v. 277; p. 314.

Stoker, Henry L., New York, N. Y. Dog-muzzle. No. 1,351,140; Aug. 31; v. 277; p. 819.

Stokes, Reuben C., and J. C. Conrad, Cement, Okla. Reducing-valve. No. 1,349,448; Aug. 10; v. 277; p. 308.

Stokes, & Smith Company. (See Morrison, Alfred J., assignor.)

Stolle, Georg. (See Gall, F., and Stolle.)

Stolpe, Frederick J. (See Klasing, Augustus F., assignor.)

Stoltman, John A., Minto, N. D. Printing-machine. No. 1,348,330; Aug. 3; v. 277; p. 40.

Stone, Albert, Seattle, Wash. Condiment-holder. No. 1,350,120; Aug. 17; v. 277; p. 512.

Stone, Edward L. (See Bates, W. B., and Stone.)

Stone, Ernest V., Los Angeles, Calif. Apparatus for distilling mineral oil. No. 1,351,266; Aug. 31; v. 277; p. 844.

Stone, Harry A., *et al.*, trustees. (See Jones, Walter J., assignor.)

Stone, J., & Company. (See Rohman, Harry D., assignor.)

Stone, John. (See Barnhill, E. B., and Stone.)

Stone, John A., Derry, N. H., assignor to I. L. Keith, Haverhill, Mass. Press-board for stacks of soles. No. 1,348,521; Aug. 3; v. 277; p. 75.

Story, John T., New York, N. Y. Hair insole. No. 1,351,726; Aug. 31; v. 277; p. 934.

Stone, Melvin L., Lawrence, assignor to Draper Corporation, Hopedale, Mass. Feeler-loom. No. 1,350,121; Aug. 17; v. 277; p. 512.

Stone, William, New York, N. Y. Purse. No. 1,350,980; Aug. 24; v. 277; p. 725.

Stoner, Winifred S., assignor to Newark Paraffine & Parchment Paper Co., New York, N. Y. Candy-wrapper. No. 1,348,761; Aug. 3; v. 277; p. 121.

Stout, Oscar M., Brooklyn, N. Y. Chocolate-developing machinery. No. 1,349,235; Aug. 10; v. 277; p. 267.

Stoute, Arthur L. P., *et al.*, executors. (See Stoute, Richard A., assignor.)

Stoute, Richard A., deceased, Branksmere, Barbados, British West Indies; J. G. C. Ward and A. L. P. Stoute, executors. Wheel-spoke-repair means. No. 1,350,528; Aug. 24; v. 277; p. 689.

Stowell, Edward R., Portland, Ind., assignor to Stowell Fireproofing Company, Manistee, Mich. Making an insulating and protective coating. No. 1,350,843; Aug. 24; v. 277; p. 601.

Stowell Fireproofing Company. (See Stowell, Edward R., assignor.)

Strachan, George C., Detroit, Mich. Bathtub. No. 1,348,250; Aug. 3; v. 277; p. 24.

Stradley, Leighton P., *et al.*, trustees. (See Jones, Walter J., assignor.)

Straka, Jaroslav, Chicago, Ill. Toy. No. 1,351,450; Aug. 31; v. 277; p. 881.

Strang, Harry B., London, England. Armor-piercing projectile. No. 1,351,498; Aug. 31; v. 277; p. 890.

Strasser, Albert, Rorschach, Switzerland. Deoxidising copper and its alloys. No. 1,348,457; Aug. 3; v. 277; p. 64.

Strasser, Albert, Rorschach, Switzerland. Deoxidising aluminum and its alloys. No. 1,348,458; Aug. 3; v. 277; p. 64.

Stratton, William T., Billings, Mont. Pump attachment for automobiles. No. 1,350,122; Aug. 17; v. 277; p. 512.

Straubel, F. L. G., Green Bay, Wis. Desk-drawer file. No. 1,350,186; Aug. 17; v. 277; p. 525.

Strawn, William H., *et al.* (See Blackwell, Henry F., assignor.)

Streibich, J. C., and G. F. Gruver, Little Rock, Ark. Submersible water-power device. No. 1,350,187; Aug. 17; v. 277; p. 525.

Streichik, Michael, Glenfield, N. Y. Train-operated railway-gate. No. 1,349,986; Aug. 17; v. 277; p. 486.

Stremel, Joseph, assignor of one-half to E. Asher, Spokane, Wash. Sewer-pipe construction. No. 1,348,332; Aug. 3; v. 277; p. 40.

Stretch, Arthur J., Seattle, Wash. Hinge. No. 1,348,598; Aug. 3; v. 277; p. 91.

Strickland, Frank M. (See Kennedy, George D., assignor.)

Strietelmeier, John E., assignor to The Ideal Wheel Company, Cincinnati, Ohio. Spring-wheel. No. 1,348,834; Aug. 3; v. 277; p. 135.

Stringer, Melvin, Cleveland, assignor of one-fourth to G. T. Bauder and one-fourth to A. E. Merkel, Cleveland, Ohio. Brake mechanism for vehicles. No. 1,348,331; Aug. 3; v. 277; p. 40.

Stringfellow, Henry A., and E. W. Templin, Rochester, N. Y. Steam-engine. No. 1,350,625; Aug. 24; v. 277; p. 657.

Stringham, George R., assignor, by mesne assignments, to M. V. Kelley, trustee, New York, N. Y. Motion-picture camera. No. 1,350,683; Aug. 24; v. 277; p. 669.

Strobl, Frank. (See Sebring, F. A., and Strobl.)

Strohbach, Henry, New York, N. Y. Coffee-urn. No. 1,349,236; Aug. 10; v. 277; p. 267.

Stromberg-Carlson Telephone Manufacturing Company. (See Dean, William W., assignor.)

Strong, Annie W. S., *et al.* (See Harmon, Alton D., assignor.)

Strosaker, Charles J. (See Dow, H. H., and Strosaker.)

Stroud, William. (See Barr, A., Stroud, and d'Albe.)

Strumph, Isadore N., New York, N. Y. Detachable cuff for shirt-sleeves. No. 1,349,987; Aug. 17; v. 277; p. 486.

Stryhal, Joseph M., Washington, D. C., assignor of one-half to W. M. Manion, Philadelphia, Pa. Attachment for grinding screw-threaded articles. No. 1,350,044; Aug. 17; v. 277; p. 497.

Stuart, Francis L., Washington, D. C., assignor to International Conveyor Corporation, New York, N. Y. Reclaiming and conveying apparatus. No. 1,348,599; Aug. 3; v. 277; p. 91.

Stuart, George W., Bay Minette, Ala. Vine-cutter. No. 1,350,529; Aug. 24; v. 277; p. 639.

Stuart, Robert F., Kokomo, Ind. Box-marking machine. No. 1,351,353; Aug. 31; v. 277; p. 862.

Stungo, Joseph, New York, N. Y. Wheel and demountable-rim construction. No. 1,351,587; Aug. 31; v. 277; p. 908.

Stupar, Max, assignor to A. J. Elias, Buffalo, N. Y. Launching device for flying-machines. No. 1,350,947; Aug. 24; v. 277; p. 719.

Stupar, Max, assignor to Abraham J. Elias, Buffalo, N. Y. Detachable stabilizing-fin for flying-machines. No. 1,350,948; Aug. 24; v. 277; p. 719.

Sturtevant Mill Company. (See Sturtevant, Thomas J., assignor.)

Sturtevant, Thomas J., Wellesley, assignor to Sturtevant Mill Company, Boston, Mass. Separator. No. 1,350,626; Aug. 24; v. 277; p. 658.

Sturtevant, Thomas J., Wellesley, assignor to Sturtevant Mill Company, Boston, Mass. Crushing-roll machine. No. 1,350,748; Aug. 24; v. 277; p. 682.

Stutzke, R. W. G., assignor to The G. A. Buhl Company, Chicago, Ill. Desiccating milk and the like. No. 1,350,248; Aug. 17; v. 277; p. 537.

Stutzke, Richard W. G., assignor to Crown Maltose Company, Chicago, Ill. Desiccating fluid substances. No. 1,350,247; Aug. 17; v. 277; p. 536.

Stuyvesant Glass Company. (See Elmer, A., and Wiegand, assignors.)

Strait, William, Appleton, Wis., assignor to The Cleveland Tractor Company, Euclid, Ohio. Tractor-truck. No. 1,349,791; Aug. 17; v. 277; p. 449.

Strauss, Joseph B., Chicago, Ill. Reconnoitering apparatus. No. 1,349,635; Aug. 17; v. 277; p. 419.

Submarine Arms Corporation. (See Leathers, Ward G., assignor.)

Submarine Signal Company. (See Blake, Robert F., assignor.)

Submarine Signal Company. (See Fessenden, Reginald A., assignor.)

Suckfield, George A. (See Lockwood, B. D., and Suckfield.)

Sudderth, W. J. (See Horne, Henry M., assignor.)

Sugimura, Matthew Y., New York, N. Y. Independently-detachable undershade for light-standards. No. 1,349,478; Aug. 10; v. 277; p. 315.

Sullivan, Frank, Cusick, Wash. Portable irrigating device. No. 1,350,684; Aug. 24; v. 277; p. 669.

Sullivan, Joseph, *et al.* (See Real, L., and Hebern, assignors.)

Sullivan Machinery Company. (See Gilman, George H., assignor.)

Sullivan Machinery Company. (See Wyman, Charles W., assignor.)

Sullivan, Michael F., San Francisco, assignor to G. A. Margeson, San Jose, Calif. Indicator. No. 1,351,707; Aug. 31; v. 277; p. 931.

Summerhayes, Henry R. (See Craighead, James R., and Summerhayes.)

Sun, Woo L. (See Simpson, William M., assignor.)

Sunbeam Chemical Company. (See Cates, Leland C., assignor.)

Sundh, August, Hastings-on-Hudson, N. Y., assignor to Sundh Engineering and Machine Company, Philadelphia, Pa. Apparatus for treating metal strips. No. 1,349,444; Aug. 10; v. 277; p. 308.

Sundh Engineering and Machine Company. (See Sundh, August, assignor.)

Sundstrom, Carl, Detroit, Mich., assignor to The Solvay Process Company, Solvay, N. Y. Recovering constituents of value from natural alkaline deposits. No. 1,349,445; Aug. 10; v. 277; p. 308.

Sundstrom, Carl, Syracuse, N. Y., assignor to The Solvay Process Company, Solvay, N. Y. Recovering borax from solutions containing sodium borates. No. 1,349,446; Aug. 10; v. 277; p. 309.

Sundstrom, Carl, Syracuse, N. Y., assignor to The Solvay Process Company, Solvay, N. Y. Obtaining sodium bicarbonate from alkaline waters. No. 1,349,447; Aug. 10; v. 277; p. 309.

Surety Tire & Rubber Company. (See Sterns, Edward, assignor.)

Surface Combustion. (See Bone, W. A., Wilson, and McCourt, assignors.)

Surface Combustion Company, The. (See Eddison, William B., assignor.)

Sutter, Roser B. (See Dick, R. H., Wolters, and Sutter.)

Sutter, Roser B., assignor to Zenitherm Company, Newark, N. J. Waterproofed material and making same. No. 1,351,087; Aug. 31; v. 277; p. 808.

Suzuki, Sosaku, Tokyo, Japan. Combination spoon and fork. No. 1,348,762; Aug. 3; v. 277; p. 121.

Wisconsin Butterine Co., Milwaukee, Wis. "Besto Nut." (For a Spread for Bread.) No. 5,291; Aug. 17; v. 277; p 583.

DISCLAIMERS.

Greenstreet, Jason H., Indianapolis, Ind.; disclaimer filed by assignee, Wirebound Patents Company. Box-blank machine. No. 1,325,719; disclaimer filed July 28, 1920; v. 277; p. 398.

Ide, Harry L., Springfield, Ill.; disclaimer filed by assignee, Elmer Stewart. Automobiles. No. 861,183; disclaimer filed July 12, 1920; v. 277; p. 184.

Lambert, Eric, Kansas City, Mo.; disclaimer filed by patentee. Apparatus for drying wood veneer. No. 1,228,790; disclaimer filed July 23, 1920; v. 277; p. 398.

Lubberger, Fritz, Chicago, Ill.; disclaimer filed by assignee, Automatic Electric Company. Semi-automatic telephone-exchange system. No. 1,306,824; disclaimer filed July 15, 1920; v. 277; p. 185.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED DURING THE MONTH OF AUGUST, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Accounting and typewriting machines, Sheet-feeding means for. S. S. Dixon. No. 1,348,984; Aug. 10; v. 277; p. 217.

Acid and other nitrogen compounds from atmospheric air, Manufacturing nitric. J. F. Sanders. No. 1,349,919; Aug. 17; v. 277; p. 473.

Acid, Manufacture of concentrated nitric. P. A. Guye. No. 1,348,873; Aug. 10; v. 277; p. 196.

Acid, Manufacture of picric. L. G. Badier. No. 1,349,802; Aug. 17; v. 277; p. 451.

Acid, Production of sulfuric. K. B. Quinan. No. 1,348,736; Aug. 3; v. 277; p. 117.

Acids, Thienylquinolin carboxylic. M. Hartmann and E. Wybert. No. 1,350,408; Aug. 24; v. 277; p. 614.

Adder, Listing. W. M. Holloway. No. 1,348,564; Aug. 3; v. 277; p. 84.

Adding-machine. C. M. Fitch. No. 1,349,194; Aug. 10; v. 277; p. 259.

Adding-machine. R. E. Wing. No. 1,351,082; Aug. 31; v. 277; p. 807.

Address-stencil. G. J. Evans. No. 1,350,993; Aug. 24; v. 277; p. 727.

Adjustable cutter. F. H. Korff and S. H. Humphrey. No. 1,349,967; Aug. 17; v. 277; p. 483.

Adjustable die. A. A. Gericke. No. 1,348,403; Aug. 3; v. 277; p. 54.

Adjustable gate, Vertically-. O. Veeder. No. 1,349,173; Aug. 10; v. 277; p. 254.

Adjustable support. G. L. Knights. No. 1,348,569; Aug. 3; v. 277; p. 85.

Adjustable wrench. E. M. Pauley. No. 1,349,852; Aug. 17; v. 277; p. 461.

Advertising-bench, Automatic. G. G. Dias. No. 1,348,852; Aug. 10; v. 277; p. 191.

Advertising device. E. J. Baker. No. 1,350,054; Aug. 17; v. 277; p. 499.

Advertising-display device. F. W. Sargent. No. 1,348,899; Aug. 10; v. 277; p. 200.

Advertisement and other papers, Holder for. R. Neddo. No. 1,349,906; Aug. 17; v. 277; p. 471.

Aerial condenser. L. P. Litsinger, P. F. Conerty, and W. Snodgrass. No. 1,349,681; Aug. 17; v. 277; p. 428.

Aeronautical apparatus. C. C. Haddock. No. 1,349,336; Aug. 10; v. 277; p. 287.

Aeronautical apparatus. H. W. Schmidt. No. 1,351,069; Aug. 31; v. 277; p. 805.

Aeroplane. I. Covino. No. 1,348,983; Aug. 10; v. 277; p. 217.

Aeroplane. J. Ebert. No. 1,348,934; Aug. 10; v. 277; p. 207.

Aeroplane. G. N. Kasematis and B. A. Stamatelopoulos. No. 1,349,460; Aug. 10; v. 277; p. 311.

Aeroplane. M. Petersen. No. 1,350,938; Aug. 24; v. 277; p. 717.

Aeroplane. J. F. Webb, Sr. No. 1,348,463; Aug. 3; v. 277; p. 65.

Aeroplane construction. H. G. Hooper. No. 1,348,996; Aug. 10; v. 277; p. 219.

Aeroplane control. V. De Dominicis and F. A. Reip. No. 1,348,548; Aug. 3; v. 277; p. 81.

Aeroplane-controlling device. C. R. Fairey. No. 1,350,145; Aug. 17; v. 277; p. 517.

Aeroplane-fuselage. G. Niedbala. No. 1,349,526; Aug. 10; v. 277; p. 325.

Aeroplane, Military. O. A. Ross. No. 1,349,105; Aug. 10; v. 277; p. 241.

Aeroplane, Multiple. G. Caproni. No. 1,349,116; Aug. 10; v. 277; p. 243.

Aeroplanes, Landing device for. A. C. Warren. No. 1,349,242; Aug. 10; v. 277; p. 268.

Aeroplanes, Liquid container for. L. L. Martineau. No. 1,351,395; Aug. 31; v. 277; p. 870.

Agitating device. P. G. Campbell. No. 1,349,492; Aug. 10; v. 277; p. 318.

Agricultural implement. J. Versteeg. No. 1,348,255; Aug. 3; v. 277; p. 25.

Air and gas mixer. A. W. Elling. No. 1,348,272; Aug. 3; v. 277; p. 28.

Air and water supplying device, Auxiliary. C. W. Jenkins. No. 1,351,170; Aug. 31; v. 277; p. 824.

Air-brakes, Cut-off and relief valve for. E. P. Clauss. No. 1,350,138; Aug. 17; v. 277; p. 515.

Air-brush. B. E. Holton. No. 1,349,154; Aug. 10; v. 277; p. 251.

Air-compressor. S. A. Johnson. No. 1,350,159; Aug. 17; v. 277; p. 519.

Air-cushion, Hydraulic. J. D. Langdon. No. 1,350,414; Aug. 24; v. 277; p. 616.

Air-heating attachment. G. D. Kennedy. No. 1,349,461; Aug. 10; v. 277; p. 311.

Air or gas, Storage cylinder or vessel for compressed. S. J. Murphy. No. 1,350,666; Aug. 24; v. 277; p. 665.

Air power-drive, Compressed-. G. C. Alstad. No. 1,349,036; Aug. 10; v. 277; p. 227.

Air-supplying-valve attachment. M. C. Kirkpatrick. No. 1,349,210; Aug. 10; v. 277; p. 262.

Air-vent. C. F. Nystrom. No. 1,350,109; Aug. 17; v. 277; p. 510.

Air-washer. W. H. L. Donaldson. No. 1,349,608; Aug. 17; v. 277; p. 414.

Aircraft-girder. E. E. Brown. No. 1,351,614; Aug. 31; v. 277; p. 913.

Aircraft seat-support. A. V. Roe. No. 1,350,266; Aug. 17; v. 277; p. 540.

Airplane construction. F. J. Plym. No. 1,348,374; Aug. 3; v. 277; p. 48.

Airplane safety attachment. R. P. Fox. No. 1,348,704; Aug. 3; v. 277; p. 111.

Airship. V. Pritelli. No. 1,351,301; Aug. 31; v. 277; p. 851.

Alarm: *See*—
Burglar-alarm.
Fire-alarm.

Alarm device. W. W. Miller. No. 1,349,904; Aug. 17; v. 277; p. 470.

Alcohol and making same, Absolute. G. B. Frankforter. No. 1,350,254; Aug. 17; v. 277; p. 538.

Alkali-metal hydroxids, Producing. S. S. Sadtler. No. 1,351,693; Aug. 31; v. 277; p. 928.

Alkaline accumulator. A. M. Cave. No. 1,350,956; Aug. 24; v. 277; p. 720.

Alkaline deposits, Recovering constituents of value from natural. C. Sundstrom. No. 1,349,445; Aug. 10; v. 277; p. 308.

Alkyl ether of starches and similar carbohydrates and producing same. L. Lilienfeld. No. 1,350,820; Aug. 24; v. 277; p. 695.

Alloy. H. S. Cooper. No. 1,350,359; Aug. 24; v. 277; p. 605.

Alloy. F. Milliken. No. 1,350,166; Aug. 17; v. 277; p. 521.

Alloy. F. Milliken. No. 1,351,673; Aug. 31; v. 277; p. 925.

Alloy. V. P. Taylor. No. 1,350,891; Aug. 24; v. 277; p. 708.

Alloy for electric welding. E. J. Kingsbury. No. 1,350,317; Aug. 24; v. 277; p. 596.

Alloy, Zinc. A. Tedesco. No. 1,350,892; Aug. 24; v. 277; p. 708.

Alloys containing nickel, Producing metallic. M. N. Salvati. No. 1,349,918; Aug. 17; v. 277; p. 473.

Alloys, Manufacturing aluminium. A. Tedesco. No. 1,350,893; Aug. 24; v. 277; p. 708.

Aluminium, Electrically depositing. G. L. Williams. No. 1,351,144; Aug. 31; v. 277; p. 819.

Aluminium from aluminic oxid, Producing. V. Gerber. No. 1,350,150; Aug. 17; v. 277; p. 518.

Aluminium from materials containing aluminic oxid, Producing nitrid of. V. Gerber. No. 1,350,149; Aug. 17; v. 277; p. 518.

Aluminum and its alloys, Deoxidizing. A. Strasser. No. 1,348,458; Aug. 3; v. 277; p. 64.

Ammonia contents of coal-gas, Process of and apparatus for recovering the. B. Torrey, Jr. No. 1,349,393; Aug. 10; v. 277; p. 298.

Ammonia synthesis, Forming a mixture of hydrogen and nitrogen for. G. P. Gerfin and M. Mauran. No. 1,349,756; Aug. 17; v. 277; p. 443.

Ammunition, Apparatus for lubricating. T. H. Eickhoff. No. 1,350,645; Aug. 24; v. 277; p. 661.

Ammunition, Primer for small-arms. H. T. Peck. No. 1,350,465; Aug. 24; v. 277; p. 626.

Amusement device. C. Lombardo. No. 1,350,873; Aug. 24; v. 277; p. 704.

Amusement device. A. Pinto. No. 1,350,176; Aug. 17; v. 277; p. 523.
Amusement device. J. Stanley and J. C. Porter. No. 1,350,066; Aug. 17; v. 277; p. 506.
Anatomical developing and adjusting machine. D. W. Riesland. No. 1,348,896; Aug. 10; v. 277; p. 200.
Anhydrid, Manufacture of nitric. P. A. Guye. No. 1,348,874; Aug. 10; v. 277; p. 196.
Anilin black upon vegetable textile fibers, Production of. E. A. Fourneaux. No. 1,350,600; Aug. 24; v. 277; p. 653.
Animal-trap. E. E. Rodgers, A. W. Wenger, and C. M. Rodgers. No. 1,348,449; Aug. 3; v. 277; p. 63.
Antirattler. H. C. Maise. No. 1,348,282; Aug. 3; v. 277; p. 20.
Antirattling device. G. A. Wells, Jr. No. 1,351,453; Aug. 31; v. 277; p. 861.
Antiseptics, Capsule for. L. E. Evslin. No. 1,350,804; Aug. 24; v. 277; p. 594.
Antiskidding device. W. E. Glover. No. 1,350,966; Aug. 24; v. 277; p. 722.
Anvil attachment. H. Trouts. No. 1,349,927; Aug. 17; v. 277; p. 474.
Apparel, particularly relating to gowns, dresses, coats, and the like. L. S. Reynard. No. 1,351,537; Aug. 31; v. 277; p. 598.
Apparel-supporter, Child's. H. McEldowney. No. 1,351,579; Aug. 31; v. 277; p. 907.
Appliance. P. Crowder. No. 1,349,368; Aug. 10; v. 277; p. 294.
Arch-support. W. C. Hill. No. 1,351,248; Aug. 31; v. 277; p. 840.
Arch-support. J. L. Zink. No. 1,349,355; Aug. 10; v. 277; p. 291.
Arm, Artificial. W. P. Anderson, N. C. Clarke, and J. F. Whitelaw. (Reissue.) No. 14,939; Aug. 31; v. 277; p. 934.
Armature, Relay-. J. I. Mitchiner. No. 1,351,674; Aug. 31; v. 277; p. 925.
Armor, Bullet-proof. G. O. Brewster. No. 1,348,204; Aug. 3; v. 277; p. 14.
Armor, Bullet-proof. G. O. Brewster. No. 1,350,062; Aug. 17; v. 277; p. 501.
Article-holder, Folding. A. Wiggers. No. 1,349,402; Aug. 10; v. 277; p. 300.
Article of manufacture and making same. C. Weber. No. 1,350,533; Aug. 24; v. 277; p. 640.
Artillery, Automatic fuse-setter for anti-aircraft. B. V. Morse. No. 1,349,220; Aug. 10; v. 277; p. 264.
Ash-conveyer. A. Girtanner. No. 1,348,937; Aug. 10; v. 277; p. 208.
Ash-conveyer. J. M. Hopwood. No. 1,351,572; Aug. 31; v. 277; p. 905.
Ash-conveyer. J. M. Hopwood. No. 1,351,573; Aug. 31; v. 277; p. 905.
Ash-discharge mechanism. F. T. and J. M. Nicholson. No. 1,348,659; Aug. 3; v. 277; p. 103.
Asphalt-kettle and steam-generating plant, Combined. C. F. Hetherington. No. 1,350,502; Aug. 24; v. 277; p. 634.
Atomiser. A. M. Holmes. No. 1,351,012; Aug. 24; v. 277; p. 731.
Audiphone. C. Larrick. No. 1,351,254; Aug. 31; v. 277; p. 841.
Auto-jack. W. M. Cook. No. 1,348,851; Aug. 10; v. 277; p. 191.
Auto-signal. E. Ortman. No. 1,349,092; Aug. 10; v. 277; p. 238.
Auto-theft signal. J. W. Marr. No. 1,350,032; Aug. 17; v. 277; p. 495.
Automatic coupling. W. V. Phillips. No. 1,349,433; Aug. 10; v. 277; p. 306.
Automobile-body construction, Convertible. L. Bresin. No. 1,348,624; Aug. 3; v. 277; p. 96.
Automobile-brake. E. V. Lawrence. No. 1,350,318; Aug. 24; v. 277; p. 596.
Automobile brake attachment. H. W. Haapaneh. No. 1,350,726; Aug. 24; v. 277; p. 677.
Automobile-buffer, Looped-attacher. G. A. Lyon. No. 1,351,050; Aug. 31; v. 277; p. 802.
Automobile-cowl attachment. J. H. Coffman. No. 1,349,715; Aug. 17; v. 277; p. 435.
Automobile-creeper. W. J. Broome. No. 1,349,941; Aug. 17; v. 277; p. 477.
Automobile-curtain compartment. J. W. Applin. No. 1,351,547; Aug. 31; v. 277; p. 900.
Automobile direction-signal. G. A. Forsberg. No. 1,351,635; Aug. 31; v. 277; p. 917.
Automobile direction-signal. W. L. and E. A. F. Miller, Jr. No. 1,350,463; Aug. 24; v. 277; p. 626.
Automobile emergency-tank. S. H. Love. No. 1,351,336; Aug. 31; v. 277; p. 858.
Automobile-jack. J. S. Cook. No. 1,348,627; Aug. 3; v. 277; p. 97.
Automobile-lifter. J. E. Coffey. No. 1,351,506; Aug. 31; v. 277; p. 892.
Automobile-lock. L. Balestrino and G. Merigone. No. 1,348,841; Aug. 10; v. 277; p. 189.
Automobile-lock. L. B. Halliday. No. 1,350,497; Aug. 24; v. 277; p. 633.
Automobile-lock. J. W. Hunter and E. Williamson. No. 1,351,651; Aug. 31; v. 277; p. 920.
Automobile-lock. A. W. Kemmling. No. 1,350,816; Aug. 24; v. 277; p. 596.
Automobile-lock. E. McCracken. No. 1,351,297; Aug. 31; v. 277; p. 850.
Automobile-lock. C. W. Nixon. No. 1,348,891; Aug. 10; v. 277; p. 199.
Automobile-lock. T. H. Simpson. No. 1,348,453; Aug. 3; v. 277; p. 63.
Automobile-lock. C. C. Trosien. No. 1,348,337; Aug. 3; v. 277; p. 41.
Automobile-lock, Safety. J. G. Schwartz. No. 1,350,741; Aug. 24; v. 277; p. 680.
Automobile-locking device. C. F. Norton. No. 1,349,849; Aug. 17; v. 277; p. 460.
Automobile-muff. C. R. Scott. No. 1,351,303; Aug. 31; v. 277; p. 852.
Automobile multiple-lever lock. L. Balestrino and G. Merigone. No. 1,348,840; Aug. 10; v. 277; p. 189.
Automobile-power-transmission device. H. H. Marshall, Jr. No. 1,349,428; Aug. 10; v. 277; p. 305.
Automobile-rim, Collapsible. L. B. Olney. No. 1,350,262; Aug. 17; v. 277; p. 539.
Automobile-running-board truss-rods, Repair-clamp for. G. K. Caviness. No. 1,350,253; Aug. 17; v. 277; p. 538.
Automobile-signal. S. D. Carnes. No. 1,351,288; Aug. 31; v. 277; p. 847.
Automobile-signal. N. Y. Gordon. No. 1,349,063; Aug. 10; v. 277; p. 288.
Automobile-signal. D. W. Grazier. No. 1,351,513; Aug. 31; v. 277; p. 893.
Automobile-signal. E. F. Griffin. No. 1,351,642; Aug. 31; v. 277; p. 919.
Automobile-signal. C. J. Hughes. No. 1,350,998; Aug. 24; v. 277; p. 728.
Automobile-signal. H. Klatt. No. 1,351,662; Aug. 31; v. 277; p. 923.
Automobile-signal. J. L. McWilliams. No. 1,351,667; Aug. 31; v. 277; p. 924.
Automobile-signal. C. Millar. No. 1,349,289; Aug. 10; v. 277; p. 278.
Automobile-signal. S. M. Pontiere. No. 1,348,182; Aug. 3; v. 277; p. 10.
Automobile-signal devices, Circuit-closer for. C. Solle. No. 1,348,454; Aug. 3; v. 277; p. 63.
Automobile signal-light. W. H. Baltes. No. 1,350,539; Aug. 24; v. 277; p. 641.
Automobile-sled-runner attachment. G. W. Corsepius. No. 1,350,069; Aug. 17; v. 277; p. 502.
Automobile-starter. D. Jokubaitis. No. 1,349,207; Aug. 10; v. 277; p. 261.
Automobile-timer. L. E. Middlebrook. No. 1,349,523; Aug. 10; v. 277; p. 324.

Drills, Support for hammer-machine. J. H. Cocks. No. 1,349,047; Aug. 10; v. 277; p. 230.
Drilling-bit. G. Nymanning. No. 1,351,262; Aug. 31; v. 277; p. 843.
Drilling device. H. F. Blackwell. No. 1,350,059; Aug. 17; v. 277; p. 500.
Drilling-machines, Saddle and head supporting mechanism for. W. T. Sears. No. 1,350,525; Aug. 24; v. 277; p. 638.
Drink mixer and dispenser. A. E. Holmes. No. 1,348,222; Aug. 3; v. 277; p. 18
Drinking-fountain. F. T. Lyman and F. J. Klimm. No. 1,349,773; Aug. 17; v. 277; p. 446.
Drip-preventer. G. S. Marston. No. 1,351,258; Aug. 31; v. 277; p. 842.
Drive mechanism, Differential-. A. Winther. No. 1,351,084; Aug. 31; v. 277; p. 808.
Drive, Two-wheel. H. Lave. No. 1,349,212; Aug. 10; v. 277; p. 262.
Driving-gear, Automobile. M. C. Sharpnack and C. A. Crisman. No. 1,349,695; Aug. 17; v. 277; p. 431.
Driving mechanism, Variable-speed hand-. A. Burr and W. Stroud. No. 1,348,690; Aug. 3; v. 277; p. 108.
Drum. J. Limoncello. No. 1,349,840; Aug. 17; v. 277; p. 458.
Drum-valve. C. L. Bastian. No. 1,349,748; Aug. 17; v. 277; p. 441.
Drums, Suspension-equalizing device for revolving. J. Stadler. No. 1,351,497; Aug. 31; v. 277; p. 890.
Dust-collecting system and apparatus therefor, Pneumatic. J. Wilsmore. No. 1,349,480; Aug. 10; v. 277; p. 315.
Dust-guard, Journal. W. S. Trowbridge. No. 1,350,429; Aug. 24; v. 277; p. 619.
Dustpan. J. M. Lund and H. Anderson. No. 1,349,165; Aug. 10; v. 277; p. 253.
Dye and producing same, Alkali proof. L. C. Cates. No. 1,349,265; Aug. 10; v. 277; p. 273.
Dyeing. C. S. Althouse. No. 1,349,867; Aug. 17; v. 277; p. 464.
Dyeing-machine. W. A. Ainsworth. No. 1,348,974; Aug. 10; v. 277; p. 215.
Dyeing-machine. E. Schnurrenberger. No. 1,350,740; Aug. 24; v. 277; p. 680.
Dyeing or similarly treating textiles. E. S. Graves. No. 1,348,167; Aug. 3; v. 277; p. 7.
Dynamos, Lubricating device for. J. Bijur. No. 1,349,871; Aug. 17; v. 277; p. 464.
Eaves-trough or gutter cover. F. W. Busse. No. 1,349,264; Aug. 10; v. 277; p. 273.
Eaves-trough screen. W. L. Spriggs. No. 1,351,703; Aug. 31; v. 277; p. 930.
Edge-trimmer. W. H. Browning. No. 1,348,847; Aug. 10; v. 277; p. 191.
Educational device. H. M. Porter. No. 1,350,237; Aug. 17; v. 277; p. 535.
Egg-case. G. Tiemann. No. 1,351,708; Aug. 31; v. 277; p. 931.
Electric circuit for a certain period, Switch for the closing of an. H. A. Schepeler. No. 1,348,746; Aug. 3; v. 277; p. 118.
Electric contact-breaker. F. H. Royce. No. 1,349,783; Aug. 17; v. 277; p. 448.
Electric control system. P. R. Owens. No. 1,350,382; Aug. 24; v. 277; p. 609.
Electric controller. E. J. Carroll. No. 1,350,003; Aug. 17; v. 277; p. 490.
Electric controller. R. R. Dunlop. No. 1,348,397; Aug. 3; v. 277; p. 53.
Electric-current-collector bars, Expansion-joint for. E. A. Davis. No. 1,350,856; Aug. 24; v. 277; p. 701.

Electric currents, Apparatus for amplifying pulsating. L. de Forest. No. 1,348,157; Aug. 3; v. 277; p. 5.
Electric currents, Apparatus for rectifying. A. F. Nesbit. No. 1,349,907; Aug. 17; v. 277; p. 471.
Electric furnace. W. S. Mayer and W. C. Kennedy. No. 1,350,876; Aug. 24; v. 277; p. 705.
Electric heater. C. A. Xardell. No. 1,350,586; Aug. 24; v. 277; p. 651.
Electric heater. C. A. Xardell. No. 1,350,631; Aug. 24; v. 277; p. 659.
Electric heating unit. C. C. Abbott. No. 1,350,910; Aug. 24; v. 277; p. 711.
Electric ignition apparatus, High-voltage distributer for. F. Billon. No. 1,349,316; Aug. 10; v. 277; p. 283.
Electric ignition apparatus, Mechanism for regulating the point of ignition in magneto-. E. Hurlimann. No. 1,349,278; Aug. 10; v. 277; p. 276.
Electric ignition machines, High-tension distributer for magneto-. J. Schneider, E. Hurlimann, and F. Billon. No. 1,349,299; Aug. 10; v. 277; p. 280.
Electric-light-bulb stabilizer. B. L. Thompson. No. 1,348,970; Aug. 10; v. 277; p. 214.
Electric-light fixtures to outlet-boxes, Device for attaching. R. Battle. No. 1,351,150; Aug. 31; v. 277; p. 820.
Electric light, Portable. F. Rampp. No. 1,350,837; Aug. 24; v. 277; p. 698.
Electric lights, Thermodynamically-controlled socket-switch for. M. H. Baker. No. 1,350,587; Aug. 24; v. 277; p. 651.
Electric machine, Dynamo-. R. E. Hellmund. No. 1,349,377; Aug. 10; v. 277; p. 295.
Electric machine, Dynamo-. R. E. Hellmund. No. 1,351,035; Aug. 31; v. 277; p. 799.
Electric machine, Dynamo-. R. E. Hellmund and R. E. Ferris. No. 1,351,036; Aug. 31; v. 277; p. 799.
Electric machine, Dynamo-. W. T. and B. A. Reynolds. No. 1,349,100; Aug. 10; v. 277; p. 248.
Electric machine, High-tension. C. Fayer. No. 1,348,986; Aug. 10; v. 277; p. 218.
Electric machines, Building inductor elements for dynamo-. V. G. Apple. No. 1,348,198; Aug. 3; v. 277; p. 13.
Electric machines, Commutator for dynamo-. E. D. Priest. No. 1,349,854; Aug. 17; v. 277; p. 461.
Electric machines, Reversing brush-gear for dynamo-. H. D. Rohman. No. 1,349,584; Aug. 17; v. 277; p. 409.
Electric mercury-switch. R. E. de los Monteros. No. 1,351,101; Aug. 31; v. 277; p. 811.
Electric motor. J. M. Breitenbach. No. 1,348,539; Aug. 3; v. 277; p. 79.
Electric motor. N. D. Levin. No. 1,,351,294; Aug. 31; v. 277; p. 850.
Electric motor. O. H. and A. F. Pieper. No. 1,348,239; Aug. 3; v. 277; p. 22.
Electric plug-receptacles, Convertible plate for. A. C. Recker. No. 1,349,978; Aug. 17; v. 277; p. 485.
Electric regulation. J. L. Creveling. No. 1,348,348; Aug. 3; v. 277; p. 43.
Electric regulation. G. G. Milne and J. L. Creveling. No. 1,351,055; Aug. 31; v. 277; p. 803.
Electric rivet-heater, Portable. L. T. Weidrick. No. 1,349,539; Aug. 10; v. 277; p. 327.
Electric switch. C. E. Anderson. No. 1,348,684; Aug. 3; v. 277; p. 107.
Electric switch. C. Christensen. No. 1,349,873; Aug. 17; v. 277; p. 465.
Electric switch. M. Guett. No. 1,350,725; Aug. 24; v. 277; p. 677.
Electric switch. E. G. Kermode. No. 1,349,573; Aug. 17; v. 277; p. 407.
Electric switch. M. P. Maxwell and J. S. Lawson. No. 1,350,107; Aug. 17; v. 277; p. 509.
Electric switch. E. T. R. Murray and G. F. Shotter. No. 1,349,429; Aug. 10; v. 277; p. 305.
Electric switch N. W. Nutt. No. 1,351,214; Aug. 31; v. 277; p. 833.
Electric switch. R. J. Parsons. No. 1,349,851; Aug. 17; v. 277; p. 460.
Electric switch and box. C. H. Bissell. No. 1,350,486; Aug. 24; v. 277; p. 631.
Electric switch and fuse-box. L. F. Kries. No. 1,351,043; Aug. 31; v. 277; p. 800.
Electric switches, Time-controlled mechanism for operating. T. W. South. No. 1,350,389; Aug. 24; v. 277; p. 611.
Electric system. M. C. Cosgray. No. 1,350,437; Aug. 24; v. 277; p. 620.
Electric train-wire coupling. T. R. Brown. No. 1,349,405; Aug. 10; v. 277; p. 301.
Electric welding-machines, Current-regulator for. F. S. Stearns. No. 1,349,303; Aug. 10; v. 277; p. 281.
Electrical circuits, Method of and means for establishing. A. A. Radtke. No. 1,350,334; Aug. 24; v. 277; p. 600.
Electrical connecting device. M. Sidon. No. 1,351,191; Aug. 31; v. 277; p. 829.
Electrical connections, Means for establishing. A. L. Eustice. No. 1,350,444; Aug. 24; v. 277; p. 622.
Electrical fixture, Extensible. R. E. Shaw. No. 1,348,752; Aug. 3; v. 277; p. 119.
Electrical precipitating system. L. W. Chubb. No. 1,349,362; Aug. 10; v. 277; p. 292.
Electrical protective apparatus. F. R. Parker. No. 1,350,329; Aug. 24; v. 277; p. 599.
Electrical protective device. H. Pearce. No. 1,349,385; Aug. 10; v. 277; p. 297.
Electrical regulating-switch. C. H. Coles. No. 1,349,818; Aug. 17; v. 277; p. 454.
Electrical starting apparatus. J. Bijur. No. 1,349,870; Aug. 17; v. 277; p. 464.
Electrical switch. B. D. Horton and W. P. Hammond. (Reissue.) No. 14,942; Aug. 31; v. 277; p. 935.
Electrical system. S. H. Eckmann. No. 1,349,371; Aug. 10; v. 277; p. 294.
Electrical system. F. D. Hallock. No. 1,348,943; Aug. 10; v. 277; p. 209.
Electrical test set. E. A. Johnson. No. 1,348,424; Aug. 3; v. 277; p. 58.
Electrical testing device. R. C. Bierbower. No. 1,349,655; Aug. 17; v. 277; p. 423.
Electrical testing device. R. C. Bierbower. No. 1,349,656; Aug. 17; v. 277; p. 423.
Electrode-holder. T. Willard. No. 1,348,530; Aug. 3; v. 277; p. 77.
Electrode-holders, Adapter for. O. J. Marshick. No. 1,348,434; Aug. 3; v. 277; p. 60.
Electrolytic cell. H. I. Allen and K. R. Fox. No. 1,349,597; Aug. 17; v. 277; p. 411.
Electrolytic cell. L. W. Chubb. No. 1,348,207; Aug. 3; v. 277; p. 14.
Electrolytic cells, Plate for. L. W. Chubb. No. 1,348,206; Aug. 3; v. 277; p. 14.
Electroplating apparatus. W. Dietzel. No. 1,349,549; Aug. 10; v. 277; p. 329.
Electrothermostatic-controlled mechanism. E. V. Hartford. No. 1,349,954; Aug. 17; v. 277; p. 480.
Electrotype and stereotype shaving machines, Safety plate-holder for. C. N. Smith. No. 1,349,736; Aug. 17; v. 277; p. 439.
Electrotypers, Stopping-out machine for. P. F. Haggerty. No. 1,348,492; Aug. 3; v. 277; p. 70.
Elevator: *See*—
Grain-elevator. Tray-elevator.
Hydraulic elevator.
Elevator-door lock. F. A. Boedtcher. No. 1,350,608; Aug. 24; v. 277; p. 671.
Elevator safety device. A. J. Barrett. No. 1,349,313; Aug. 10; v. 277; p. 283.
Elevator safety device. H. Bleymehl. No. 1,348,472; Aug. 3; v. 277; p. 67.
Elevator safety mechanism. C. P. Beaver. No. 1,348,201; Aug. 3; v. 277; p. 13.
Embossed designs, Making. L. H. Fuelling. No. 1,350,365; Aug. 24; v. 277; p. 606.
Embossing-gage. G. Neumann. No. 1,349,579; Aug. 17; v. 277; p. 408.
Embroidering device. M. Terragni and T. Boldizzoni. No. 1,348,600; Aug. 3; v. 277; p. 91.
Emulsifier. R. H. Stevens. No. 1,351,352; Aug. 31; v. 277; p. 862.
End-gate. H. E. Griggs. No. 1,351,165; Aug. 31; v. 277; p. 823.
End-gate. H. P. Olsen. No. 1,351,436; Aug. 31; v. 277; p. 878.
Engine: *See*—
Combustion-engine. Rotary engine.
Gas-engine. Rotary internal-combustion engine.
Fire-engine. Steam-engine.
Internal-combustion engine. Traction-engine.
Logging-engine. Turbine-engine.
Engine. A. C. Fischer. No. 1,349,054; Aug. 10; v. 277; p. 231.
Engine. O. G. McMillan. No. 1,349,520; Aug. 10; v. 277; p. 323.
Engine. H. Ruttinger. No. 1,349,856; Aug. 17; v. 277; p. 461.
Engine. E. Sarjent. No. 1,350,570; Aug. 24; v. 277; p. 647.
Engine. G. W. Swartz. No. 1,351,544; Aug. 31; v. 277; p. 899.
Engine feed, Gravity control for gas-. E. W. Peery. No. 1,351,123; Aug. 31; v. 277; p. 815.
Engine-indicator. D. G. Roos. No. 1,349,346; Aug. 10; v. 277; p. 289.
Engine-manifold. F. E. Arndt. No. 1,350,431; Aug. 24; v. 277; p. 619.
Engine-starter. V. Bendix. No. 1,348,147; Aug. 3; v. 277; p. 3.
Engine-starter. W. L. McGrath. No. 1,348,288; Aug. 3; v. 277; p. 31.
Engine-starter. W. L. McGrath. No. 1,348,289; Aug. 3; v. 277; p. 32.
Engine starter and generator. T. R. Du Bois. No. 1,348,555; Aug. 3; v. 277; p. 82.
Engine-starting apparatus. L. M. Wolffsohn. No. 1,349,866; Aug. 17; v. 277; p. 464.
Engine-starting cranks, Locking device for. M. J. Cohn. No. 1,351,095; Aug. 31; v. 277; p. 810.
Engine valve mechanism. C. R. Greuter. No. 1,350,800; Aug. 24; v. 277; p. 691.
Engines, Adjustable distributer for internal-combustion. W. J. Woodcock. No. 1,349,308; Aug. 10; v. 277; p. 282.
Engines, Air control and heat-regulating device for internal-combustion. E. G. Hodges. No. 1,351,477; Aug. 31; v. 277; p. 886.
Engines, Apparatus for priming. F. D. Sweet. No. 1,350,344; Aug. 24; v. 277; p. 601.

Engines, Attachment for internal-combustion. L. P. Peterson. No. 1,350,385; Aug. 24; v. 277; p. 610.
Engines, Attachment for internal-combustion. W. E. Stitzer. No. 1,351,706; Aug. 31; v. 277; p. 931.
Engines, Carbon-shearing and compression device for internal-combustion. H. H. Gove. No. 1,349,757; Aug. 17; v. 277; p. 443.
Engines, Circuit-breaking mechanism for internal-combustion. J. E. Tuscher. No. 1,350,898; Aug. 24; v. 277; p. 709.
Engines, Combined leveling and cushioning device for traction-. C. Swan. No. 1,348,333; Aug. 3; v. 277; p. 41.
Engines, Combined muffler, vaporizer, and mixing-chamber for gas-. P. J. Garrison. No. 1,349,755; Aug. 17; v. 277; p. 442.
Engines, Crank-shaft for internal-combustion. F. S. Lee. No. 1,349,893; Aug. 17; v. 277; p. 468.
Engines, Cylinder for internal-combustion. A. J. Rowledge. No. 1,348,451; Aug. 3; v. 277; p. 63.
Engines, Device for supplying cooling liquids to pistons of internal-combustion. G. J. Lugt. No. 1,349,516; Aug. 10; v. 277; p. 322.
Engines, Fluid-pump for internal-combustion. K. J. E. Hesselman. No. 1,348,646; Aug. 3; v. 277; p. 100.
Engines, Fuel system for internal-combustion. A. Rosner. No. 1,350,421; Aug. 24; v. 277; p. 617.
Engines, Fuel-tank for internal-combustion. F. Jensen. No. 1,350,808; Aug. 24; v. 277; p. 693.
Engines Fuel-vaporizing system for internal-combustion. J. D. Langdon. No. 1,350,413; Aug. 24; v. 277; p. 615.
Engines, Governing mechanism for internal-combustion. A. F. Christmas. No. 1,349,146; Aug. 10; v. 277; p. 249.
Engines, Ignition mechanism for internal-combustion. C. Y. Knight. No. 1,350,815; Aug. 24; v. 277; p. 694.
Engines, Ignition system for internal-combustion. A. H. Midgley. No. 1,351,396; Aug. 31; v. 277; p. 870.
Engines, Injector for internal-combustion. L. W. Lombard. No. 1,349,515; Aug. 10; v. 277; p. 322.
Engines, Lubricating attachment for internal-combustion. C. L. Magee. No. 1,351,338; Aug. 31; v. 277; p. 859.
Engines, Lubrication for internal-combustion. C. B. Kirkham. No. 1,349,676; Aug. 17; v. 277; p. 427.
Engines, Means for controlling the supply of liquid fuel to internal-combustion. H. Brooks. No. 1,348,845; Aug. 10; v. 277; p. 190.
Engines, Muffler for steam and gas. C. S. Shuman and S. S. Hanson. No. 1,351,698; Aug. 31; v. 277; p. 929.

Engines, Radiator for internal-combustion. P. F. Spery. No. 1,349,011; Aug. 10; v. 277; p. 222.
Engines, Releasing-crank mechanism for internal-combustion. R. N. Cook. No. 1,348,931; Aug. 10; v. 277; p. 207.
Engines, Speed-regulator for. W. A. North. No. 1,348,833; Aug. 3; v. 277; p. 135.
Engines, Starting apparatus for use with internal-combustion. A. I. Odler. No. 1,351,399; Aug. 31; v. 277; p. 871.
Engines, Starting-port for valveless two-cycle internal-combustion. C. H. Shessley. No. 1,349,630; Aug. 17; v. 277; p. 418.
Engines, Starting mechanism for internal-combustion. A. Churchward. No. 1,350,703; Aug. 24; v. 277; p. 673.
Engines, Synchronizing and regulating mechanism for combination steam and explosion. C. T. Litchfield. No. 1,349,619; Aug. 17; v. 277; p. 416.
Engines, Thermostatic control mechanism for hydrocarbon-. L. H. Lamont. No. 1,350,871; Aug. 24; v. 277; p. 764.
Engines using heavy oils, Carbureter for internal-combustion. F. Grenier. No. 1,351,104; Aug. 31; v. 277; p. 811.
Engines, Valve for internal-combustion. J. A. Toomey. No. 1,350,479; Aug. 24; v. 277; p. 620.
Engines, Valve-gear for steam-. W. H. Smith. No. 1,351,702; Aug. 31; v. 277; p. 930.
Engines, Vaporizer for internal-combustion. T. A. Mulkern. No. 1,350,079; Aug. 17; v. 277; p. 504.
Engines, Vaporizer for internal-combustion. G. Spicer and E. G. S. Croxson. No. 1,348,455; Aug. 3; v. 277; p. 64.
Envelop. G. Rottman. No. 1,348,243; Aug. 3; v. 277; p. 23.
Envelop. W. Homeniuk. No. 1,350,928; Aug. 24; v. 277; p. 715.
Envelop blanks, Machine for making window-. S. Furman. (Reissue.) No. 14,936; Aug. 24; v. 277; p. 732.
Envelop, Safety-. M. R. Geyer. No. 1,349,061; Aug. 10; v. 277; p. 232.
Envelop sealing and stamping machine. I. Hinerfeld. No. 1,348,493; Aug. 3; v. 277; p. 70.
Evaporator. J. N. Brooke. No. 1,349; 810; Aug. 17; v. 277; p. 452.
Evaporator, Crank-case. F. I. Cochrane. No. 1,351,716; Aug. 31; v. 277; p. 932.
Excavating-machine. J. A. MacKillican and F. L. Lipcsey. No. 1,351,212; Aug. 31; v. 277; p. 833.
Excavating-machines, Means for leveling and staying. E. M. Downie. No. 1,350,992; Aug. 24; v. 277; p. 727.
Exhauster. H. W. Lowe. No. 1,350,104; Aug. 17; v. 277; p. 509.
Expansion-bolt. H. W. Aylward. No. 1,349,998; Aug. 17; v. 277; p. 489.
Expansion-bolt. E. C. Royer. No. 1,349,437; Aug. 10; v. 277; p. 307.
Explosive, Propellant. O. Silberrad. No. 1,349,983; Aug. 17; v. 277; p. 486.
Explosive substances, Preventing danger of explosion in the preparation and handling of dangerous. G. Darier and C. Goudet. No. 1,349,411; Aug. 10; v. 277; p. 302.
Explosives, Gelatinization of cellulose nitric esters in manufacture of. W. Rintoul and T. J. Nolan. No. 1,348,741; Aug. 3; v. 277; p. 117.
Exposure-table. L. Smith. No. 1,348,382; Aug. 3; v. 277; p. 50.
Extension-table. E. T. Noennig. No. 1,349,471; Aug. 10; v. 277; p. 313.
Extension-table. F. Wohlmann. No. 1,351,457; Aug. 31; v. 277; p. 882.
Extractor: *See*—
Cork-extractor. Valve-extractor.
Eye syringe and massage device. E. H. Galligan. No. 1,350,719; Aug. 24; v. 277; p. 676.
Eye-tester. H. E. Myers No. 1,349,625; Aug. 17; v. 277; p. 417.
Eyelet-machine. W. D. Pierson. No. 1,348,892 Aug. 10; v. 277; p. 199.
Eyeleter, Duplex. F. L. Harmon. (Reissue.) No. 14,932; Aug. 17; v. 277; p. 546.
Eyeleting machine. F. L. Harmon. (Reissue.) No. 14,931; Aug. 17; v. 277; p. 545.
Eyeleting-machine. R. B. Smith. No. 1,351,138; Aug. 31; v. 277; p. 818.
Fabric: *See*—
Waterproofed fabric.
Fabric-clamp. R. W. Biddiecom. No. 1,351,551; Aug. 31; v. 277; p. 901.
Fabric machine, Interposed-. W. S. Southwick. No. 1,351,350; Aug. 31; v. 277; p. 861.
Fabric, Method and apparatus for conditioning prepared. F. M. Furber; No. 1,350,366; Aug. 24; v. 277; p. 606.
Fabric, Parchmentizing. J. M. Taylor. No. 1,350,685; Aug. 24; v. 277; p. 669.
Fabric sections, Uniting. J. Berger, Jr. No. 1,349,711; Aug. 17; v. 277; p. 434.
Fabric sections, Uniting. J. Berger, Jr. No. 1,349,712; Aug. 17; v. 277; p. 434.
Fabric-treating machine, Textile-. L. Clarenbach. No. 1,351,621; Aug. 31; v. 277; p. 914.
Fabrics, Apparatus for singeing. H. Whitaker. No. 1,350,582; Aug. 24; v. 277; p. 650.
Fan. A. A. Canton. No. 1,348,477; Aug. 3; v. 277; p. 68.
Fan for use in spark-arresting and smoke-consuming devices. W. A. Watterson. No. 1,350,191; Aug. 17; v. 277; p. 526.
Farm-gate. D. A. Gray. No. 1,350,967; Aug. 24; v. 277; p. 722.
Farm implement. J. E. Rich. No. 1,351,063; Aug. 31; v. 277; p. 804.
Fastener. W. M. Brooks. No. 1,348,473; Aug. 3; v. 277; p. 67.
Fastener. W. A. Schuler. No. 1,348,666; Aug. 3; v. 277; p. 104.
Fastening device. T. R. Gaines. No. 1,350,718; Aug. 24; v. 277; p. 676.
Fastenings, Machine for making. G. Goddu. No. 1,348,864; Aug. 10; v. 277; p. 194.
Faucet. J. W. Johnson and A. J. Carpenter. No. 1,351,657; Aug. 31; v. 277; p. 922.
Faucet. W. E. La Rue. No. 1,351,524; Aug. 31; v. 277; p. 895.
Faucet. L. L. Rowe. No. 1,350,885; Aug. 24; v. 277; p. 706.
Faucet, Dispensing-. L. E. Baker. No. 1,348,839; Aug. 10; v. 277; p. 189.
Faucet, Dispensing-. F. B. Ellers. No. 1,348,854; Aug. 10; v. 277; p. 192.
Feed-water, Apparatus for treating. I. P. Winer. No. 1,348,196; Aug. 3; v. 277; p. 12.
Feed-water heater. L. D. Lovekin. No. 1,350,320; Aug. 24; v. 277; p. 597.
Feed-water-heating apparatus. T. C. McBride. No. 1,350,322; Aug. 24; v. 277; p. 597.
Feeding and pitching machine, Self. F. Hamilton. No. 1,351,381; Aug. 31; v. 277; p. 868.
Feeding device, Animal-. J. R. Royer. No. 1,350,523; Aug. 24; v. 277; p. 638.
Feeding device, Poultry-. G. C. Eaton. No. 1,350,013; Aug. 17; v. 277; p. 491.
Fence strand, Picket-. J. B. Weeks. No. 1,348,765; Aug. 3; v. 277; p. 122.
Fencepost, Metal. E. S. Lachmann. No. 1,349,575; Aug. 17; v. 277; p. 407.
Ferroconcrete construction. W. Meischke-Smith. No. 1,349,901; Aug. 17; v. 277; p. 470.
Fertilizer. J. R. Partington and L. H. Parker. No. 1,348,578; Aug. 3; v. 277; p. 87.
Fertilizer and making same. J. N. Carothers. No. 1,350,591; Aug. 24; v. 277; p. 652.
Fertilizer and manufacturing same, Phosphatic. C. C. James. No. 1,348,495; Aug. 3; v. 277; p. 71.

Fertilizer from city and like waste, Making. C. W. Rice. No. 1,348,320; Aug. 3; v. 277; p. 38.
Fibers, Treating. J. H. Pickup. No. 1,350,621; Aug. 24; v. 277; p. 657.
Fibrous materials, Waterproofing composition for. H. L. Buckner and E. Burke. No. 1,349,601; Aug. 17; v. 277; p. 412.
Fibrous products. H. F. Weiss. No. 1,349,112; Aug. 10; v. 277; p. 242.
Fibrous vegetable material and resulting product, Treating. G. S. McDaniel. No. 1,350,031; Aug. 17; v. 277; p. 495.
Fifth-wheel. E. F. Hartwick. No. 1,351,245; Aug. 31; v. 277; p. 840.
File, Desk-drawer. F. L. G. Straubel. No. 1,350,186; Aug. 17; v. 277; p. 525.
File-folders, Clip and support for vertical. J. L. Rivers. No. 1,351,127; Aug. 31; v. 277; p. 816.
File-protector. J. Wosiewski. No. 1,349,596; Aug. 17; v. 277; p. 411.
Filler. W. H. Alton and A. C. Battelle. No. 1,350,694; Aug. 24; v. 277; p. 671.
Filling device. F. A. Sebring, and F. Strobl. No. 1,350,673; Aug. 24; v. 277; p. 666.
Film-developing tank. G. Winston. No. 1,350,761; Aug. 24; v. 277; p. 684.
Filter. F. K. and E. F. Atkins. No. 1,350,433; Aug. 24; v. 277; p. 620.
Filter. P. C. Forrester. No. 1,349,056; Aug. 10; v. 277; p. 231.
Filter. E. J. Sweetland. No. 1,349,238; Aug. 10; v. 277; p. 268.
Filtering materials. J. J. Berrigan. No. 1,350,292; Aug. 24; v. 277; p. 501.
Filtering, Method of and apparatus for. N. B. Down. No. Aug. 3; v. 277; p. 5.
Finger-board attachment. T. J. Hewitt. No. 1,351,570; Aug. 31; v. 277; p. 905.
Finishing device. E. B. Limle. No. 1,351,177; Aug. 31; v. 277; p. 826.
Fire-alarm. Automatic. G. B. Rattermann and W. W. Garrison. No. 1,349,531; Aug. 10; v. 277; p. 325.
Fire-alarm system. S. B. Hess. No. 1,351,514; Aug. 31; v. 277; p. 893.
Fire, Electric. H. H. Berry and J. W. Reid. No. 1,349,804; Aug. 17; v. 277; p. 451.
Fire-engine. P. E. Smith. No. 1,351,700; Aug. 31; v. 277; p. 930.
Fire-escape. H. M. Davis. No. 1,350,708; Aug. 24; v. 277; p. 674.
Fire-escape or life-saving tower. G. Gulich. No. 1,348,872; Aug. 10; v. 277; p. 195.
Fire-extinguisher, Automatically-operated. A. Charter. No. 1,348,480; Aug. 3; v. 277; p. 68.
Fire-fighting apparatus. J. C. Witt. No. 1,351,085; Aug. 31; v. 277; p 808
Fire-hydrant valves while under water-pressure, Means for removing. D. Goldberg. No. 1,349,062; Aug. 10; v. 277; p. 232.
Firearm. O. V. Payne. No. 1,349,345; Aug. 10; v. 277; p. 289.
Firearm. S. Vlanch. No. 1,348,910; Aug. 10; v. 277; p. 203.
Firearm, Autoloading. J. D. Pedersen. No. 1,348,733; Aug. 3; v. 277; p. 116.
Firearm, Automatic. K. A. Bräuning. No. 1,350,543; Aug. 24; v. 277; p. 641.
Firearm, Automatic. M. G. Farquhar, and A. H. Hill. No. 1,350,961; Aug. 24; v. 277; p. 721.
Firearm, Bolt-action. T. C. Johnson. No. 1,349,675; Aug. 17; v. 277; p. 427.
Firearms, Apparatus for deflecting fire of. A. T. Fischer. No. 1,348,987; Aug. 10; v. 277; p. 218.
Firearms, Magazine for. G. Hammond. No. 1,348,172; Aug. 3; v. 277; p. 8.
Firearms, Recoil-pad for. W. L. Marble. No. 1,349,779; Aug. 17; v. 277; p. 447.
Fireplace. W. Hagenbuch. No. 1,350,495; Aug. 24; v. 277; p. 632.
Fireproofing material. H. S. Ashenhurst. No. 1,351,149; Aug. 31; v. 277; p. 820.
Fish-stringer. C. L. Stein. No. 1,350,390; Aug. 24; v. 277; p. 611.
Fishing-float. E. Talbot. No. 1,350,530; Aug. 24; v. 277; p. 639.
Fishing-net. J. K. Dukas. No. 1,351,628; Aug. 31; v. 277; p. 916.
Fishing-reel. L. Benson. No. 1,351,549; Aug. 31; v. 277; p. 901.
Fishing-rod. F. Hardy. No. 1,351,473; Aug. 31; v. 277; p. 885.
Fishing-rod reel-seat. W. L. Beaty. No. 1,350,636; Aug. 24; v. 277; p. 660.
Fishing-rod reel-seat. W. L. Beaty. No. 1,350,637; Aug. 24; v. 277; p. 660.
Fishing-signal. S. Owsiak. No. 1,349,528; Aug. 10; v. 277; p. 325.
Fishline attachment. M. J. Crosbie. No. 1,351,625; Aug. 31; v. 277; p. 915.
Flagstaff and support therefor. C. Short. No. 1,349,921; Aug. 17; v. 277; p. 473.
Flash-light bag. G. A. Ley. No. 1,350,730; Aug. 24; v. 277; p. 678.
Flatiron, Electric. H. Kocourek. No. 1,350,867; Aug. 24; v. 277; p. 703.
Flax, Apparatus for deseeding. F. L. van Allen. No. 1,350,045; Aug. 17; v. 277; p. 498.
Flexible coupling. C. L. Rayfield. No. 1,348,184; Aug. 3; v. 277; p. 10.
Flexible members, Arrangement of. R. Caudron. No. 1,350,986; Aug. 24; v. 277; p. 726.
Float, Life-. J. H. McDonah. No. 1,349,897; Aug. 17; v. 277; p. 469.
Floor and paving block. W. H. Hollenbeck. No. 1,348,418; Aug. 3; v. 277; p. 57.
Flotation apparatus. W. E. Greenawalt. No. 1,350,605; Aug. 24; v. 277; p. 654.
Flower-box. C. R. Sanborn. No. 1,351,490; Aug. 31; v. 277; p. 888.
Fluid-motor. G. H. Gilman. No. 1,348,863; Aug. 10; v. 277; p. 194.
Fluid-regulator. P. Catucci and L. D. Nadel. No. 1,350,782; Aug. 24; v. 277; p. 688.
Fluid-receptacle. A. J. Herschmann. No. 1,351,331; Aug. 31; v. 277; p. 857.
Fluid substances, Desiccating. R. W. G. Stutzke. No. 1,350,247; Aug. 17; v. 277; p. 536.
Fluid-transmission mechanism. R. L. Swanson. No. 1,349,924; Aug. 17; v. 277; p. 474.
Flushing apparatus, Siphonic. M. J. McCloud. No. 1,349,683; Aug. 17; v. 277; p. 428.
Flying-machine. J. H. Carr. No. 1,349,942; Aug. 17; v. 277; p. 477.
Flying-machine. P. C. Hewitt. No. 1,350,454; Aug. 24; v. 277; p. 624.
Flying-machine. A. B. Roney. No. 1,348,743; Aug. 3; v. 277; p. 118.
Flying-machine. P. Yeso. No. 1,350,201; Aug. 17; v. 277; p. 528.
Flying-machine indicator. J. N. Reynolds. No. 1,351,538; Aug. 31; v. 277; p. 899.
Flying-machine with revolving wings. A. Beurrier. No. 1,350,982; Aug. 24; v. 277; p. 725.
Flying-machines, Detachable stabilizing-fin for. M. Stupar. No. 1,350,948; Aug. 24; v. 277; p. 719.
Flying-machines, Launching device for. M. Stupar. No. 1,350,947; Aug. 24; v. 277; p. 719.
Flying-machines, Wing construction for. T. J. Kehoe. No. 1,349,770; Aug. 17; v. 277; p. 445.
Flytrap and garbage-can, Combined. L. J. Cereghino. No. 1,350,402; Aug. 24; v. 277; p. 613.
Folding chair. E. E. Fisher. No. 1,349,271; Aug. 10; v. 277; p. 274.
Folding seat. A. E. Rhoades. No. 1,348,375; Aug. 3; 277; p. 48.
Folding table. E. F. Mitchell. No. 1,349,687; Aug. 17; v. 277; p. 429.
Food beverage and making same. J. L. Kellogg and B. Kazmann. No. 1,348,999; Aug. 10; v. 277; p. 220.
Food beverage and making same. J. L. Kellogg and B. Kazmann. No. 1,349,000; Aug. 10; v. 277; p. 220.
Food compound and preparing same. A. S. Wahl. No. 1,350,756; Aug. 24; v. 277; p. 683.
Food-cutting device. J. Palinski. No. 1,348,821; Aug. 3; v. 277; p. 132.
Food product. N. C. Fowler, Jr. No. 1,349,753; Aug. 17; v. 277; p. 442.
Food product and making same. J. F. Rumsey. No. 1,348,186; Aug. 3; v. 277; p. 10.
Food product, Canning. J. F. Tronconi. No. 1,348,824; Aug. 3; v. 277; p. 133.
Food products, Apparatus for dehydrating. F. L. Nichols. No. 1,351,118; Aug. 31; v. 277; p. 814.
Foot-operable impression throw-off. J. W. Bernet. No. 1,350,272; Aug. 17; v. 277; p. 541.
Foot-warmer. J. A. Mata. No. 1,348,506; Aug. 3; v. 277; p. 73.
Forceps, Rubber-dam-clamp. J. W. Ivory. No. 1,349,767; Aug. 17; v. 277; p. 445.
Form, Dress-. M. Luery and B. S. Nelson. No. 1,351,179; Aug. 31; v. 277; p. 826.
Form, Dress-. M. Luery and B. S. Nelson. No. 1,351,180; Aug. 31; v. 277; p. 826.
Forming shaped articles from precipitated skin-like compounds. C. E. Swett. No. 1,348,459; Aug. 3; v. 277; p. 64.
Fortress, Floating. J. Ortiz. No. 1,350,667; Aug. 24; v. 277; p. 665.

Ore reducing and refining furnace. Smelting-furnace.
Furnace. B. F. Caldwell. No. 1,351,282; Aug. 31; v. 277; p. 847.
Furnace. C. P. Hidden. No. 1,348,175; Aug. 3; v. 277; p. 8.
Furnace. J. U. McDonald. No. 1,349,971; Aug. 17; v. 277; p. 483.
Furnace. M. Mathy. No. 1,349,899; Aug. 17; v. 277; p. 469.
Furnace. F. C. Nicholas. No. 1,350,233; Aug. 17; v. 277; p. 534.
Furnace-casing. C. L. Epps. No. 1,351,633; Aug. 31; v. 277; p. 917.
Furnace construction. B. E. Broadwell. No. 1,351,281; Aug. 31; v. 277; p. 847.
Furnace construction. A. G. Smith and B. E. Broadwell. No. 1,351,305; Aug. 31; v. 277; p. 852.
Furnace-front. J. Reid. No. 1,359,037; Aug. 17; v. 277; p. 496.
Furnace-front baffle construction. J. Reid. No. 1,350,468; Aug. 24; v. 277; p. 627.
Furnace-grate. M. T. Davis, Jr. No. 1,350,990; Aug. 24; v. 277; p. 727.
Furnace or leer, Annealing-. W. O. Amsler. No. 1,351,323; Aug. 31; v. 277; p. 856.
Furnace-regulator. E. W. Seeger. No. 1,348,589; Aug. 3; v. 277; p. 89.
Furnace-regulator system. E. M. Bouton. No. 1,349,361; Aug. 10; v. 277; p. 292.
Furnace sectional casing. W. F. Kasbohm. No. 1,350,257; Aug. 17; v. 277; p. 538.
Furnaces, Control system for electric. O. A. Colby. No. 1,349,363; Aug. 10; v. 277; p. 292.
Furnaces, Control system for electric. E. A. Hester. No. 1,349,379; Aug. 10; v. 277; p. 296.
Furnaces, Control system for electrical. F. Thornton, Jr. No. 1,349,391; Aug. 10; v. 277; p. 298.
Furnaces, Observation-window for. M. Curry. No. 1,349,562; Aug. 17; v. 277; p. 405.
Furnaces, Ore-feeding apparatus for. L. S. Thill. No. 1,348,603; Aug. 3; v. 277; p. 92.
Furnaces, Oxidizing materials in electric. W. S. Mayer and W. C. Kennedy. No. 1,350,877; Aug. 24; v. 277; p. 705.
Furnaces, Water-heater for. A. W. Bachmann. No. 1,351,606; Aug. 31; v. 277; p. 912.
Furniture, Folding. G. R. Stine. No. 1,351,013; Aug. 24; v. 277; p. 731.
Furniture-leveler. G. R. Perry. No. 1,348,441; Aug. 3; v. 277; p. 61.
Furniture, Printer's. C. E. Benham. No. 1,349,257; Aug. 10; v. 277; p. 272.
Fuse. A. H. Bakken. No. 1,349,357; Aug. 10; v. 277; p. 291.
Fuse. A. L. Eustice. No. 1,348,488; Aug. 3; v. 277; p. 70.
Fuse, Cartridge-type. E. C. Ballman. No. 1,350,055; Aug. 17; v. 277; p. 500.
Fuse-plug. M. J. Canning. No. 1,350,210; Aug. 17; v. 277; p. 530.
Fuse-plug. A. F. Daum. No. 1,351,204; Aug. 31; v. 277; p. 832.
Fuse-plug. H. T. Paiste. No. 1,350,111; Aug. 17; v. 277; p. 510.
Fuse-plug, Refillable. J. G. Clemens. No. 1,348,391; Aug. 3; v. 277; p. 51.
Fuse, Projectile-. J. W. Darley, Jr. No. 1,351,416; Aug. 31; v. 277; p. 874.
Fuse, Renewable. G. D. Fernandez. No. 1,349,269; Aug. 10; v. 277; p. 274.
Fuse-switch. J. P. Arndt. No. 1,350,432; Aug. 24; v. 277; p. 619.
Gage: *See*—
Caliper or indicating gage. Micrometer-gage.
Damper-gage. Oil-gage.
Diaphragm-gage. Plug or thread gage.
Embossing-gage. Thickness-gage.
Gage. J. Erskine. No. 1,351,419; Aug. 31; v. 277; p. 875.
Gage. J. R. Koch. No. 1,351,663; Aug. 31; v. 277; p. 923.
Gage. A. W. Martin. No. 1,351,528; Aug. 31; v. 277; p. 896.
Gage. O. L. Wood. No. 1,351,600; Aug. 31; v. 277; p. 911.
Gage or try-cock. W. H. Wafer and J. Murrin. No. 1,349,594; Aug. 17; v. 277; p. 411.
Gaging or assorting machine. S. A. North. No. 1,348,310; Aug. 3; v. 277; p. 36.
Galley. A. J. Loriot. No. 1,351,295; Aug. 31; v. 277; p. 850.
Gambrel. H. E. Albrecht. No. 1,350,632; Aug. 24; v. 277; p. 659.
Game. B. A. Koellhoffer. No. 1,349,615; Aug. 17; v. 277; p. 415.
Game. R. L. Lloyd. No. 1,348,817; Aug. 3; v. 277; p. 132.
Game. G. H. Parker. No. 1,350,384; Aug. 24; v. 277; p. 610.
Game. W. I. Smith and J. R. Irvin. No. 1,348,520; Aug. 3; v. 277; p. 521.
Game. H. M. Thompson. No. 1,348,335; Aug. 3; v. 277; p. 41.
Game apparatus. A. Prebble. No. 1,348,442; Aug. 3; v. 277; p. 61.
Game apparatus. C. R. Stewart. No. 1,348,597; Aug. 3; v. 277; p. 91.
Game-board. J. R. Duncan. No. 1,349,190; Aug. 10; v. 277; p. 258.
Game-table. A. Smith and R. R. Shenk. No. 1,349,587; Aug. 17; v. 277; p. 410.
Game-trap. F. F. Ellis. No. 1,349,717; Aug. 17; v. 277; p. 435.
Garbage-incinerator. W. Savage. No. 1,349,785; Aug. 17; v. 277; p. 448.
Garment. J. I. Barnett. No. 1,349,359; Aug. 10; v. 277; p. 292.
Garment. A. L. Rankin. No. 1,351,687; Aug. 31; v. 277; p. 927.
Garment. J. Weiss. No. 1,349,029; Aug. 10; v. 277; p. 226.
Garment, Child's. N. Green and S. Matison. No. 1,351,380; Aug. 31; v. 277; p. 868.
Garment-hangers, Card-holder for. W. J. Landry. No. 1,348,952; Aug. 10; v. 277; p. 211.
Garment, Union-. G. H. Heatly. No. 1,350,020. Aug. 17; v. 277; p. 493.
Garment, Waterproof. D. L. MacCallum. No. 1,348,818; Aug. 3; v. 277; p. 132.
Garter. R. Gorton. No. 1,351,567; Aug. 31; v. 277; p. 904.
Gas-analyzing apparatus, Automatic. O. Rodhe. No. 1,351,129; Aug. 31; v. 277; p. 816.
Gas, Apparatus for manufacture of. M. C. Whitaker and W. F. Rittman. No. 1,348,766; Aug. 3; v. 277; p. 122.
Gas-burner. C. F. Brand. No. 1,348,261; Aug. 3; v. 277; p. 26.
Gas-burner. G. W. Calef. No. 1,351,715; Aug. 31; v. 277; p. 932.
Gas-burner. J. T. Masterson. No. 1,351,431; Aug. 31; v. 277; p. 877.
Gas-burner. G. H. Stevens. No. 1,350,678; Aug. 24; v. 277; p. 667.
Gas-burner. L. Wilson. No. 1,350,051; Aug. 17; v. 277; p. 449.
Gas-burners, Time-retarded extinguishing device for. M. H. Baker. No. 1,350,589; Aug. 24; v. 277; p. 651.
Gas-burning heater. J. C. Tate. No. 1,349,862; Aug. 17; v. 277; p. 463.
Gas-control system. H. F. Smith. No. 1,348,379; Aug. 3; v. 277; p. 49.
Gas-engine ignition. G. L. Meyer. No. 1,349,846; Aug. 17; v. 277; p. 459.
Gas-engine, Rotary. H. E. Osborne. No. 1,350,880; Aug. 24; v. 277; p. 705.
Gas-generator. H. M. Smith. No. 1,349,923; Aug. 17; v. 277; p. 473.
Gas-generator, Pulverized-fuel. N. F. X. Beauregard. No. 1,351,460; Aug. 31; v. 277; p. 883.
Gas-heater. J. I. Robin. No. 1,351,004; Aug. 24; v. 277; p. 729.
Gas-heater. J. I. Robin. No. 1,351,005; Aug. 24; v. 277; p. 729.
Gas, Heating-stove burning. F. M. Lea. No. 1,351,525; Aug. 31; v. 277; p. 896.
Gas-lighting device and making same. G. Blumrick. No. 1,350,853; Aug. 24; v. 277; p. 701.
Gas-meters, Fitting for domestic. W. A. Ashley. No. 1,350,132; Aug. 17; v. 277; p. 514.
Gas-meters, Tangent-post for. H. Chrisman. No. 1,350,067; Aug. 17; v. 277; p. 502.
Gas-producer. E. H. Crush. No. 1,349,497; Aug. 10; v. 277; p. 319.

Gas-producer. S. B. Sheldon. No. 1,350,472; Aug. 24; v. 277; p. 628.
Gas-producer. S. B. Sheldon. No. 1,350,474; Aug. 24; v. 277; p. 628.
Gas-producer. S. B. Sheldon. No. 1,350,475; Aug. 24; v. 277; p. 628.
Gas-producer arrangement. S. B. Sheldon. No. 1,350,473; Aug. 24; v. 277; p. 628.
Gas-regulator. J. Denton and A. L. Skinner. No. 1,349,945; Aug. 17; v. 277; p. 478.
Gas-screen. T. A. Brooks. No. 1,350,700; Aug. 24; v. 277; p. 672.
Gases, Absorption of nitrous. J. L. la Cour. No. 1,348,227; Aug. 3; v. 277; p. 19.
Gases and vapors from liquids, Apparatus for separating. T. K. Smith. No. 1,350,576; Aug. 24; v. 277; p. 649.
Gases, Apparatus for purifying. H. F. Smith. No. 1,348,066; Aug. 10; v. 277; p. 214.
Gases of coal, Purification of distillation-. E. Ciselet and C. Deguide. No. 1,349,750; Aug. 17; v. 277; p. 442.
Gasolene, Cleaning. M. Leitch. No. 1,351,047; Aug. 31; v. 277; p. 801.
Gasolene, Compressed-air device for handling. W. H. Pridgen. No. 1,350,517; Aug. 24; v. 277; p. 636.
Gate: *See*—
Adjustable gate. Farm-gate.
End-gate. Railway-gate.
Gate. M. H. Bodley. No. 1,351,612; Aug. 31; v. 277; p. 913.
Gate. C. A. McCann. No. 1,350,323; Aug. 24; v. 277; p. 597.
Gate. J. H. Pickett. No. 1,350,235; Aug. 17; v. 277; p. 534.
Gate and shoveling-board, Combined end-. H. H. Johnson. No. 1,351,656; Aug. 31; v. 277; p. 921.
Gate closer and supporter. R. P. Bellican. No. 1,350,134; Aug. 17; v. 277; p. 515.
Gear, Change-speed. A. McNitt. No. 1,350,822; Aug. 24; v. 277; p. 696.
Gear-cutting machine. E. W. Bullock, S. H. Earl, and G. H. Bryan. No. 1,351,200; Aug. 31; v. 277; p. 831.
Gear for bicycles, velocipedes, and the like, Pedimotive propelling-. W. B. Smith. No. 1,349,588; Aug. 17; v. 277; p. 410.
Gear-shift lock. G. C. Mather. No. 1,349,973; Aug. 17; v. 277; p. 484.
Gear, Making housings for automobile transmission-. T. E., Jr., and J. B. Murray. No. 1,350,830; Aug. 24; v. 277; p. 697.
Gear, Reversing-. C. H. Macmillan. No. 1,350,324; Aug. 24; v. 277; p. 598.
Gear, Transmission-. J. H. Downie. No. 1,348,160; Aug. 3; v. 277; p. 5.
Gear-wheel, Power-transmission. C. A. Parsons and S. S. Cook. No. 1,351,401; Aug. 31; v. 277; p. 872.
Gears, Machine for generating bevel-. M. Maag. No. 1,351,580; Aug. 31; v. 277; p. 907.
Gears or wheels, Method of and machinery for cutting. J. E. Gleason and A. L. Stewart. No. 1,349,951; Aug. 17; v. 277; p. 479.
Gearing. K. Alquist. No. 1,351,317; Aug. 31; v. 277; p. 854.
Gearing. K. Alquist. No. 1,351,318; Aug. 31; v. 277; p. 855.
Gearing. K. Alquist. No. 1,351,320; Aug. 31; v. 277; p. 855.
Gearing. K. Alquist. No. 1,351,321; Aug. 31; v. 277; p. 855.
Gearing. K. Alquist. No. 1,351,322; Aug. 31; v. 277; p. 855.
Gearing, Epicyclic. F. H. Royce. No. 1,350,522; Aug. 24; v. 277; p. 637.
Gearing for double-rotation turbines. K. Alquist. No. 1,351,319; Aug. 31; v. 277; p. 855.
Gearing, Power-transmission toothed. B. R. Wingfield. No. 1,351,597; Aug. 31; v. 277; p. 910.
Gearing, Transmission-. L. M. Gardiner. No. 1,349,719; Aug. 17; v. 277; p. 436.
Gearing, Worm-. P. Brown and F. J. Bostock. No. 1,349,811; Aug. 17; v. 277; p. 453.
Generator: *See*—
Gas-generator. Steam-generator.
Hydrocarbon-generator.
Generator and pump, Combined. H. R. Van Deventer. No. 1,349,397; Aug. 10; v. 277; p. 299.
Glass, Apparatus for conveying molten. J. B. Graham and R. La France. No. 1,350,448; Aug. 24; v. 277; p. 623.
Glass covering, Hermetic. J. C. Séailles. No. 1,351,492; Aug. 31; v. 277; p. 889.
Glass-drawing bait and using it. H. K. Hitchcock. No. 1,349,200; Aug. 10; v. 277; p. 260.
Glass-feeding machine and process. K. E. Peiler. No. 1,349,551; Aug. 10; v. 277; p. 329.
Glass-forming machine. R. La France. No. 1,348,365; Aug. 3; v. 277; p. 46.
Glass-gathering mechanism. A. Kadow. No. 1,350,552; Aug. 24; v. 277; p. 643.
Glass-making pots, Brush for cleaning. C. M. Brown. No. 1,349,262; Aug. 10; v. 277; p. 273.
Glass, Means for transferring hot. M. J. Owens. No. 1,350,464; Aug. 24; v. 277; p. 626.
Glass rollers, Method of opening the shade ends of hand-blown. C. F. Warrick. No. 1,351,710; Aug. 31; v. 277; p. 931.
Glass-securing device. D. J. Murnane. No. 1,351,058; Aug. 31; v. 277; p. 803.
Glass sheets, Apparatus for drawing. H. K. Hitchcock. No. 1,349,201; Aug. 10; v. 277; p. 266.
Glass-topped jars, Opener for. D. C. Belyea. No. 1,350,180; Aug. 17; v. 277; p. 524.
Glass vessel. G. F. McDonnell and J. J. Dandoy. No. 1,348,231; Aug. 3; v. 277; p. 20.
Glass-working machine. E. Miller. No. 1,350,375; Aug. 24; v. 277; p. 608.
Glue-heaters, Electric. H. Kain, C. L. Miles, and G. A. Wilkinson. No. 1,351,478; Aug. 31; v. 277; p. 886.
Golf-ball. G. C. Worthington and W. E. Reichard. No. 1,351,145; Aug. 31; v. 277; p. 819.
Golf-club. C. W. Booth. No. 1,349,805; Aug. 17; v. 277; p. 452.
Golf-club. C. W. Booth. No. 1,349,806; Aug. 17; v. 277; p. 452.
Gopher-trap. J. F. Stanklewicz. No. 1,351,351; Aug. 31; v. 277; p. 862.
Governor. F. Pokorny, Jr. No. 1,348,956; Aug. 10; v. 277; p. 212.
Governor, Gas-engine. J. Kathe. No. 1,351,660; Aug. 31; v. 277; p. 922.
Governor, Frictional. W. W. Dean. No. 1,349,050; Aug. 10; v. 277; p. 230.
Governor, Motor-. C. H. Gill. No. 1,350,018; Aug. 17; v. 277; p. 492.
Grader, Road-. A. N. Daywitt. No. 1,349,498; Aug. 10; v. 277; p. 319.
Grader, Seed-. E. A. Watkins. No. 1,349,306; Aug. 10; v. 277; p. 281.
Grain-elevator. W. E. Echterling. No. 1,349,948; Aug. 17; v. 277; p. 478.
Grain-spout mechanism. L. E. Wray. No. 1,349,354; Aug. 10; v. 277; p. 291.
Grain-unloading process and grain-car track construction. H. Richardson. No. 1,350,736; Aug. 24; v. 277; p. 679.
Granite, Producing duplicate patterns in. J. Harwood. No. 1,349,955; Aug. 17; v. 277; p. 480.
Grapefruit-corer. M. W. Pifer. No. 1,351,216; Aug. 31; v. 277; p. 834.
Graphic recording instrument. J. W. Bard and O. White. No. 1,350,485; Aug. 24; v. 277; p. 630.
Grapple, Lifting-. A. Awischus. No. 1,350,053; Aug. 17; v. 277; p. 499.
Grass cutter, Bermuda-. M. Bronnum. No. 1,349,809; Aug. 17; v. 277; p. 452.
Grate. J. S. Wilson. No. 1,349,644; Aug. 17; v. 277; p. 420.
Grate, Forced-draft water-. H. F. Morris. No. 1,348,235; Aug. 3; v. 277; p. 21.
Grater attachment. J. C. Kottman. No. 1,349,616; Aug. 17; v. 277; p. 415.
Grave-lining device. L. Goodwin. No. 1,348,405; Aug. 3; v. 277; p. 54.
Gravity-carrier. C. H. Lister. No. 1,348,500; Aug. 3; v. 277; p. 72.
Grease container and dispenser for heavy greases. A. J. Wood. No. 1,349,994; Aug. 17; v. 277; p. 488.
Grease-cup. S. Dawson. No. 1,348,154; Aug. 3; v. 277; p. 4.
Grease-cup. E. W. K'Burg. No. 1,348,362; Aug. 3; v. 277; p. 46.
Grinder, Corn-. F. M. Lyon. No. 1,350,261; Aug. 17; v. 277; p. 539.
Grinder, Meat-. P. F. Loichot. No. 1,350,164; Aug. 17; v. 277; p. 520.
Grinder, Valve-. P. P. Hinckley. No. 1,350,804; Aug. 24; v. 277; p. 692.
Grinders, Sliding base for. M. F. Williams. No. 1,350,691; Aug. 24; v. 277; p. 670.
Grinding-machine. P. S. Arnold. No. 1,351,409; Aug. 31; v. 277; p. 873.
Grinding screw-threaded articles, Attachment for. J. M. Stryhal. No. 1,350,044; Aug. 17; v. 277; p. 497.
Gripper, Auxiliary. C. G. Cope. No. 1,350,140; Aug. 17; v. 277; p. 516.
Groceryman's box. F. Dorchek. No. 1,348,552; Aug. 3; v. 277; p. 82.
Gromets, Manufacturing. W. A. Young. No. 1,348,615; Aug. 3; v. 277; p. 94.
Ground-anchor. I. Solberg. No. 1,349,476; Aug. 10; v. 277; p. 314.

Lint-collecting system. J. Davidson. No. 1,350,439; Aug. 24; v. 277; p. 621.

Linting-machine. G. N. Woodruff. No. 1,349,179; Aug. 10; v. 277; p. 256.

Liquid and gas contact apparatus. H. J. Zimmermann. No. 1,350,202; Aug. 17; v. 277; p. 528.

Liquid-containers, Means for establishing auxiliary convection in. O. E. Huebner. No. 1,350,728; Aug. 24; v. 277; p. 678.

Liquid-fuel-ignition mechanism. A. Doble. No. 1,349,877; Aug. 17; v. 277; p. 465.

Liquid in evaporating installations, Apparatus for regulating and maintaining a desired level in. E. A. Barbet. No. 1,349,114; Aug. 10; v. 27; p. 242.

Liquids, Apparatus for separating solids from. H. N. Herrick. No. 1,349,881; Aug. 17; v. 277; p. 466.

Liquids, Apparatus for the recovery of the contents of. C. P. Grimwood. No. 1,348,409; Aug. 3; v. 277; p. 55.

Liquids, Apparatus for treating. W. Koedding and W. J Lemp. No. 1,351,522; Aug. 31; v. 277; p. 895.

Liquids, Filtration and/or percolation of. C. Yeoman. No. 1,349,798; Aug. 17; v. 277; p. 450.

Liquids from gases, Obtaining volatile. L. F. Bayer. No. 1,351,151; Aug. 31; v. 277; p. 820.

Liquids or gases, Apparatus for extracting. J. Sonneveld. No. 1,351,139; Aug. 31; v. 277; p. 818.

Liquids, Producing foam in. E. Wirth-Frey. No. 1,351,089; Aug. 31; v. 277; p. 809.

Load-indicator. A. Hallner. No. 1,350,498; Aug. 24; v. 277; p. 633.

Loading-machine. F. Billings. No. 1,349,749; Aug. 17; v. 277; p. 441.

Locating buried objects, Instrument for. W. S. Darley. No. 1,351,556; Aug. 31; v. 277; p. 902.

Modulating and transmitting system. E. L. Nelson. No. 1,349,729; Aug. 17; v. 277; p. 438.
Mold: *See*—
Ingot-mold. Rubber-mold.
Multiple-cup mold.
Molds for founding, Machine for making. E. C. Beardsley and W. F. Piper. No. 1,351,227; Aug. 31; v. 277; p. 836.
Molding device. L. E. Butler. No. 1,351,157; Aug. 31; v. 277; p. 822.
Molding-machine. W. F. Brady. No. 1,351,020; Aug. 31; v. 277; p. 795.
Molding-machine. L. Hansen. No. 1,348,411; Aug. 3; v. 277; p. 56.
Molding-machine. G. H. Talbot. No. 1,349,017; Aug. 10; v. 277; p. 223.
Monkey-wrench. F. E. Sayres. No. 1,350,672; Aug. 24; v. 277; p. 666.
Monoxid to dioxid, Oxidizing barium. H. Fleck. No. 1,349,417; Aug. 10; v. 277; p. 303.
Mop. A. Link. No. 1,349,680; Aug. 17; v. 277; p. 428.
Mop-wringer. W. Dequede. No. 1,350,791; Aug. 24; v. 277; p. 690.
Mordant or dye and making same. G. M. Lopez and A. Quaglia. No. 1,348,431; Aug. 3; v. 277; p. 59.
Motor: *See*—
Electric motor. Rotary motor.
Fluid-motor. V-type motor.
Hydraulic motor. Water-motor.
Phonograph-motor.
Motor. J. Schroeder. No. 1,351,695; Aug. 31; v. 277; p. 929.
Motor-propelling means. P. B. McChesney. No. 1,349,077; Aug. 10; v. 277; p. 235.
Motor-support. G. F. Flynn. No. 1,349,418; Aug. 10; v. 277; p. 303.
Motor-vehicle signal. R. Y. Neely. No. 1,350,513; Aug. 24; v. 277; p. 636.
Motors, Controller for electric. C. L. Perry. No. 1,350,937; Aug. 24; v. 277; p. 717.
Motors, Controller for small. J. L. Chantemerle. No. 1,351,023; Aug. 31; v. 277; p. 796.
Motors, Winding mechanism for spring-. J. J. Scully. No. 1,351,405; Aug. 31; v. 277; p. 872.
Motorcycle. G. W. Mouldin. No. 1,350,878; Aug. 24; v. 277; p. 705.
Mower. J. Aspinwall. No. 1,348,471; Aug. 3; v. 277; p. 66.
Mower, Lawn-. J. N. M. Keyzer. No. 1,351,520; Aug. 31; v. 277; p. 894.
Mowing-machine. M. H. P. Archer. No. 1,348,685; Aug. 3; v. 277; p. 107.
Muffler. H. Paulson. No. 1,351,122; Aug. 31; v. 277; p. 815.
Muffler cut-out. O. F. Kirkpatrick. No. 1,351,173; Aug. 31; v. 277; p. 825.
Multiple coupling. T. C. Kremer. No. 1,348,811; Aug. 3; v. 277; p. 131.
Multiple-cup mold. J. Benton. No. 1,349,546; Aug. 10; v. 277; p. 328.
Music-recorder. P. J. Meahl. No. 1,351,432; Aug. 31; v. 277; p. 877.
Music-rolls, Container for. C. S. Burton. No. 1,350,701; Aug. 24; v. 277; p. 672.
Musical instruments, Appliance for horn. G. B. Humes. No. 1,350,409; Aug. 24; v. 277; p. 615.
Musical instruments, Detachable bottom-action unit for automatic. G. P. Brand. No. 1,351,280; Aug. 31; v. 277; p. 847.
Musical instruments, Primary valve for pneumatic. B. R. Van Valkenburg. No. 1,350,395; Aug. 24; v. 277; p. 612.
Musical instruments, Sounding-board for. J. Virzi. No. 1,351,709; Aug. 31; v. 277; p. 931.
Musical wind instrument. F. and R. C. Jagger. No. 1,349,722; Aug. 17; v. 277; p. 436.
Muzzle, Dog-. H. L. Stoker. No. 1,351,140; Aug. 31; v. 277; p. 819.
Nailing mechanism. J. H. Gibson. No. 1,348,711; Aug. 3; v. 277; p. 112.
Name-plate and annunciator. W. H. Bailey. No. 1,351,362; Aug. 31; v. 277; p. 864.
Necktie. A. M. Bakerman. No. 1,349,436; Aug. 10; v. 277; p. 316.
Necktie. J. Costello. No. 1,349,187; Aug. 10; v. 277; p. 257.
Necktie-clasp. C. A. Kreplin. No. 1,350,612; Aug. 24; v. 277; p. 655.
Needle-holder. J. Stanko. No. 1,349,232; Aug. 10; v. 277; p. 266.
Needle, Ribbon or tape. W. C. Ellsworth. No. 1,351,418; Aug. 31; v. 277; p. 875.
Needle, Ripping-. M. V. Bell. No. 1,351,010; Aug. 24; v. 277; p. 730.
Nest, Knockdown hen's. E. Swanson. No. 1,351,308; Aug. 31; v. 277; p. 852.
Nest structure, Portable. E. M. Pratt and A. H. Rockefeller. No. 1,350,264; Aug. 17; v. 277; p. 540.
Nest, Trap-. C. E. Glander. No. 1,351,103; Aug. 31; v. 277; p. 811.
Net, Collapsible minnow-. F. Eberhardt. No. 1,348,398; Aug. 3; v. 277; p. 53.
Non-kick device. E. Frohwerk. No. 1,348,989; Aug. 10; v. 277; p. 218.
Non-metallic resistance element and making same. A. L. Feild. No. 1,349,053; Aug. 10; v. 277; p. 231.
Nozzle, Suction cleaning-. W. W. Rosenfield. No. 1,348,584; Aug. 3; v. 277; p. 88.
Nozzle, Suction cleaning-. W. W. Rosenfield. No. 1,348,587; Aug. 3; v. 277; p. 89.
Nut and washer, Combined. W. H. Cook. No. 1,350,545; Aug. 24; v. 277; p. 642.
Nut-blancher. J. G. Kennedy. No. 1,350,506; Aug. 24; v. 277; p. 634.
Nut-blanching machine. J. E. Demerath. No. 1,350,549; Aug. 24; v. 277; p. 642.
Nut-lock. A. Blake. No. 1,349,404; Aug. 10; v. 277; p. 300.
Nut-lock. J. A. Bradley. No. 1,349,260; Aug. 10; v. 277; p. 272.
Nut-lock. A. Du Puy. No. 1,348,787; Aug. 3; v. 277; p. 126.
Nut-lock. E. E. Ellmann, F. A. Kell, and L. L. Zacharias. No. 1,351,235; Aug. 31; v. 277; p. 838.
Nut-lock. J. A. Ettler. No. 1,350,404; Aug. 24; v. 277; p. 614.
Nut-lock. G. Johnson and E. Nelson. No. 1,349,768; Aug. 17; v. 277; p. 445.
Nut-lock. E. Luck. No. 1,350,165; Aug. 17; v. 277; p. 521.
Nut-lock. S. H. McCain, Jr. No. 1,350,230; Aug. 17; v. 277; p. 533.
Nut-lock. W. S. Myers. No. 1,351,676; Aug. 31; v. 277; p. 925.
Nut-lock. C. W. Shelton. No. 1,349,696; Aug. 17; v. 277; p. 431.
Oil-absorbing device. A. E. Allen. No. 1,351,601; Aug. 31; v. 277; p. 911.
Oil-alarm device. F. C. Withrow. No. 1,349,991; Aug. 17; v. 277; p. 487.
Oil, Apparatus for distilling mineral. E. V. Stone. No. 1,351,266; Aug. 31; v. 277; p. 844.
Oil-atomizer. L. Stiles, Jr. No. 1,350,391; Aug. 24; v. 277; p. 611.
Oil-box attachment. F. A. Mackin. No. 1,348,433; Aug. 3; v. 277; p. 60.
Oil-burner. W. Beckman. No. 1,350,917; Aug. 24; v. 277; p. 713.
Oil-burner. J. W. Hamilton. No. 1,351,208; Aug. 31; v. 277; p. 832.
Oil-burner. J. L. Perkins. No. 1,350,466; Aug. 24; v. 275; p. 627.
Oil-burner. A. T. Timosci. No. 1,349,479; Aug. 10; v. 277; p. 315.
Oil burner, Crude-. J. Westall. No. 1,348,528; Aug. 3; v. 277; p. 77.
Oil-burning boiler. A. S. D. Herreshoff. No. 1,348,563; Aug. 3; v. 277; p. 84.
Oil-burning heater. D. Seiniger. No. 1,349,475; Aug. 10; v. 277; p. 314.
Oil-can. E. S. Church. No. 1,350,702; Aug. 24; v. 277; p. 672.
Oil-can holder. C. W. McKinley. No. 1,349,842; Aug. 17; v. 277; p. 458.
Oil-can. J. P. Gits. No. 1,350,721; Aug. 25; v. 277; p. 676.
Oil-cup. T. G. Pihlfeldt and F. C. Hartung. No. 1,350,566; Aug. 24; v. 277; p. 646.
Oil-cup. C. E. Quintin. No. 1,349,098; Aug. 10; v. 277; p. 239.
Oil-cup. L. H. Williams. No. 1,350,196; Aug. 17; v. 277; p. 527.
Oil-cup, Vacuum. H. F. Bloom. No. 1,351,610; Aug. 31; v. 277; p. 913.
Oil-filter. R. W. Roots. No. 1,350,521; Aug. 24; v. 277; p. 637.

Oil-heater. F. Yokel. No. 1,349,484; Aug. 10; v. 277; p. 316.
Oil-press. M. B. Green. No. 1,348,869; Aug. 10; v. 277; p. 195.
Oil-press. M. B. Green. No. 1,348,870; Aug. 10; v. 277; p. 195.
Oil-tanks, Fire-extinguisher for. I. N. Cooper. No. 1,349,048; Aug. 10; v. 277; p. 230.
Oil-well packer. P. H. Mack. No. 1,350,553; Aug. 24; v. 277; p. 643.
Oils, Apparatus for treating hydrocarbon-. M. J. Trumble. No. 1,349,794; Aug. 17; v. 277; p. 450.
Oils from cans, Removing solid. W. B. Fogh. No. 1,350,599; Aug. 24; v. 277; p. 653.
Oils, Manufacturing lubricating. H. Klever, L. C. Lautenschläger, and O. H. Göhring. No. 1,350,814; Aug. 24; v. 277; p. 634.
Oils, Process and apparatus for continuously cracking. W. B. Price and E. Dietz. No. 1,349,294; Aug. 10; v. 277; p. 279.
Oils, Recovery of crude products from benzol light. F. Tschudy. No. 1,348,606; Aug. 3; v. 277; p. 92.
Oiler. Automatic tractor-. A. E. Modrell. No. 1,350,559; Aug. 24; v. 277; p. 645.
Oiler, Floor-. P. Belvin. No. 1,350,638; Aug. 24; v. 277; p. 660.
Oiler, Spring-leaf. F. Kleinsmith. No. 1,351,174; Aug. 31; v. 277; p. 825.
Oiler, Tool-handle. W. Wilson. No. 1,349,931; Aug. 17; v. 277; p. 475.
Oiling device. F. Richard. No. 1,348,664; Aug. 3; v. 277; p. 104.
Oiling system. A. Costa. No. 1,350,643; Aug. 24; v. 277; p. 661.
Oiling the wheels of tramway and like vehicles, Means for. T. Abbott. No. 1,351,196; Aug. 31; v. 277; p. 830.
Oleaginous materials from containers, Device for removing semisolid. W. B. Fogh. No. 1,350,598; Aug. 24; v. 277; p. 653.
Oleaginous substances from oleaginous subetance containing materials, Extracting. J. MacGregor. No. 1,351,483; Aug. 31; v. 277; p. 887.
Ophthalmic mounting. G. H. Day. No. 1,348,155; Aug. 3; v. 277; p. 4.
Ophthalmic mounting. P. H. Herbert. No. 1,349,378; Aug. 10; v. 277; p. 296.
Ophthalmic mounting. J. R. Van Tassel. No. 1,350,430; Aug. 24; v. 277; p. 619.
Optical instrument. N. A. Shigon. No. 1,351,221; Aug. 31; v. 277; p. 835.
Optical printer. H. B. Byron. No. 1,351,618; Aug. 31; v. 277; p. 914.
Optical sign. E. Hönig. No. 1,349,277; Aug. 10; v. 277; p. 276.
Optophone. A. Barr, W. Stroud, and E. E. F. d'Albe. No. 1,350,954; Aug. 24; v. 277; p. 720.
Ordnance, Recoil apparatus of. A. T. Dawson and G. T. Buckham. No. 1,350,593; Aug. 24; v. 277; p. 652.
Ore concentration. B. H. Dosenbach. No. 1,350,364; Aug. 24; v. 277; p. 606.
Ore-flotation apparatus. J. B. Brown. No. 1,351,155; Aug. 31; v. 277; p. 821.
Ore reducing and refining furnace. H. L. Charles. No. 1,348,151; Aug. 3; v. 277; p. 4.
Ores, Apparatus for agglomerating. E. W. Davis. No. 1,350,440; Aug. 24; v. 277; p. 622.
Ores, Apparatus for roasting or sintering. J. E. Greenawalt. No. 1,348,407; Aug. 3; v. 277; p. 55.
Ores, Apparatus for separating or concentrating. D. Cole. No. 1,351,096; Aug. 31; v. 277; p. 810.
Ores, Extraction of lead from its. F. E. Elmore. No. 1,350,959; Aug. 24; v. 277; p. 721.
Ores in blast-furnaces, Treating. L. P. Basset. No. 1,349,598; Aug. 17; v. 277; p. 412.
Ores, Process and apparatus for the reduction of metallic oxid. J. W. Moffat. No. 1,348,889; Aug. 10; v. 277; p. 198.
Ores, Reducing tungsten. D. J. Giles. No. 1,348,356; Aug. 3; v. 277; p. 45.
Ores, Treating. J. E. Greenawalt. No. 1,348,408; Aug. 3; v. 277; p. 55.
Ores, Treating. L. B. Skinner. No. 1,350,286; Aug. 17; v. 277; p. 544.
Organ, Automatic. C. Kraliček. No. 1,350,818; Aug. 24; v. 277; p. 695.
Organs, Combination action for. H. T. Depue. No. 1,349,820; Aug. 17; v. 277; p. 454.
Orthopedic device. M. L. Severy. No. 1,350,944; Aug. 24; v. 277; p. 718.
Oven. H. H. Chaffee. No. 1,349,494; Aug. 10; v. 277; p. 318.
Oven and loading device therefor, Baking-. G. L. Gay. No. 1,348,355; Aug. 3; v. 277; p. 44.
Oven, Baking-. A. R. Ross. No. 1,349,436; Aug. 10; v. 277; p. 307.
Oven-shelf. J. W. Coumerilh. No. 1,351,415; Aug. 31; v. 277; p. 874.
Oven-shelf. W. B. Martin. No. 1,351,394; Aug. 31; v. 277; p. 870.
Oven turntable-rack. O. L. Partonnar. No. 1,350,330; Aug. 24; v. 277; p. 599.
Overhead-track hanger. A. H. Neller. No. 1,349,141; Aug. 10; v. 277; p. 248.
Oxalate, Making calcium. F. M. Dupont and G. A. Hanke. No. 1,349,947; Aug. 17; v. 277; p. 478.
Oxid, Obtaining titanic. L. E. Barton. No. 1,348,843; Aug. 10; v. 277; p. 190.
Oxid, Obtaining zirconium. L. E. Barton. No. 1,351,091; Aug. 31; v. 277; p. 809.
Oxid ores of manganese, Treating. G. H. Clevenger and M. H. Caron. No. 1,349,322; Aug. 10; v. 277; p. 284.
Oxids, Process and apparatus for reducing metallic. W. L. Morrison. No. 1,350,419; Aug. 24; v. 277; p. 617.
Oxyacetylene cutting-machine for circular plates. F. Klits and L. A. Paradis. No. 1,348,863; Aug. 3; v. 277; p. 46.
Package, Absorbent-bandage. E. M. Pond. No. 1,351,441; Aug. 31; v. 277; p. 879.
Package closing and locking mechanism. A. W. Harris. No. 1,348,643; Aug. 3; v. 277; p. 99.
Package, Shipping-. S. Zielezinski. No. 1,348,682; Aug. 3; v. 277; p. 107.
Package-tie. W. F. Riley. No. 1,351,344; Aug. 31; v. 277; p. 860.
Package wrapper or label and match-packet, Combination. A. W. Graham. No. 1,351,242; Aug. 31; v. 277; p. 839.
Package-wrapping machine. S. Cooper. No. 1,351,025; Aug. 31; v. 277; p. 797.
Packaging materials, Machine for. E. E. Winkley. No. 1,348,341; Aug. 3; v. 277; p. 42.
Packing-auger. O. R. Hyland. No. 1,350,999; Aug. 24; v. 277; p. 728.
Packing material. A. A. Somerville. No. 1,349,737; Aug. 17; v. 277; p. 439.
Pad: *See*—
Copying-pad.
Padlock. N. Krohn. No. 1,348,884; Aug. 10; v. 277; p. 198.
Padlock. G. A. Lund. No. 1,349,682; Aug. 17; v. 277; p. 428.
Pail. H. J. Scott. No. 1,349,008; Aug. 10; v. 277; p. 222.
Paint. D. C. Smith. No. 1,348,904; Aug. 10; v. 277; p. 202.
Paint outfit, Water-color-. J. P. Mentzer. No. 1,349,217; Aug. 10; v. 277; p. 263.
Paints and pigments, Colorimetry. A. H. Pfund. No. 1,350,386; Aug. 24; v. 277; p. 610.
Pan: *See*—
Roasting-pan.
Paper bags, Machine for making valved. M. C. Rose. No. 1,351,219; Aug. 31; v. 277; p. 834.
Paper bottles, Machine for capping multisided. L. D. Stephenson. No. 1,349,233; Aug. 10; v. 277; p. 267.
Paper bottles, Machine for capping multisided. L. D. Stephenson. No. 1,349,234; Aug. 10; v. 277; p. 267.
Paper cup, Collapsible. P. H. Carr. No. 1,351,412; Aug. 31; v. 277; p. 874.
Paper-drying machines, Cylinder for. J. E. Alexander. No. 1,348,469; Aug. 3; v. 277; p. 66.
Paper guard and cutter, Roll-. H. B. Cranshaw. No. 1,351,555; Aug. 31. v. 277; p. 902.
Paper-hanging device. P. Malacos and S. Canellos. No. 1,348,290; Aug. 3; v. 277; p. 32.
Paper, Machine for making stretchable crinkled. E. D. Greene. No. 1,348,638; Aug. 3; v. 277; p. 99.
Paper-sorting machines, Sheet-feeding apparatus for. G. Spiess. No. 1,348,246; Aug. 3; v. 277; p. 23.
Paper-stock, Reclaiming. C. Baskerville and C. M. Joyce. No. 1,351,092; Aug. 31; v. 277; p. 809.
Parachute. Z. Koza. No. 1,349,513; Aug. 10; v. 277; p. 322.
Paste, Alimentary. C. S. Miner. No. 1,349,524; Aug. 10; v. 277; p. 324.
Pavement. A. T. Rhodes. No. 1,348,959; Aug. 10; v. 277; p. 212
Paving-block. A. L. Baughman. No. 1,348,774; Aug. 3; v. 277; p. 124.
Paving materials, Apparatus for preparing. L. B. West. No. 1,351,361; Aug. 31; v. 277; p. 864.
Paving, Wood-block. G. W. Warmoth. No. 1,351,546; Aug. 31; v. 277; p. 900.
Peanut-roaster. E. C. Booth. No. 1,350,541; Aug. 24; v. 277; p. 641.
Pearl, Producing imitation of mother-of-. E. Mauvillin and V. Guillet. No. 1,351,529; Aug. 31; v. 277; p. 897.
Peat, Treating. W. W. Blair. No. 1,349,713; Aug. 17; v. 277; p. 434.
Peat, Treating. W. W. Blair. No. 1,349,714; Aug. 17; v. 277; p. 435.
Pedal-holder. A. J. Lear. No. 1,350,228; Aug. 17; v. 277; p. 533.
Pen caps, Clip for fountain-. D. J. La France and W. P. De Witt. No. 1,350,412; Aug. 24; v. 277; p. 615.
Pen-filling device, Fountain-. A. T. Cross. No. 1,348,211; Aug. 3; v. 277; p. 15.
Pen, Fountain-. C. R. Keeran. No. 1,351,574; Aug. 31; v. 277; p. 906.
Pen, Fountain-. C. R. Keeran. No. 1,351,575; Aug. 31; v. 277; p. 906.
Pen, Fountain-. J. C. Wahl. No. 1,351,591; Aug. 31; v. 277; p. 909.
Pen-holder. H. E. Halseth. No. 1,348,410; Aug. 3; v. 277; p. 55.
Pen, Ruling-. H. R. Fuller. No. 1,348,637; Aug. 3; v. 277; p. 98.

Pencil. H. L. Blackman. No. 1,350,983; Aug. 24; v. 277; p. 725.
Pencil. J. Bricken. No. 1,351,552; Aug. 31; v. 277; p. 901.
Pencil. H. L. Fischer and F. J. Kristofek. No. 1,349,950; Aug. 17; v. 277; p. 479.
Pencil, Mechanical. J. C. Wahl. No. 1,349,025; Aug. 10; v. 277; p. 225.
Periscope and gun, Combined. L. Holecek. No. 1,351,649; Aug. 31; v. 277; p. 920.
Pessary, Medicated. L. Martocci-Pisculli. No. 1,348,728; Aug. 3; v. 277; p. 115.
Petroleum and like oils, Treatment of. E. W. Wynne. No. 1,351,458; Aug. 31; v. 277; p. 882.
Petroleum distillates, Expressing wax from. W. C. and F. E. Wells. No. 1,350,482; Aug. 24; v. 277; p. 630.
Phonograph. J. B. Griffin. No. 1,348,357; Aug. 3; v. 277; p. 45.
Phonograph. W. H. Miller. No. 1,350,616; Aug. 24; v. 277; p. 656.
Phonograph control. J. Hoffay. No. 1,349,763; Aug. 17; v. 277; p. 444.
Phonograph-horn. F. C. Lyon. No. 1,349,286; Aug. 10; v. 277; p. 277.
Phonograph-motor. W. G. Shelton. No. 1,350,571; Aug. 24; v. 277; p. 647.
Phonograph-motor. T. E. White and G. McIntosh. No. 1,349,401; Aug. 10; v. 277; p. 300.
Phonograph-needle-sharpening attachment. J. Silberstang. No. 1,349,009; Aug. 10; v. 277; p. 222.
Phonograph-records, Lock-cabinet for. M. R. Hutchison. No. 1,351,333; Aug. 31; v. 277; p. 858.
Phonograph-reproducers, Indicator for. J. Wolff. No. 1,350,763; Aug. 24; v. 277; p. 684.
Phonograph-stop, Automatic. C. H. Lenerville. No. 1,349,970; Aug. 17; v. 277; p. 483.
Phonograph winding-handle. H. S. Cahn and H. Siskin. No. 1,348,476; Aug. 3; v. 277; p. 69.
Phonographs, Flexible tripping device for. J. B. Griffin. No. 1,348,358; Aug. 3; v. 277; p. 45.
Phonographs, Lighting attachment for. W. C. Money. No. 1,351,675; Aug. 31; v. 277; p. 925.
Phosphate, Producing double super-. C. C. Meigs. No. 1,351,672; Aug. 31; v. 277; p. 925.
Photograph-negative-developing frame. E. B. Core. No. 1,348,153; Aug. 3; v. 277; p. 4.
Photographic films, Making. E. M. Flaherty. No. 1,350,274; Aug. 17; v. 277; p. 542.
Photographic image. W. V. D. Kelley and J. Mason. No. 1,350,024; Aug. 17; v. 277; p. 494.
Photographic-plate rack. G. J. MacDowell. No. 1,349,972; Aug. 17; v. 277; p. 484.
Photographic printing. W. V. D. Kelley and J. Mason. No. 1,350,023; Aug. 17; v. 277; p. 493.
Photographic-printing machine. A. E. Kaiser. No. 1,350,256; Aug. 17; v. 277; p. 538.
Photography, Multiple-image. N. E. Luboshey. No. 1,351,430; Aug. 31; v. 277; p. 877.
Photos, Device for washing. E. E. Kleine. No. 1,348,881; Aug. 10; v. 277; p. 197.
Piano action, Player-. W. J. Wodraska. No. 1,349,481; Aug. 10; v. 277; p. 315.
Piano-actions, Regulating-hook for. W. A. Goble. No. 1,351,512; Aug. 31; v. 277; p. 893.
Piano, Player-. F. J. W. Weiser. No. 1,351,312; Aug. 31; v. 277; p. 853.
Piano-player action. A. G. Gulbransen. No. 1,349,273; Aug. 10; v. 277; p. 275.
Picker: *See*—
Cotton-picker.
Pickle liquor, Method of and apparatus for treating waste. A. T. Weaver, E. W. D. Laufer, and E. von Wintzingerode. No. 1,348,462; Aug. 3; v. 277; p. 65.
Picture apparatus, Fire-extinguisher for motion-. C. F. Jenkins. No. 1,348,565; Aug. 3; v. 277; p. 85.
Picture camera, Motion-. G. R. Stringham. No. 1,350,683; Aug. 24; v. 277; p. 669.
Picture-film reels, Alarm for motion-. M. F. Walker. No. 1,348,609; Aug. 3; v. 277; p. 93.
Picture-films, Limited combustion of. C. F. Jenkins. No. 1,348,177; Aug. 3; v. 277; p. 9.
Picture films, Machine for applying emollient to motion-. P. Werner. No. 1,351,408; Aug. 31; v. 277; p. 873.
Picture films, Method of and apparatus for producing stereoscopic motion-. H. M. Prud'homme. No. 1,350,836; Aug. 24; v. 277; p. 698.
Picture framing, Motion-. C. F. Jenkins. No. 1,348,566; Aug. 3; v. 277; p. 85.
Picture machine, Moving-. J. Podjevin. No. 1,350,388; Aug. 24; v. 277; p. 610.
Picture machine, Motion-. J. Grans. No. 1,349,420; Aug. 10; v. 277; p. 303.
Picture machine, Motion-. J. Grans. No. 1,349,421; Aug. 10; v. 277; p. 304.
Picture machine, Motion-. J. Grans. No. 1,349,422; Aug. 10; v. 277; p. 304.
Picture machines, Film-gate and tension means for motion-. J. Darby. No. 1,350,548; Aug. 24; v. 277; p. 642.
Picture machines, Film-gate for motion-. L. Coatsworth. No. 1,348,626; Aug. 3; v. 277; p. 96.
Picture machines, Shutter for moving-. J. H. Lehman. No. 1,349,214; Aug. 10; v. 277; p. 262.
Picture machines, Shutter for moving-. J. H. Lehman. No. 1,349,215; Aug. 10; v. 277; p. 262.
Picture-mounting device. A. W. Engel. No. 1,351,560; Aug. 31; v. 277; p. 903.
Picture-projection apparatus. A. B. Mueller. No. 1,348,656; Aug. 3; v. 277; p. 102.
Picture-screen-frame projector. R. F. Paradis. No. 1,349,580; Aug. 17; v. 277; p. 408.

Sewing-machine, Inseam. A. R. Morrill. No. 1,350,377; Aug. 24; v. 277; p. 608.
Sewing machine, Shoe-. F. Ashworth. No. 1,351,090; Aug. 31; v. 277; p. 809.
Sewing-machines, Bobbin-winder for motor-driven. G. H. Riddell. No. 1,351,442; Aug. 31; v. 277; p. 879.
Sewing-machines, Loop retainer for. J. R. Moffatt and R. S. Kelso. No. 1,350,931; Aug. 24; v. 277; p. 715.
Sewing-machines, Motor attachment for. E. Wagman and H. Brussell. No. 1,350,126; Aug. 17; v. 277; p. 513.
Sewing-machines, Needle-threader for. A. Corduan. No. 1,350,592; Aug. 24; v. 277; p. 652.
Sewing-machines, Presser mechanisms for. A. H. De Voe. No. 1,350,301; Aug. 24; v. 277; p. 593.
Sewing-machines, Stitch-forming mechanism for. J. R. Moffatt. No. 1,350,326; Aug. 24; v. 277; p. 598.
Sewing-machines, Thread-controlling mechanism for. R. Becker. No. 1,349,115; Aug. 10; v. 277; p. 243.
Sewing-machines, Work-supporting rack for. J. Gutstein. No. 1,351,244; Aug. 31; v. 277; p. 839.
Shade and curtain fixture. F. W. Schenmeyer. No. 1,350,623; Aug. 24; v. 277; p. 657.
Shade, curtain, and drapery holder. H. C. Zeltz. No. 1,349,933; Aug. 17; v. 277; p. 476.
Shade-roller-operating mechanism. A. B. Collins. No. 1,348,928; Aug. 10; v. 277; p. 206.
Shading-machine. W. H. Marretta. No. 1,348,653; Aug. 3; v. 277; p. 102.
Shaft-bearing. A. T. Ball. No. 1,350,953; Aug. 24; v. 277; p. 720.
Shaft-bracing. D. Barclay and A. M. Dudley. No. 1,349,358; Aug. 10; v. 277; p. 291.
Shaft-coupling, Universal. H. R. Geer. No. 1,351,420; Aug. 31; v. 277; p. 875.
Shafting, Hand-press for. H. C. Urbaner. No. 1,351,358; Aug. 31; v. 277; p. 863.
Shaker, Combination-. S. L. Adelson. No. 1,348,408; Aug. 3; v. 277; p. 66.
Sharpener, Razor-. F. Rogowski. No. 1,350,884; Aug. 24; v. 277; p. 706.
Sharpening device, Disk-. H. C. Simons. No. 1,350,888; Aug. 24; v. 277; p. 707.
Sharpening mechanism, Drill-. P. Scheib. No. 1,349,169; Aug. 10; v. 277; p. 254.
Shears. D. Johnson. No. 1,350,653; Aug. 24; v. 277; p. 662.
Shears. G. P. Yeakel. No. 1,349,180; Aug. 10; v. 277; p. 256.
Shears, Block and bar. B. Quast. No. 1,349,915; Aug. 17; v. 277; p. 472.
Shears, Power-operated. J. P. Heil. No. 1,351,569; Aug. 31; v. 277; p. 905.
Shears, Sheep-. F. N. L. Willett. No. 1,348,914; Aug. 10; v. 277; p. 203.
Sheave, Balanced. T. A. Coleman. No. 1,351,469; Aug. 31; v. 277; p. 885.
Sheave-carrier. R. H. Beaumont. No. 1,348,691; Aug. 3; v. 277; p. 109.
Sheep-protector and coyote-exterminator. J. Duncombe. No. 1,349,665; Aug. 17; v. 277; p. 425.
Sheet detector, Plural-. J. R. Blaine. No. 1,350,487; Aug. 24; v. 277; p. 631.
Sheet-feeding machine. E. F. Hulbert. No. 1,349,133; Aug. 10; v. 277; p. 246.
Sheet-feeding mechanism. B. F. Upham. No. 1,348,254; Aug. 3; v. 277; p. 25.
Sheet-interfolding machine. G. G. Brown and P. A. Schuchart. No. 1,348,846; Aug. 10; v. 277; p. 190.
Sheet metal, Hollow projectile shell of. T. E., Jr., and J. B. Murray. No. 1,350,828; Aug. 24; v. 277; p. 697.
Sheet-metal vehicle-wheel. T. E. Murphy. No. 1,350,827; Aug. 24; v. 277; p. 696.
Sheet-uniting device. A. W. McCurdy. No. 1,350,371; Aug. 24; v. 277; p. 607.
Shelf-rancher. J. Pedersen. No. 1,350,331; Aug. 24; v. 277; p. 599.
Shell. J. E. Richards. No. 1,350,339; Aug. 24; v. 277; p. 601.
Shell casings, Machine for re-forming ammunition. F. Leming. No. 1,351,389; Aug. 31; v. 277; p. 869.
Shell, Explosive-. W. L. Walker. No. 1,351,078; Aug. 31; v. 277; p. 806.
Shield, Dress-. H. Weeks. No. 1,350,192; Aug. 17; v. 277; p. 526.
Shield, Folded metal expansion-. J. E. Ogden. No. 1,350,562; Aug. 24; v. 277; p. 645.
Shield, Wheel-. E. E. Miller. No. 1,351,261; Aug. 31; v. 277; p. 842.
Shifter-block lock. G. C. Jensen. No. 1,348,803; Aug. 3; v. 277; p. 129.
Shingle. A. R. Lukens, Jr. No. 1,348,503; Aug. 3; v. 277; p. 72.
Shingle-cutting machine. A. Nylund. No. 1,350,879; Aug. 24; v. 277; p. 705.
Ship-cleaning device, Power. W. J. Pattosien. No. 1,349,167; Aug. 10; v. 277; p. 253.
Ship-salvage device. T. Davidenia. No. 1,351,100; Aug. 31; v. 277; p. 811.
Ships, Construction of. W. Alderson. No. 1,349,800; Aug. 17; v. 277; p. 451.
Ship's davit. H. B. Hills. No. 1,351,571; Aug. 31; v. 277; p. 905.
Ships, Molding concrete. E. Freyssinet. No. 1,349,826; Aug. 17; v. 277; p. 455.
Ships' walls, Cutting holes in. W. J. Jones. No. 1,351,518; Aug. 31; v. 277; p. 894.
Shipbuilding, Wedging-block for. R. Sanchez. No. 1,350,844; Aug. 24; v. 277; p. 699.
Shipping-packages, Means for binding. S. C. Cary and V. Ragona. No. 1,350,137; Aug. 17; v. 277; p. 515.
Shirt. J. P. Mullane. No. 1,350,169; Aug. 17; v. 277; p. 521.
Shirt-folding table. C. E. Waream and D. H. Benjamin. No. 1,351,079; Aug. 31; v. 277; p. 807.
Shirt sleeves, Detachable cuff for. I. N. Strumph. No. 1,349,987; Aug. 17; v. 277; p. 486.
Shock-absorber. D. W. Durbin. No. 1,351,558; Aug. 31; v. 277; p. 902.
Shock-absorber. O. S. Jeffries, Sr. No. 1,350,313; Aug. 24; v. 277; p. 596.
Shock-absorber. J. T. Richards. No. 1,348,581; Aug. 3; v. 277; p. 87.
Shock-absorber and rebound-snubber for vehicle-springs, Combined. G. J. Oltsch. No. 1,350,110; Aug. 17; v. 277; p. 510.
Shock-absorber, Transmission. E. C. Middleton. No. 1,349,082; Aug. 10; v. 277; p. 236.
Shock-absorbing spring, Compound. A. S. Kux. No. 1,351,044; Aug. 31; v. 277; p. 801.
Shock-absorbing wheel. A. L. Carroll. No. 1,350,642; Aug. 24; v. 277; p. 661.
Shoe. C. P. Coscia. No. 1,351,414; Aug. 31; v. 277; p. 874.
Shoe. H. Westling. No 1,349,744; Aug. 17; v. 277; p. 440.
Shoe. H. Westling. No. 1,349,745; Aug. 17; v. 277; p. 441.
Shoe and making same. J. A. Green. No. 1,348,941; Aug. 10; v. 277; p. 209.
Shoe attachment. W. Wood. No. 1,350,197; Aug. 17; v. 277; p. 527.
Shoe-bottom, Rubber. W. MacPherson. No. 1,350,930; Aug. 24; v. 277; p. 715.
Shoe-counter. J. Jones. No. 1,351,172; Aug. 31; v. 277; p. 825.
Shoe-fastener. C. M. Cook. No. 1,348,302; Aug. 3; v. 277; p. 52.
Shoe-fastener. P. Ferris. No. 1,348,703; Aug. 3; v. 277; p. 111.
Shoe-laces, Machine for tipping. S. Norden. No. 1,348,660; Aug. 3; v. 277; p. 103.
Shoe-last. J. C. Schelter. No. 1,350,340; Aug. 24; v. 277; p. 601.
Shoe, Mud-. G. L. Lauer. No. 1,349,514; Aug. 10; v. 277; p. 322.
Shoe-polisher. W. E. Sheehy. No. 1,351,136; Aug. 31; v. 277; p. 878.
Shoe, Rubber-sole. G. Ferguson. No. 1,348,163; Aug. 3; v. 277; p. 6.
Shoe-sole, Flexible and resilient. J. B. Frechette. No. 1,348,706; Aug. 3; v. 277; p. 111.
Shoe-soles, Machine for operating upon. J. H. Rigsby. No. 1,351,065; Aug. 31; v. 277; p. 804.
Shoe-stiffener. C. E. Swett. No. 1,348,968; Aug. 10; v. 277; p. 214.
Shoe-stretcher. A. B. Elmstrom. No. 1,349,333; Aug. 10; v. 277; p. 286.
Shoe-truing iron, Electrically heated. E. N. Chandler. No. 1,348,263; Aug. 3; v. 277; p. 27.
Shoe, Turned. F. W. Homan. No. 1,350,156; Aug. 17; v. 277; p. 519.
Shoe-uppers, Member for. W. F. Lautenschlager. No. 1,351,722; Aug. 31; v. 277; p. 934.
Shoestring-fastening device. L. C. Bullock, Jr. No. 1,348,475; Aug. 3; v. 277; p. 67.
Shotgun choke attachment. F. X. Schuster. No. 1,348,750; Aug. 3; v. 277; p. 119.

Sonnd-box for sound recording and reproducing machines. I. F. Burton. No. 1,350,590; Aug. 24; v. 277; p. 651.
Sound-box for sound-reproducing and sound-recording machines. A. C. Diehl. No. 1,350,595; Aug. 24; v. 277; p. 652.
Sound-detecting device. W. S. Tucker. No. 1,351,356; Aug. 31; v. 277; p. 863.
Sound insulation, Method and apparatus for. R. A. Fessenden. No. 1,348,828; Aug. 3; v. 277; p. 134.
Sound-insulating support. A. F. Walther. No. 1,350,349; Aug. 24; v. 277; p. 602.
Sound recorder and reproducer. E. Steiger. No. 1,350,246; Aug. 17; v. 277; p. 536.
Sounding apparatus. E. C. Fischer. No. 1,349,718; Aug. 17; v. 277; p. 435.
Sounding-board, Free. G. Virzi. No. 1,349,700; Aug. 17; v. 277; p. 432.
Spar and boom turning machine. A. I. Robbins. No. 1,350,840; Aug. 24; v. 277; p. 699.
Spark-arrester. B. C. Hardgrove. No. 1,349,151; Aug. 10; v. 277; p. 250.
Spark-indicator and plug-tester. J. S. Stevenson. No. 1,348,456; Aug. 3; v. 277; p. 64.
Spark-plug. A. V. Kinsel. No. 1,349,158; Aug. 10; v. 277; p. 252.
Spark-plug. O. M. Leich. No. 1,348,886; Aug. 10; v. 277; p. 198.
Spark-plug. O. L. Longworth. No. 1,350,319; Aug. 24; v. 277; p. 597.
Spark-plug. S. P. Welch. No. 1,348,913; Aug. 10; v. 277; p. 203.
Spark-plug. C. A. Wellman. No. 1,350,757; Aug. 24; v. 277; p. 683.
Spark-plugs, Waterproof connection for. A. Schmidt. No. 1,350,470; Aug. 24; v. 277; p. 627.
Spark-suppression method and device, Interrupter-. W. J. Crumpton. No. 1,350,300; Aug. 24; v. 277; p. 593.

Sparking plug for ignition purposes. A. E. Heath. No. 1,349,464; Aug. 10; v. 277; p. 810.
Spectacle. K. R. Gitterman. No. 1,348,713; Aug. 3; v. 277; p. 113.
Spectacle-shade. K. R. Gitterman. No. 1,348,712; Aug. 3; v. 277; p. 112.
Spectacles. S. I. Schwabacher. No. 1,351,491; Aug. 31; v. 277; p. 889.
Speed-changing machine. T. H. Seely. No. 1,348,902; Aug. 10; v. 277; p. 201.
Speed-changing mechanism. M. Ritter. No. 1,350,670; Aug. 24; v. 277; p. 666.
Speed device, Variable-. A. H. Jessen. No. 1,350,255; Aug. 17; v. 277; p. 538.
Speed indicator, Mean-. H. Petit. No. 1,350,620; Aug. 24; v. 277; p. 656.
Speed-limiting device. E. G. Hodges. No. 1,348,831; Aug. 3; v. 277; p. 134.
Speed of motors, Device for regulating and maintaining constant the. R. Eisenmann. No. 1,350,214; Aug. 17; v. 277; p. 531.
Speed-regulating apparatus. V. A. Fynn. No. 1,350,446; Aug. 24; v. 277; p. 623.
Speed-regulating apparatus. V. A. Fynn. No. 1,350,447; Aug. 24; v. 277; p. 623.
Speedometer. A. F. Poole. No. 1,351,585; Aug. 31; v. 277; p. 908.
Spindle drills, Journal adjustment for arms of multiple-. E. W. Cleveland. No. 1,350,004; Aug. 17; v. 277; p. 490.
Spinning apparatus. E. A. Watson. No. 1,350,905; Aug. 24; v. 277; p. 710.
Spinning-frames, Doffing mechanism for. H. C. Speight. No. 1,350,578; Aug. 24; v. 277; p. 649.
Spinning-ring. C. D. White. No. 1,351,595; Aug. 31; v. 277; p. 910.
Spinning, twisting, doubling, and analogous machines, Doffing-mechanism for flier. P. Smith, Jr. No. 1,351,701; Aug. 31; v. 277; p. 930.
Spool. A. H. Schloerb. No. 1,350,979; Aug. 24; v. 277; p. 725.
Spoon and fork combined. A. Larson. No. 1,351,045; Aug. 31; v. 277; p. 801.
Spoon and fork, Combination. S. Suzuki. No. 1,348,762; Aug. 3; v. 277; p. 121.
Spoon and fork combined. A. Larson. No. 1,351,046; Aug. 31; v. 277; p. 801.
Spoon or dipper, Measuring. A. E. Shutterly. No. 1,348,591; Aug. 3; v. 277; p. 90.
Spraying device. W. L. Deming and C. Cornwall. No. 1,348,631; Aug. 3; v. 277; p. 97.
Spring: *See*—
Coil-spring. Vehicle-spring.
Leaf-spring.
Spring-catch device. J. Soss. No. 1,351,072; Aug. 31; v. 277; p. 806.
Spring device. D. B. Davis. No. 1,349,327; Aug. 10; v. 277; p. 285.
Spring-hub. A. S. Middleton. No. 1,348,437; Aug. 3; v. 277; p. 60.
Spring-leaf spreader and lubricator. L. E. Wood. No. 1,351,272; Aug. 31; v. 277; p. 845.
Spring-retainer. A. Vasselli. No. 1,350,754; Aug. 24; v. 277; p. 683.
Spring-wheel. H. M. Horne. No. 1,349,339; Aug. 10; v. 277; p. 287.
Spring-wheel. W. Leviston and J. Perry. No. 1,350,370; Aug. 24; v. 277; p. 607.
Spring-wheel. D. J. Shea. No. 1,348,590; Aug. 3; v. 277; p. 89.
Spring-wheel. J. E. Strietelmeier. No. 1,348,834; Aug. 3; v. 277; p. 135.
Spring-wheel. G. B. Timberlake. No. 1,349,019; Aug. 10; v. 277; p. 224.
Springs, Clip-fastener for. F. Meads. No. 1,351,213; Aug. 31; v. 277; p. 833.
Springs, Lubricating device for leaf-. J. M. E. Franc. No. 1,350,217; Aug. 17; p. 531.
Springs, Mechanism for forming and assembling snap-fastener. A. J. Lewis. No. 1,351,420; Aug. 31; v. 277; p. 877.
Springs, Method and apparatus for wiring coil-. F. M. Stevens. No. 1,351,448; Aug. 31; v. 277; p. 881.
Sprinkler: *See*—
Clothes-sprinkler.
Spur. L. V. Calderón. No. 1,351,619; Aug. 31; v. 277; p. 914.
Square and bevel structure. F. C. Niebling. No. 1,349,087; Aug. 10; v. 277; p. 287.
Squirrel-cage winding construction. N. Wilkinson. No. 1,351,270; Aug. 31; v. 277; p. 844.
Stair-rule. G. F. Thielman. No. 1,349,348; Aug. 10; v. 277; p. 290.
Stanchion, Cow-. R. W. Walter. No. 1,350,480; Aug. 24; v. 277; p. 629.
Stanchion-fastener and shock-absorber. C. M. Stevenson. No. 1,350,679; Aug. 24; v. 277; p. 668.

"Hofstra—The National Insecticide." (For Insecticide.) Hofstra Manufacturing Company. No. 5,323; Aug. 31; v. 277; p. 978.

"Lectro Service Stand." (For Devices for Locating and Eliminating Short Circuits in and Recharging Magnets of Ford Magnetos.) Lectro Sales Company. No. 5,288; Aug. 17; v. 277; p. 583.

"Make Your Own Ink." (For a Powdered Ink.) The Economy Ink Company. No. 5,293; Aug. 24; v. 277; p. 786.

"Makes Your Hair Look Its Best." (For Mulsified Cocoanut-Oil Shampoo.) The R. L. Watkins Company. Nos. 5,331–3; Aug. 31; v. 277; p. 978.

"Making a Hit." (For Boys' Blouses.) The Kaynee Company. No. 5,325; Aug. 31; v. 277; p. 978.

"Nailing the Right Bower Every Time the Deck's Dealt." (For Smoking-Tobacco.) R. J. Reynolds Tobacco Company. No. 5,312; Aug. 24; v. 277; p. 786.

"Novak's Pills." (For Pills for the Treatment of Constipation.) John Novak Company. No. 5,329; Aug. 31; v. 277; p. 978.

"Nucoa Churn Girl." (For Substitute for Butter.) The Nucoa Butter Company. No. 5,286; Aug. 10; v. 277; p. 393.

"Nurex Tabbing Compound." (For Tabbing Compounds.) The Lee Hardware Co. No. 5,326; Aug. 31; v. 277; p. 978.

"Prince Albert the National Christmas Joy Smoke." (For Smoking-Tobacco.) R. J. Reynolds Tobacco Company. No. 5,313; Aug. 24; v. 277; p. 786.

"Pure as Gold Transparent as Truth." (For Kirk's Jap Rose Soap.) James S. Kirk & Company. No. 5,305; Aug. 24; v. 277; p. 786.

"Re-Incarnation of Beauty." (For Soap.) The Palmolive Company. No. 5,310; Aug. 24; v. 277; p. 786.

"Rely on Reliance." (For Work-Shirts.) Reliance Mfg. Company. No. 5,311; Aug. 24; v. 277; p. 786.

"Skookum America's Supreme Apples Who Can Resist Them?" (For Apples.) Northwestern Fruit Exchange. No. 5,307; Aug. 24; v. 277; p. 786.

"Sweetheart Chocolates." (For Candy.) The Harter Candy Co. No. 5,285; Aug. 10; v. 277; p. 393.

"Talk About Handing Yourself a Birthday-Blow-Out with Bells on." R. J. Reynolds Tobacco Company. No. 5,316; Aug. 24; v. 277; p. 786.

"Taking Awkward Angles Out of the Early Christmas Morning Atmosphere." (For Smoking-Tobacco.) R. J. Reynolds Tobacco Company. No. 5,315; Aug. 24; v. 277; p. 786.

"The New 1920 Haynes Roadster." (For Automobiles.) The Haynes Automobile Company. No. 5,298; Aug. 24; v. 277; p. 786.

"The New 1920 Haynes Roadster." (For Automobiles.) The Haynes Automobile Company. No. 5,304; Aug. 24; v. 277; p. 786.

"The New 1920 Haynes Touring Car." (For Automobiles.) The Haynes Automobile Company. No. 5,295; Aug. 24; v. 277; p. 786.

"The New 1920 Haynes Touring Car." (For Automobiles.) The Haynes Automobile Company. No. 5,302; Aug. 24; v. 277; p. 786.

"The New Series Haynes Brougham." (For Automobiles.) The Haynes Automobile Company. Nos. 5,296–7; Aug. 24; v. 277; p. 786.

"The New Series Haynes Coupé." (For Automobiles.) The Haynes Automobile Company. No. 5,299; Aug. 24; v. 277; p. 786.

"The New Series Haynes Coupé." (For Automobiles.) The Haynes Automobile Company. No. 5,301; Aug. 24; v. 277; p. 786.

"The New Series Haynes Suburban." (For Automobiles.) The Haynes Automobile Company. No. 5,300; Aug. 24; v. 277; p. 786.

"The New Series Haynes Suburban." (For Automobiles.) The Haynes Automobile Company. No. 5,303; Aug. 24; v. 277; p. 786.

"The Price of Beauty." (For Soap.) The Palmolive Company. No. 5,280; Aug. 3; v. 277; p. 180.

"The Price of a Good Complexion." (For Soap.) The Palmolive Company. No. 5,330; Aug. 31; v. 277; p. 978.

"The Way to Rose Complexions." (For Soap.) The Palmolive Company. No. 5,309; Aug. 24; v. 277; p. 786.

"Try a Green River Soda." (For Non-Alcoholic Beverages.) Schoenhofen Company. No. 5,290; Aug. 17; v. 277; p. 583.
"Virginia Dare Agrees with the Constitution." (For Non-Intoxicating Wine.) Garrett and Company, Incorporated. No. 5,319; Aug. 31; v. 277; p. 978.
"What Tabbing Compound Permits This? Only Nurex!" (For Tabbing Compound.) The Lee Hardware Co. No. 5,278; Aug. 3; v. 277; p. 180.
"You Can Do This With Nurex." (For Tabbing Compound.) The Lee Hardware Co. No. 5,279; Aug. 3; v. 277; p. 180.
"You Will Not Regret It—If You Conduiet it." (For Conduiets.) Crouse-Hinds Co. No. 5,292; Aug. 24; v. 277; p. 786.
"'Yourex,' The Silver Plated Knives." (For Silver-Plated Knives.) Associated Silver Company. No. 5,275; Aug. 3; v. 277; p. 180.
"You're Wise-o That You've Been Checking Smoke Sport." (For Smoking-Tobacco.) R. J. Reynolds Tobacco Company. No. 5,314; Aug. 24; v. 277; p. 786.
"Winter's Chilly Temperature Does Not Affect Nurex." (For Tabbing Compounds.) The Lee Hardware Co. No. 5,306; Aug. 24; v. 277; p. 786.

DISCLAIMERS.

Apparatus for drying wood veneer. E. Lambert. No. 1,228,790; date of patent June 5, 1917; disclaimer filed July 23, 1920; v. 277; p. 398.
Automobiles. H. L. Ide. No. 861,183; date of patent July 23, 1907; disclaimer filed July 12, 1920; v. 277; p. 184.
Box-blank machine. J. H. Greenstreet. No. 1,325,719; date of patent Dec. 23, 1919; disclaimer filed July 28, 1920; v. 277; p. 398.
Telephone-exchange system, Semi-automatic. F. Lubberger. No. 1,306,824; date of patent, June 17, 1919; disclaimer filed July 15, 1920; v. 277; p. 185.

CLASSIFICATION OF PATENTS

AUGUST, 1920.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 4: 1,351,060
7: 1,348,850
1,349,662
1,351,231
14: 1,348,161
33: 1,351,152
45: 1,348,644
1,348,711
46: 1,350,371
50: 1,350,936
2— 32: 1,349,472
34: 1,348,754

E.R.

Patents Nos. 1,351,727 to 1,352,419.

THE OFFICIAL GAZETTE

OF THE

United States Patent Office.

Vol. 278—No. 1. TUESDAY, SEPTEMBER 7, 1920. Price—$5 per year.

[PUBLISHED SEPTEMBER 8, 1920.]

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscriptions, $5.00 per annum; single numbers, 10 cents each.

Printed copies of patents are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

Interference Notices.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., August 30, 1920.

Pyro Paint Company, its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of George F. Johnston, of Fort Dodge, Iowa, for registration of a trade-mark and trade-mark registered May 16, 1899, No. 32,902, to Pyro Paint Company, of 37–39 Commercial Place, Norfolk, Va., and a notice of such declaration sent by registered mail to said Pyro Paint Company at the said address having been returned by the post-office undeliverable, notice is hereby given that unless said Pyro Paint Company, its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

M. H. COULTSON,
First Assistant Commissioner.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., August 17, 1920.

Frederick Gardner, his assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of the Ward Baking Company, Southern Boulevard and East One Hundred and Forty-third street, New York, N. Y., for registration of a trade-mark and trade-mark registered January 8, 1907, No. 59,440, to Frederick Gardner, 151 East Van Buren street, Chicago, Ill., and a notice of such declaration sent by registered mail to said Frederick Gardner at the said address having been returned by the post-office undeliverable, notice is hereby given that unless said Frederick Gardner, his assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

M. H. COULSTON,
First Assistant Commissioner.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., August 17, 1920.

H. Chaloner & Co., their assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of the Pendleton Creamery Company, Pendleton, Ind., for registration of a trade-mark and trade-mark registered June 18, 1901, No. 36,614, to H. Chaloner & Co., 36 Water street, New York, N. Y., and a notice of such declaration sent by registered mail to said H. Chaloner & Co. at the said address having been returned by the post-office undeliverable, notice is hereby given that unless said H. Chaloner & Co., their assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

M. H. COULSTON,
First Assistant Commissioner.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., August 17, 1920.

Retailers' Cooperative Association, its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Henry Thayer & Co., Inc., of 150 Broadway, Cambridge, Mass., for registration of a trade-mark and trade-mark registered November 12, 1912, No. 89,143, to Retailers' Cooperative Association, of 428 Market street, Camden, N. J., and a notice of such declaration sent by registered mail to said Retailers' Cooperative Association at the said address having been returned by the post-office undeliverable, notice is hereby given that unless said Retailers' Cooperative Association, its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

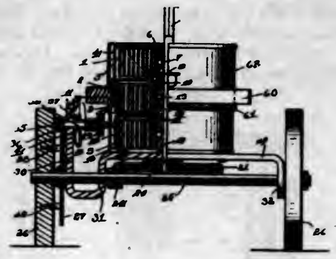
M. H. COULSTON,
First Assistant Commissioner.

Amendments to Amendments.

RULE 74. When an amendatory clause is amended, it must be wholly rewritten, so that no interlineation or erasure shall appear in the clause, as finally amended, when the application is passed to issue. If the number or nature of the amendments shall render it otherwise difficult to consider the case or to arrange the papers for printing or copying, the Examiner or Commissioner may require the entire specification to be rewritten.

2183

APPLICATIONS UNDER EXAMINATION.



Condition at Close of Business Aug. 28, 1920.

Room No.	Divisions and subjects of invention.	Oldest new application and oldest action by applicant awaiting office action.		No. of applications awaiting action.
		New.	Amended.	
314	1. Closure Operators; Fences; Gates; Harrows and Diggers; Plows; Planting; Scattering Unloaders; Trees, Plants, and Flowers.	Feb. 26	Mar. 11	620
128	2. Bee Culture; Curtains, Shades, and Screens; Dairy; Medicines; Pneumatics; Preserving; Presses; Tents, Canopies, Umbrellas, and Canes; Tobacco.	Jan. 1	Feb. 27	971
175	3. Electric Heating and Rheostats; Electrochemistry; Heating; Metal-Founding; Metallurgical Apparatus; Metallurgy; Metal Treatment; Plastic Metal Working.	Feb. 17	Apr. 16	238
234	4. Conveyers; Conveyers, Fluid-Current; Elevators; Excavating; Handling—Hand and Hoist-Line Implements; Hoisting; Material or Article Handling; Pneumatic Despatch; Pushing and Pulling Implements; Railway Mail Delivery; Store-Service; Traversing Hoists.	Nov. 17	May 22	1,586
167	5. Book-Making; Books, Strips and Leaves; Harvesters; Jewelry; Manifolding; Music; Printed Matter; Tying Cords or Strands.	Apr. 9	May 11	481
318	6. Bleaching and Dyeing; Chemicals; Explosives; Fertilizers; Liquid Coating Compositions; Plastic Compositions; Substance Preparation.	Apr. 3	June 21	545
312	7. Games and Toys; Optics; Photography; Velocipedes	Apr. 29	May 25	904
151	8. Beds; Chairs and Seats; Flexible-Sheet Securing Devices; Furniture; Kitchen and Table Articles; Store Furniture; Supports.	June 8	June 17	476
221	9. Air and Gas Pumps; Hydraulic Motors; Injectors and Ejectors; Motors, Fluid; Motors, Fluid-Current; Pumps.	Mar. 17	Mar. 29	573
235	10. Carriages and Wagons; Land-Vehicles; Land-Vehicles—Bodies and Tops; Land-Vehicles—Dumping; Land-Vehicles, Wheel Substitutes; Motor Vehicles.	Feb. 24	July 6	993
154	11. Boot and Shoe Making; Boots, Shoes, and Leggings; Button, Eyelet, and Rivet Setting; Harness; Leather Manufactures; Nailing and Stapling; Spring Devices; Whips and Whip Apparatus.	Apr. 7	Apr. 15	384
223	12. Machine Elements	Dec. 10	May 22	1,116
329	13. Bolt, Nail, Nut, Rivet, and Screw Making; Button Making; Chain, Staple, and Horseshoe Making; Driven, Headed, and Screw-Threaded Fastenings; Gear Cutting, Milling, and Planing; Metal Drawing; Metal Forging and Welding; Metal Rolling; Metal Tools and Implements, Making; Metal Working; Needle and Pin Making; Turning.	Dec. 15	June 12	1,162
323	14. Compound Tools; Cutting and Punching Sheets and Bars; Farriery; Metal-Bending; Sheet-Metal Ware, Making; Tools; Wire Fabrics and Structure; Wire-Working.	Jan. 12	Apr. 23	700
308	15. Bread, Pastry, and Confection Making; Coating; Glass; Laminated Fabrics and Analogous Manufactures; Paper-Making and Fiber Liberation; Plastic Block and Earthenware Apparatus; Plastics.	Nov. 17	Apr. 20	1,310
	16. Radiant Energy; Telegraphy; Telephony	Dec. 31	Mar. 1	890
111 307	17. Label Pasting and Paper Hanging; Nut and Bolt Locks; Ornamentation; Paper Manufactures; Printing; Type Casting; Sheet Material Associating or Folding; Sheet Feeding or Delivering; Type Setting.	June 18	June 25	193
229	18. Liquid Heaters and Vaporizers; Motors, Expansible Chamber Type; Power Plants; Speed Responsive Devices; Steam and Vacuum Pumps.	Feb. 2	Apr. 5	1,283
236	19. Automatic Temperature and Humidity Regulation; Furnaces; Heating Systems; Stoves and Furnaces; Domestic Cooking Vessels; Thermostats and Humidostats.	Dec. 12	Mar. 11	639
179	20. Artificial Body Members; Builders' Hardware; Closure-Fasteners; Cutlery; Dentistry; Locks and Latches; Safes; Undertaking.	May 20	May 7	699
212	21. Brakes and Gins; Carding; Cloth-Finishing; Continuous-Strip Feeding; Cordage; Felt and Fur; Knitting and Netting; Silk; Spinning; Weaving; Winding and Reeling.	Dec. 29	June 22	545
249	22. Aeronautics; Firearms; Ordnance	June 10	June 24	263
217	23. Acoustics; Coin-Handling; Horology; Recorders; Registers; Sound Recording and Reproducing; Time-Controlling Mechanism.	Jan. 13	May 11	767
144	24. Apparel; Apparel Apparatus; Garment Supporters; Sewing-Machines	Mar. 3	June 3	589
315	25. Agitating; Butchering; Centrifugal Bowl Separators; Mills; Threshing; Vegetable Cutters and Crushers; Gas Separation.	July 15	July 9	233
105	26. Electricity, Generation; Motive Power; Prime Mover Dynamo Plants	Jan. 10	Feb. 2	776
214	27. Abrading; Brushing and Scrubbing; Laundry; Washing Apparatus	May 7	May 29	533
225	28. Internal-Combustion Engines	Feb. 16	May 4	795
147	29. Boring and Drilling; Chucks or Sockets; Coopering; Rod Joints or Couplings; Wheelwright-Machines; Wood-Sawing; Wood-Turning; Woodworking; Woodworking Tools.	Mar. 1	June 9	651
152	30. Illuminating-Burners; Illumination; Liquid and Gaseous Fuel Burners; Type-Writing Machines	Jan. 31	July 15	1,147
172	31. Alcohol; Ammonia, Water, and Wood Distillation; Charcoal and Coke; Fuel and Igniting Devices; Gas, Heating and Illuminating; Hides, Skins, and Leather; Hydraulic Cement and Lime; Mineral Oils; Oils, Fats, and Glue; Sugar and Salt.	Nov. 24	Mar. 5	1,393
278	32. Gas and Liquid Contact Apparatus; Heat Exchange; Refrigeration	Jan. 2	June 1	1,185
70	33. Bridges; Hydraulic and Earth Engineering; Masonry and Concrete Structures; Metallic Building Structures; Roads and Pavements; Roofs.	Apr. 1	June 1	476
301	34. Electricity-Transmission to Vehicles; Railways; Railway Rolling Stock; Railway Switches and Signals; Railways, Surface Track; Railway Wheels and Axles; Track-Sanders; Vehicle-Fenders.	July 12	July 7	236
57	35. Buckles, Buttons, Clasps, Etc.; Card, Picture, and Sign Exhibiting; Signals and Indicators; Toilet	July 7	July 19	474
204	36. Automatic Weighers; Driers; Geometrical Instruments; Measuring Instruments; Force Measuring	Mar. 29	Apr. 24	1,209
107	37. Electric Lamps; Electricity, Circuit Makers and Breakers; Electricity, General Applications	Mar. 16	Mar. 26	1,271
378	38. Animal Husbandry; Earth Boring; Fishing, Trapping and Vermin Destroying; Mining, Quarrying, and Ice-Harvesting; Stationery; Stone-Working; Wells.	Apr. 8	May 1	844
220	39. Fluid Pressure Regulators; Joint Packings; Multiple Valves; Packed Shaft or Rod Joints; Pipe Joints or Couplings; Valved Pipe Joints or Couplings; Valves; Water Distribution.	Oct. 20	Dec. 26	1,329
273	40. Baggage; Bottles and Jars; Check-Controlled Apparatus; Cloth, Leather, and Rubber Receptacles; Deposit and Collection Receptacles; Metallic Receptacles; Package and Article Carriers; Paper Receptacles; Special Receptacles and Packages; Wooden Receptacles.	Jan. 5	Mar. 15	1,006
125	41. Land Vehicles, Wheels and Axles; Resilient Tires and Wheels	Jan. 15	June 4	867
114	42. Electricity, Conductors; Electrical Conduits and Housings; Electric Signaling	Feb. 16	Mar. 23	1,189
382	43. Baths and Closets; Dispensing; Dispensing Beverages; Electricity, Medical and Surgical; Fire-Extinguishers; Sewerage; Surgery; Water Separation or Purification.	Dec. 15	Mar. 16	1,067
253	44. Air-Guns, Catapults, and Targets; Ammunition and Explosive Devices; Ammunition and Explosive Charge Making; Boats and Buoys; Filling and Closing Portable Receptacles; Marine Propulsion; Railway Draft Appliances; Ships.	Apr. 22	June 10	310
379	45. Journal-Boxes, Pulleys, and Shafting; Lubrication; Motors	Mar. 3	Apr. 2	1,060
264	46. Educational Appliances; Fire-Escapes; Ladders; Fluid Sprinkling, Spraying, and Diffusing; Paper Files and Binders; Wooden Buildings; Scaffolds.	Feb. 2	Apr. 1	631
332	47. Brakes; Clutches; Fluid Pressure Brake and Analogous Systems	Jan. 8	Nov. 19	943
	Oldest new case, Oct. 20; oldest amended, Nov. 19.			
	Total number of applications awaiting action			37,522
163	TRADE-MARKS, DESIGNS, LABELS AND PRINTS:			
	Trade-Marks	Mar. 18	Aug. 7	2,596

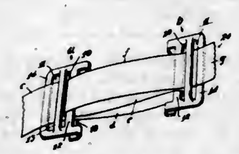
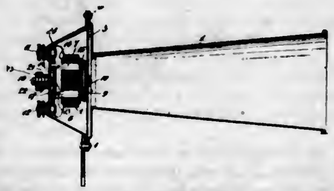
	Labels and Prints	May 15	Aug. 9	552

PATENTS



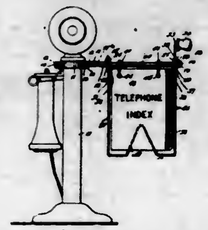
GRANTED SEPTEMBER 7, 1920.

1,351,727. SPRING-MOTOR. HOWARD G. ALLEN, Albion, N. Y. Filed May 31, 1919. Serial No. 300,980. 3 Claims. (Cl. 185—37.)



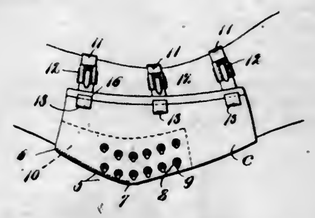
1. In a spring motor, the combination of a frame, a cylindrical housing mounted to rotate in said frame, a series of springs mounted in said housing, a power shaft driven by said springs, a stationary axle, said cylindrical housing being mounted on said stationary axle, a driving shaft mounted parallel to said stationary axle and carried thereby, and wheels mounted on said driving shaft, said driving shaft being geared to said power shaft and being driven thereby.

1,351,728. CORSET-FASTENING. JULIA H. AUERBACH, Los Angeles, Calif. Filed May 27, 1918. Serial No. 236,666. 2 Claims. (Cl. 24—140.)



2. In a garment lacing, a series of three bars connected at their ends forming ribbon receiving slots on opposite sides of the intermediate bar, a pair of inturned flanges carried by one of the side bars adjacent its ends, a bar connecting the outer ends of said flanges, a series of eyelet engaging fasteners slidable on said last named bars and hooked ends on said fasteners adapted to engage said intermediate bar.

1,351,729. ELECTRIC HORN. BUTLER AMES, Lowell, Mass. Filed Mar. 14, 1917. Serial No. 154,867. 7 Claims. (Cl. 177—7.)



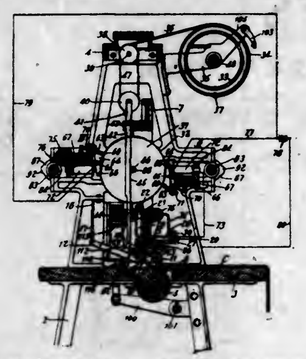
1. Electrical apparatus comprising a magnet, a magnetic armature movably mounted with respect to the magnet so as to be attracted thereby, and means for mounting the magnet so that it may automatically adjust its position with respect to the armature.

1,351,730. CARD-INDEX DIRECTORY. LEOPOLD BACHRACH, New York, N. Y. Filed Dec. 23, 1919. Serial No. 346,996. 7 Claims. (Cl. 40—1.)

1. An index device comprising a shaft support, a frame rotatably mounted on said shaft support, a plurality of index cards suspended within said frame and engaged at their rear by said frame, said cards adapted to be individually swung about said shaft to bring the cards normally forwardly of the card to be exposed rearwardly of said frame, said frame adapted upon being rotated in one direction about said shaft to place all of the cards forwardly thereof.

1,351,731. ELBOW-PROTECTOR. MURRAY BALDWIN, Brookline, Mass. Filed Dec. 17, 1918. Serial No. 267,097. 8 Claims. (Cl. 2—95.)

1. A device for protecting the elbow while firing a firearm in a recumbent position, comprising a casing fitting the elbow and having means thereon adapted to prevent the device from sliding under the impact due to the discharge of the firearm.



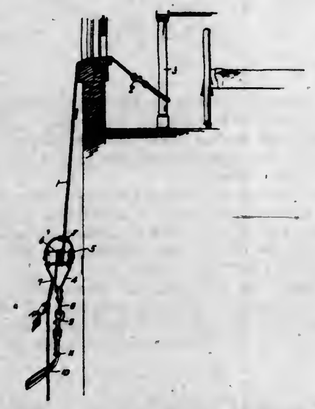
2. A device for protecting the elbow while firing a firearm in a recumbent position, comprising a casing fitting the elbow and having studs projecting therefrom adapted to prevent the device from sliding under the impact due to the discharge of the firearm.

3. A device for protecting the elbow while firing a firearm in a recumbent position, comprising a casing fitting the elbow and adapted to be detachably fastened to the arm, and a pad detachably fastened inside the casing.

1,351,732. MEASURING-MACHINE. FREDERIC R. BARKER, Boston, and WALTER R. SOPER, Lynn, Mass. Filed Mar. 7, 1918. Serial No. 221,055. 41 Claims. (Cl. 33—123.)

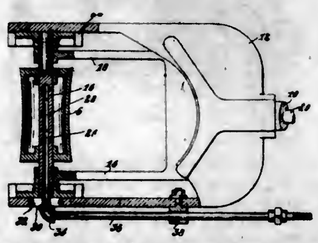
1. An area measuring machine having, in combination, work feeding means, a rotary feeder adapted to be moved laterally of said work feeding means by the thickness of the work, area indicating means, an escapement mecha-

nism, means connecting said feeler mechanism and said escapement mechanism to transmit motion from the former



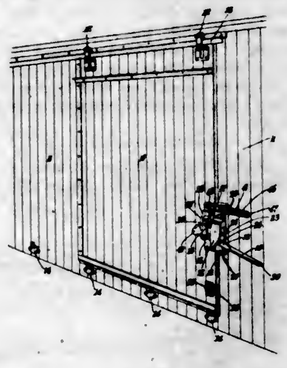
to the latter and means to connect said escapement mechanism with said area indicating means.

1,351,733. WINDOW-SCREEN. CHARLES J. BARKER, Columbus, Ohio. Filed Apr. 16, 1920. Serial No. 374,386. 6 Claims. (Cl. 156—14.)



6. A window screen including a frame having vertical side bars, supporting uprights secured to the lower portions of the inner surfaces of said side bars in spaced relation thereto, and a strip of ventilating fabric having its ends secured around the said uprights, for the purpose described.

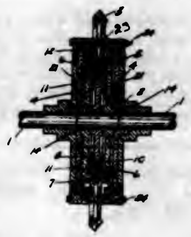
1,351,734. FIRE-ESCAPE. FRED G. BARRINGTON, Venice, Calif. Filed Mar. 5, 1920. Serial No. 363,408. 1 Claim. (Cl. 227—28.)



A fire escape comprising an open frame consisting of a strap doubled on itself and having its ends brought together to form an arched top portion, relatively short vertical end portions and converging bottom portions, said converging bottom portions having flat parallel terminals, and provided in its top and in one of said converging bottom portions near its flat terminal with guide openings, a bar extending between the sides of said frame and having its central portion circular in cross section, the ends of said bar being flat faced and abutting and secured rigidly to the short vertical end portions of the frame, an eye secured between the said flat parallel terminals, a belt suspended from said eye, and a cable having its intermediate portion wrapped around the central circular portion of the bar and its end portions passing through the guide openings in the top and the bottom portion of the frame, the upper end of the cable being provided with anchoring means.

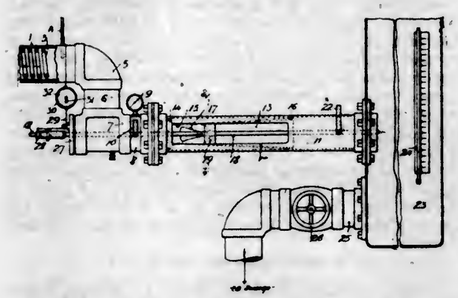
1,351,735. SOLE-LEVELING MACHINE. WILLIAM C. BAXTER, Beverly, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Feb. 13, 1915. Serial No. 7,985. 1 Claim. (Cl. 12—34.)

A sole leveling machine comprising a roll carrier having a slotted side bar, a yoke slidingly supported in the carrier, means for vibrating the yoke within the carrier, a non-rotatable hollow shaft mounted in the yoke and having a series of fuel passages communicating with the central bore, a fuel pipe connected to the end of the shaft and passing through the slot in the side bar, and an open ended hollow leveling roll journaled upon the shaft and heated by jets of flame within the roll and issuing from the fuel passages in the shaft, the products of combustion passing out through the open end of the roll.



1,351,736. DOOR-FASTENER. CLAUDE A. BEAR, Albany, N. Y., assignor of two-ninths to George P. Fox, Albany, N. Y., two-ninths to Alexander McGary, New York, N. Y., and two-ninths to George R. Berger, Chicago, Ill. Filed Mar. 31, 1919. Serial No. 286,448. 14 Claims. (Cl. 292—241.)

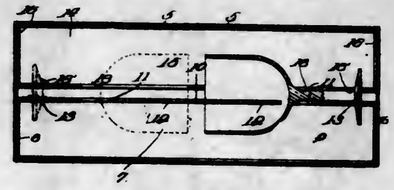
1. In an arrangement of the class described, the combination with a door and its frame, of a keeper member secured to one, a latch member pivoted to the other and coöperating with the keeper to pull the door closed by a cam action when the latch member is swung into engagement with the keeper, said keeper member being spaced from the member to which it is secured and said latch member being adapted to swing in between the keeper



member and the member to which it is secured, and a dog adapted to be inserted in the path of the latch member to prevent its becoming unlatched from the keeper, said latch member having a part adapted to force the door open when the latch member is swung in the opposite direction, and perforated lugs, one carried by the member secured to the frame and the other by the member secured to the door, by means of which the door may be sealed.

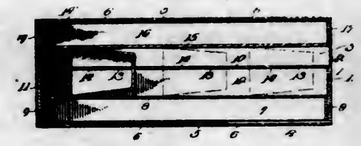
1,351,737. DIFFERENTIAL GEARING. JOHN C. BOGART, Bay City, Mich., assignor of one-half to Paul R. Dinsmore, Bay City, Mich. Filed Nov. 15, 1918. Serial No. 262,681. 5 Claims. (Cl. 74—7.)

1. In a differential gearing the combination of opposite drive shafts, a drive gear disposed between the drive shafts, driving elements located at opposite sides of the drive gear and having a limited movement independent of the same, ratchet elements mounted on the drive shafts, opposite dogs carried by the driving elements and arranged to engage the ratchet elements, and shiftable means operating between the dogs and connected with and actuated by the drive gear for moving one dog out of engagement with each ratchet element and for permitting another dog to engage the same.



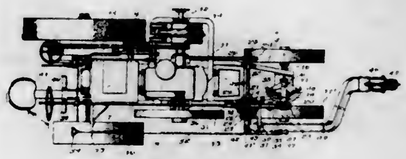
1,351,738. PROPELLER-TESTING DEVICE. WILLIAM SPENCER BOWEN, New York, N. Y. Filed Sept. 10, 1917. Serial No. 190,557. 9 Claims. (Cl. 73—51.)

1. A propeller testing device comprising means forming a liquid passage and having a transparent portion through which the propeller may be observed, a propeller adapted to revolve within said passage adjacent the transparent portion of said liquid passage to propel the liquid through said passage, power means for operating the propeller from without said liquid passage, and a rectifying vane arranged behind the propeller and within said transparent liquid passage and adapted to rectify the current of liquid propelled by said propeller.



1,351,739. SHIPPING-CASE. ROGER J. BOYD, Chicago, Ill., assignor, by mesne assignments, to Carson Pirie Scott & Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 22, 1917. Serial No. 187,641. 2 Claims. (Cl. 206—65.)

1. A packing case for goblets and other stem glasses, comprising a box, a tray supported therein, and having openings therein to receive the body of the stem glasses and also separate openings to receive the base of the

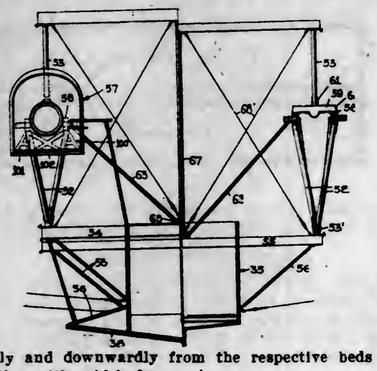


glasses and a second tray having corresponding openings placed above the first tray in an inverted position.

1,351,740. SHIPPING-CASE. ROGER J. BOYD, Chicago, Ill., assignor, by mesne assignments, to Carson Pirie Scott & Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 22, 1917., Serial No. 187,642. 1 Claim. (Cl. 206—65.)

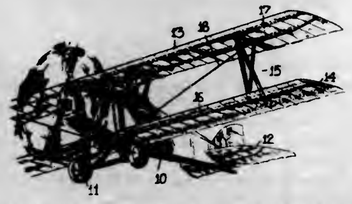
The combination with a box, of a cushioning section in the bottom of the box, a tray formed of a top, sides and ends, said sides and ends resting on the cushioning section, the top of the tray having elongated openings, tongues formed integral with the top and extending inwardly from one end of the openings and adapted to enter the glasses within the openings, and a cushioning section above the tray and resting upon the glasses.

1,351,741. STEERING MECHANISM FOR TRACTION-ENGINES. EDWARD W. BURGESS, Chicago, Ill., assignor, by mesne assignments, to International Harvester Company, a Corporation of New Jersey. Filed July 5, 1916. Serial No. 107,679. 6 Claims. (Cl. 97—81.)



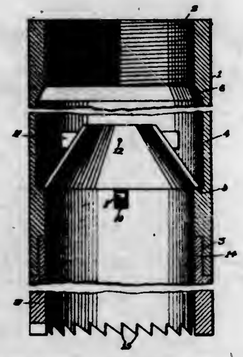
1. In combination, a tractor having a steering wheel, automatic steering means including a gage wheel in advance of the tractor and power driven mechanism including a clutch and gears operatively connecting the gage wheel and steering wheel for automatically angling said steering wheel, and manual steering means independent of the clutch and operable through said gears for manually angling the steering wheel.

1,351,742. FLYING-BOAT CONSTRUCTION. GLENN H. CURTISS and HENRY KLECKLER, Buffalo, N. Y., assignors to Curtiss Aeroplane & Motor Corporation, a Corporation of New York. Filed Dec. 23, 1916. Serial No. 138,633. 14 Claims. (Cl. 244—14.)



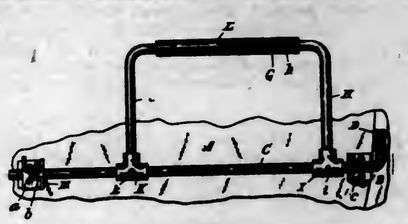
1. In an aircraft, superposed supporting surfaces including wing beams, engine beds supported at opposite

sides of the longitudinal axis of the craft between the supporting surfaces, a body, and braces extending diagonally



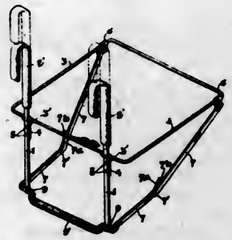
inwardly and downwardly from the respective beds for connection with said body.

1,351,743. AIRPLANE-WING-STRUCTURE TRUSS. GLENN H. CURTISS, Garden City, N. Y., assignor to Curtiss Aeroplane and Motor Corporation, a Corporation of New York. Filed May 4, 1918. Serial No. 232,486. 4 Claims. (Cl. 244—31.)



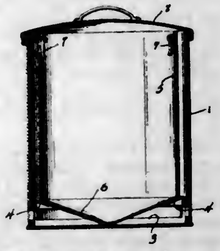
1. A wing structure truss for airplanes having a single exposed wire at each side of the fore and aft axis of the craft to care for both the lift and drift stresses, the wire in each instance being extended rearwardly and outwardly at an angle.

1,351,744. OVERSHOT. ROY A. DAILEY, Taft, Calif. Filed Oct. 11, 1919. Serial No. 330,006. 1 Claim. (Cl. 294—90.)



An overshot fishing tool comprising a cylindrical body, a plurality of rhomboidal slips disposed therein and tapering upwardly and having their upper edges formed with arcuate depressions, an integral lug extending from the lower edge of each slip, the body being formed with openings receiving said lugs, transverse pins passing through said lugs and pivoting the slips, and a plate spring secured externally to each slip and engaging the wall of the body.

1,351,745. SIGNAL-OPERATING DEVICE FOR AUTOMOBILES. MARK DEAN, Boonville, N. Y. Filed May 18, 1918. Serial No. 235,260. 1 Claim. (Cl. 74—81.)



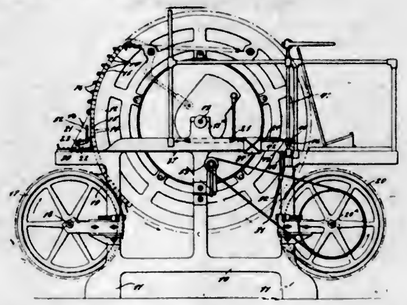
A knee switch for automobiles which comprises a rod rotatably mounted upon the side door of an automobile, and provided with an offset arm adapted to contact with a signal giving mechanism, adjustable sleeves mounted on said rod and a pressure bar mounted upon said sleeves and located within easy reach of the knee of the operator.

1,351,746. SUSPENSIBLE SEAT. JOHN A. EBERLE, St. Louis, Mo. Filed June 27, 1918. Serial No. 242,251. 2 Claims. (Cl. 155—79.)

1. A portable foldable seat comprising hanger bars provided with pivot bearing members, a seat frame having spaced offset pivot portions integral therewith and seated on said hanger bars and journaled in said pivot bearing members to permit pivotal movement of said seat frame relative to said hanger bars without lateral movement of the seat frame, foldable supports connecting said seat frame to said hanger bars, said supports each comprising a pair of members pivotally connected together, one member of said pair of members having a stop integral therewith and adapted to automatically abut the other member of the pair so as to limit the pivotal movement therebetween, and a cross-bar joining the lower portions of the hanger bars and being offset outwardly from its plane of juncture with the hanger bars so as to provide an engaging surface for the fixture to which the portable seat is applied.

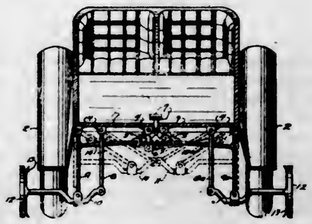
1,351,747. GARBAGE-CAN. JOHN R. FLINN, Johnstown, Pa. Filed Dec. 4, 1918. Serial No. 265,210. 4 Claims. (Cl. 220—17.)

1. A garbage can including an outer receptacle equipped with a detachable ring embracing the inner periphery of the latter, an inner receptacle for concentric mounting in



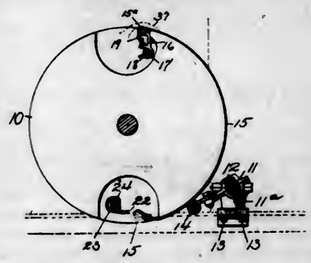
said outer receptacle and ring, and fingers carried by said ring and engaging the inner receptacle to retain the latter centered.

1,351,748. SPRING STRUCTURE. HYMAN FREEDMAN, Chicago, Ill. Filed July 17, 1919. Serial No. 311,467. 2 Claims. (Cl. 155—179.)



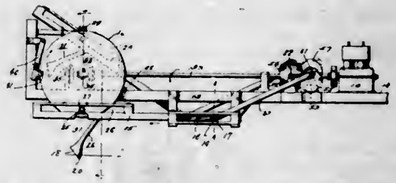
1. In a spring seat structure, upper and lower peripheral frames secured in convergently yielding relation to each other, said structure including a plurality of coiled springs disposed in compression between said frames, centrally shouldered sockets being provided on one of said frames to receive the ends of said springs respectively for holding the latter in place against lateral displacement, tension means to limit the divergence of said frames, a plurality of medially disposed coiled springs, a resilient support stretched across said lower frame whereon the medial springs rest, and upholstering secured at its edges to said upper frame and held in upwardly bulging position by said medial springs.

1,351,749. FIBER-DRESSING MACHINE. FRITZ GRAF, Sr., Collingdale, Pa. Filed Dec. 29, 1919. Serial No. 348,237. 18 Claims. (Cl. 19—25.)



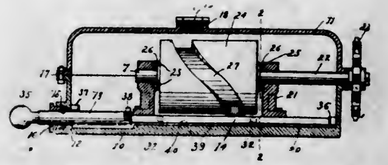
5. In a machine of the character described, means for conveying a plurality of sticks for carrying textile fibers, means for unwinding the sticks from the fibers to release them from the conveying means, and means adapted to be actuated by a broken stick to arrest the operation of the machine.

1,351,750. ANTISKID DEVICE FOR AUTOMOBILES. JAKOB GRÖNROOS, Fairport Harbor, Ohio. Filed Nov. 10, 1919. Serial No. 337,096. 1 Claim. (Cl. 188—5.)



In an anti-skid device for vehicles, two pair of parallel swinging rods secured to the vehicle floor, a pair of oppositely disposed bell-cranks fulcrumed to the vehicle floor, connection between each bell-crank and one rod of each pair of swinging rods, flexible connection between said bell-cranks whereby they are yieldingly retained in a predetermined position, a foot pedal for actuating said bell-cranks, a crank shaft carried by each pair of swinging rods, and a toothed disk carried by each crank shaft.

1,351,751. COMBINATION SLITTER AND PERFORATOR. LESLIE D. HOFF, Newark, N. J. Filed Aug. 19, 1919. Serial No. 318,586. 6 Claims. (Cl. 164—100.)



1. A slitting and perforating device for printing presses comprising a cylinder, a band to be affixed to the periphery of said cylinder, and a rotatable wheel having a portion adapted to engage the edge of said band to operate on a sheet being printed, and another portion adapted to engage material on the face of the band to rotate the wheel.

1,351,752. WALKING TRACTOR. EDWARD R. HONEYWELL, Garber, Okla. Filed Aug. 27, 1919. Serial No. 320,282. 8 Claims. (Cl. 180—8.)

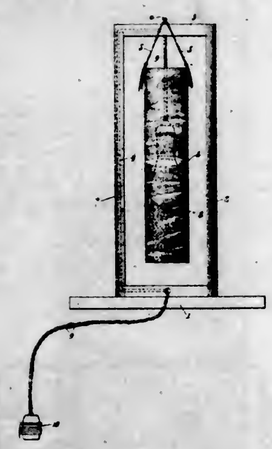
1. A propelling apparatus having a prime mover, a reciprocatory pusher member, a shiftable guiding member for directing the pusher member alternately in operative and inoperative paths and consisting of a disk having a sliding connection with the pusher member and means actuated by the prime mover for operating said members in timed relation.

1,351,753. MECHANICAL MOVEMENT. CHARLES F. HOVER, Conrad, Mont. Filed June 30, 1919. Serial No. 307,657. 3 Claims. (Cl. 74—1.)

1. A device of the class described comprising a base having a guide groove therein, spaced bearing brackets secured upon the base and bridging the groove, a rotatable member having a shaft journaled in the brackets, said rotatable member having a cam groove, a bar mounted in the groove of the base for reciprocation therein and having means engaging the cam groove for actuating the bar, the base having transverse channels communicating with its

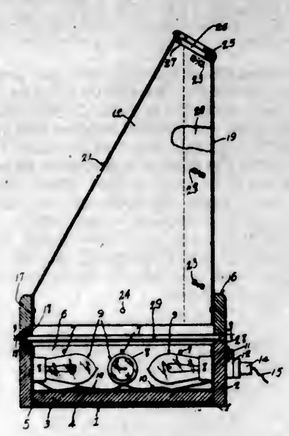
groove, and plates adjustably mounted in the channels and having bearing rollers disposed to contact respectively with the opposite sides of the bar.

1,351,754. ANTIFRICTION ROLLER AND BALL BEARING. ARCHIBALD B. HUBARD, Ogontz, Pa. Filed Mar. 16, 1920. Serial No. 366,272. 10 Claims. (Cl. 64—39.)



1. An anti-friction bearing comprising inner and outer races, rollers and balls between the races, and a revolvable cage the body of which extends radially between the races and is partially cut away from the reception of the balls and wholly cut away for the reception of the rollers.

1,351,755. PROCESS OF MANUFACTURING HYDROGEN SULFID. KIKUNAE IKEDA, Tokyo, Japan. Filed Nov. 12, 1917. Serial No. 201,666. 6 Claims. (Cl. 23—10.)

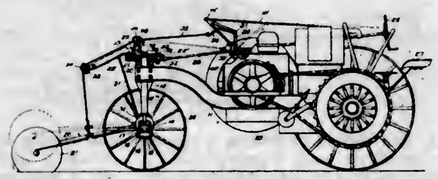


1. The process of manufacturing hydrogen sulfid which consists in causing a reaction of fuel gas and sulfur in the presence of a catalyzer.

1,351,756. LIGHT-FILTER. BEATRICE IRWIN, New York, N. Y. Filed Aug. 22, 1918. Serial No. 250,920. 4 Claims. (Cl. 240—1.)

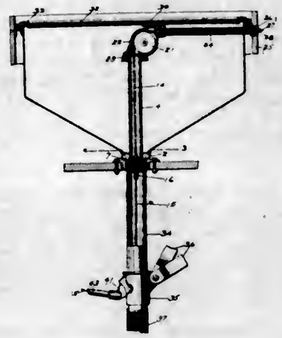
2. A light filter composed of paper and shaped to screen the light rays from a source of light, the paper having such a thickness and translucency that it renders the source of light substantially invisible therethrough, while permitting sufficient light rays to pass therethrough for lighting purposes and make the broad surface of the paper filter appear as the source of light, the paper having coloring matter of various shades or colors thereon forming a combination of stimulant, sedative and recuperative color values or any two of them, with the colors or shades gradually merging or running into one another to cause the light coming from the filter to be variously colored, the coloring matter being insufficient to decrease the light coming through the filter to render it ineffective for lighting porposes.

1,351,757. EGG-CANDLER. WILL D. ISEMAN, Detroit, Mich. Filed Oct. 31, 1919. Serial No. 334,722. 2 Claims. (Cl. 99—6.)



1. An egg candler comprising a base including a frame cut away adjacent its upper edge to form a shoulder, a main bottom within the frame; a false bottom located below the main bottom and having a flange bound between the main bottom and the frame; a box-like reflector located within the frame and supported by the main bottom; a lamp within the reflector; a platform supported on the shoulder and provided with an egg receiving opening; and a top hinged to the base, the top being supplied adjacent to its upper end with a peep hole.

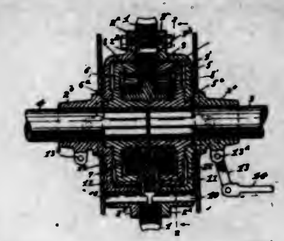
1,351,758. BED-FRAME CONNECTION. BENJAMIN H. JOHNSON and BENSON M. PHELPS, Roanoke, Va.; said Johnson assignor to William S. Phelps, Bluefield, W. Va. Filed May 27, 1918. Serial No. 236,864. 1 Claim. (Cl. 5—55.)



The combination with the corner post of a bed having a vertical lug and a seat at the base of the lug, of an angle iron bed rail having a cross-sectionally rectangular end portion that is cut away at one side with a resultant shoulder and a longitudinal face, there being a vertically extending channel in said face at its free end portion and there being a socket in said face adjacent its inner end portion, a stud bolt projecting from said face between the channel and the socket, a clamping block disposed removably against said face with one end against the shoulder, the inner face of the opposite end portion of the block having a vertical channel in coöperative relation to the first named channel and receiving with it the lug of the post, the block having a lug removably engaged in said socket and having an opening through the block from which the stud bolt projects, and a clamping nut upon the stud bolt beyond the block.

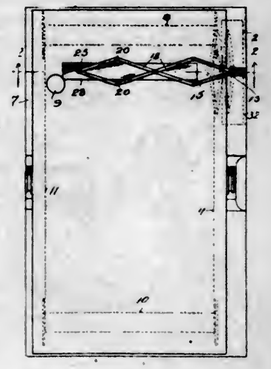
1,351,759. TRACTOR STEERING MECHANISM. EDWARD A. JOHNSTON and EDMUND J. KANE, Chicago, Ill., assignors, by mesne assignments, to International Harvester Company, a Corporation of New Jersey. Filed Feb. 11, 1915. Serial No. 7,469. 15 Claims. (Cl. 97—81.)

1. In tractor steering mechanism, an axle, a wheel thereon, furrow pilot steering means connected thereto on the furrow side of the wheel, a rotatable shaft operatively connected to said axle, and means connected to said shaft and rotatable therewith for supporting said furrow pilot steering means.



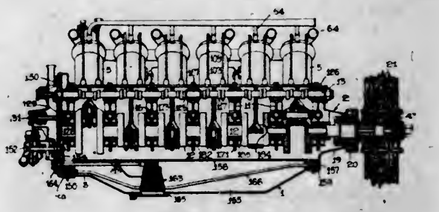
1,351,760. SANDING DEVICE. FRANK W. KALLOM, Malden, and PETER S. TOENNESEN, Everett, Mass. Filed Feb. 3, 1919. Serial No. 274,604. 8 Claims. (Cl. 291—36.)

1. A sanding device, comprising a hopper, a discharge tube extending through the bottom of said hopper and arranged to be raised or lowered relatively to the hopper, means for normally holding said tube in a raised position with the upper end thereof above the level of the sand in the hopper, means for lowering said tube, and a hood within which the upper end of the tube rests when in its elevated position.



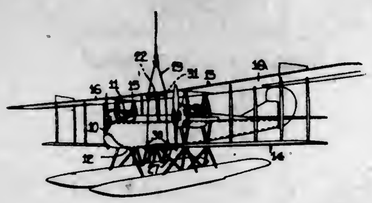
1,351,761. COMPENSATING DRIVING MECHANISM FOR MOTOR-VEHICLES. HARVEY R. KIDNEY, Cleveland, Ohio. Filed June 14, 1919. Serial No. 304,156. 4 Claims. (Cl. 74—7.)

2. In driving mechanism for motor vehicles, the combination with the wheel shafts and power shaft, of automatic means for connecting the latter to both the wheel shafts for forward drive, means operated automatically by the reversal of the power shaft to connect the latter to both wheel shafts for reverse drive, and means for disconnecting the drive of either one of the wheel shafts,



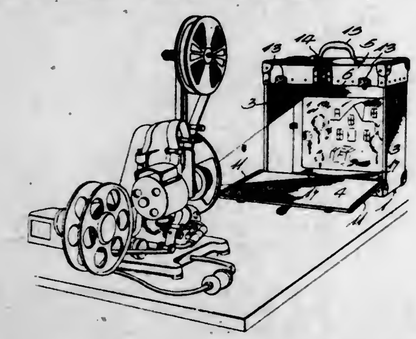
said means being operative independently of the automatic means.

1,351,762. MEANS FOR INSCRIBING UNEXPOSED PHOTOGRAPHIC FILMS, PLATES, OR THE LIKE. BERTELL W. KING, Brooklyn, N. Y. Filed Mar. 11, 1915. Serial No. 13,582. 25 Claims. (Cl. 95—1.1.)



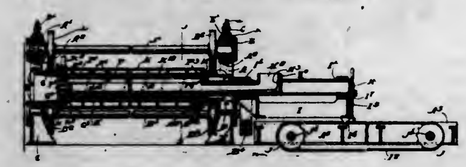
1. A camera adapted to contain a sensitized element in combination with means including lazy tongs and a source of artificial light for identically reproduucing script or other writings upon said sensitized element.

1,351,763. AERONAUTICAL MOTOR. CHARLES B. KIRKHAM, Buffalo, N. Y., assignor to Curtiss Aeroplane and Motor Corporation, a Corporation of New York. Filed May 18, 1916. Serial No. 98,336. 18 Claims. (Cl. 123—195.)



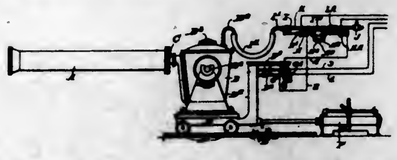
1. In an internal combustion engine, a crank case comprising a transverse reinforcing integrally formed partition, said crank case partition having a transverse opening passing therethrough for the reception of a motor support and an elongated motor support passing through and engaging the walls of said opening and extending laterally beyond the sides of the crank case for engagement with the engine bed.

1,351,764. HOISTING CONNECTION FOR AIRPLANES. HENRY KLECKLER, Hempstead, N. Y., assignor to Curtiss Aeroplane and Motor Corporation, a Corporation of New York. Filed May 4, 1918. Serial No. 232,519. 8 Claims. (Cl. 244—1.)



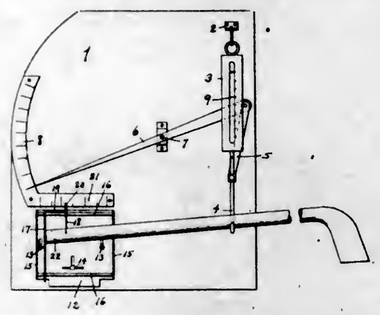
1. The combination, in an airplane, of an airplane wing, a body, and a hoisting connection for the airplane comprising a looped cable having its ends fastened to the body, the cable intermediately of its ends being held apart by an element incorporated in the airplane wing.

1,351,765. CARRYING-CASE FOR MOTION-PICTURE PROJECTORS. CHARLES J. KOCH, Cincinnati, Ohio, assignor to The Sales Service Company, Cincinnati, Ohio, a Corporation of Ohio. Filed July 24, 1919. Serial No. 312,883. 2 Claims. (Cl. 88—24.)



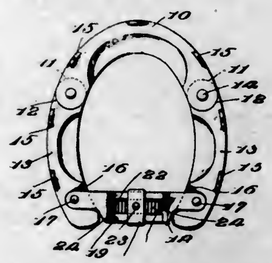
1. A carrying device for motion picture projectors comprising a rectangular case from which the projector is entirely removable for use, the front side of said case being hinged for downward swinging to admit rays from the projector into the case, the top of said case being hinged for upward swinging, guides in the back portion of said case, and a panel held by said guides and removable upwardly when said top is opened, said panel having a screen forming side and being reversible to protect said side when carrying the projector within the case.

1,351,766. CENTRIFUGAL PIPE-CASTING. JAMES B. LADD, Ardmore, Pa., assignor to United States Cast Iron Pipe and Foundry Company, Burlington, N. J., a Corporation of New Jersey. Filed Nov. 1, 1918. Serial No. 260,656. 11 Claims. (Cl. 22—65.)



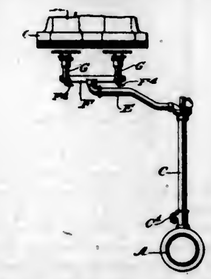
1. In a centrifugal casting machine, the combination with a rotatable mold, of a stationary cooling water jacket shell surrounding the mold and having an inlet at one end and an outlet at the other end for the cooling water, and formed with a spiral internal rib providing a spiral path of flow between said inlet and outlet.

1,351,767. METHOD OF AND APPARATUS FOR CHARGING ROTATING PIPE-MOLDS. JAMES B. LADD, Ardmore, Pa., assignor to United States Cast Iron Pipe and Foundry Company, Burlington, N. J., a Corporation of New Jersey. Filed Nov. 1, 1918. Serial No. 260,658. 4 Claims. (Cl. 22—65.)



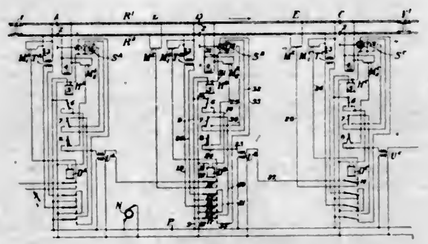
1. The method of making a tubular metal casting in an elongated mold rotating about a horizontal axis, which consists in supplying the molten casting metal to the mold in a jet and progressively varying the jet velocity to distribute the metal along the length of the mold.

1,351,768. TESTING DEVICE FOR GOLF-CLUBS. CHARLES L. LAWTON, Hancock, Mich. Filed Mar. 22, 1920. Serial No. 367,675. 4 Claims. (Cl. 265—33.)



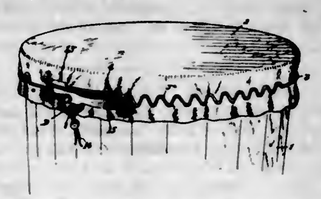
1. In a device for determining the moment of inertia of golf clubs, the combination of a load resisting device for supporting the clubs near their handle ends, an abutment movable toward and from the load resisting device and adapted to prevent the upward movement of said handle ends, and means to indicate the load resisted.

1,351,769. HORSESHOE. MARY C. LEINWEBER, Weimar, Tex. Filed Dec. 26, 1918. Serial No. 268,241. 1 Claim. (Cl. 168—19.)



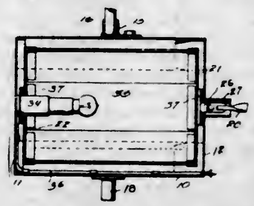
A horseshoe comprising pivoted sections certain of which are formed with terminal recesses and openings therethrough, links pivotally connected to the said certain links and within said recesses, one of the links being longitudinally bifurcated and having teeth formed on one face of each leg thereof, the other link having teeth extending across one face and engaging with the teeth of the first link, said other link having a central opening therethrough, a plate disposed transversely of the bifurcated link and having its ends turned to engage with the outer faces of the legs thereof, said plate having a central internally-threaded tubular extension disposed through the bifurcation of one link and the opening of the other link, and a bolt engaged through the tubular extension, the links, and the plate, from the face opposite to that on which the plate is disposed.

1,351,770. GAS-BURNER FOR PIPE-MOLDS. LOUIS R. LEMOINE, Philadelphia, Pa., assignor to United States Cast Iron Pipe & Foundry Company, Burlington, N. J., a Corporation of New Jersey. Filed Nov. 21, 1918. Serial No. 263,484. 4 Claims. (Cl. 34—18.)



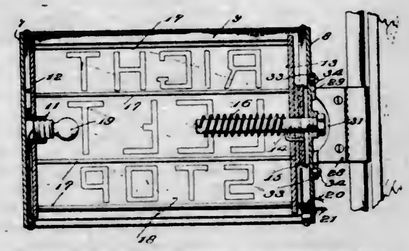
3. A mold drying apparatus comprising means for supporting a multiple number of pipe molds, a gas main, a multiple number of gas delivery pipes leading therefrom, valves connected to said delivery pipes each comprising a fixed member secured to a pipe and a pivoted member turning thereon, burner supporting pipes connected to the pivoted valve members and rotatable from a position in which the burner registers with a mold to a non-registering position, burners supported on said pipes, regulating valves for each burner, said valve members being so arranged as to open when the burner pipes are in registry with a mold and close when they are rotated away from such position.

1,351,771. RAILWAY-TRAFFIC-CONTROLLING SYSTEM. LLOYD V. LEWIS, Edgewood borough, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Nov. 21, 1918. Serial No. 263,607. 13 Claims. (Cl. 246—38.)



12. In combination, a section of railway track, a track circuit including a source of current and a track relay both of which are connected across the rails of said section, a second circuit including the two rails of said section in multiple, and means comprising a contact of said track relay for opening said second circuit when the relay is energized.

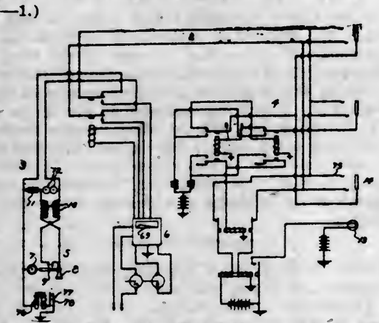
1,351,772. CLAMP. SAMUEL REUBEN LIBBEY, Brady, Mont., assignor of one-half to Sanford H. Severson, Brady, Mont. Filed Nov. 3, 1919. Serial No. 335,884. 4 Claims. (Cl. 24—256.)



4. A fastener for fastening flexible covers on tubs, comprising a wire adapted to embrace the cover on the tub, and a clamp for connecting the ends of the wire, said clamp consisting of two members pivoted together at one end to swing with respect to each other in parallel planes, one end of the wire being connected to one of the members at the other end, and the other member having at the said other end a grip or handle, the other end of the wire being connected to said other member intermediate the ends thereof, and means for limiting the closing movement of the members to a position where they are superposed.

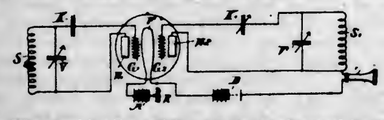
1,351,773. AUTOMOBILE SAFETY-SIGNAL. HARVEY R. DEILEY, Bethlehem, Pa., assignor of one-half to John T. Lindstrom, Allentown, Pa. Filed July 8, 1918. Serial No. 243,891. 1 Claim. (Cl. 116—49.)

A safety signal comprising a housing having heads closing its ends, an indicating drum rotatably mounted in the housing and having heads provided with inwardly extending flanges, cleats extending from the heads of the drum in operative relation to the flanges, panels positioned between the heads of the drum and engaged by the flanges and cleats, and washers of resilient material positioned between the heads of the drum and heads of the housing to move the heads of the drum toward each other for tight engagement with the panels and further providing frictional brake means for the drum.



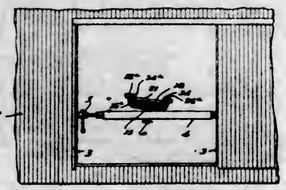
1,351,774. DIRECTION-INDICATOR. JOHN T. LINDSTROM, Allentown, and HARVEY R. DEILEY, Bethlehem, Pa.; said Deiley assignor to said Lindstrom. Filed Apr. 30, 1919. Serial No. 293,803. 1 Claim. (Cl. 116—48.)

A direction indicator including a housing having a side opening, heads closing the ends of the housing, a movable indicator in the housing, and a supporting bracket



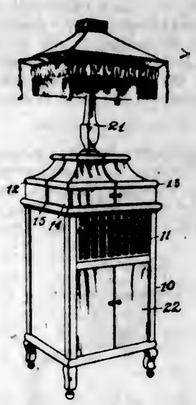
positioned in axial alinement with the housing and having a head fitting against one head of the housing and provided with arcuate slots, and securing screws passing through the slots to adjustably connect the bracket head with the casing head and releasably hold the bracket in an adjusted position and limit turning movement of the bracket.

1,351,775. SYSTEM OF TRANSMITTING INTELLIGENCE. GEORGE A. LONG, Hartford, Conn., assignor of one-fourth to Charles Soby, Hartford, Conn., and one-fourth to The Gray Telephone Pay Station Company, Hartford, Conn., a Corporation of Connecticut. Filed Aug. 3, 1917. Serial No. 184,235. 14 Claims. (Cl. 179—1.)



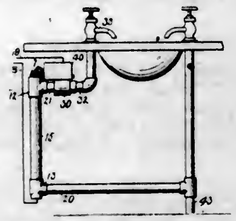
1. A system of the class described comprising a station having a telephone and an instrument for the transmission of written intelligence, a second station also having a telephone and having an instrument for the receipt of such written intelligence, a central station having a telephone switchboard provided with means to connect the two telephones, and means to be set in action by the subscriber at the first station for cutting the telephone thereat off the line and for simultaneously cutting the instrument thereat into the line.

1,351,776. OSCILLATION-GENERATOR SYSTEM. CHARLES VEYNE LOGWOOD, New York, N. Y. Filed Feb. 21, 1917. Serial No. 150,221. 6 Claims. (Cl. 250—8.)



1. The combination with an evacuated vessel having associated therewith a hot electrode and a plurality of cold electrodes, a circuit connecting two of said cold electrodes, an independent oscillating circuit connecting two of said cold electrodes, and a third circuit including a current source conductively connecting said hot electrode to one of said circuits.

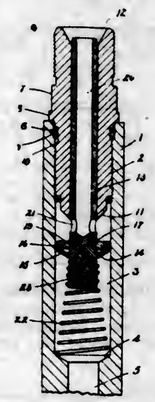
1,351,777. LUMBER AND TIMBER GRADING MACHINE. JOSEPH G. MCDONOUGH, Eau Claire, Wis. Filed Nov. 20, 1916. Serial No. 132,470. 29 Claims. (Cl. 101—8.)



1. A device of the class described comprising a support having a surface to receive the lumber or timber to be marked and mounted to rock on a transverse axis under weight of the lumber, and means for identifying a surface of the lumber or timber on said support.

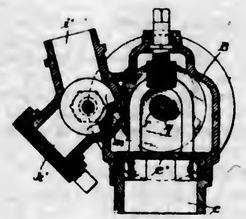
1,351,778. TALKING-MACHINE CASE. CHARLES J. MALMBERG, Jamestown, N. Y. Filed Dec. 6, 1919. Serial No. 342,889. 2 Claims. (Cl. 211—16.)

2. In a talking machine case, a body having a top, a stationary part at the rear of the body extending upwardly from the top thereof to form a part of a cover for the top, said cover part being cutaway on its front so as to leave the entire front half of the top of the body exposed and having parts which extend around the rear half of the body top and a top part in spaced relation thereto, movable cover parts which conjointly when closed cover the front half of the body top, and means to hingedly mount said movable cover parts so that same may be swung free of the front half of the body top so that light coming from above the stationary part will strike the front half of the body top.



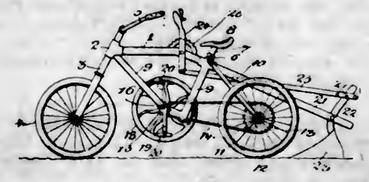
1,351,779. ELECTRIC HEATER. ALONZO C. MATHER, Chicago, Ill. Filed Nov. 25, 1918. Serial No. 263,966. 3 Claims. (Cl. 219—39.)

2. A device of the character described comprising, a pipe, T-fittings on either end of said pipe, inlet and outlet pipes connected with the said fittings, a tube located in said first mentioned pipe, said tube having a conical surface formed on one end thereof, one of said T-fittings having a conical aperture formed therein to receive said conical end of the tube, a stuffing box located in the opposite one of said T-fittings, a removable gland nut in said stuffing box adapted to embrace the tube whereby the tube may be removed through the stuffing box, a resistance wire extending through the said tube, and an electric circuit for heating the resistance wire.



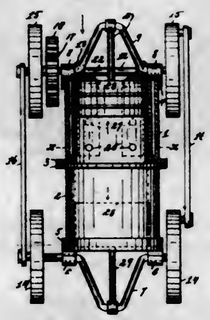
1,351,780. AIR-VALVE. WILLIAM CHARLES MEAD, Toronto, Ontario, Canada. Filed June 14, 1920. Serial No. 388,757. 2 Claims. (Cl. 152—12.)

1. In an air valve, a valve seat having a tapered surface and an opening through the center, a valve having a tubular stem extending through said central opening and provided with lateral openings adapted when the valve is pushed inwardly to move beyond the valve seat to permit the free flow of air having a cup-shaped inner end



formed with a tapered bottom inner wall, and a gasket supported from the outer perimeter of the tapered bottom and in perpendicular relation to the stem of the valve, said gasket being adapted to engage the tapered valve seat and to be depressed into the tapered head of the valve.

1,351,781. FIRE-PLUG. THOMAS H. MEUSHAW and CONRAD J. DIEZ, Baltimore, Md. Filed Sept. 11, 1919. Serial No. 323,063. 2 Claims. (Cl. 137—13.)

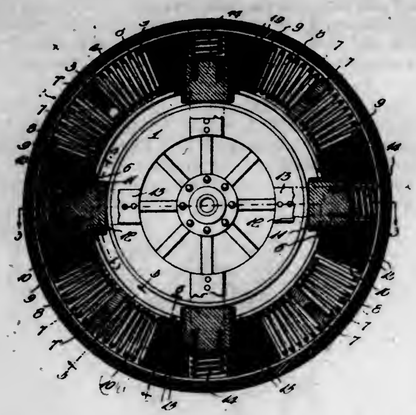


1. A connection for fire plugs comprising a head adapted for connection with the plug, said head having a main pipe for direct connection with the engine, a valve for controlling the flow from said main pipe, two couplings supported from the head, one for the return pipe from the engine, and the other for the outlet to the nozzle, and a three-way valve for closing the outlet from the engine and making a direct connection from the head to the nozzle to cut out the engine or for causing the flow through the engine when the main outlet valve is open, substantially as described.

1,351,782. PLOW. ALEXANDER MITCHELL, Pueblo, Colo. Filed Mar. 5, 1918. Serial No. 220,538. 1 Claim. (Cl. 97—36.)

A wheeled vehicle including a seat post, a draw bar extending rearwardly and downwardly from the seat post to a point beyond the rear wheels, a substantially upright standard pivoted intermediate its ends to the rear end of said draw bar and carrying an earth engaging blade at its lower end, an operating lever pivoted to the frame of the vehicle forwardly of said seat post, and a link connected at one end to said lever and being pivotally and adjustably connected at its opposite end to said standard.

1,351,783. INTERNAL-COMBUSTION ENGINE. ALFRED MOEGLIN, Newark, N. J. Filed Sept. 19, 1917. Serial No. 192,065. 2 Claims. (Cl. 123—51.)

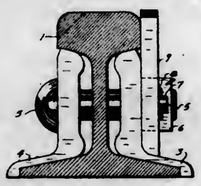


2. In an internal combustion engine, the combination with a cylinder having intake and exhaust ports, said intake and exhaust ports being located in line with each other in said cylinder, a single movable piston located in each end of said cylinder, a rotatable crank-shaft located in bearings on each end of the cylinder operatively connected with each piston, a connecting rod operatively connected to said crank-shafts, a rotary valve operating shaft mounted in bearings on one end of the cylinder, a gear carried by the crank shaft meshing with a gear carried by the rotary valve operating shaft for revolving said valve operating shaft once to every two revolutions of the said crank shaft, beveled gears carried by said valve operating shaft, two rotary valves fitted into a valve casing which is secured to the underside of the cylinder, each valve having a passage one for intaking and the other for exhausting charges, said passages communicating with the intake and exhaust ports of the said cylinder, and beveled wheels secured to the free ends of the rotary valves for engagement with the beveled wheels on the valve operating shaft for imparting rotary motion to said rotary valves for alternately registering the passages of said rotary valves with the intake and exhaust port in said cylinder.

1,351,784. SPRING-CUSHION TIRE. GEORGE ORBIN, Hoboken, Pa., assignor of one-third to Charles Milton Hays, Hoboken, Pa. Filed Feb. 19, 1920. Serial No. 360,005. 4 Claims. (Cl. 152—38.)

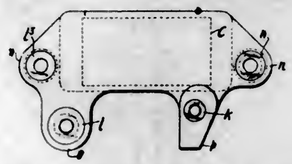
3. A spring tire comprising a casing having a plurality of elongated slots formed in its inner periphery at spaced intervals, and partitions secured transversely in the casing at points between the slots, circumferentially extending coiled springs, bearing at one end against the partitions, circular movable plates contacting the other ends of the springs, arcuate plates, including integral sockets, the ends of the arcuate plates normally bearing against said circular plates to move them against the action of the circumferential coiled springs, said sockets extending through and beyond the slots, a plunger disposed in each socket the sides thereof being spaced from the walls of the socket, a wheel, guide plates secured on opposite sides

of the rim of the wheel and extending into the spaces between the plungers and walls of the sockets, and a coiled



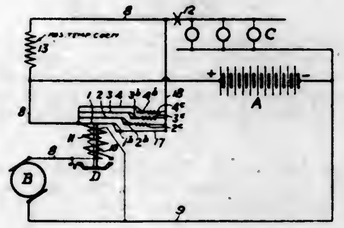
spring and resilient blocks between each arcuate plate and casing.

1,351,785. MULTIFOCAL OPTICAL ELEMENT AND METHOD AND MEANS FOR MAKING THE SAME. ARTHUR E. PAIGE, Philadelphia, Pa. Filed Oct. 22, 1919. Serial No. 332,525. 23 Claims. (Cl. 88—54.)



1. An optical element having one side surface including a spherical area and an area with a cylindrical component.

1,351,786. NUT-LOCK AND RAIL-JOINT PROTECTOR. PETER JOHAN ADOLF PETERSON, Pine River, Minn., assignor of one-half to Olaf B. Orres, Pine River, Minn. Filed May 26, 1919. Serial No. 299,811. 1 Claim. (Cl. 238—262.)



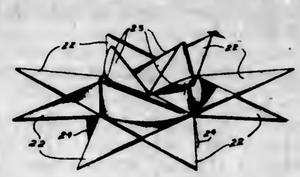
In combination with the meeting ends of a pair of railway rails, fish plates, bolts connecting said fish plates to the rails, nuts for said bolts, one cover plate for each pairs of fish plates, said cover plate being formed with a plurality of square perforations adapted to snugly receive the said nuts when the cover plate is applied to one of said fish plates and to said bolts, said cover plate, when in position, extending from the base of one fish plate to the level of the tread surface of the railway rails at the rail ends, and fastening means for said cover plate.

1,351,787. CONDENSER UNIT AND METHOD OF MAKING THE SAME. WILLIAM H. RICHTER, Philadelphia, Pa., assignor to Arthur Atwater Kent, Ardmore, Pa. Filed July 14, 1919. Serial No. 310,796. 17 Claims. (Cl. 250—41.)

16. A condenser unit consisting of a rigid unitary structure of insulating material and a condenser molded in and held compressed solely by said structure.

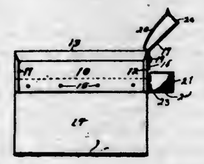
1,351,788. CAR-LIGHTING SYSTEM. HARRY D. ROHMAN, New York, N. Y., assignor, by mesne assignments, to J. Stone & Company, Limited, Deptford, England. Filed Apr. 23, 1917. Serial No. 163,815. 4 Claims. (Cl. 171—313.)

4. In a car lighting system, the combination of a dynamo, a battery, translating devices, a cut-in switch, and a plurality of resistances between the dynamo and the translating devices, said resistances being arranged to be connected in parallel and to be successively disconnected by the cut-in switch as it closes and to be successively connected by said switch as it opens as and for the purpose set forth.



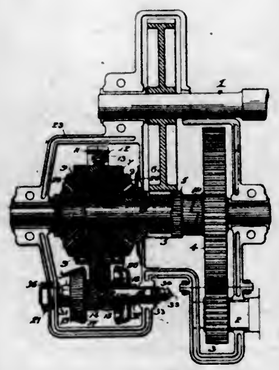
1,351,789. METHOD OF FITTING ARTIFICIAL LIMBS. JAMES F. ROWLEY, Chicago, Ill. Filed Jan. 27, 1919. Serial No. 273,397. 3 Claims. (Cl. 3—2.)

1. The method of obtaining a cast of the stump of an amputated limb, which consists in providing a matrix base formed of stretchable fabric, coating the same with wax, and while the wax is soft, pulling on said base longitudinally of the stump of the limb, manipulating the stump with the hands so as to displace the fleshy parts of the leg and to cause said base to be shaped substantially as said stump would be normally when in place in a stump socket, allowing the wax to harden, then removing said base and filling the same with plastic material to form the cast.



1,351,790. CHRISTMAS-TREE ORNAMENT AND METHOD OF MAKING SAME. WILLIAM R. RUDOLPH, Glenbrook, Conn. Filed June 24, 1919. Serial No. 306,338. 3 Claims. (Cl. 41—10.)

3. The method of forming a Christmas tree ornament consisting of interweaving a plurality of doubled strips of paper, folding the strips on oblique lines adjacent the interweaving, tucking the ends through the interweaving,



and folding the ends on both sides of the interweaving into conical members and tucking the ends in the interweaving.

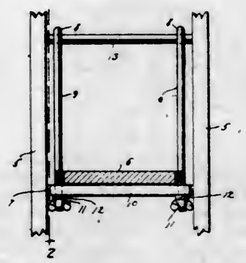
1,351,791. GATHERING CONVEYER-BUCKET. HERBERT W. SARGENT, Fort Dodge, Iowa, assignor to Sargent Tile Ditcher Company, Fort Dodge, Iowa, a Corporation of Iowa. Filed June 19, 1919. Serial No. 305,244. 5 Claims. (Cl. 193—28.)

1. A gathering conveyer bucket, comprising a base element formed with a cutting edge, a concaved wing fixed to said base element opposite the cutting edge thereof, and gathering means fixed to and extending obliquely from one end of the base element adjacent said cutting edge, said gathering means extending forwardly and outwardly from such end of the base element.

1,351,792. BRAKE MECHANISM FOR HOISTING MACHINERY. HARRY SAWYER, Muskegon, Mich., assignor to Shaw Electric Crane Company, Muskegon, Mich., a Corporation of Michigan. Filed July 12, 1916. Serial No. 108,829. 9 Claims. (Cl. 57—116.)

1. In an automatic brake mechanism, a brake member, right and left helical gears carried thereby, helical right and left pinions respectively engaged by said gears to be moved thereby endwise toward and from each other, a friction cone associated with each pinion and fixed cone seats to coöperate with said cones.

1,351,793. BALL-MILL. EDWIN H. SCHMIDT, Inspiration, Ariz. Filed May 9, 1919. Serial No. 295,938. 5 Claims. (Cl. 83—9.)

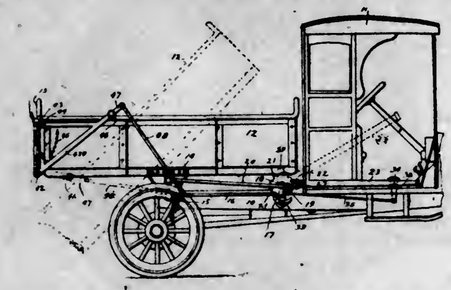


1. In a ball mill, a shell, liners mounted on the inside of said shell, and a sentinel device provided with a bore associated with said shell, which, when worn away a certain amount, allows material to escape from the inside of said shell to the outside thereof.

1,351,794. SHOT-FIRING DEVICE. WILLIAM F. SCHMIDT, Freeburg, Ill. Filed Sept. 5, 1919. Serial No. 321,830. 1 Claim. (Cl. 102—8.)

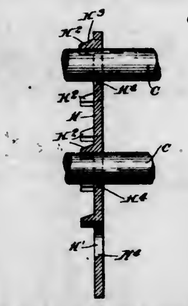
A fuse split at its free end, a match comprising a body portion and a coating thereon, a coating of powder on the end of said match disposed in the split end of the fuse, and a wrapping over the split end of the fuse, the powdered end of the match serving as a squib.

1,351,795. ATTACHMENT FOR LADDERS. FRITZ W. SCHNABEL, Chicago, Ill. Filed Mar. 29, 1920. Serial No. 369,707. 2 Claims. (Cl. 304—3.)



1. The combination with a pair of ladders placed face to face in spaced relation, and a platform extending between said ladders and supported at its ends by one of the rungs thereof; of hooks hung on rungs of the ladders above the aforesaid rungs supporting the platform, said hooks having depending shanks straddling the platform, and cross-bars carried by the shanks, on which cross-bars the platform also seats.

1,351,796. DUMPING-VEHICLE. FREDERICK C. SCHOFIELD, Salem, Va., assignor, by direct and mesne assignments, to The Hillfield Body Company, Salem, Va., a Corporation of Virginia. Filed Feb. 17, 1919. Serial No. 277,669. 2 Claims. (Cl. 298—19.)

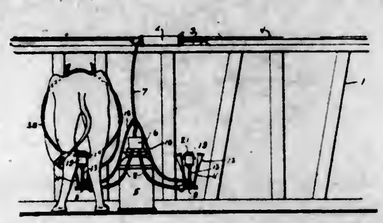


1. In a dumping vehicle, the combination of a chassis, a body, a driver's cab whose rear is forward of but close to the front of the body, a bracket at each side of the

body extending downward below the bottom thereof and pivoted to the chassis at a fixed point, whereby the body has only a swinging motion, a rotary member situated forward of said pivot, an operative connection between one of said brackets and said member to swing the body on said pivot, means accessible to the driver in the cab,

to rotate said member, driver-operated means to prevent the rotation of said member, a shaft on which said rotary member is mounted, extending transversely of and supported by the chassis beneath the body, a hook carried by said shaft and a part on the bottom of the body into and out of engagement with which said hook moves when the shaft is turned.

1,351,797. METALLIC BAFFLE-PLATE. WILLIAM F. SELLERS, Wilmington, Del., assignor to Edge Moor Iron Company, Edgemoor, Del., a Corporation of Delaware. Filed Oct. 11, 1918. Serial No. 257,731. 3 Claims. (Cl. 110—98.)

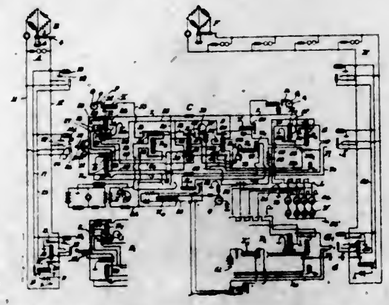


3. As a new article of manufacture a cast metallic plate for use in a baffle wall traversed by the water tubes of a water tube boiler, said plate being formed with lugs projecting from one side of the plate along the upper side only of the margin of each boiler tube opening, said lugs being formed with concave lower sides to fit the tops of the tubes and with tapered upper sides, and said plates being also formed with boiler tube openings which below the lugs have walls flaring in the direction of the lugs.

1,351,798. STRIPPING DEVICE FOR MILKING-MACHINES. WARREN A. SHIPPERT, Chicago, Ill. Filed Nov. 15, 1917. Serial No. 202,137. 23 Claims. (Cl. 31—98.)

1. A device of the class described, comprising a telescopic member, capable of being extended by suction within the same; and suction and pressure mechanism adapted to intermittently create a suction within said member and relieve the same; and means for holding said member in a normally closed position.

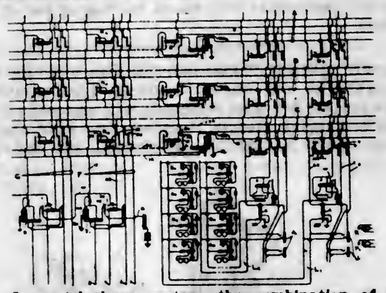
6. A device of the class described, comprising a hollow rod capable of being attached to the teat-cup apparatus of a milking machine; a casing telescopically movable on said rod and capable of movement thereon under suction; means communicating with said casing through said rod for exhaustion of the air from said casing; and yielding means for holding said casing normally in a retracted position on said rod.



7. A device of the class described, comprising a hollow rod adapted for attachment to the teat-cup apparatus of a milking machine; a casing telescopically movable on said rod and capable of movement thereon under suction; and means for exhausting the air from said casing communicating therewith through said rod by way of a continuous valveless passage.

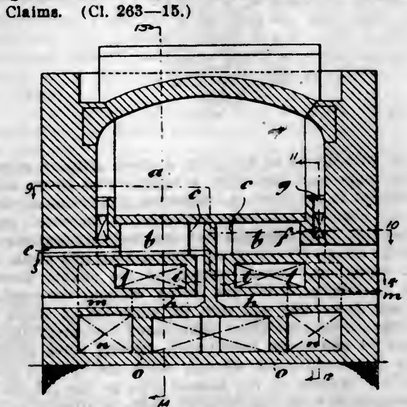
15. In a stripping device for cow milking machines, a cylindrical shell provided with a convex cap; a plunger therefor comprising a pair of flexible cup-shaped members, spaced apart and forming an oil receptacle, means for holding the edges of said members in distended positions; and a stem for said plunger extending through the end of said shell and having an air-tight relation therewith.

20. A device of the class described, comprising a teat-cup apparatus; mechanism for creating a vacuum therein and relieving the same; a telescopic member associated with said teat-cup apparatus, so as to be actuated by the suction therein, in position for impact with the udder of a cow, centrally of such apparatus; and means for holding said member normally in an inoperative position when the amount of suction exerted in said apparatus is below a predetermined degree.



1,351,799. TELEPHONE SYSTEM. FRANK M. SLOUGH, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Original application filed May 15, 1915, Serial No. 28,251. Divided and this application filed Dec. 26, 1916. Serial No. 138,710. 8 Claims. (Cl. 179—9.)

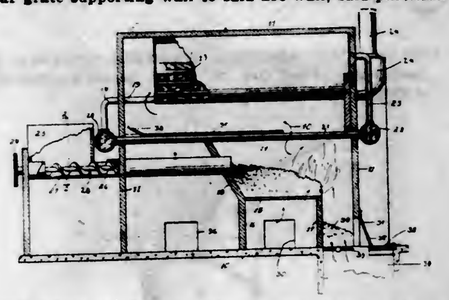
1. In a telephone system, the combination with a connection register, a calling telephone line, a called telephone line, a link circuit for interconnecting the lines, a calling subscriber's supervisory relay and a called subscriber's supervisory relay, an operator's listening relay under the joint control of the said calling and called subscribers' supervisory relays, means to cause the said calling subscriber's supervisory relay and the said operator's listening relay to automatically operate when connection is made with a calling subscriber's line, under the control of the calling subscriber's substation apparatus, a register circuit for the said register comprising normally open



contacts of the said listening relay and of the said calling subscriber's supervisory relay and normally closed contacts of said called subscriber's supervisory relay, and means to cause the actuation of the called subscriber's supervisory relay when connection is made with a line of the called subscriber, by the said link circuit.

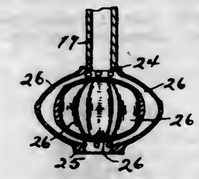
1,351,800. TELEPHONE SYSTEM. FRANK M. SLOUGH, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed Mar. 31, 1917. Serial No. 158,863. 45 Claims. (Cl. 179—27.)

1. In a telephone system, the combination of interconnecting trunk circuits, relays to interconnect said trunk circuits, relays to prevent one of said trunk circuits being connected with more than one of said interconnecting trunks at a time to incoming call circuits, relay means to interconnect one of said trunks to said incoming call circuit, and delayed disconnect means to disassociate said incoming call circuit and said trunk circuit.



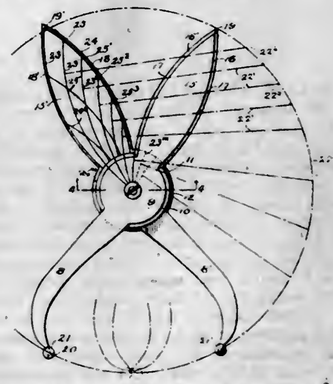
1,351,801. FURNACE. ALFRED SMALLWOOD, London, England. Filed July 31, 1918. Serial No. 247,645. 5 Claims. (Cl. 263—15.)

1. A furnace adapted to be heated by gaseous or liquid fuel, including in combination with a goods chamber, means for introducing air for primary combustion, and means independent of said first named means for introducing air for secondary combustion at a point removed from the point of primary combustion.



1,351,802. BOILER-FURNACE. LINCOLN G. SMITH, Des Moines, Iowa. Filed Feb. 3, 1919. Serial No. 274,799. 2 Claims. (Cl. 110—1.)

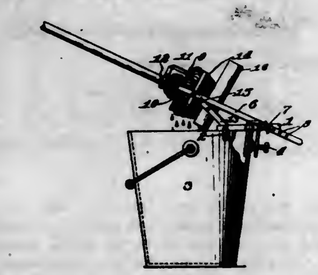
1. In a boiler furnace, a furnace inclosure, a tubular boiler member mounted in the upper portion thereof, a substantially horizontally disposed fire wall extended across the inclosure in position spaced below the boiler member with its front edge spaced rearwardly from the front wall of the inclosure, spaced transverse walls disposed below said fire wall, a grate extended between and supported on said transverse walls in position spaced below the fire wall, a closure partition extended from the rear grate supporting wall to said fire wall, said partition



being spaced rearwardly from the front edge of the fire wall thereby forming a pocket and means for forcing fuel through said partition out on to the grate, whereby gas formed in the pocket below the fire wall must escape around the front edge of the fire wall where it will be exposed to the flames from the burning fuel on the grate.

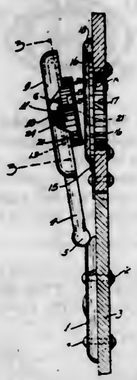
1,351,803. HOT-BLAST DOWNDRAFT-FURNACE. JONATHAN J. SMITH, Des Moines, Iowa, assignor of one-half to Oscar F. Petersen, Des Moines, Iowa. Filed Mar. 5, 1919. Serial No. 280,693. 3 Claims. (Cl. 299—141.)

1. A pipe adapted to be suspended within a furnace and a nozzle device suspended on said pipe, said nozzle device having opposed spaced collars, one opening to said pipe and the other opening to said furnace, and intermediate, wholly outwardly arched communicating tubular members opening at their ends only to said collar members.



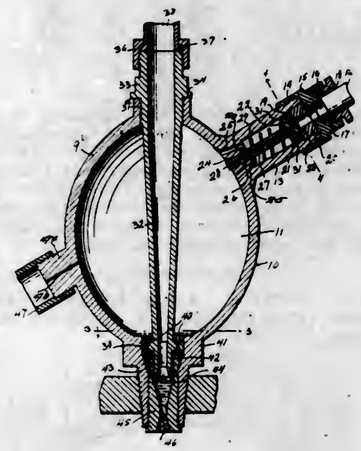
1,351,804. MEASURING-CALIPERS. KNUT ELVING SOLBERG, Philadelphia, Pa. Filed May 14, 1919. Serial No. 297,012. 11 Claims. (Cl. 33—148.)

1. In measuring calipers, a pair of caliper legs having pivoted bearing portions and extensions beyond said por-



tions adapted to overlie one another when the caliper measurements are small, one extension having graduations corresponding to the edge of the other extension and equidistantly spaced to indicate different predetermined spacings between the work contact ends of said legs.

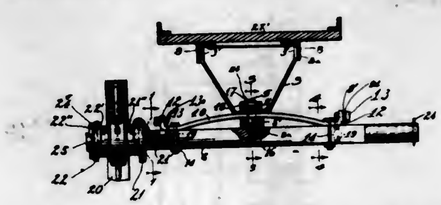
1,351,805. MOP-WRINGER. FREDERICK SPECKMAN, St. Louis, Mo. Filed Dec. 29, 1919. Serial No. 348,132. 4 Claims. (Cl. 15—12.)



2. A support, a mop receiving member pivotally secured thereto, and means for pressing a mop into said mop receiving member, said means comprising a bracket pivotally mounted on said support and a member secured to said bracket and adapted to engage the head of a mop and press it into said receiving member when the handle of said mop is pressed downwardly.

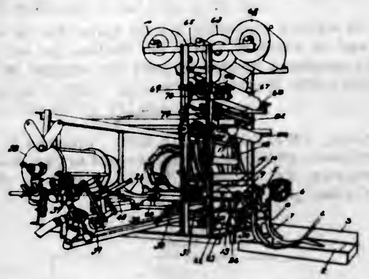
1,351,806. LOCK. JOHN I. STERN, Waukegan, Ill. Filed Nov. 5, 1917. Serial No. 200,337. 2 Claims. (Cl. 70—55.)

1. In a lock, a hinged leaf formed with graduations and with an elongated perforation, a perforate casing carried by said leaf, one of the perforations in said casing being a "sight perforation," a winged plate formed with a depression to receive said casing, an inverted U-shaped yoke carried by said plate for disposal in one perforation in said casing, an anchor lug formed in said casing diametrically opposite the yoke-receiving perforation, a notched tumbler casing disposed in the first named casing, the notched portion thereof being in engagement with the said anchor lug, an extension formed upon said tumbler casing for releasable engagement with the said yoke, notched tumblers within said tumbler casing, the notched portions of said tumblers being adapted for releasable engagement with said anchor lug, said tumbler casing being slidable relative to said first named casing, in one position of the latter, through gravity to cause disengagement of said tumbler-casing-extension from said U-shaped yoke and engagement of the notched portions of the tumblers with said anchor lug, a pronged washer arranged upon each tumbler within said tumbler casing, the prongs of said washers being spaced apart for engagement with the said anchor lug, lugs formed upon said tumblers for engagement with each other, an indicator disposed in the elongated portion of said hinged leaf and formed of two cup-shaped portions each provided with a flange which flanges are disposed upon opposite sides of said hinged leaf, one of said flanges fitting snugly inside the periphery of said tumbler casing whereby sliding movement of said tumbler casing may be manually effected, and a lug formed in said last named indicator flange for engagement with one of the lugs of one of said tumblers.



1,351,807. LUBRICATING DEVICE FOR VALVES AND CYLINDERS OF SUPERHEATING-LOCOMOTIVES. HOWARD MC STEVENS, Somerset, Ky., assignor of one-half to Ralph T. Hodges, Somerset, Ky. Filed Apr. 28, 1919. Serial No. 293,274. 18 Claims. (Cl. 184—56.)

10. In a device as set forth, a steam cylinder, a steam chest connecting therewith, a super-heated steam supp'y connected to the chest, a lubricating gun casing having a mixing chamber and being connected to the chest, means connecting the mixing chamber and the super-heated steam supply, means for conveying combined oil and steam into the casing, and means connecting the mixing chamber and the interior of the gun casing, whereby the combined oil and steam may mix with the super-heated steam and be injected into the chest, said means for conveying combined oil and steam including a drifting valve provided with peripheral ports, whereby when the valve is closed and the throttle of the booster pipe in the cab on the lubricator is open, considerable steam is allowed to pass through the combined steam and oil means, while the engine is drifting to equalize the pressure on both sides of said valve, and means acting to close the valve when the pressure is equalized on both sides thereof.



1,351,808. TRUCK. WILLIAM E. SULLIVAN, Roodhouse, Ill. Filed July 29, 1918. Serial No. 247,210. 3 Claims. (Cl. 280—116.)

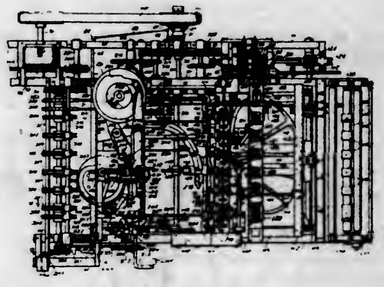
1. A truck of the character described, including a front axle having a plain bar adapted to be formed from rolled stock, disposed lengthwise on its upper side, said bar being bowed upward medially and its tips being turned upward adjacent to its corresponding bearing points where the bar is secured to the axle, a forked tongue having rearwardly divergent arms pivotally connected to the upturned tips of said bar respectively for vertical

swinging thereon, and a king-pin for securing the body of the truck to the middle part of said bar and axle.

1,351,809. WRAPPING-MACHINE. FORREST A. SUTHERLAND, Millinocket, Me., assignor to Great Northern Paper Company, Millinocket, Me., a Corporation of Maine. Filed Nov. 13, 1917. Serial No. 201,863. 18 Claims. (Cl. 93—5.)

1. A machine for wrapping rolls of paper, having, in combination, wrapping mechanism for said rolls, and mechanism for feeding said rolls to said wrapping mechanism constructed and arranged to be set into operation by the presence of one of said rolls in position to be fed thereby.

10. A machine for wrapping rolls of paper, having in combination, wrapping mechanism constructed to cover the peripheral surface of a roll with a wrapper leaving tubular wrapper extensions projecting beyond the opposite ends of the roll, means for moving a roll so wrapped away from said mechanism, and additional means arranged to operate on the roll after its removal from said mechanism to crimp said end extensions and apply headers to the opposite ends of the roll.



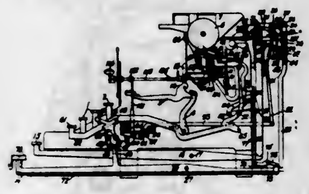
1,351,810. FENCE-MACHINE. JOSEPH H. TAUSCH, Chicago Ridge, Ill., assignor to George Gorton, Racine, Wis. Filed Jan. 24, 1916, Serial No. 74,010. Renewed Jan. 28, 1920. Serial No. 354,751. 97 Claims. (Cl. 140—5.)

1. In a twisted cable and picket fence machine, means for feeding a plurality of pairs of wires therethrough, means for positioning pickets between said wires, and reciprocating twister heads arranged to closely approach a positioned picket and twist said wires to secure the same in place, substantially as described.

26. In a fence machine, a rotatable twister head having wire openings extending therethrough, and a removable plate on one end of said head provided with an opening forming a twisting recess, substantially as described.

36. In a fence machine, means for feeding wires therethrough in pairs, means for twisting said wires to secure pickets therein, means for doubling certain of said pickets centrally, a removable curved guide adapted to guide the ends of said doubled pickets between said wires, and means for again twisting said wires to secure said doubled ends, substantially as described.

42. As a means for positioning sinuously formed objects, a support therefor, and a finger arranged to engage a sinuosity of said object and force it into a certain position, substantially as described.

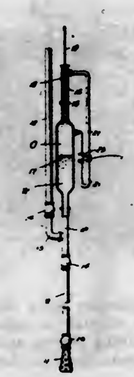


69. A feed mechanism for a wire fence machine, comprising sprockets adapted to engage pickets of a fence, and means for holding pickets against springing over the sprocket teeth, substantially as described.

1,351,811. ALLOYS HAVING HIGH MECHANICAL, CHEMICAL, AND ELECTRICAL RESISTANCE. ARRIGO TEDESCO, Turin, Italy, assignor to Societa Anonima Stabilimenti Biak, Turin, Italy, a Company of Italy. Filed Mar. 6, 1919. Serial No. 281,084. 1 Claim. (Cl. 75—1.)

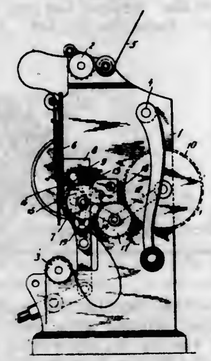
An alloy having high mechanical, chemical and electrical resistance, comprising nickel in proportion of about one half of the final alloy, copper in proportion between 35 and 44 per cent. iron in proportion between 1.5 and 4.75 per cent. and tungsten in proportion between 3 and 6 per cent.

1,351,812. TYPEWRITING-MACHINE. EDWARD THOMAS, New York, N. Y., and BURNHAM C. STICKNEY, Elizabeth, N. J., assignors to Underwood Computing Machine Company, New York, N. Y., a Corporation of New York. Original application filed Dec. 21, 1916, Serial No. 138,159. Divided and this application filed Dec. 19, 1918. Serial No. 267,440. 17 Claims. (Cl. 197—157.)



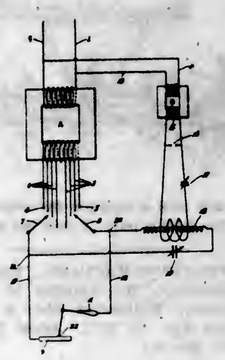
1. In a typewriting machine, the combination with a traveling carriage, printing keys, and column-selecting keys, of means whereby the typewriting mechanism may be effective to print in more than one color, devices whereby in a given column certain printing keys normally print in one color and other keys normally print in another color, and means under the control of the column-selecting keys for causing printing by all said keys to be done in a single color in said column.

1,351,813. PUMP. WILLIAM R. TWIFORD, Manville, Wyo. Filed Jan. 3, 1920. Serial No. 349,181. 5 Claims. (Cl. 103—75.)



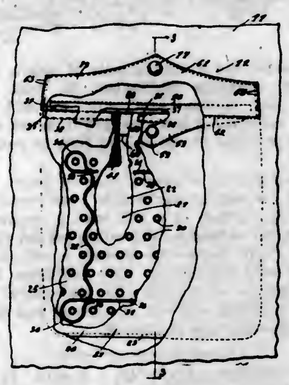
1. In a pump, the combination with a water pipe leading from the well to a point of delivery and having valve

means therein to prevent the downward flow of water in the pipe, of a pump barrel connected to the pipe and extending upward from the point of connection at one side of the water pipe, a body of oil maintained permanently



in the upper portion of the barrel, the said upper portion of the barrel constituting a pump cylinder, a reciprocating piston in the cylinder immersed in the oil, and means to maintain a suitable supply of oil both above and below the piston.

1,351,814. FRAMING MECHANISM FOR MOVING-PICTURE MACHINES. THEODORE F. UHLEMANN, New York, N. Y., assignor to Nicholas Power Company, New York, N. Y., a Corporation of Delaware. Filed Nov. 29, 1918. Serial No. 264,686. 8 Claims. (Cl. 88—17.)



1. In a framing mechanism for moving picture machines, the combination of a driving sprocket for the film, an adjustable support for said sprocket, a driving gear for said sprocket having a fixed axis of rotation, gears for transmitting the rotation of said fixed gear to said sprocket, means for maintaining the center of said gears at fixed distances from each other, and means for controlling said gear connection to prevent rotative movement of said sprocket from the movement of its support.

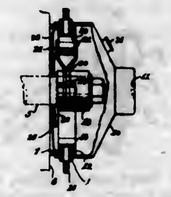
1,351,815. APPARATUS FOR AND METHOD OF WELDING. EDMUND J. VON HENKE, New York, N. Y. Filed Jan. 18, 1919. Serial No. 271,910. 12 Claims. (Cl. 219—15.)

1. In welding apparatus, a main source for the welding arc, and an auxiliary source for starting the arc permanently connected in parallel with the arc and of higher frequency than the main source.

1,351,816. PROTECTIVE POCKET. CHARLES C. WAIS, Cincinnati, Ohio, assignor of one-half to Carl Schwerin, Covington, Ky. Filed Oct. 1, 1918. Serial No. 256,426. 8 Claims. (Cl. 2—15.)

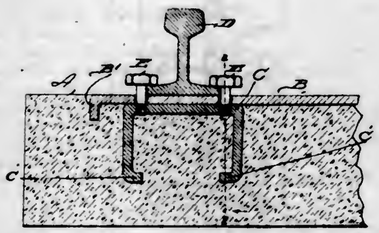
1. In a device of the character described, the combination of an outer pocket, an inner protective pocket having a mouth arranged to be entered through the mouth of said outer pocket, spaced-apart cross-strips extending across said mouth of said inner protective pocket, said cross-strips spaced from the respective ends of said inner protective pocket, and a flap for said mouth of said inner protective pocket.

1,351,817. DISPLAY-STAND. JAMES MADISON WALTERS, Los Angeles, Calif. Filed Feb. 6, 1920. Serial No. 356,610. 1 Claim. (Cl. 211—24.)



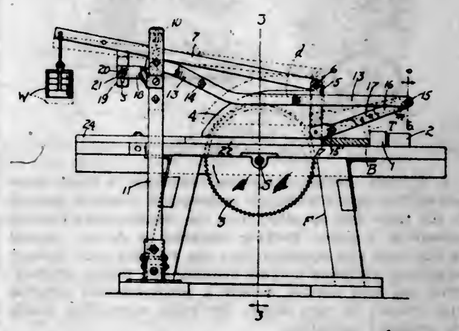
A display stand comprising a standard and an attachment for connection with the standard for supporting garments having shoulder straps, the attachment comprising a yoke shaped member consisting of a body having means for engaging the top of the standard, and arms extending upwardly from the body and spaced apart to register with the shoulder straps of the garment to

be supported and of a length to hold the garment with the upper line of the bosom thereof above the body of the attachment, each arm having a shoulder-piece detachably



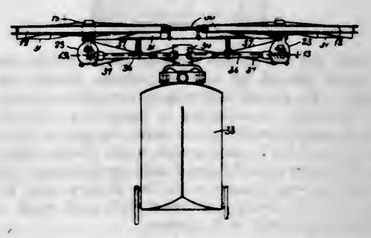
connected therewith, said shoulder-pieces being inclined outwardly and downwardly and each extending on both sides of each arm of the yoke at its end.

1,351,818. LUBRICANT-RETAINING CAP FOR TIMERS. HUBBARD C. WEST, Mount Vernon, N. Y. Filed July 22, 1919. Serial No. 312,558. 10 Claims. (Cl. 200—19.)



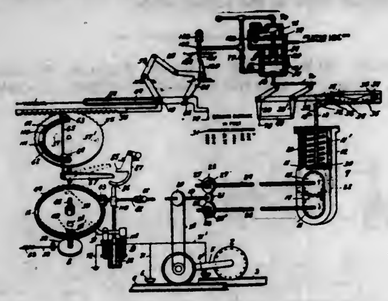
8. In combination, a timing shaft; a commutator casing disposed over the end of the timing shaft; an insulating ring around the inner face of said casing; a plurality of fixed contacts on the ring; a pivoted contact pivoted on said shaft and adapted to contact said fixed contacts; a disk-shaped oil cap secured oil-tight in said casing and provided with a large opening receiving said shaft and having its center disposed above the shaft; and a baffle disk disposed on said shaft between said cap and pivoted contact and almost closing said opening.

1,351,819. RAILROAD-TIE. CHARLES O. WHITCOMB, Washington, Mich. Filed Apr. 6, 1920. Serial No. 371,682. 2 Claims. (Cl. 238—265.)



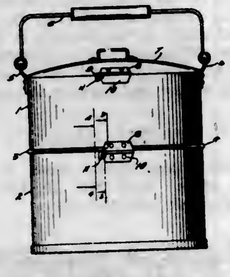
1. A railroad tie, comprising a concrete block, a bed-plate mounted on the top of said block and flush with its upper surface having holes for the passage of bolts, an anchor-plate of an inverted channel-like form extending transversely to the block and downwardly from the bed plate with inwardly directed opposing flanges spaced apart, track rails mounted on the bed plate, and a plurality of bolts adapted to engage the flanges of the track-rails extending through the holes in the bed-plate and screwed into tapped holes in the anchor plate.

1,351,820. SAW-GUARD. GEORGE WIELAND, St. Louis, Mo. Filed Dec. 5, 1919. Serial No. 342,594. 12 Claims. (Cl. 143—159.)



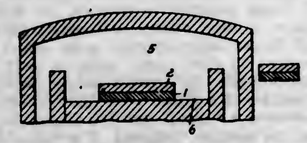
1. In combination with a circular saw rotating in a given plane, a hood surrounding the saw and yieldable in said plane, a reciprocable carriage for the stock to be cut, a supporting bed or frame for the carriage, and a member coupled to the carriage interposed between the bed and bottom of the hood along the face of the saw for pushing the section severed from the stock on the forward or feed stroke of the carriage to a point beyond the cutting edge of the saw with a backward stroke, said member on such backward stroke covering the otherwise exposed portion of the saw between the bed and bottom of the hood.

1,351,821. FLYING-MACHINE. JOHN F. WILKINSON, Winchendon, Mass. Filed Nov. 20, 1919. Serial No. 339,383. 5 Claims. (Cl. 244—19.)



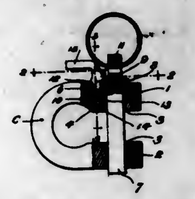
5. A flying-machine comprising a car, a motor thereon, a propeller-carrying frame, a plurality of spaced apart propellers carried by said frame and all arranged in the same plane, each propeller being composed of a hub, a rim, radial spokes connecting the hub with the rim, and fan-shaped blades mounted to turn on the spokes to a limited extent to form variable air spaces between the blades, said blades being adapted to be closed together by air pressure on their under sides, so that the propellers constitute outer parachute members, car-supporting means connecting said frame with the car, driving connections between the motor and the propellers, and an inner parachute member composed of a frame occupying the space between the propellers, and blades pivoted to said frame and adapted to be closed together by air pressure on their under sides, said inner parachute member being in the same plane with the propellers.

1,351,822. TRAIN-CONTROL SYSTEM. ARBA G. WILLIAMSON, Pittsburgh, Pa., and SIGMUND V. HUBER, Los Angeles, Calif. Filed Oct. 20, 1917. Serial No. 197,528. 39 Claims. (Cl. 246—49.)



2. A train controlling system including: a train, train controlling means normally inoperative, a device, carried by the train and operated from the running gear thereof, measuring required braking distance, a device, carried by the train and operated from the running gear thereof, measuring available braking distance and means whereby, when the two devices occupy a predetermined relation with respect to each other, the train controlling means are rendered operative.

1,351,823. DINNER-PAIL. LOYD WINDBICHLER, Nokomis, Ill. Filed Dec. 11, 1918. Serial No. 266,238. 1 Claim. (Cl. 220—5.)

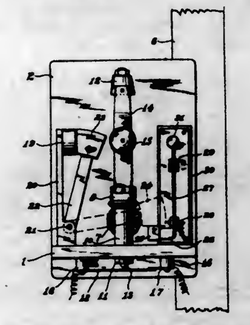


In a pail, top and bottom sections, diametrically opposed angle pieces carried by said top section, fingers integral with said angle pieces, said fingers extending beyond said angle pieces and terminating in hooked extremities, the fingers of opposed angle pieces being formed at relatively remote ends of said angle pieces, angle plates carried by said bottom section and formed with beveled edges adapted for frictional engagement with the hooked ends of said fingers, and stop flanges integral with said angle plates for coöperation with said fingers.

1,351,824. METHOD OF MAKING COMPOSITE STEEL PLATES. WARREN WORTHINGTON, Buffalo, N. Y. Filed Oct. 4, 1918. Serial No. 256,805. 3 Claims. (Cl. 29—189.)

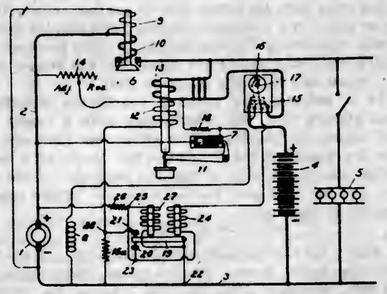
1. The method of making composite steel plates, which consists in placing on the bottom of a heating furnace a pile of steel plates or slabs of different carbon content, with a low carbon plate on the top of the pile, bringing said plates or slabs to a welding temperature, and then subjecting them to pressure to unite them into an integral composite plate.

1,351,825. SAFETY-CLEVIS. JOHN ZUBAL, Walsen, Colo. Filed Dec. 18, 1919. Serial No. 345,699. 3 Claims. (Cl. 97—4.)



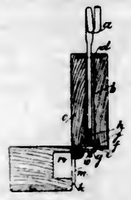
1. In a clevis, a frame having a pair of spaced arms provided with alined pin openings, one of said arms having a notch in its outer face, a pin insertible in said openings, a stop formed on the pin adjacent its outer end adapted to rest on the arm of said frame, a slidable and rotatable bolt carried by one arm, a lug on said bolt receivable in the notch in said arm, and a spring for actuating said bolt in one direction.

1,351,826. SAFETY-RAZOR. LEWIS H. ALLEN, West Springfield, Mass. Filed Aug. 9, 1919. Serial No. 316,434. 3 Claims. (Cl. 30—12.)



1. In a safety razor construction, the combination, of a handle, a holder therefor, a threaded end portion on the handle for attaching the handle to the holder, the handle having a shoulder portion, a raised portion between the shoulder and the threaded portion, a spring washer having an opening that engages the raised portion, said opening being of such shape as to prevent the washer rotating when the handle is threaded into the holder to place the spring under compression.

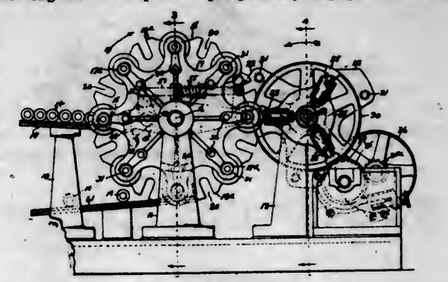
1,351,827. SAFETY APPARATUS FOR ELEVATORS. GEORGE P. BARKER and OLIVER E. UNDERWOOD, Indianapolis, Ind. Filed Oct. 3, 1919. Serial No. 328,148. 3 Claims. (Cl. 178—91.)



1. In an apparatus of the class described, the combination with a car and with a primary and auxiliary rails, of a governor-controlled switch carried by said car, a primary roller, means coöperating with the primary roller and the governor-controlled switch for operating the same when the car descends too rapidly, a magnet electrically connected to said governor-controlled switch, weighted means coöperating with said magnet and being held in a set position while the magnet is energised, a second switch carried by the car and provided with an angle-headed arm in the path of movement of the weighted means, and clutch means carried by the car and adapted to grip or act upon the auxiliary rails when the second switch is opened by the weighted means being released by the magnet and striking the headed arm of the second switch.

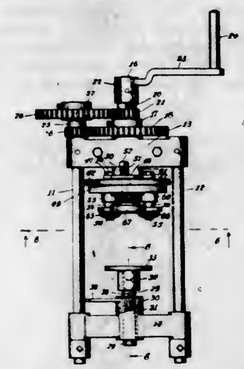
1,351,828. CAR-LIGHTING SYSTEM. WILLIAM L. BLISS, Niagara Falls, N. Y., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y., a Corporation of New York. Filed Mar. 6, 1917. Serial No. 152,553. 11 Claims. (Cl. 171—313.)

5. In an electrical system, in combination, a variable speed generator, a storage battery, a lamp circuit, means for regulating said generator whereby its voltage is substantially unaffected by changes in speed or lamp load, means for measuring the net input to said battery, means responsive to said measuring means for reducing the generator voltage to substantially the floating voltage of said battery, and means for maintaining said floating voltage independently of said measuring means.



1,351,829. WOODEN LAPPET. WILLIAM H. BOWKER, Manchester, England. Filed Jan. 6, 1920. Serial No. 349,719. 3 Claims. (Cl. 242—157.)

1. In wooden lappets means for adjustably securing a thread guide wire the shank of which is rectangular in section and screw threaded at its inner end comprising in combination two washers or metal plates having holes of similar section to the thread guide wire shank, a double adjusting nut and a metal hinge for attaching the lappet to the lappet rail, the said hinge being arranged that one wing lies between the two parts of the double adjusting nut the other wing being cut to house the end of the thread guide wire and the outer part of the double nut.

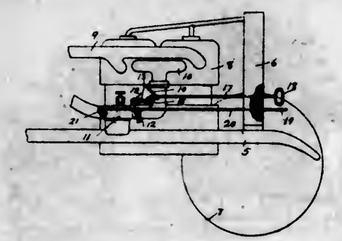


1,351,830. PRINTING MECHANISM FOR CYLINDRICAL ARTICLES. EUGENE S. BRADFORD, Detroit, Mich. Filed July 12, 1919. Serial No. 310,358. 7 Claims. (Cl. 101—37.)

1. In combination with means for feeding a supply of blanks, a rotatable carriage having blank-receiving portions spacedly disposed about its periphery in position to be successively filled from said feeding means, a rotatable member operatively connected with said carriage, a printing wheel adapted to peripherally engage the blanks

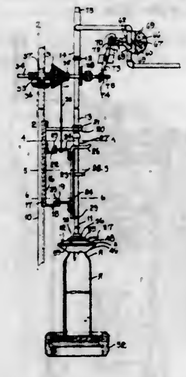
as said carriage rotates, and means deriving timed actuation from the movement of said rotatable member whereby the individual blanks are locked in position in the carriage and released therefrom at the desired phases of each cycle of operations.

1,351,831. CAN-HEADING MACHINE. JULIUS BRENZINGER, Fairfield, Conn., assignor to The Max Ams Machine Company, Bridgeport, Conn., a Corporation of New York. Filed Nov. 10, 1917. Serial No. 201,270. 10 Claims. (Cl. 113—23.)



1. In a can heading machine, the combination, with a frame comprising vertical posts and upper and lower cross-pieces, said upper cross-piece carrying seaming mechanism which comprises a can-head supporting chuck, a vertical shaft at the lower end of which said chuck is mounted, a seaming-roller carrier and seaming rollers mounted thereon, a sleeve on said shaft, and means intermediate said sleeve and said carrier for actuating the latter upon rotation of the former to successively advance and retract said rollers to and from effectively coöperative positional relation to said chuck, of a member mounted for rotation about a vertical axis, a pinion on said shaft meshing with a gear on said member and a pinion on said member meshing with a gear on said sleeve, whereby said shaft and said sleeve will be rotated at different velocities upon rotation of any one of the intergeared elements.

1,351,832. AUXILIARY THROTTLE-CONTROLLER. ROBERT S. BRICKEY, Aberdeen, S. D. Filed Dec. 9, 1918. Serial No. 265,875. 1 Claim. (Cl. 123—98.)

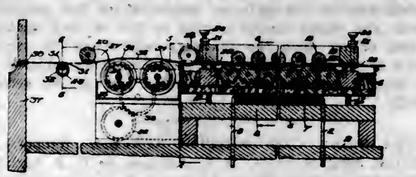


In a motor propelled vehicle, the combination with an internal combustion engine and a radiator located in front thereof, said engine including a throttle valve having an extended arm and primary operating connection attached to the end of said arm, of an off-set supplemental arm

rigidly, but detachably connected to said throttle valve arm and projecting laterally therefrom, and an auxiliary throttle valve operating rod attached to the end of said

supplemental arm and extended forward through the radiator and terminating in a hand piece located in front of said radiator.

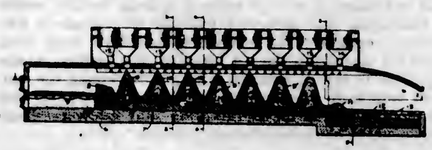
1,351,833. GLASS-DRAWING APPARATUS. GEORGE L. CATLIN and DAVID MORRISON, Port Allegany, Pa., assignors to R. W. Hilton, Smethport, Pa. Filed Oct. 29, 1917. Serial No. 199,039. 21 Claims. (Cl. 49—17.1.)



4. A glass drawing apparatus including an imperforate bait tube, a bait into which the lower end of the tube discharges, the bait having a diameter larger than the tube and comprising a hollow body open at its lower end and having a relief opening, and a manually operable valve controlling passage through said opening.

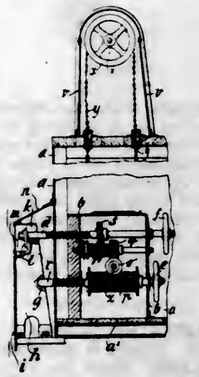
13. A bait for glass drawing comprising a hollow body, the body being expanded toward its median and then contracted downward and centrally to an orifice in its bottom, the orifice being thus less in diameter than the extreme diameter of the body and being defined by a vertical wall, the outer surface of the downwardly contracted portion of the body being straight from the lower corner of the wall of the orifice upward and outward to the point of greatest diameter, whereby the line of contact between the lowest edge of the bait and the molten glass may be observed and whereby the bait will be provided at its lower end with a sharp annular edge.

18. Means for controlling the volume of air admitted to the bait pipes of glass drawing apparatus comprising a casing having inlet and outlet ports, a disk rotatably mounted in the casing and having a plurality of different sized apertures, the disk being shiftable to bring any one of said apertures in alinement with said ports, and a valve shiftable across the face of the disk to control the effective area of the aperture formed in said disk.



1,351,834. APPARATUS FOR TREATING MOTION-PICTURE FILMS. JOHN G. CAPSTAFF, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed Mar. 29, 1918. Serial No. 225,388. 5 Claims. (Cl. 91—51.)

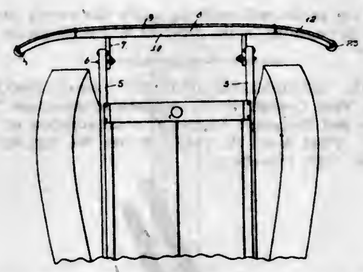
2. In a machine for treating continuous lengths of motion picture film, the combination with a liquid container, capillary rolls therein and means for passing a film strip over the rolls with its under face in contact therewith, of a frame above the container, tension rolls carried thereby and each contacting the top face of the film between two capillary rolls and means for adjusting the frame vertically toward and from the capillary rolls.



4. In a machine for treating continuous lengths of motion picture film, the combination with a liquid container, means for passing a film strip over the same and means for applying the liquid to the strip, of a roller engaging the coated side of the film adjacent to the container, and an exhauster having a narrow intake passage tangential to the roller.

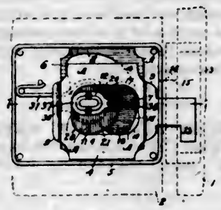
1,351,835. REVERBERATORY FURNACE. HENRY L. CHARLES, Butte, Mont. Filed Aug. 30, 1917, Serial No. 188,889. Renewed Jan. 23, 1920. Serial No. 353,589. 4 Claims. (Cl. 266—24.)

1. The within described method of feeding ores into a reverberatory furnace consisting in dropping the same upon the hearth in such a manner as to provide piles or mounds at frequent intervals.



1,351,836. BUOYANT LIFE-SAVING FITTING AND APPLIANCE FOR SHIPS. PATRICK CHURCHILL, Manchester, England. Filed Oct. 25, 1919, Serial No. 333,294. Divided and this application filed Apr. 8, 1920. Serial No. 372,241. 3 Claims. (Cl. 114—77.)

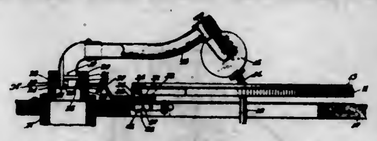
1. A buoyant life saving fitting and appliance for ships, comprising a series of frames secured to the inside of the



deck cabin or room, two screw-threaded spindles horizontally mounted above each other in said frames, a gear rotatably connecting together said spindles, a bracket secured to the ship deck adjacent to the bulwarks, a pocket in the top and a socket in the bottom of said brackets, a plate on the front end of said top spindle adapted to engage in said pocket and the front end of said bottom spindle engaging in said socket, for the purpose specified.

1,351,837. AUTO-BUMPER. LOUIS COHEN, Johnstown, N. Y. Filed May 18, 1920. Serial No. 382,240. 3 Claims. (Cl. 293—55.)

2. A bumper including a body portion, said body portion including a front wall and spaced bottom and top walls, end sections pivotally connected to the body portion, guide members carried by the end sections and adapted to contact with the top and bottom walls of the body portion for securing the end sections in alinement, and means carried by the body portion for moving the end sections in one direction.

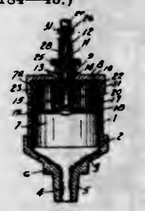


1,351,838. LOCK. BENJAMIN J. COHON, Westwood, and LOUIS MOSKOWITZ, Bayonne, N. J. Filed May 8, 1916. Serial No. 96,105. 12 Claims. (Cl. 70—46.)

1. The combination of an element having a locking projection, means for actuating said element to enable it to be moved translationally in one direction, means for controlling said element to enable it to be moved translationally in another direction, and means for supporting said element, said actuating means and said controlling means in operative relation; said element, said actuating means and said controlling means being so shaped that, upon the positions of the element, the actuating means and the controlling means being changed with respect to said supporting means, said element can be moved in a direction opposite to the one direction when the actuating means is operated, and in the same direction as the other direction when the controlling means is operated.

1,351,839. AUTOMATIC STOP MECHANISM FOR TALKING-MACHINES. EDWARD T. CONDON, Jr., New York, N. Y. Filed Oct. 17, 1916. Serial No. 126,070. 9 Claims. (Cl. 74—46.)

1. Automatic stop mechanism for talking machines, comprising: the tone arm of the machine, and a base in which the same is mounted; a collar within said base, rotatable with the tone arm and provided with an open-

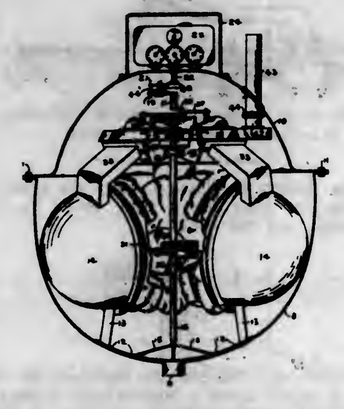


ing; and brake actuating mechanism including means adapted to engage said opening of the collar.

1,351,840. NOZZLE. FRANK CRAIGIE and JOHN HINDS, Chicago, Ill. Filed May 3, 1919. Serial No. 294,540. 4 Claims. (Cl. 299—114.)

1. In a device of the character described, the combination of a nozzle having a tapering axial passage therethrough, said nozzle including a head plate, a plate having a spiral cut-out secured to said head plate, and a nozzle cap in opposition to said head plate and secured thereto, said plate with the spiral cut-out being located on said head plate in a position in which one end of the spiral cut-out communicates with the discharge opening of the axial passage, while the other end of the spiral cut-out is in opposition to the central portion of the nozzle cap, said nozzle cap being provided in its central portion with a cavity and a discharge opening in said cavity.

1,351,841. GREASE-CUP. JAMES F. CRAVEN, Pittsburgh, Pa. Filed Mar. 31, 1917. Serial No. 158,895. 16 Claims. (Cl. 184—45.)



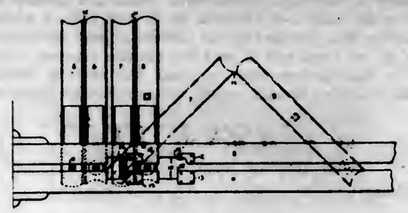
11. An automatic grease cup comprising a base member adapted to screw into a bearing to be lubricated, a casing adapted to screw into the base member and form a grease cup, a follower in the cup, a spring to drive the follower to expel the contents of the cup, a stem fixed on the follower and extending through a wall of the cup and making an air-tight fit therewith, an air passage through the stem, a valve controlling said air passage, means to adjust the valve and to lock it into adjusted position, and exterior means to withdraw the follower against pressure of the driving spring.

1,351,842. GAS-METER. ROBERT A. CULLETON and DANIEL J. LEAHY, Brooklyn, N. Y. Filed Aug. 11, 1916. Serial No. 114,343. 9 Claims. (Cl. 73—1.)

1. In a device of the character described, the combination, with a casing, of a supporting member mounted within the casing, a plurality of measuring units supported from said member, a shaft, means operatively connecting said measuring units with said shaft, said shaft being journaled in the supporting member, valves for regulating the in-flow and out-flow of gas into and from said measuring units, operative connecting means including a crank and connecting rods between said valves and said shaft, the said valves being supported upon the support-

ing member, a cover for said casing, registering mechanism carried by said cover and adapted to be actuated by said shaft, disconnectible operating means between said

shaft and said registering mechanism, the entire mechanism within the casing being removable as a unit from the interior thereof after removal of said cover.

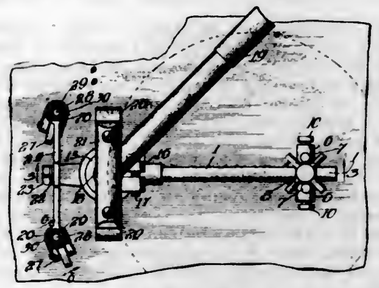


1,351,843. SHOCK-ABSORBER. ANDREW C. DUNN, Minneapolis, Minn. Filed Sept. 12, 1917, Serial No. 190,932. Renewed Jan. 15, 1920. Serial No. 351,560. 8 Claims. (Cl. 267—65.)

1. The combination with a vehicle body and axle, of a double acting pneumatic cushioning device comprising a pair of cylinders each carrying a piston working in the opposite cylinder and dividing the cylinders into two cushioning chambers and an intermediate rebound checking chamber each of said chambers being directly connected with the outer atmosphere by a duct.

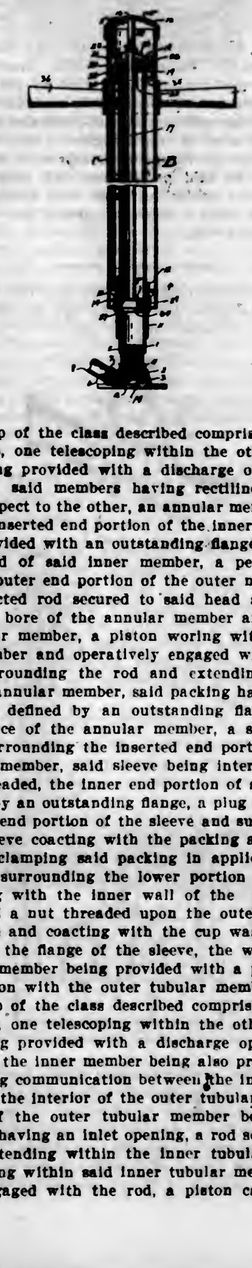
1,351,844. LOCK FOR FOLDING PARTITIONS. JOHN THOS. FAIRHURST, Elizabeth, N. J. Filed Dec. 27, 1919. Serial No. 347,855. 1 Claim. (Cl. 20—20.)

In combination with the top and guide of a folding partition, a guide member substantially parallel with a section of said partition and guide plates along the guide of said partition, one of said plates on one side of said partition guide being cut away at one corner and the other of said plates forming a shoulder to prevent the movement



of said top guide until said top guide has swung around through the opening in the other of said guide plates.

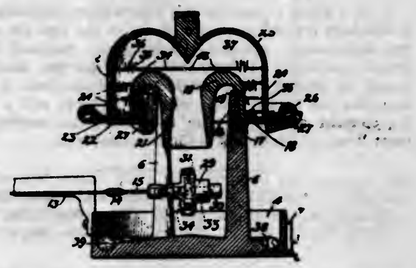
1,351,845. ANCHORING DEVICE. LEWIN BENJAMIN FISH, East Orange, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Mar. 28, 1918. Serial No. 225,267. 3 Claims. (Cl. 189—90.)



3. In an anchoring device the combination of a rod and a ring integrally connected therewith adapted to provide a continuous bearing surface for a guy, the radius of curvature of a cross section of the ring through said bearing surface being greater than the radius of curvature of any other cross section of said ring.

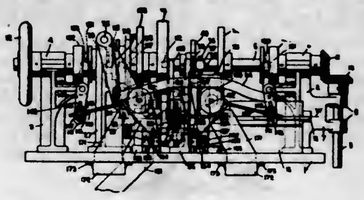
1,351,846. CIRCLE-GUIDE FOR OXYACETYLENE-TORCHES. HARRY J. FORSTER, Chicago, Ill. Filed Aug. 11, 1919. Serial No. 316,823. 14 Claims. (Cl. 266—23.)

9. A circle guide for torches comprising a carriage equipped with three supporting elements, two of the latter being rotatable relatively to the carriage for promoting ease of travel and the other constituting the center-point about which the carriage is adapted to rotate, a bearing in said carriage disposed within the area of a triangle of which said supports form the corners, a torch-nozzle engaging element mounted to rotate in said bearing, and a handle rigid with the latter for rotating the carriage about its axis and at the same time rotating said nozzle engaging element relatively to said carriage, pintles carrying said rotatable supports rotatably engaged with said carriage for permitting said rotatable elements to adjust themselves to travel in circles of different diameters, and means associated with the carriage and said pintles for firmly holding the latter against rotation relatively to said carriage.



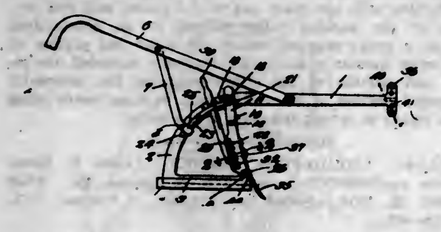
1,351,847. AIR-PUMP. JACOB G. GERHART, Fredericksburg, Pa. Filed Nov. 14, 1919. Serial No. 337,924. 4 Claims. (Cl. 230—27.)

1. A pump of the class described comprising two tubular members, one telescoping within the other, the inner member being provided with a discharge opening at one end portion, said members having rectilinear movement one with respect to the other, an annular member arranged within the inserted end portion of the inner tubular member and provided with an outstanding flange engaging the adjacent end of said inner member, a perforated head closing the outer end portion of the outer member, an inwardly directed rod secured to said head and extending through the bore of the annular member and within the inner tubular member, a piston woring within the inner tubular member and operatively engaged with the rod, a packing surrounding the rod and extending within the bore of the annular member, said packing having its outer end portion defined by an outstanding flange overlying the outer face of the annular member, a sleeve engaged with and surrounding the inserted end portion of the inner tubular member, said sleeve being internally and externally threaded, the inner end portion of said sleeve being defined by an outstanding flange, a plug engaged within the outer end portion of the sleeve and surrounding the rod, said sleeve coacting with the packing and the flange thereof for clamping said packing in applied position, a cup washer surrounding the lower portion of the sleeve and coacting with the inner wall of the outer tubular member, and a nut threaded upon the outer end portion of the sleeve and coacting with the cup washer to clamp the same to the flange of the sleeve, the wall of the inner tubular member being provided with a port affording communication with the outer tubular member.



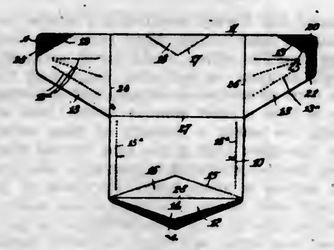
3. A pump of the class described comprising two tubular members, one telescoping within the other, the inner member being provided with a discharge opening at one end portion, the inner member being also provided with a port affording communication between the interior of said member and the interior of the outer tubular member, the outer end of the outer tubular member being provided with a head having an inlet opening, a rod secured to said head and extending within the inner tubular member, a piston working within said inner tubular member and operatively engaged with the rod, a piston carried by the inserted end portion of the inner tubular member and coacting with the outer tubular member, a sleeve mounted upon the inner tubular member, a packing sleeve surrounding the inner tubular member and having one end portion contacting with the inner end of the sleeve, said end portion of the packing being defined by an outstanding flange, a collar engaged within the inner end portion of the outer tubular member and internally threaded, the inner end portion of the sleeve engaging the internally threaded portion of the collar, said packing sleeve being of a length to extend inwardly of the collar.

1,351,848. LIQUID-FUEL BURNER. JAMES D. GOODWIN and GROVER C. GOODWIN, Richmond, Va. Filed Oct. 25, 1918. Serial No. 259,665. 2 Claims. (Cl. 158—69.)



1. A liquid fuel burner comprising a tubular base portion having its inner surface flared outwardly toward the lower end and the upper walls flared outwardly then downwardly to form an encircling outer wall then outwardly to form an annualr horizontal bottom partition and upwardly to form a short annular vertical wall or flange surrounding the whole, a plurality of rings arranged to rest upon the upper edge of the said vertical flange portion, a cap member arranged to rest upon the uppermost ring and inclose a space above the lines of juncture between said cover member, rings and base member, spacing means carried by said rings arranged to space them apart from each other and from the cover member and base member to form jet openings or slots therebetween, a vapor generating pipe surrounding the base member and supporting brackets therefor carried by the base member and arranged to hold the generating pipe in the plane of the jet openings between the bottom ring and the vertical flange portion of the base member, and a nozzle connected with said generator pipe and arranged to direct a jet of vapor through the said tubular portion of the base member into the space inclosed by said cover member.

1,351,849. PIN-POINTING MACHINE. HERMAN HEINE, Brooklyn, N. Y., assignor to A. Kimball Company, New York, N. Y., a Corporation of New York. Filed Apr. 12, 1917. Serial No. 161,468. 21 Claims. (Cl. 163—6.)

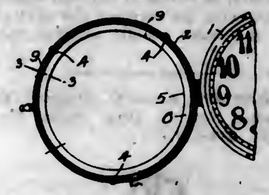


1. A machine for pointing articles comprising means for receiving and rotating said articles, a cylindrical cutter, means for rotating the same, means for moving said cutter in the direction of the axis of said receiving means and means for reciprocating said receiving means in the direction of the axis of said cylindrical cutter to cause the end of the article to traverse across the surface of said cutter.

1,351,850. PLOW. WILLIAM T. HERNDON, Parkton, N. C. Filed Jan. 15, 1920. Serial No. 351,529. 6 Claims. (Cl. 97—26.)

1. In a plow, a beam having a forwardly extended foot; a standard pivoted at its lower end to the foot for swinging adjustment; means for holding the standard in adjusted positions; a lever fulcrumed on the standard; means for holding the lever in adjusted positions; a share engaging the forward edge of the standard; and a securing element connected with the share, the securing element being pivotally engaged with the lever.

1,351,851. SAFETY-ENVELOP BLANK. MORTIMER L. HINCHMAN, Brooklyn, N. Y. Filed Sept. 16, 1919. Serial No. 324,064. 3 Claims. (Cl. 229—81.)

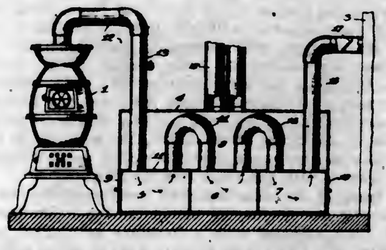


1. A blank from which an envelop is formed, including front and back folds, a seal flap forming part of said front fold having a marginal gummed portion, a partly severed portion embodied by the front fold and seal flap, side flaps forming a part of said back fold, gummed areas on the side flaps, partly severed gummed portions in the side flaps, and a partly severed portion in the back fold to which the partly severed gummed portions in the side flaps are pasted.

1,351,852. AEROPLANE CONSTRUCTION. HARRIS G. HOOPER, San Francisco, Calif. Original application filed Aug. 28, 1917, Serial No. 188,623. Divided and this application filed Sept. 13, 1918. Serial No. 253,875. 8 Claims. (Cl. 244—31.)

1. In improvements of the character disclosed, means for producing sustentation of atmospheric re-action comprising spaced upper and lower walls, a strut connected with one of said walls, and means for connecting said strut, comprising an arched plate joined at its edges with said wall by a lap joint and upon which said strut rests.

1,351,853. SASH FOR DIALS. CHARLES H. HYDE, Winsted, Conn., assignor to William L. Gilbert Clock Company, Winsted, Conn., a Corporation of Connecticut. Filed Nov. 4, 1919. Serial No. 335,722. 3 Claims. (Cl. 58—58.)

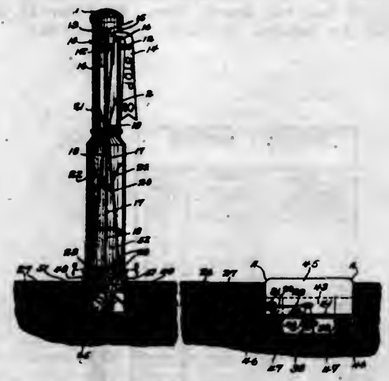


1. In a sash for clock dials and the like, the combination of an inwardly flanged outer sash frame having a plurality of inward projections carried by the rim thereof, a glass in said frame, a holding ring within said frame and having a flange adjacent to said glass and a peripheral portion approximately at right angles to said flange, said peripheral portion having upon its rear edge inclined surfaces adjacent to said projections and adapted to cooperate with said projection when said internal ring is turned so as to engage said projections and clamp said glass in said outer ring.

1,351,854. WATER-CLOSET VENTILATOR. ERNST F. KLEMME, Milwaukee, Wis. Filed Apr. 24, 1918. Serial No. 230,561. 1 Claim. (Cl. 4—21.)

In the water closet ventilator, the combination of a flushing pipe, a vent connector having communication therewith and having a valve seat surrounding it, a valve member normally pivotally mounted in the flushing pipe and fitting on the valve seat and adapted to be closed by the flow of water through the flushing pipe, said valve having a curved blade projecting from the outer face thereof, and a counterweight on the valve member for holding it open.

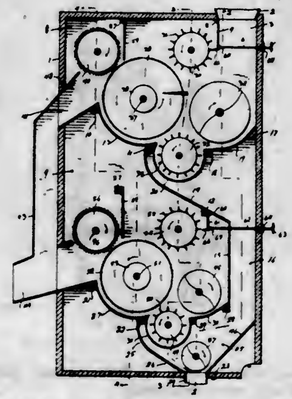
1,351,855. FUEL-SAVER. JUAN FERNANDEZ KNOCK, Lewistown, Ill. Filed Aug. 8, 1918. Serial No. 248,986. 1 Claim. (Cl. 257—166.)



In a fuel saver, the combination with a heating unit, of a main casing, a supplemental casing interior to the main casing and divided into a plurality of compartments, tubular connections between the compartments of the supplemental casing, a tubular connection between the heating unit and one of the compartments of the supplemental casing, another of the compartments of the supplemental casing having means for connection to a smoke stack, certain of the tubular connections and portions of the others being inclosed within the main casing, and tubular members communicating with the main casing for the purpose specified.

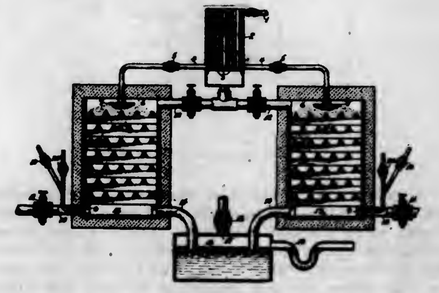
1,351,856. METHOD OF MANUFACTURING TIRES. HENRY M. LAMBERT, Portland, Oreg. Filed Feb. 19, 1919, Serial No. 278,017. Renewed July 16, 1920. Serial No. 396,877. 6 Claims. (Cl. 154—12.)

1. The method of manufacturing cushion tires which comprises the following steps: first, building up a base structure including a non-stretchable belt, the latter being formed by winding alternate layers of cord, stretched to its approximate maximum limit of elongation while being laid, and cushion gum; second, forming a cushion element over the base structure by placing a band of cushion gum over said belt, then placing a series of rubber blocks transversely on the cushion gum layer while holding adjacent blocks separated by core elements having fixed cross sections, and placing another layer of cushion gum over the blocks and core elements; third, forming a second non-stretchable belt around said cushion gum element while constricting the same in a direction toward the axis of the tire; fourth, building up another structure around the outermost belt structure, said other structure including a tread section; fifth, applying a compacting pressure to the mass to compact the same and vulcanizing the mass while under pressure.



1,351,857. TRAFFIC-SIGNAL. LESTER ALFRED LAWHEAD, St. Joseph, Mo. Filed Apr. 9, 1920. Serial No. 372,608. 5 Claims. (Cl. 116—67.)

1. A signal, comprising a signal post, a plurality of signal arms secured thereto, a plurality of treads connected with each of said signal arms and each of said treads arranged in spaced relation to each other on opposite sides of the signal post and adapted to move said signal arms.

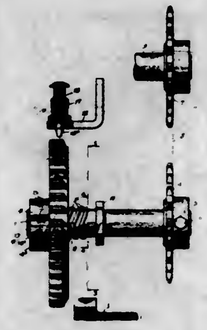


1,351,858. COTTON-BOLL-CLEANING MACHINE. ALLEN T. LOKEY, Memphis, Tex. Filed May 14, 1919. Serial No. 296,973. 5 Claims. (Cl. 19—9.)

1. In a cotton cleaning machine, the combination with a casing having a boll chamber, of a cotton cleaning mechanism in said chamber comprising a conveying screw and cotton gathering saws operative in parallel planes on an axis parallel with the screw, a knocker roll offset above and between the screw and the saws and provided with longitudinally extending spaced flanges adapted to knock the bolls back upon the feed screw, and a hinged combined

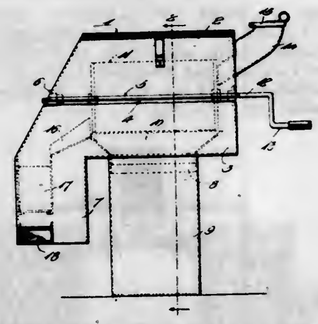
deflector and guard plate adjustable to approximate the longitudinal edges of the knocker flanges of the knocker roll to assist in knocking the bolls back toward and upon the conveyer.

1,351,859. PROCESS OF CRACKING PETROLEUM. LEON P. LOWE, San Francisco, and FREDERICK C. RUFF, Los Angeles, Calif., assignors to By-Products Manufacturing Company, San Francisco, Calif., a Corporation of California. Filed Jan. 15, 1917. Serial No. 142,560. 2 Claims. (Cl. 196—25.)



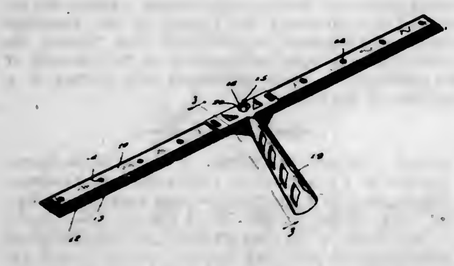
1. The process of cracking petroleum, which consists in passing products of combustion through a cracking chamber and into contact with openwork material therein to raise the temperature of said material above that at which petroleum is cracked with a production of carbon and condensible hydrocarbons, but less than that to which it is heated in the generation of gas from petroleum, then passing petroleum therethrough, thereby cracking the petroleum, then arresting the passage of the petroleum through the openwork material, and then burning the carbon deposited upon said surface by the cracking of the petroleum, to assist in heating said surface in a repetition of the process.

1,351,860. ENGINE-STARTER. WILLIAM L. MCGRATH, Elmira, N. Y., assignor to Eclipse Machine Company, Elmira, N. Y., a Corporation of New York. Filed Mar. 20, 1919. Serial No. 283,777. 8 Claims. (Cl. 74—7.)



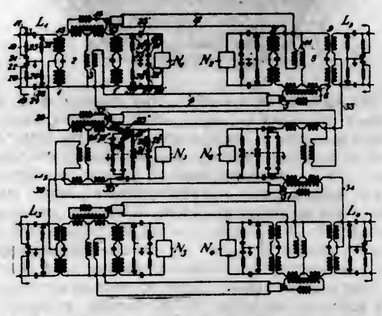
1. In a device of the class described, the combination of a rotatable shaft, a driving member mounted thereon for longitudinal movement thereof and rotary movement therewith, and means for yieldingly holding such member in normal position on the shaft but permitting a limited free

rotary movement thereon such means comprising a projection on the shaft and a spring anchored at one end to



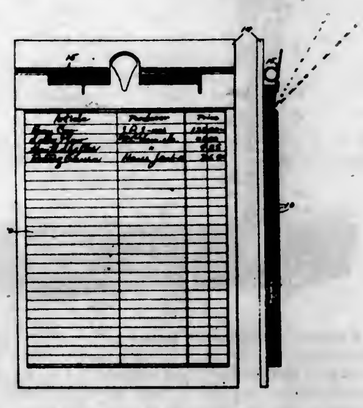
the driving member with its intermediate portion arched to extend over such projection.

1,351,861. ASH, CINDER, AND COAL SEPARATOR. ELITH C. MADSEN, Hazleton, Pa. Filed Aug. 19, 1918. Serial No. 250,532. 2 Claims. (Cl. 83—60.)



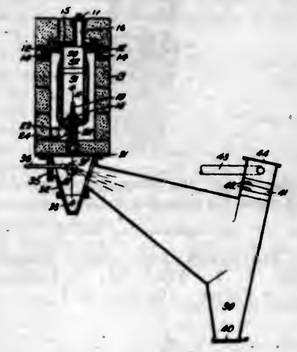
1. In a device of the class described, a casing having an inlet to receive ashes, cinders and unburned coal, said casing being provided with three outlets, means in said casing for separating the ashes from the coal and cinders and directing such ashes to one of said outlets, and means in said casing for then separating the coal and cinders and directing them to the other outlets respectively.

1,351,862. SQUEEGEE. JOHN H. MENKHAUS, Cincinnati, Ohio. Filed Mar. 22, 1920. Serial No. 367,700. 2 Claims. (Cl. 15—59.)



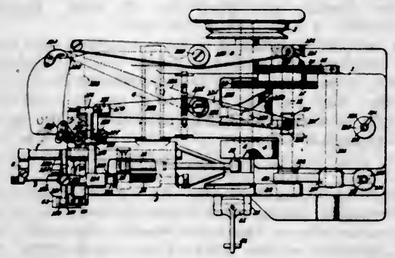
1. A squeegee comprising a handle member having a laterally extended bead provided with a slot open at one end, and having members for interlocking engagement with the squeegee member; and a squeegee member comprising a metal plate carrying a threaded bolt for entry in said slot, a nut on the bolt for clamping engagement with the handle member, and a rubber strip laterally extended beyond both edges of said metal plate.

1,351,863. TELEPHONE-REPEATER. JOHN MILLS, Wyoming, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Jan. 15, 1917. Serial No. 142,486. 6 Claims. (Cl. 179—170.)



1. In a signaling system, two transmission line sections, two artificial lines individually associated with said line sections, translating apparatus, means to associate said translating apparatus with said transmission lines and said artificial lines, auxiliary apparatus associated with a line section and means electrically equivalent to said auxiliary apparatus similarly associated with the corresponding artificial line in order to balance the auxiliary apparatus with respect to the translating apparatus.

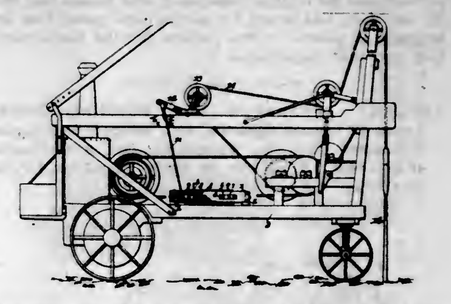
1,351,864. ACCOUNTING AND RECORD DEVICE. GUSTAVE W. MOELLER, Harris, Iowa. Filed Nov. 14, 1918. Serial No. 262,501. 1 Claim. (Cl. 282—25.)



An accounting and record device, comprising a collocation of envelops each having indicia on its face suitably arranged to receive entries and memoranda, each envelop containing a carbon sheet, second sheet and backing sheet, said insert sheets being substantially shorter than the envelop, a holding device engaging the collocation of envelops at those portions not occupied by the insert sheets, whereby the envelops, relatively stiff in their main portions, are free to flex on transverse lines between said holding device and the insert sheets.

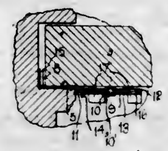
1,351,865. PROCESS FOR THE MANUFACTURE OF MAGNESIUM POWDER. DAVID S. NICOL, Montreal, Quebec, Canada, assignor to Shawinigan Electro-Metals Company, Limited, Montreal, Quebec, Canada. Filed July 23, 1917. Serial No. 182,265. 4 Claims. (Cl. 75—197.)

3. A process for the production of magnesium powder which comprises melting the magnesium in an atmosphere of a gas which will not combine with the magnesium at high temperatures and high pressures, and discharging the molten magnesium into a nitrogen atmosphere and into a nitrogen jet by which the molten metallic stream is disintegrated into fine particles.



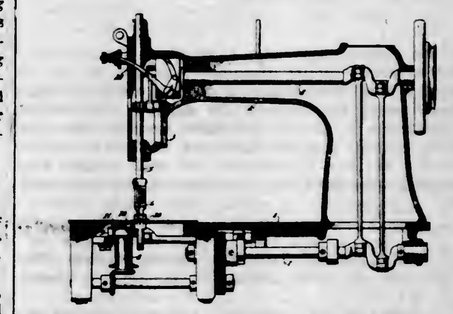
1,351,866. SEWING-MACHINE. DONALD NOBLE, Bridgeport, Conn., assignor to The Singer Manufacturing Company, a Corporation of New Jersey. Filed Aug. 11, 1916. Serial No. 114,333. 9 Claims. (Cl. 112—178.)

1. In a sewing machine, the combination with a stitch-forming mechanism including a needle, a needle carrying bar and means for operating said mechanism, of means for presenting the fabric to the action of said stitch-forming mechanism including a fabric bender, an under feeding mechanism comprising a feeding member having feed movements intersecting the path of needle movement, and an upper feeding mechanism including a feeding member coöperating with said under feeding member at the seam-finished side of the needle only.



1,351,867. COMPENSATING APPARATUS FOR WELL-DIGGING OUTFITS. OLIVER E. OAKES, Asbury, Mo. Filed Jan. 9, 1919. Serial No. 270,341. 5 Claims. (Cl. 255—11.)

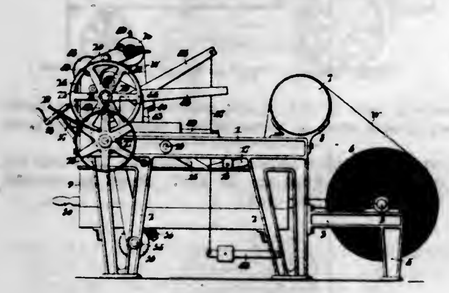
1. A compensating apparatus for well digging machines, comprising a fixed frame, movable frames guided in said frame, resilient connections respectively between the movable frames and between the movable frames and the fixed frame, and a flexible connection reaching from one movable frame to the other and finally to a movable cable-



receiving part of the digging machine, to impart resiliency to said cable by virtue of said resilient connections.

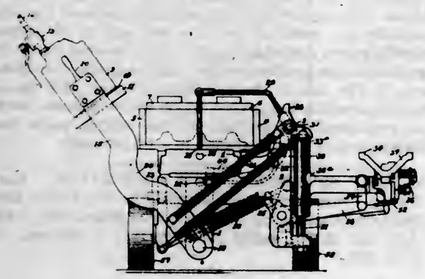
1,351,868. SASH-FASTENER. MAYNARD E. PENQUITE, Colfax, Iowa. Filed Apr. 25, 1917. Serial No. 164,455. 1 Claim. (Cl. 292—140.)

A sash fastener comprising a flat body plate formed at one end with spaced legs, the extremities of the legs being angularly bent to form lugs, the central portion of the body having an elongated boss, a locking plate disposed upon said body and provided in one end portion with a longitudinally extending slot slidably engaging the sides of the boss, the lower surface of said end portion being engaged with the portion of the body surrounding the base of the boss, the other end portion of said locking plate having its lower surface positioned for engagement with a support or sash, the extremity of the last mentioned end portion being formed with an angularly disposed lug, and a rotatable cam mounted upon the boss and in all positions extending over and engaging the upper surface of the first mentioned end portion of the locking plate, the locking plate at the end of the slot being formed with an outwardly extending lug against which the cam bears, the second mentioned end portion of the locking plate being slidable flush with the spaced legs of the body.



1,351,869. SEWING-MACHINE LOOP-TAKER. RALPH PETTI, Bridgeport, Conn., assignor to The Singer Manufacturing Company, a Corporation of New Jersey. Filed Apr. 24, 1918. Serial No. 230,407. 7 Claims. (Cl. 112—231.)

1. In a sewing machine, a stitch-forming mechanism including a reciprocating needle, a loop-taker, a thread-



case mounted in said loop-taker and around which said loop-taker is adapted to cast a loop of needle-thread, a stop-element for limiting rotation of said thread-case upon its own axis, and means for moving said thread-case axis laterally to provide a free passage for the needle-thread loop past said stop-element.

1,351,870. APPARATUS FOR FORMING TUBES. JAMES F. PIERCE, Glynrich, Del., assignor to American Vulcanized Fibre Co., Wilmington, Del., a Corporation of Delaware. Filed Mar. 30, 1917. Serial No. 158,769. 18 Claims. (Cl. 93—81.)

2. In an apparatus for forming tubes, the combination of means for supplying a web of material; a mandrel; means for guiding the web to the mandrel; a pair of yielding rolls coöperating with said mandrel for winding the web thereon; and means for simultaneously moving said rolls into and out of position for coöperating with the mandrel.

1,351,871. MOLDING-MACHINE. EDWARD A. PRIDMORE, La Grange, Ill. Filed July 9, 1909, Serial No. 506,715. Renewed Nov. 4, 1918. Serial No. 261,160. 15 Claims. (Cl. 22—33.)

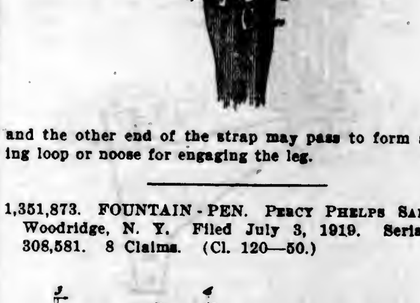
1. The combination with a molding machine of a frame, a pattern carrier connected therewith, adapted to support a flask and pattern, a movable frame pivotally connected with the frame of the machine, a projection on said frame, a cylinder and piston mounted upon said movable frame, a stop on the molding machine frame, the projection and stop arranged so that when brought into engagement the piston and cylinder are directly over said flask.

1,351,872. GARTER. PAUL EMIL ROSEN, Madison, Wis. Filed Dec. 15, 1919. Serial No. 344,888. 2 Claims. (Cl. 241—6.)

1. A hose supporter comprising a strap of flexible material having laterally enlarged portions near its ends and having hose-engaging clasps at its ends, each enlargement having an opening through which the hose engaging clasp

and the other end of the strap may pass to form a sliding loop or noose for engaging the leg.

1,351,873. FOUNTAIN-PEN. PERCY PHELPS SANFORD, Woodridge, N. Y. Filed July 3, 1919. Serial No. 308,581. 8 Claims. (Cl. 120—50.)



1. A fountain pen having, in combination, a tubular reservoir, a feed holder secured in one end of said reservoir, a pen secured in said holder, a hollow feed tube mounted in said holder having a lateral opening in its end adjacent said pen, and a feed strip passing through said tube and arranged to make a point contact with said pen in the area opposite said lateral opening, said strip forming two distinct passages through said tube.

1,351,874. CEMENT COMPOSITION. JACOB J. SCHALLER, Chicago, Ill. Filed Feb. 13, 1920. Serial No. 358,387. 1 Claim. (Cl. 106—38.)

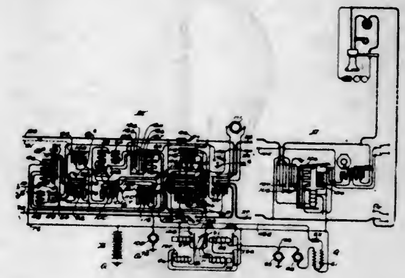
A composition adapted to form a light weight cement for finely cut and ground vegetable material, comprising twenty pounds of casein, from twenty to thirty pounds of lime, from two and one half to one and one quarter pounds of caustic soda, and from five to two and one half pounds of borax.

1,351,875. COUPLING FOR RAILWAY-TRAIN PIPES. EDWARD A. SCHREIBER, Chicago, Ill., assignor, by mesne assignments, to Vapor Car Heating Company, Inc., a Corporation of New York. Filed Oct. 5, 1914. Serial No. 865,161. 17 Claims. (Cl. 285—7.)

1. In a railway train pipe, the combination with the train pipe section carried by a car of the train, of a

coupling for the same including a coupler head adapted to engage the coupling member carried by the adjacent car of the train, and a jointed structure connecting the coupler head with the train pipe section comprising a metal tubular element, a gimbal joint uniting said train pipe and tubular element, and a second gimbal joint between the other end of the tubular element and the coupler head; each joint having a tubular, metallic, flexible, corrugated diaphragm providing a steam port therethrough.

2. In a railway train pipe, the combination with the train pipe section carried by a car of the train, of a coupling for the same including a coupler head of the gravity type adapted to engage the coupling member carried by the adjacent car of the train, and a jointed structure connecting the coupler head with the train pipe section comprising a substantially straight metal, tubular element, a gimbal joint uniting said train pipe and tubular element, a second gimbal joint at the other end of the tubular element, and an elbow pipe between said joint and coupler-head; each joint having a tubular, metallic, flexible, corrugated diaphragm providing a steam port therethrough.



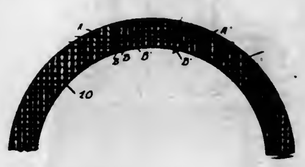
3. In a railway train pipe, the combination with the train pipe section carried by a car of the train, of a coupling for the same including a coupler head adapted to engage the coupling member carried by the adjacent car of the train, and a jointed structure connecting the coupler head with the train pipe section comprising a metal tubular element, a gimbal joint uniting said train pipe and tubular element, and a second gimbal joint between the other end of the tubular element and the coupler head; each joint having flexible, metallic means providing a passage-way for a fluid under pressure through said joint.

4. In a railway train pipe, the combination with the train pipe section carried by a car of the train, of a coupling for the same including a coupler head adapted to engage the coupling member carried by the adjacent car of the train, and a jointed structure connecting the coupler head with the train pipe section comprising a metal tubular element, a gimbal joint uniting said train pipe and tubular element, and a second gimbal joint between the other end of the tubular element and the coupler head; and flexible, metallic conduit members providing a passageway for a fluid through the joint, each joint being provided with a pair of substantially hemispherical casing members which inclose said conduit members.

5. In a railway train pipe, the combination with the train pipe section carried by a car of the train, of a coupling for the same including a coupler head of the gravity type adapted to engage the coupling member carried by the adjacent car of the train, and a jointed structure connecting the coupler head with the train pipe section comprising a metal tubular element, a universal joint uniting said train pipe and tubular element, and a second universal joint between the other end of the tubular element and the coupler head; each joint being made up of a pair of yokes arranged at right angles to each other formed with casing members, one fitting and movable within the other, an annular member to which said yokes are pivoted, and flexible means providing a fluid passageway through said joint.

1,351,876. SEMI-AUTOMATIC TELEPHONE SYSTEM. MICHAEL SCHWARTZ, Chicago, Ill., assignor to Automatic Electric Company, Chicago, Ill., a Corporation of Illinois. Filed May 22, 1913. Serial No. 769,284. 32 Claims. (Cl. 179—27.)

30. In a telephone system, an operator's cord circuit comprising a pair of talking conductors, a signal, a relay for controlling said signal, said relay having two windings serially connected in bridge of said talking conductors, a second relay and a signal controlled thereby, and

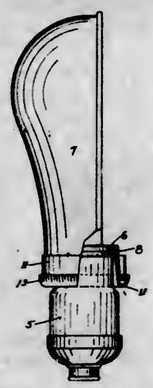


means controlled by said second relay for short-circuiting one of the windings of said first relay.

1,351,877. METHOD OF SEPARATING NICKEL AND COPPER FROM COPPER-NICKEL MATTES OR MATERIALS. ROBERT C. STANLEY, New Brighton, N. Y., assignor to The International Nickel Company, New York, N. Y., a Corporation of New Jersey. Filed Feb. 5, 1919. Serial No. 275,239. 38 Claims. (Cl. 204—57.)

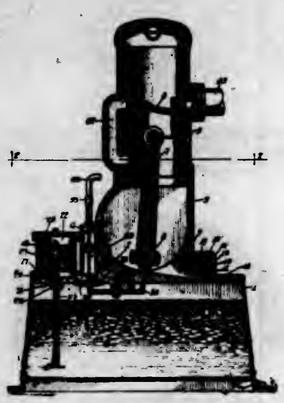
3. In the separation of nickel and copper from mattes or materials containing them, the steps of partially separating the copper material from the nickel material by furnace treatment, converting the nickel material into impure metallic nickel containing a material proportion of copper, and then recovering metallic nickel therefrom by electrolytic treatment.

1,351,878. DRAIN-TILE. HALVER R. STRAIGHT, Adel, Iowa. Filed Oct. 14, 1918. Serial No. 258,075. 4 Claims. (Cl. 61—10.)



1. A drain tile having in each end a series of grooves, said grooves extending from the exterior of the tile toward the interior thereof, the grooves at the opposite ends of the tile being arranged on different lines tangentially of the periphery of the tile, so that when the non-corresponding ends of two tiles are placed together the said grooves will not register.

1,351,879. SHADE-HOLDER FOR ELECTRIC-LIGHT BULBS. WILLIAM E. SURFACE, Decatur, Ill., assignor to Farlee Manufacturing Co., Decatur, Ill., a Corporation of Illinois. Filed Jan. 27, 1916. Serial No. 74,544. 5 Claims. (Cl. 240—110.)

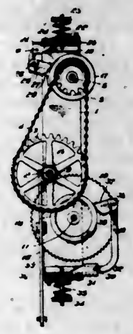


1. The combination with an electric light socket of a tapered split ferrule having a circumferential groove formed therein, adapted to surround the annular rib on the socket, there being inclined slots in said ferrule, one edge of each slot being provided with a plurality of ratchet teeth, a ferrule, the internal walls of which are tapered to coincide with the external walls of the split ferrule having two inwardly projecting lugs adapted to engage

the said teeth, said slots being wide enough to permit the release of said lugs from engagement with the said teeth,

the tendency to push off the tapered ferrule operating to hold the lugs in engagement.

1,351,880. INTERNAL-COMBUSTION ENGINE. HERBERT L. THOMPSON, Elgin, Ill., assignor to The Maytag Company, Newton, Iowa, a Corporation of Iowa. Filed Apr. 27, 1916. Serial No. 93,854. 11 Claims. (Cl. 123—30.)

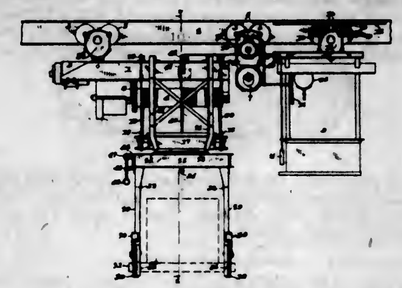


1. In an internal combustion engine a fuel supply, a compression chamber, means to draw air to said chamber and to charge said air with finely divided fuel in its passage to the compression chamber, and manually operable means for causing said air to bubble through said fuel in passage to the compression chamber.

1,351,881. AUTOMATIC DRAG FOR PLAYER-PIANO TRANSMISSIONS. WILLIAM T. WAITE, Kansas City, Mo. Filed Dec. 11, 1916. Serial No. 136,196. Renewed Mar. 15, 1920. Serial No. 366,037. 8 Claims. (Cl. 84—166.)

1. In a transmission for player pianos, the combination of a pair of shafts adapted to support the ends of record spools, means for alternately driving one of said shafts while the other rotates idly, friction disks on said shafts, and independent means constantly engaging said disks and automatically operative to retard the idly rotating shaft.

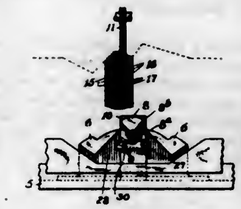
2. In a transmission for player pianos, the combination of a pair of shafts adapted to support the ends of record spools, means for alternately driving one of said shafts while the other rotates idly, friction disks on said shafts, means constantly engaging said disks and automatically operative to retard the idly rotating shaft, and means for independently varying the retarding effect of the retarding means.



3. In a transmission for player pianos, the combination of a pair of shafts adapted to support the ends of record spools, means for automatically driving one of said shafts while the other rotates idly, friction disks on said shafts, independent brakes constantly and yieldingly engaging said disks and automatically operative to retard the idly rotating shaft, and means for independently varying the retarding effect of said brakes.

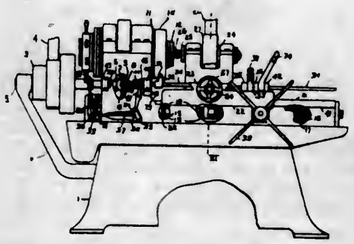
4. In a transmission for player pianos, the combination of a pair of shafts adapted to support the ends of record spools, means for selectively driving one of said shafts, the other being adapted to rotate idly, a disk secured to each shaft, a lever pivoted adjacent each of said disks, a brake-shoe pivotally supported on each lever and automatically operative to retard said idly rotating shaft by engagement with the disk thereon, springs operatively connected to said levers to maintain the operative brake-shoe in resilient engagement with its coöperating disk, and adjustable stops arranged in the path of movement of said levers.

5. In a transmission for player pianos, the combination of a frame, a pair of shafts journaled in said frame and adapted to support the ends of record spools, means for selectively driving one of said shafts, the other being adapted to rotate idly, a disk secured to each shaft, a bell-crank lever pivotally supported by said frame adjacent each of said disks, a brake shoe pivoted on one arm of each of said levers and automatically operative to retard said idly rotating shaft by engagement with the disk thereon, hooks secured to the other arms of said bell-crank levers and having shanks extending through openings in said frame, nuts threadedly mounted on said shanks, and springs mounted between said nuts and frame.



1,351,882. HOISTING AND CONVEYING APPARATUS. HENRY WEICKEL, Milwaukee, Wis., assignor to Pawling and Harnischfeger Company, Milwaukee, Wis., a Corporation of Wisconsin. Original application filed July 17, 1913, Serial No. 779,442. Divided and this application filed June 3, 1918. Serial No. 237,843. 3 Claims. (Cl. 212—127.)

1. In hoisting and conveying apparatus the combination of a trolley adapted to be suspended from and to travel on an elevated monorail track and provided on opposite sides of and parallel with its longitudinal center and equidistant from the track with two hoisting drums, a motor connected with said drums and adapted to rotate them simultaneously in opposite directions at the same speed, and prevent independent rotation thereof, and a lifting frame provided with two pairs of sheaves and suspended on opposite sides of its longitudinal center and adjacent its ends from the trolley by four cables passing around said sheaves and attached at their ends to the

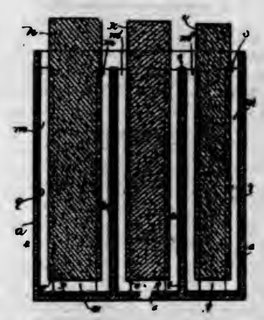


trolley frame and to said drums, the cables passing downward from the outer sides of the drums to the sheaves.

1,351,883. REINFORCING MECHANISM FOR CIRCULAR-KNITTING MACHINES. GEORGE S. WEINERTH, Reading, Pa. Filed July 16, 1919. Serial No. 311,155. 4 Claims. (Cl. 66—21.)

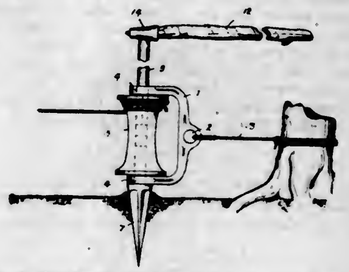
1. In a circular knitting machine, the combination with reinforcing thread mechanism, of series of long butt and short butt needles certain of the former having reduced-end butts, and means for operatively positioning said reduced-end long butt needles either with the short butt needles or with the other long-butt needles to vary the extent of the reinforced knitting.

1,351,884. AUTOMATIC MACHINE-TOOL. MILTON A. WERTMAN, Dayton, Ohio, assignor to The Biggs-Watterson Co., Cleveland, Ohio, a Corporation of Ohio. Filed July 8, 1918. Serial No. 243,884. 5 Claims. (Cl. 10—154.)



3. A machine tool including a tool holder, a work holder parallel thereto, rotatable driving means therefor, a rock shaft parallel to the axes of the holders, a trigger coacting with a rotary holder to trip the rock shaft, a feed device for one of the holders, and connecting means from the rock shaft to the feed device operable by the rock shaft for disconnecting the device from actuating the holder.

1,351,885. PROCESS OF PAINTING OBJECTS OF ART. JAMES A. WILLIAMS, Cincinnati, Ohio, assignor, by direct and mesne assignments, to Charles Mullis Manufacturing Company, Greensburg, Ind., a Corporation of Indiana. Filed Nov. 22, 1919. Serial No. 339,936. 3 Claims. (Cl. 91—68.)

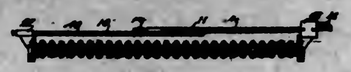


1. A process of painting an object which comprises applying a coat of paint to the object, applying a mixture of dry colors and pulverized polishing material to the coat before it becomes dry, drying the coat and polishing the object.

1,351,886. ELECTROLYTIC CELL. EDWARD A. ALLEN, Portland, Me. Filed Dec. 19, 1918. Serial No. 267,462. 17 Claims. (Cl. 204—5.)

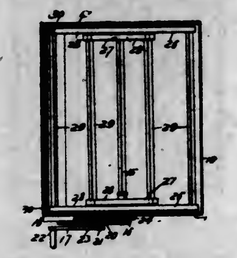
3. An electrolytic cell comprising a metallic casing forcing the cathode, an anode occupying the interior of said casing, an insulating plate on the bottom of the space within the casing which the anode occupies, and insulating means holding said anode out of contact with the surfaces of the casing.

1,351,887. PULLING-DRUM. CHRISTOPHER C. BAGNELL, Duluth, Minn., assignor to Mary H. Bagnell, Duluth, Minn. Filed Aug. 27, 1919. Serial No. 320,093. 3 Claims. (Cl. 254—150.)



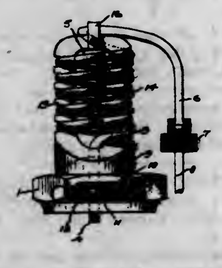
1. In a device of the character described a holding clevis, a drum rotatably mounted intermediate of the arms of the clevis, a shaft upon which the drum is mounted composed of two separate sections one of which being stationary and supporting the clevis and the other being rotatable and actuating the drum and means for rotating the last mentioned portion of the shaft.

1,351,888. METHOD FOR PRODUCING ASYMMETRIC CARBAMIDS. AXEL VIGGO BLOM, Berne, Switzerland. Filed Apr. 3, 1919. Serial No. 287,212. 4 Claims. (Cl. 23—24.)



1. The hereindescribed process for the production of asymmetric carbamids, which consists in causing amidonaphthoisulfacid and primary diamins of the aromatic series, containing two primary amido groups reacting with different velocities, to continuously commingle in molecular amounts at a temperature of about 40° Celsius with phosgen, and immediately neutralizing the muriatic acid split off during the reaction.

1,351,889. PROPORTIONAL SPACER. MICHAEL E. CONCANNON, Chicago, Ill. Filed Nov. 15, 1919. Serial No. 338,216. 4 Claims. (Cl. 33—192.)

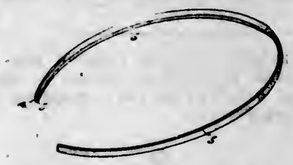


1. An instrument of the character described having in combination two bars overlapping and slidable longitudinally of each other; a head on one end of each bar; a pantograph structure having its terminal ends connected to the respective heads, and a punch guide carried by the pivoted joints of the pantograph structure.

1,351,890. MASHING AND MIXING MACHINE. ROAS C. COX and JOHN F. MCGINNITEY, St. Joseph, Mo. Filed Mar. 9, 1917, Serial No. 153,689. Renewed Feb. 26, 1920. Serial No. 361,412. 1 Claim. (Cl. 259—105.)

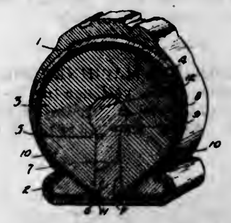
A device of the kind described comprising a container, a longitudinal element polygonal in cross section and mounted for rotary movement in the container, a beater frame united with the element, a second beater frame between which and the first said beater frame and element there is relative passing movement, and means for rotating the element and its attendant beater frame, both beater frames having longitudinal rails polygonal in cross section and paralleling the element and so disposed in their frame as to function their corners as cutting edges, the rails of the second said beater frame passing between the element and the rails of the first said beater frame, so that a substance being mashed will be cut by the rails of both frames and crushed between the corners of the element and the rails of the second beater frame.

1,351,891. CONDENSER FOR RADIATORS. JULIAN R. BRANDON, Jr., San Francisco, Calif. Filed June 6, 1918. Serial No. 238,455. 5 Claims. (Cl. 257—25.)



1. In combination with the removable cap of a radiator, a tubular helix coil having its inlet end fixed in said cap and open to the interior of the radiator and extending exteriorly thereabove and having a descending overflow tube terminating below the top of said radiator, and a base fixed to said cap having notched supports thereon engaging the coils of said helix.

1,351,892. MINING-MACHINE. CLYDE S. CORRIGAN, Norwood, Ohio. Filed July 30, 1919. Serial No. 314,249. 8 Claims. (Cl. 262—33.)

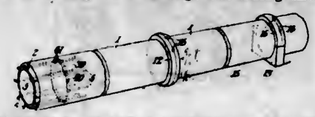


6. A chain saw for cutting minerals, comprising links pivotally secured together and having triangular shaped sockets therein, and diamond shaped teeth removably mounted in said sockets.

1,351,893. HAT-SIZE REDUCER. HARRY D. CURTIS, Red Bank, N. J. Filed Sept. 24, 1919. Serial No. 325,850. 2 Claims. (Cl. 2—32.)

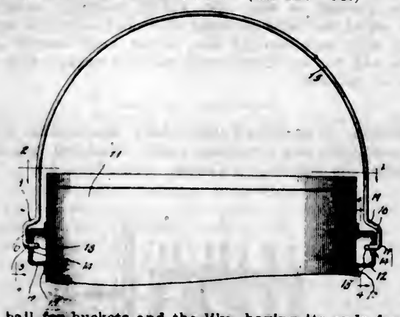
1. A size-reducer for hats comprising a strip of cushioning material having plies of flexible sheet material secured to opposite sides thereof by an adhesive material, said plies of sheet material being coated on their outer sides with a moisture-proofing material rendered adhesive by heat for securing the reducer to a hat and preventing the penetration of moisture to the plies of sheet material and the strip of cushioning material.

1,351,894. RESILIENT CORE FOR TIRES. JAMES H. DALBEY, Elgin, Ill., assignor to Elgin Rubber Ace Company, Elgin, Ill., a Corporation of Illinois. Filed Apr. 16, 1920. Serial No. 374,313. 7 Claims. (Cl. 152—5.)



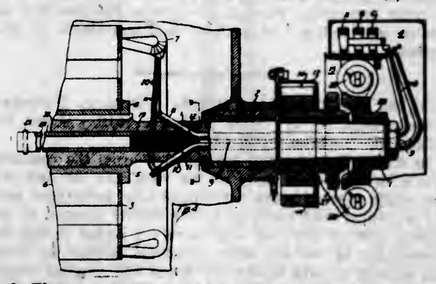
7. The herein described system of filling tire casings with resilient fillers, which consists in providing main ring filler members of substantially the size and dimensions of the casings to be filled, and provided with key hole shaped slots at their inner peripheries having flared sides, and providing a series of auxiliary filler rings for placement in and to fill said slots, the auxiliary fillers having different dimensions so that a filler suitable for a selected casing can be used for completely filling the casing.

1,351,895. CONCRETE PIPE CONSTRUCTION. HARRY EDGAR DILLON, Philadelphia, Pa. Filed June 16, 1919. Serial No. 304,418. 10 Claims. (Cl. 72—53.)



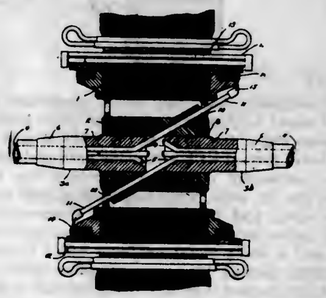
6. The combination with a hollow body having one end tapered; of members projecting outwardly at said end thereof in transverse relation to the axis of said body; another such hollow body having similar members; the projecting ends of said members of the respective bodies

overlapping in the direction of the length of the structure and forming wedge seats between them, and said tapered ends forming a channel; metallic coupling links, each encircling adjoining ends of said members of the respective bodies; a wedge member, including a bar of wedge shaped cross section, having its thin edge extending inwardly be-



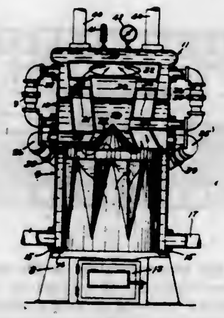
tween said overlapped ends, and forming a hoop substantially concentric with the axis of said structure; said wedge bar exerting tensile strain upon said members to hold said bodies together, and sealing means in said channel embedding the interlocked portions of said members and forming a liquid tight joint between said bodies.

1,351,896. BAIL FOR CONTAINER-BODIES. JAMES H. DOYLE, Chicago, and WILLIAM J. KENNY, Cicero, Ill., assignors to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Aug. 18, 1917. Serial No. 186,873. 1 Claim. (Cl. 220—95.)



A bail for buckets and the like, having its ends formed for pivotal connection with the bail ears, one of said ends of the bail being bent to form an extremity which extends inward in a direction toward the other end of the bail [illegible] is adapted to be inserted in said direction into its bail ear after the other end of the bail has been connected with the other bail ear, the leg of the bail near said extremity being bent to form an offset which extends in a lateral direction and which is adapted to be twisted into line with the main portion of the bail, thereby turning said extremity into a lateral position to permanently secure it within the bail ear into which it has been inserted.

1,351,897. ROTOR FOR DYNAMO-ELECTRIC MACHINES. GEORGE M. EATON, Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 7, 1916. Serial No. 76,602. 9 Claims. (Cl. 171—206.)

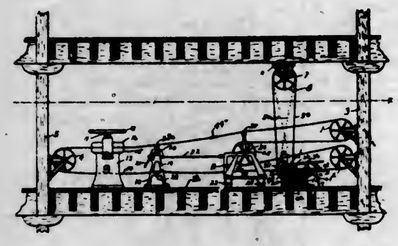


6. The combination with a hollow shaft having a plurality of inclined lateral ducts and a plug having corresponding ducts, of means for effecting registration of the shaft and plug ducts, and a plurality of conductors for out-of-phase currents, at least one of said conductors per phase being brought through each of said registering ducts.

1,351,898. ROTATABLE MEMBER FOR DYNAMO-ELECTRIC MACHINES. GEORGE M. EATON, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 12, 1917. Serial No. 180,078. 2 Claims. (Cl. 171—206.)

1. A rotatable member for dynamo-electric machines comprising a magnetizable core and a divided shaft, one of the parts of which is provided with a longitudinally extending passage having a flaring end portion to provide a recess within said member, and a lead disposed within said passage and leaving said passage at said recess and extending to the opposite side of said core.

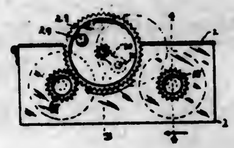
1,351,899. HOT-WATER HEATER. JOHN FLEISCHMANN, Minneapolis, Minn. Filed Aug. 11, 1919. Serial No. 316,531. 5 Claims. (Cl. 122—218.)



3. A hot water heater including fire pot, intermediate and top sections, each of which has an outer water chamber, said intermediate and top sections also having central water chambers spaced apart from their outer water chambers to afford a secondary combustion chamber, water conduits connecting the outer water chamber in the intermediate section to the outer water chambers in the fire pot and top sections, other water conduits connecting the inner water chamber of the intermediate section to the outer water chambers in the fire pot and top sections, and communicating water passageways between the outer and central water chambers in the top sections, said conduits being in the form of union equipped pipes located outward of the heater and separably connecting the fire pot and intermediate and top sections, and holding the same in assembled relation.

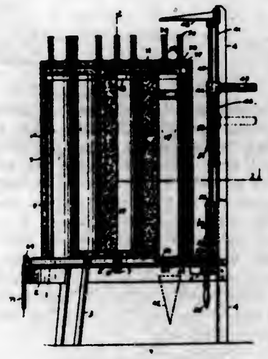
1,351,900. SHIPPING AND DISPENSING CONTAINER. LOUIS J. FREUNDT, Chicago, Ill., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed June 12, 1915. Serial No. 33,667. 2 Claims. (Cl. 220—31.)

1. A shipping and dispensing container comprising a sheet metal body, a stiffening and hinge wire at its top edge over which the edge of the body is curled, a sheet metal cover formed with a circular nesting depression having an outwardly inclined wall which fits within and against the top edge of the body and is bent over the top of the same and terminates in a downward curl open at the under side and fitting over the said curl of the body, and a sheet metal bendable hinge element having its middle portion bent around under said hinge wire and its ends passed through the top portion of the said curl of the cover, and bent down in the form of hooks engaging partly around the same in a downward direction, said ends being free and bendable up from the cover to entirely remove the same, the said curl of the cover having downwardly extending lips 23 adapted to be bent under the curl of the body and to be bent out therefrom, to secure and to release the cover and permit the hinging or entire removal of the same.



1,351,901. APPARATUS FOR MANUFACTURING BELTING. EDWARD F. GINGRAS, Buffalo, N. Y. Filed Feb. 9, 1917, Serial No. 147,608. Renewed Feb. 12, 1920. Serial No. 358,131. 5 Claims. (Cl. 154—3.)

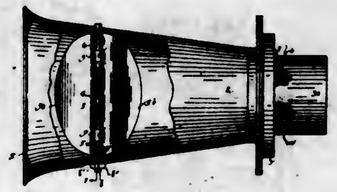
1. Apparatus for treating fabric in the manufacture of belting, the same consisting of a plurality of rollers disposed to support the fabric in endless arrangement with a portion of such fabric between contiguous rollers forming a reëntrant loop between the main runs, a roller disposed in such loop and engaging the bight thereof, means normally tending to press the roller against the bight of the loop to tension and stretch the endless fabric, a tank for receiving a solution, and means mounted upon the tank for deflecting the fabric into the solution contained therein.



2. Apparatus for treating fabric in the manufacture of belting, the same comprising a plurality of rollers for supporting the fabric in endless arrangements with a reentrant loop portion, a tension roller supported in the bight of the loop, means normally pressing the tension roller against the bight, a tank containing a solution, means for deflecting the fabric into the solution of the tank and removing the excess of solution, and a press for acting on a portion of the fabric while the same is under tension,

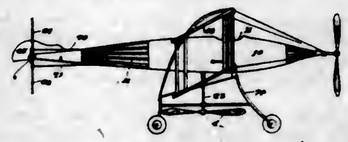
1,351,902. RECORDING APPARATUS. CLAIR E. GODDARD, Omaha, Nebr. Filed Dec. 16, 1919. Serial No. 345,446. 2 Claims. (Cl. 281—7.)

1. A recorder comprising a casing, a shelf therein, a cover for the casing having an opening over the shelf, a pair of reels in the casing adapted to wind and unwind a web back and forth over said shelf, each reel comprising a pair of end disks having depressions therein constituting bearing for the reel, one of the depressions being formed with angular walls, pivot pins journaled in the casing at one side and having ends engaging in the depressions of the adjacent disks, said pins having grooves therein, latches pivoted in the casing and normally resting in the grooves to lock the pins in place, stub shafts journaled in the opposite wall of the casing and having angular ends for fitting in the angular depressions of the disks, pinions on said stub shafts, manually rotatable gear wheel journaled to swing alternately into and out of mesh with said pinions, and drums held between said disks and having means to detachably engage with the ends of the web.



1,351,903. ICE-CREAM-DELIVERY MACHINE. FUSATARO HARA, San Francisco, Calif. Filed Oct. 29, 1918. Serial No. 260,196. 6 Claims. (Cl. 107—14.)

3. In an ice cream delivery machine, the combination of a rotatable vessel, vertical ice cream containers arranged in a concentric circular series in said vessel, each opening through the bottom of the said vessel, a follower in each container having a lateral extension, and means for repeatedly depressing through a uniform distance the extension and follower of each of said containers in succession.

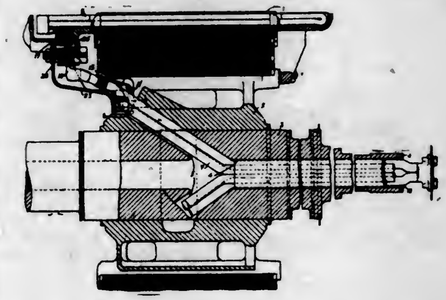


1,351,904. AUTOMOBILE-HORN. PETER B. HARTMAN, Watertown, N. Y. Filed Nov. 28, 1919. Serial No. 341,186. 1 Claim. (Cl. 116—137.)

In means for silencing automobile horns, the combination with the hollow body of the horn, the top and bottom walls thereof being correspondingly perforated near the mouth of said body, of a bolt rigidly secured to the bottom wall of the body and having a socket facing the perforation in the top wall, a spindle having its lower end pivoted in said socket, its upper end passing loosely through said top perforation, and a damper supported by said spindle and rotatable therewith by the force of the atmospheric pressure induced by the movement of the automobile, for preventing humming and droning of the

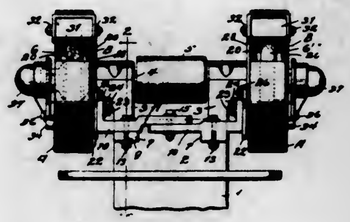
horn, said damper being smaller than the bore of said body for preventing the muffling of the signal notes of the horn.

1,351,905. FLYING-MACHINE. PETER L. HARVEY, Chicago, Ill. Filed Dec. 18, 1918. Serial No. 267,418. 1 Claim. (Cl. 244—29.)



In a flying machine, a body, pairs of wings on opposite sides of the body, spaced vertically from each other, the opposite pairs being connected together for simultaneous movement, and being pivoted at their forward edges, a pair of rudder members pivoted along adjacent edges at the rear of the body along a line which is horizontal when the machine is in its normal position, and adapted to swing from horizontal adjacent position to vertically oppositely extending position, and means for controlling the movement of the opposite pairs of wings, said means being adapted when actuated in certain ways to also control said rudder members.

1,351,906. VALVE FOR DEEP WELLS. CHARLES M. HEETER, Butler, Pa. Filed Sept. 29, 1916. Serial No. 122,846. 2 Claims. (Cl. 103—63.)

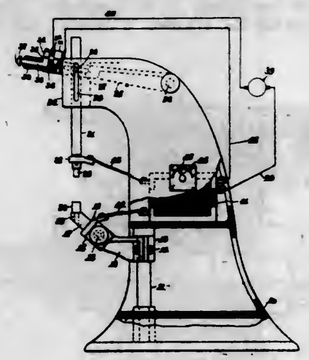


1. The combination of a tubular piston body provided at one end with a seat, a vertically slotted valve confining cage extending from the seat-carrying end of the body, and a valve within the cage adapted to cooperate with the seat, the valve having a spool shaped body with conically shaped ends.

1,351,907. ARRANGEMENT OF LEADS FOR DYNAMO-ELECTRIC MACHINES. RUDOLF E. HELLMUND, Swissvale, and BENJAMIN S. MOORE, Wilkinsburg, Pa., assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 5, 1917. Serial No. 178,600. 5 Claims. (Cl. 171—206.)

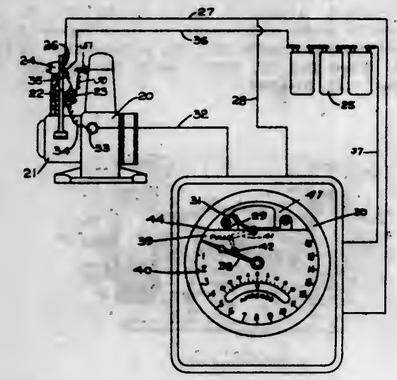
1. In a dynamo-electric machine, the combination with a shaft, a core mounted thereon and a winding carried by the core, of leads for the winding extending through the shaft and projecting beyond the core and means for individually supporting the leads beyond the core, said means comprising arms to which said leads are attached.

1,351,908. SAFETY-GUARD FOR ROTARY GRINDING-MACHINES. ANDREW F. HOWE, Granite City, Ill., assignor, by mesne assignments, to Howe Safety Appliance Company, Granite City, Ill., a Corporation of Illinois. Filed Dec. 27, 1916. Serial No. 268,523. 12 Claims. (Cl. 51—268.)



1. A grinding-wheel safety-guard comprising a pair of hood-shaped sections coöperating to inclose the wheel, in combination with means for supporting the guard as a whole around the wheel, said means including a separate plate having connection with a side wall of one of the sections.

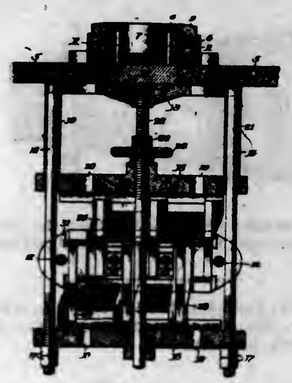
1,351,909. METHOD OF AND APPARATUS FOR HEAT-TREATING METALS. LAWRENCE E. JOHNSON, Melrose, Mass., assignor, by mesne assignments, to Mattie S. Johnson, Melrose, Mass. Filed Nov. 11, 1918. Serial No. 262,078. 18 Claims. (Cl. 219—10.)



1. The combination of a die member composed of metal of low conductivity; a punch member movable toward said die member; supports for said members; electrodes surrounding said supports and composed of metals of high

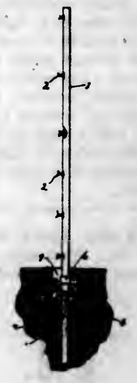
conductivity; and means for transmitting a current of electricity through said electrodes from one member to the

other and through the work interposed between said members.



1,351,910. SYSTEM OF ELECTRICAL CONTROL. CHARLES F. KETTERING, Dayton, Ohio, assignor, by mesne assignments, to Delco-Light Company, Dayton, Ohio, a Corporation of Delaware. Filed Mar. 3, 1917. Serial No. 152,348. 6 Claims. (Cl. 200—56.)

2. In a device of the character described, the combination with a meter; of switch actuating mechanism mounted thereon; and a detachably mounted unit secured adjacent said dial and having a pair of contacts thereon arranged to be actuated by said mechanism, said unit being removable without disturbing said contact operating mechanism.

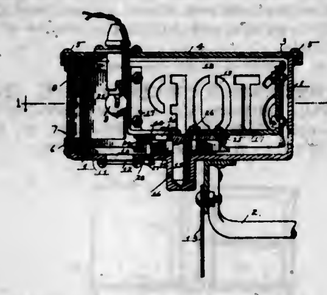


1,351,911. SPRING-DIE CUSHION. ROY D. KING, Chicago, Ill., assignor of one-half to John Nelson, Chicago, Ill. Filed Apr. 15, 1918. Serial No. 228,805. 15 Claims. (Cl. 113—46.)

1. In a spring die cushion, the combination of a member adapted to be fixed to a stationary part of a press, a member adapted to be attached to a movable part of said press, toggle levers interposed between said members, a spring arranged to resist movement of said members, and means for adjusting the normal relative position of said

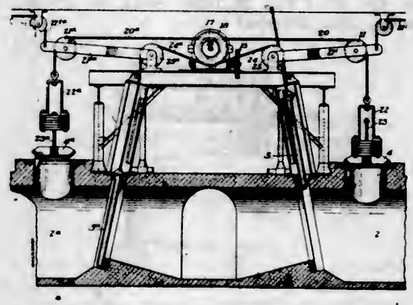
members whereby the variable resistance offered by said spring may be regulated.

1,351,912. METALLIC FENCEPOST. CARL KLEIN, Wichita, Kans. Filed Aug. 7, 1919. Serial No. 315,868. 1 Claim. (Cl. 189—92.)



In combination as a self anchoring fence post, a tubular post having a truncated sheet metal cone fixedly sleeved around said post at a distance from the lower driving end of said post; a tubular sleeve, slidably mounted around said post and above said cone, provided with depending flexible prongs extending downwardly along said tubular post; the lower driving end of said post being adapted to be entered in a post hole and to be then driven down until said cone bottoms on the floor of such hole and the said tubular sleeve upon then being driven down, the depending prongs will contact said cone and be forced outwardly to an anchorage in the ground, all in the manner and for the purposes as specified.

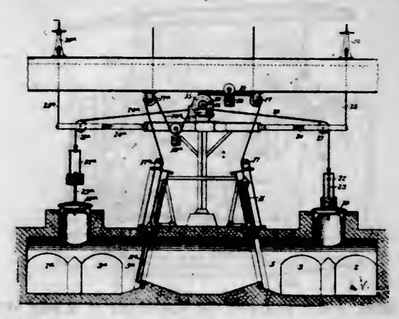
1,351,913. DIRECTION-INDICATOR AND TAIL-LIGHT FOR VEHICLES. JACOB KLUNDER, Grand Rapids, Mich. Filed Nov. 5, 1919. Serial No. 335,885. 4 Claims. (Cl. 116—43.)



2. In a device of the character described; an open-top casing having a light-transmitting side portion; a closure for the open top of the casing removably secured thereto; a member insertible into the casing through its open top and carrying signals and having a journal; a bearing into which the journal is freely insertible and in which said

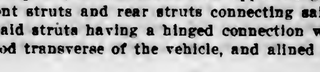
member is turnable to move one or another of the signals to a position adjacent said light-transmitting portion; a

light within said member and carried by the closure; means extending outside the casing for turning said member.



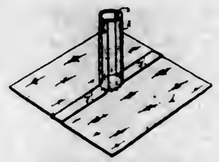
1,351,914. VALVE SYSTEM FOR REVERSING-FURNACES. LUTHER L. KNOX, Avalon, Pa., assignor to Blaw-Knox Company, Pittsburgh, Pa., a Corporation of New Jersey. Filed Dec. 21, 1916. Serial No. 138,288. 3 Claims. (Cl. 277—6.)

1. In a valve system of the character described, the combination with air and gas flues leading to opposite ends of the furnace, each of the air flues having an air inlet valve and also an air reversing valve, each of the gas flues having a gas reversing valve, a gas inlet, each of the gas flues having a gas inlet valve, a shaft having actuating devices thereon for all of the air inlet valves, air reversing valves and gas reversing valves, a second actuating device for the gas inlet valves, lost motion devices between the air inlet valves and their actuating mechanism, and lost motion devices between the gas inlet valves and their actuating devices, said shaft and actuating devices being arranged to permit the operation of the several recited valves in a predetermined sequence, substantially as described.



1,351,915. REVERSING-FURNACE. LUTHER L. KNOX, Avalon, Pa., assignor to Blaw-Knox Company, Pittsburgh, Pa., a Corporation of New Jersey. Filed Dec. 21, 1916. Serial No. 138,289. 3 Claims. (Cl. 277—6.)

3. A valve system for furnaces, comprising a pair of air-inlet-valves, a pair of air reversing valves, a pair of gas inlet valves, and a pair of gas-reversing valves, a motor having actuating connections with the air inlet and the air reversing valves, a second motor for the gas inlet valves, and a third motor for the gas-reversing valves, said motors being arranged for independent actuation, the actuating connections between each motor and the pair or pairs of valves controlled thereby being arranged to move one valve of each pair in advance of and in the reverse direction to the other one of the particular pair, together with means actuated by said connections

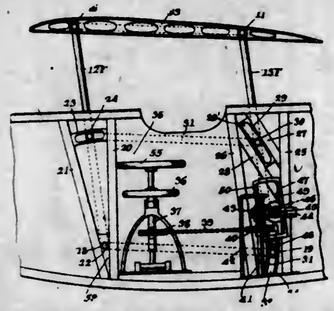


for indicating the position of a number of the said valves; substantially as described.

1,351,916. PENCIL. FRANK J. KRISTOFEK and HOWARD L. FISCHER, St. Paul, Minn. Filed May 7, 1918. Serial No. 233,174. 5 Claims. (Cl. 120—17.)

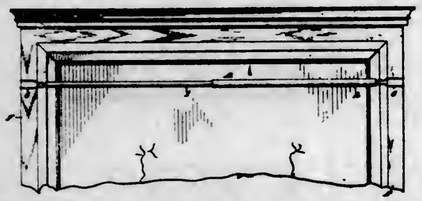
3. In a pencil of the class described, having a barrel portion formed of tubing, a conical shaped hollow forward end formed on said barrel, an opening formed through the apex of said conical end, a removable lead ejecting means adapted to be held under spring tension in said barrel, a lead holding finger slidably held in said ejecting means, a socket formed on the outer end of said finger and means in said finger forming an abutment for the lead held in said socket and for ejecting said lead from said socket substantially as described.

1,351,917. ASEPTIC APPLIANCE. ANNA O. KUHN, San Francisco, Calif. Filed Feb. 15, 1916. Serial No. 78,388. Renewed Mar. 9, 1920. Serial No. 364,520. 7 Claims. (Cl. 128—132.)



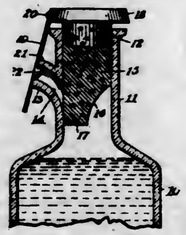
1. A device of the character described comprising a sheet of flexible material having a hole therethrough and a rubber tube extending from the sheet around the hole and having threads secured thereto lengthwise of the tube.

1,351,918. AEROPLANE. FREDRICK C. LAWRENCE, New York, N. Y., assignor to Emma K. Lawrence, New York, N. Y. Filed July 23, 1919. Serial No. 312,698. 4 Claims. (Cl. 244—29.)



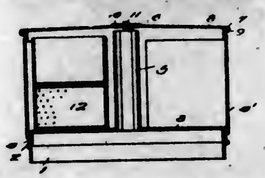
4. In a biplane, in combination, an upper wing, a lower wing, front struts and rear struts connecting said wings, each of said struts having a hinged connection with each wing, a rod transverse of the vehicle, and alined with the

main spar of the lower wing, a guide intermediate the ends of a front strut, a guide intermediate the ends of a



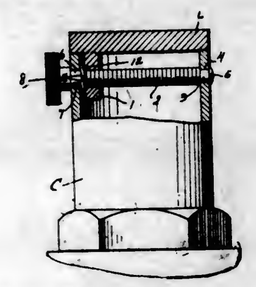
rear strut, and a guide at the lower end of a rear strut, each said guide being arcuate with its center on said rod.

1,351,919. CURTAIN-SUPPORT. WILLIAM I. LEVI, St. Louis, Mo. Filed Feb. 24, 1920. Serial No. 360,745. 4 Claims. (Cl. 156—19.)



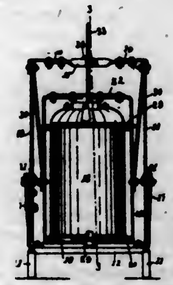
4. As a new article of manufacture, a curtain support comprising, in combination, a hollow pole consisting of complementing members telescopically adjustable relatively to each other, an extensile coiled spring extending lengthwise within, and having engagement at its ends with the ends of said pole-members, and window-frame engaging hooks at the ends of said pole-members having engagement only with the ends of the spring.

1,351,920. CONTAINER AND CLOSURE THEREFOR. RAYMOND V. MARCHSON, Washington, D. C., assignor to Frank H. Newham, Jr., Washington, D. C. Filed May 4, 1917, Serial No. 166,499. Renewed Dec. 9, 1919. Serial No. 343,645. 9 Claims. (Cl. 215—57.)



6. The combination with a bottle having a neck of smaller diameter than the body of the bottle, said neck having a mouth and a spout below said mouth extending laterally of the neck, said spout having a passage therethrough, a plug fitting in said mouth and turnable therein, a portion of the inner end of said plug opposite the inner end of said passage being cut away whereby said plug will serve as a valve to open and close said passage when the plug is turned, a rim on the upper end of said plug, and a comparatively stiff resilient metal strip secured at one end to said rim and having a part which extends downwardly across the outer end of said spout, said strip having a depression adapted to fit the outer end of said passage to close the same and latch said plug in position to close the inner end of said passage, said spout rim and strip being disposed within the margin of the body of the bottle.

1,351,921. COMBINATION COOKING DEVICE. HENRY LLOYD MENDAL, Baltimore, Md., assignor of one-fourth to Kate M. Langley, Baltimore, Md. Filed Jan. 21, 1919. Serial No. 272,372. 5 Claims. (Cl. 126—275.)



1. A combination cooking device comprising a base plate, a heat conducting flue comprising a number of branches diverging from the center and open at each end and affixed to said base plate, a cover above said heat conducting flue, and a revolving plate secured to said cover and provided with open spaces to serve as a damper.

1,351,922. GREASE-CUP LID. JACOB H. MILLER, Cresson, Pa. Filed Apr. 28, 1920. Serial No. 377,310. 5 Claims. (Cl. 184—94.)

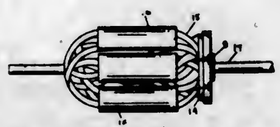
4. In combination with a grease cup, a lid for said cup provided with an inwardly disposed lug and a rod rotatably supported by the cup and extending thereacross, said rod being in threaded engagement with the lug of the lid, said rod being provided with means for rotating the same, and a locking member carried by the rod and coacting with the opposed faces of the lug and the wall of the cup when the lid is in closed position.

1,351,923. TANK-RACK. EPHRIAM H. NELSON, Yale, Iowa. Filed Feb. 28, 1920. Serial No. 361,987. 3 Claims. (Cl. 248—58.)

1. In a device of the class described, a fixed upright frame substantially rectangular in outline, a substantially

rectangular movable frame, hangers connected with the upper parts of the upright members of the fixed frame, and extending downwardly within the outline of the fixed frame, spindles mounted in said movable frame and in the lower ends of said hangers, and in the upright members of said fixed frame, for pivotally supporting the movable frame between its ends, a bottom on the movable frame, and means for locking the movable frame in upright position.

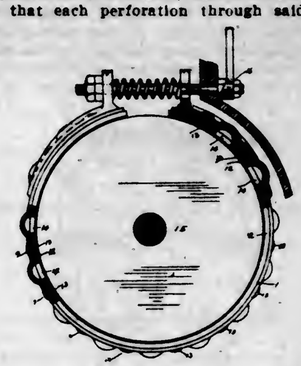
1,351,924. HAIR-CLIPPER. VINCENT NICOSIA, Waco, Tex. Filed Mar. 29, 1919. Serial No. 286,121. 1 Claim. (Cl. 30—1.)



In a device of the character described, in combination with a hair clipper, of a detachable metal plate having a plurality of small tubular rollers of different diameters set in slits in and extending across the surface of the plate, the roller or rollers next the handles of said clipper being larger than those following in the ratio to provide a good cutting angle to the hair, the sides of said plate having suitable flanges to attach the device to the clippers.

1,351,925. SKATE. GEORGE H. RICKE, Cincinnati, Ohio. Filed Dec. 15, 1919. Serial No. 345,130. 3 Claims. (Cl. 46—51.)

1. In a skate of the class described, an ice skating runner supporting a foot piece, a metal cutter attached on one side of said runner at the bottom thereof, wheels and axles and means for attaching and removing same to and from skate runner.

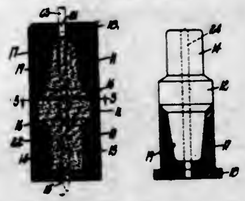


1,351,926. COMMUTATOR. HERMAN R. SAXON, Toledo, Ohio, assignor, by mesne assignments, to Electric Auto-Lite Corporation, Toledo, Ohio, a Corporation of Delaware. Filed Apr. 17, 1916. Serial No. 91,754. 11 Claims. (Cl. 171—320.)

1. A method of building commutators comprising the anchoring of an annular series of terminals in a mold by means of interlocking elements on the mold and terminals respectively, casting of insulation about said terminals, and removing the terminals and insulation thus cast as a unit.

1,351,927. FRICTION BRAKE-BAND. DAVID B. SIMPSON, Wichita, Kans. Filed Oct. 21, 1919. Serial No. 332,229. 2 Claims. (Cl. 188—259.)

1. In combination, a metallic band and a friction lining secured thereto; said band being provided with a plurality of embossed receptacles arranged at spaced intervals thereupon and said lining being provided with a plurality of perforations arranged longitudinally around said lining so that each perforation through said lining is

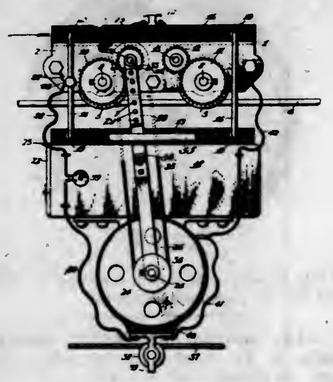


brought into registry with a corresponding receptacle upon said band for the purpose as specified.

1,351,928. MOBILE ARMAMENT. MASSEY SITNEY, Brooklyn, N. Y. Filed Mar. 24, 1917. Serial No. 157,068. 15 Claims. (Cl. 89—40.)

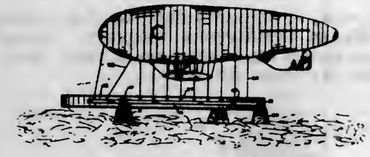
1. An armored vehicle comprising an inclosed body having hinged lids and a bottom adapted to be swung about the forward end into an upright position to constitute a support.

1,351,929. MOLD AND PROCESS FOR FORMING PORCELAIN INSULATORS THEREIN. ERNEST J. TAYLOR, Everett, Mass. Filed Aug. 9, 1919. Serial No. 316,366. 6 Claims. (Cl. 25—3.)



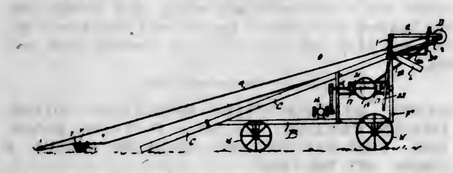
1. A mold having, in combination, a main body portion, said main body portion being provided with a longitudinally extended bore and also being provided with vents, and a plunger adapted to slide within said bore and into endwise engagement with plastic material contained within said bore, whereby said material may be compressed endwise into a pre-determined shape, said plunger also being adapted to vertically position said compressed material and after the same has been removed from said mold.

1,351,930. AUTOMATICALLY-OPERATING MOTOR DRIVEN CARRIER. CLARENCE O. TRACY, Denver, Colo. Filed Mar. 13, 1919. Serial No. 282,512. 6 Claims. (Cl. 104—149.)



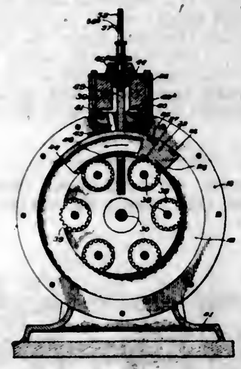
1. In an electrically operated carrier of the character described, the combination with current feed wires, one of which is a track wire, of a trolley on the track wire whose wheel shafts have gear wheels thereon, a pinion in mesh with one of said gear wheels, a parcel carrier and a motor suspended from said trolley, a bracket secured to, but insulated from said motor, having a sheave wheel for supporting the other feed wire, the motor terminals being connected, respectively, with the trolley, and with the

sheave wheel bracket, an arm loosely mounted at one end on the motor shaft, and having a spindle rotatably mounted in its opposite end, a gear rigidly mounted on one end of the spindle and adapted to mesh with one of the trolley shaft gear wheels, or with the pinion which meshes with the other gear wheel, a wheel on the other



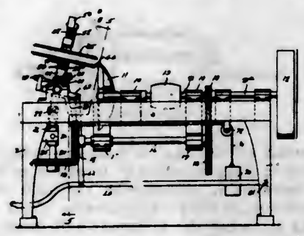
end of the spindle, a wheel on the motor shaft, and an endless flexible connection connecting the two wheels, means for automatically shifting the arm to throw the pinion out of gear with one wheel and into gear with the other wheel, and means for holding the arm in either position.

1,351,931. APPARATUS FOR MOORING AIRSHIPS. EMANUEL S. ULLMANN, New York, N. Y. Filed Sept. 4, 1919. Serial No. 321,526. 9 Claims. (Cl. 244—2.)



1. An apparatus for mooring airships comprising a fixed support, a pivoted mooring member mounted to turn on said support and provided with means for the engagement of the mooring ropes of an airship, and means for holding said mooring member against upward movement, including a stationary guideway in which the outer portion of said mooring member is adapted to travel and by which it is held against upward movement.

1,351,932. LOADING APPARATUS. WARREN UNGER, Kentland, Ind. Filed July 26, 1919. Serial No. 313,520. 1 Claim. (Cl. 214—110.)



A loading apparatus, comprising, in combination, a portable body, a chute carried by said body and disposed on an upward incline, a frame coacting with said body and the upper end portion of the chute, forwardly directed beams carried by the side portions of the chute at the upper end thereof, a driven member supported between said beams, a scoop, a connection between the scoop and the driven member whereby said scoop may be caused to travel along the chute upon rotation of said driven member in one direction, a motor supported by the body below the chute and in driving connection with the driven member, said connection including a reversing mechanism, a substantially vertically disposed lever having its upper portion pivotally engaged with the inner end portion of one of the beams, said lever being arranged to one side of the chute and the supporting frame therefor with its lower end terminating in close proximity to the body, said lever operating the reversing mechanism and adapted for manual operation, a rock member supported by the outer end portions of the beams at a point inwardly of but in close proximity to the driven member, and a connection between the rock member and the lever whereby the direction of movement of the driven member is reversed upon contact of the scoop with the rock member.

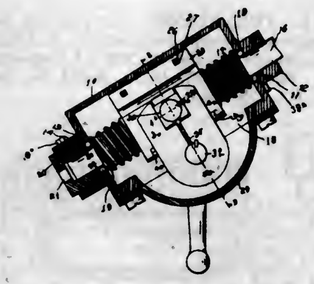
1,351,933. ROTARY ENGINE. WILLIAM J. VAN OSDEL, Chicago, Ill. Filed Feb. 3, 1919. Serial No. 274,679. 22 Claims. (Cl. 60—44.)

1. A rotary engine embodying a cylinder, a floating piston movable in the cylinder, a driven shaft separate from the piston, a plurality of separate pinions operatively connected with the shaft, and a rack connected with and extending substantially the entire length of the piston and successively engaging the pinions for driving the shaft, and an abutment movable into and out of the path of movement of the piston, said abutment having an opening therein and through which opening the piston passes.

1,351,934. BARREL-HEAD MACHINE. TIMOTHY F. WARD, Earleys, N. C. Filed Dec. 5, 1919. Serial No. 342,580. 5 Claims. (Cl. 147—38.)

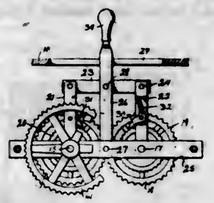
1. The combination with a saw, of a shaft formed in two sections connected by a flexible joint, each of said sections being pivotally mounted between its ends to swing in a plane parallel to the axis of the saw, one section being provided with a work holder and the other section being provided with a driving device engageable or disengageable by the swing thereof, and means for adjusting the section provided with the work holder radially of said work holder.

1,351,935. SELF-LUMINOUS WRITING OR READING DEVICE. PAUL M. WILLIS, Orange, N. J., assignor to Radium Luminous Material Corporation, New York, N. Y., a Corporation of Delaware. Filed Nov. 17, 1917, Serial No. 202,606. Renewed Jan. 24, 1920. Serial No. 353,814. 5 Claims. (Cl. 240—1.)



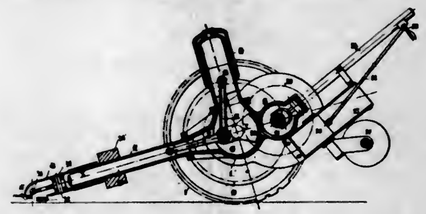
1. A luminous writing or reading device comprising a base member, means for holding a record sheet thereon, and a self-luminous sheet slidably connected with the base member in position to the slide under successive portions of the record sheet, whereby to successively illuminate said record sheet portions by transmitted light.

1,351,936. SASH-FASTENER. ANDREW A. WILSON, Norfolk, Va. Filed Oct. 4, 1919. Serial No. 328,391. 5 Claims. (Cl. 292—117.)



1. A sash fastener comprising a substantially S-shaped locking lever having beveled surfaces at each side of its fulcrum, and a bell crank lever movable in a plane at right angles to that of said locking lever and having its arms beveled to co-act with the arms of said locking lever, and means for actuating said bell crank lever.

1,351,937. COMBINED WORM AND LEVER STEERING-GEAR DEVICE. FRANCIS B. ALLDREDGE, Des Moines, Iowa. Filed May 29, 1919. Serial No. 300,558. 8 Claims. (Cl. 74—79.)

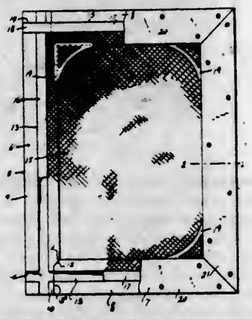


1. In a device of the class described; a casing; a steering shaft mounted therein, having a worm formed thereon; a nut on said worm having opposite spindles; a shaft mounted in said casing; a sleeve on said shaft, having opposite pairs of arms extending to position adjacent to said spindles; two-part bearings for the respective spindles, mounted between the arms of each pair; and a steering arm on said second shaft.

1,351,938. SPRING-WINDING MECHANISM FOR PHONOGRAPHS. WILLIAM M. ALLEN, Merrill, Wis., assignor of one-fourth to Richard B. Runke, Merrill, Wis. Filed Sept. 18, 1918. Serial No. 254,572. 2 Claims. (Cl. 74—54.)

1. In a mechanism of the character described, a driving shaft, a gear wheel mounted thereon, a second shaft extending parallel to the first named shaft, a gear wheel mounted thereon and meshing with the first named gear wheel, ratchet wheels mounted upon both of said shafts and having teeth extending in opposite directions, two pairs of arms disposed in parallel relation to each other, each pair being loosely mounted upon one of said shafts, and the arms of each pair being disposed on opposite sides of the corresponding ratchet wheel, oppositely directed pawls mounted upon each pair of arms, each pawl being mounted between a pair of arms and engaging their corresponding ratchet wheels, springs urging said pawls into engagement with the ratchet wheels, a link disposed between and connecting the outer ends of the pairs of arms and pivotally connected thereto, and an operating lever pivotally supported between said arms and extending parallel thereto, the pivot of said lever being in line with the shafts and the link being pivotally connected at its middle to said lever.

1,351,939. SHEARING AND MOWING MACHINE. PAUL ANDRÉ, Le Val D'Ajol, France. Filed Jan. 22, 1919. Serial No. 272,516. 7 Claims. (Cl. 56—25.)



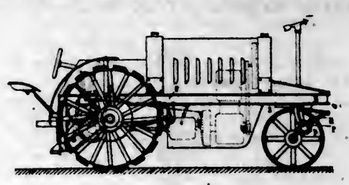
1. In a mowing machine, the combination of a main frame, a pair of wheels supporting the same; a crank shaft journaled in said frame and having said wheels mounted on its ends; an internal combustion engine mounted on said frame and including a piston connected to rotate said crank shaft; a tubular case connected to said fsame at the front thereof; a cross-head connected to the front portion of said case; cutting mechanism mounted on the cross-head; a bar mounted to reciprocate in said case and connected at its front end to operate the cutting mechanism; and a link connection between the rear end of said bar and the crank portions of said shaft.

1,351,940. SCREEN DOOR AND WINDOW CONSTRUCTION. DAVID C. BLAKE, Durham, N. C. Filed Apr. 12, 1920. Serial No. 373,217. 1 Claim. (Cl. 156—14.)

A screen closure comprising two sections adapted to engage each other, each section including top, bottom and side members, each of the members of one section having a longitudinal groove in one face thereof, the end portions of said side members having a laterally extending mortise groove intersecting the end portions of the longitudinal groove, the end portions of the top and bottom

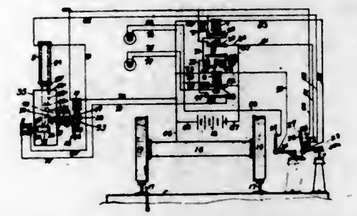
members of said section engaging the side portions of the side members, screen fabric extending over said sections and having its ends disposed in the groove, key members disposed in said grooves for holding the screen fabric therein, the end portions of the key of the top and bottom members extending beyond the ends of said members to provide tenons, said tenons being disposed in the

mortise grooves of the side members, the top and bottom side members of the other section having their ends mitered and engaged with each other, the end portions of the top and bottom members of the second mentioned section extending over the adjacent joints and tenons of the first mentioned section, and means for securing said sections to each other.



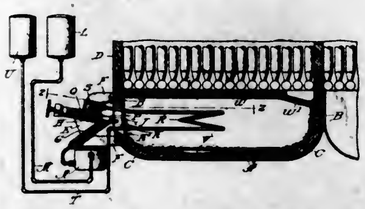
1,351,941. SLIDING CALIPERS. ETIENNE CHALLET, Genève, Switzerland. Filed Oct. 22, 1919. Serial No. 332,424. 1 Claim. (Cl. 33—158.)

In calipers, an arm formed with a longitudinal groove having inclined sides provided with scales, the lower part of said groove being provided with marks or numerals corresponding to the graduation of said scales and a member slidable along said arm and having inclined faces lying in the same planes as the inclined sides of the arm, said faces being provided with vernier graduations to coöperate with said scales.



1,351,942. AGRICULTURAL TRACTOR. BAPTISTE ALFRED JOSEPH CHAPRON, Puteaux, France. Filed July 25, 1918. Serial No. 246,726. 5 Claims. (Cl. 180—17.)

1. In a motor-driven vehicle, the combination of a differential shaft or axle comprising a pair of shaft sections arranged end to end; a differential mounted on said axle and comprising a fixed outer casing, a rotatable inner casing, a driving gear encircling the inner casing and fixed to it, and a set of differential pinions arranged in pairs within the inner casing, one of said pairs of pinions being loosely mounted upon the inner ends of the shaft sections and having their hubs formed with notches and the other pair being fixed to said inner casing to rotate therewith, the ends of the inner casing terminating short of the notched ends of said pair of pinions and being formed with notches which register with said pinion notches; a pair of slidable sleeves keyed to said shaft sections and

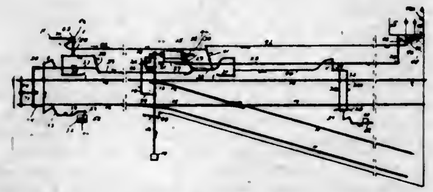


extending into the ends of the outer casing, said sleeves having toothed inner ends for engagement alternatively with the pinion notches alone or with both the pinion and inner casing notches; and individual operating means for said sleeves.

1,351,943. CAB-SIGNAL SYSTEM. LUTHER RINGER, Buffalo, N. Y., assignor to The Simmen Automatic Railway Signal Company, Buffalo, N. Y., a Corporation of Arizona. Filed May 29, 1917. Serial No. 171,612. 8 Claims. (Cl. 246—167.)

1. In a cab signal system, clear and danger traffic signals carried by a vehicle moving along a trackway, a route indicator carried by the vehicle, means for displaying a clear signal on the vehicle when safety conditions exist, means for displaying a danger signal on the vehicle when danger conditions exist, means for setting up a predetermined route indication on the vehicle as the vehicle approaches a point in the trackway where a plurality of diverging routes are possible, and means for displaying said route indication when a clear traffic signal is carried by the vehicle.

1,351,944. FUEL-BURNER, ABNER DOBLE, Detroit, Mich., assignor, by mesne assignments, to Double-Detroit Steam Motors Co., Detroit, Mich., a Corporation of Delaware. Filed Jan. 27, 1917. Serial No. 144,833. 7 Claims. (Cl. 158—29.)



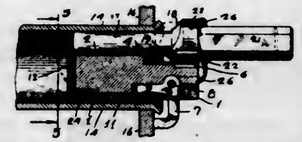
1. The combination of a liquid fuel nozzle and a source of liquid fuel connected thereto, a spraying nozzle arranged in aspirating relationship to said liquid fuel nozzle, and a source of combustible gas connected with said spray nozzle arranged to atomize and mix with the liquid fuel from said fuel nozzle.

1,351,945. METHOD OF CLEANING OIL AND GAS WELLS. JOHN R. DULANY, Pittsburgh, Pa. Filed Nov. 1, 1919. Serial No. 335,203. 3 Claims. (Cl. 166—21.)

1. The method herein described of removing deposits from oil and gas wells which consists in introducing water into the well, adding a dry compound of alkali-metal hydrate and aluminum to the water; permitting the solution thus formed to remain in the well for a period sufficient for the heat generated by the mixture to soften the oil and wax adhering to the sides of the well and then pumping it out.

1,351,946. AUTOMATIC RAILWAY SWITCH AND SIGNAL. ISAAC L. EDWARDS, Aurora, Ill. Filed May 14, 1912, Serial No. 697,325. Renewed Mar. 5, 1919. Serial No. 280,859. 6 Claims. (Cl. 246—257.)

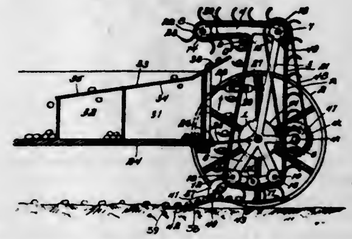
1. The combination of the main line and switch, a switch-point moving means, including a distant controller, electric signals at the latter, a circuit including said signals, circuit-opening and closing means, operative connections between the latter and the switch point, a signal device having a movable member and situated alongside the main line, and an operative connection between said movable member and said controller.



2. The combination of the main line and switch, a switch point moving means including a motor and a distant controller, electric signals at the latter, a circuit including said signals, circuit-opening and closing means, an operative connection between the latter and the switch point, means at the motor for controlling its operation, a connection between said means and the distant controller for operating said means by the controller, a signal device having a movable member and situated alongside the main line, a connection between said movable member and the controller and a connection between the controller and the means for starting and stopping the motor.

3. The combination of a main line, a switch, switch-point moving means, including a controller, distant from the switch, an electrical signal near the controller, a circuit including said signal and an electric switch connected with the switch point, an electric signal situated adjacent the main line in advance of the switch point, a circuit opener and closer for said last named electric signal, connections between said controller and said circuit opener and closer, a signal device having a movable member and situated alongside the main line, an operative connection between said movable member and said controller, the signal controller thus being operatively connected with the switch point moving means with said circuit opener and closer for the electric signal, and with the moving member of said signal alongside the main line.

4. The combination of the main line and switch, a switch point moving means including a motor and a distant controller, electric signals at the latter, a circuit including said signals, circuit-opening and closing means, an operative connection between the latter and the switch point, a train signal operating shoe mounted near the main line, a horizontally slidable frame carrying said shoe, and connections between said frame and said controller whereby the position of the shoe horizontally may be changed.

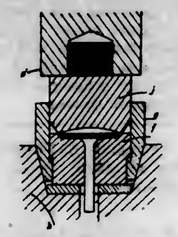


5. The combination of the main line and switch, a switch point moving means including a motor and a distant controller, electric signals at the latter, a circuit including said signals, circuit-opening and closing means, an operative connection between the latter and the switch point, a train signal operating shoe mounted near the main line, a horizontally slidable frame carrying said shoe, connections between said frame and said controller whereby the position of the shoe horizontally may be changed, and a signal operatively connected with said shoe and actuated by the movement thereof.

1,351,947. TOOL. WILLIAM A. FINDLEY, San Francisco, Calif. Filed Nov. 18, 1919. Serial No. 338,970. 10 Claims. (Cl. 153—79.)

1. A tool of the character described comprising a slidable and a rotative hammer having a plurality of shoulders thereon adapted to successively bevel, expand and bead the end of a tube onto a boiler head or the like; and a core having a bore on one side thereof to slidably and rotatably hold said hammer within said tube and adjacent the internal wall thereof.

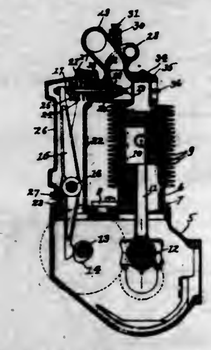
1,351,948. POTATO PICKER OR GATHERER. CHARLES FOWLER, Tomkins Cove, N. Y. Filed Mar. 29, 1919. Serial No. 286,062. 5 Claims. (Cl. 55—17.)



3. A device of the character described comprising an axle provided with suporting wheels, a frame mounted on said axle, gathering means at the lower end of the frame for picking up articles from the ground, an endless belt upon the frame provided with fingers to pick up and elevate the articles from the gathering means, said belt being provided with a delivery portion projecting horizontally beyond the vertical plane of the elevating portion of the belt, and means for transmitting driving motion to the belt.

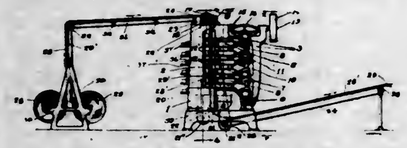
5. A device of the character described comprising an axle, supporting wheels on the axle, a frame tiltably mounted on the axle, fastening devices arranged at different elevations for adjustably securing the frame to a traction member and holding the frame when secured against tilting motion, a grated gathering shovel at the lower end of the frame, an endless belt supported by the frame and provided with gathering fingers, said belt having an upper portion extending horizontally beyond the vertical plane of the ascending stretch of the belt, and means operative in the movement of the device for imparting motion to the belt.

1,351,949. PROCESS FOR FORGING VALVES AND SIMILAR ARTICLES. ERNEST FUCHS, Paris, France, assignor to Louis Renault, Billancourt, Seine, France. Filed Nov. 15, 1918. Serial No. 262,685. 1 Claim. (Cl. 29—157.)



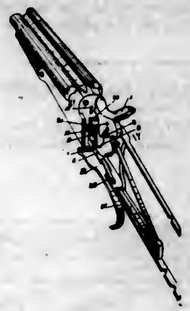
The process of forging valves of the class described having a head and stem, by first taking a section of metal

having a diameter between that of the finished head and stem, heating the same, forcing the hot metal through a



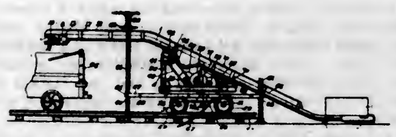
hole in a draw-plate to form the stem, leaving a roughly shaped head and thereafter completely forming said head between a die and suitable press tool.

1,351,950. INTERNAL-COMBUSTION ENGINE. RALPH M. GASTON, Chicago, Ill. Filed July 17, 1919. Serial No. 311,498. 6 Claims. (Cl. 123—177.)



1. In an air cooled internal combustion engine, the combination of an engine cylinder, a valve rocker casing located laterally opposite to and spaced from said cylinder, a valve stem guide extending between said cylinder and rocker casing and in contact with both whereby it serves to conduct heat from said cylinder to said rocker casing, heat radiating fins on the circumference of said guide, and a valve stem mounted in said guide.

1,351,951. MULTIPLE-DISK-CUTTING APPARATUS. JAMES A. GRAY, San Francisco, Calif., assignor to American Can Company, San Francisco, Calif., a Corporation of New Jersey. Filed Jan. 6, 1919. Serial No. 269,783. 11 Claims. (Cl. 164—22.)

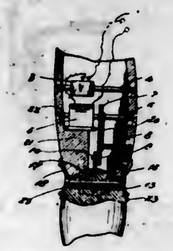


1. In an apparatus for the described purpose, the same comprising a suitable frame member, of feed means associated therewith for advancing a web of flat liner material therethrough in a substantially vertical direction, a support for a roll of liner material, a plurality of alined reciprocating punches and a plurality of associated alined cutting dies sustained by the frame member and between which punches and dies the web of liner material is moved, mechanism for imparting reciprocating movement to the punches for coaction with the cutting dies for the severing of a plurality of disks from the web of liner material, means for removing the punchings in a substantially horisontal direction, and means for removing the waste section of the web.

1,351,952. SHOTGUN AND THE LIKE GUN. JEAN LOUIS JOIRIS, Wandre, Belgium. Filed May 20, 1920. Serial No. 382,975. 4 Claims. (Cl. 42—42.)

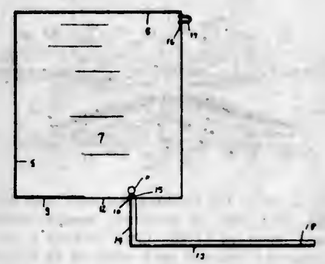
1. A double-barreled gun comprising two hammers, a single trigger pivotally mounted on a pin, a sear for one of the hammers attached firmly to the trigger, a second sear for the other hammer pivotally mounted on the aforesaid pin, and a movable abutment on the first sear adapted according to its position to operate and to release the second sear.

1,351,953. LOADING-MACHINE. NILS D. LEVIN, Columbus, Ohio, assignor to The Jeffrey-Manufacturing Company, Columbus, Ohio, a Corporation of Ohio. Filed Oct. 17, 1916. Serial No. 126,184. 28 Claims. (Cl. 193—8.)



1. In a machine of the class described, the combination with a self contained conveyer comprising an elongated frame and conveyer and power devices mounted within said frame, of a removable substantially horizontal rail extending transversely beneath said frame upon which said conveyer may be moved to and supported in operative position, a collapsible support for said rail, and means to prevent the collapse of said support.

1,351,954. PRINTING-PLATE AND METHOD OF MAKING THE SAME. ISAAC W. LITCHFIELD, Newtonville, Mass., assignor to Litchfield Linoplate Co., Boston, Mass., a Corporation of Massachusetts. Filed July 3, 1919. Serial No. 308,441. 19 Claims. (Cl. 101—401.2.)

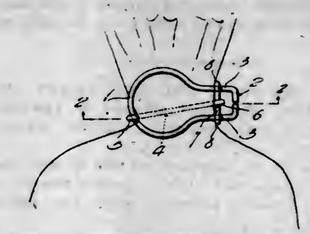


1. The method of making a printing plate which comprises assembling in plate formation a plurality of lines of type, positioning reinforcing means transversely of the lines of type at distributed points along the back thereof, and bonding said reinforcing means and lines of type into a rigid integral plate from which to make directly the printing impressions.

1,351,955. ARTIFICIAL LIMB. FRANK J. LOWRY, New Orleans, La. Filed Dec. 29, 1919. Serial No. 348,143. 4 Claims. (Cl. 3—2.)

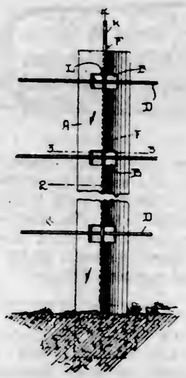
1. In an artificial leg, means for actuating the lower portion thereof in imitation of a natural limb comprising an electric motor, a source of electrical energy, and means actuated by said motor to impart intermittent motion to said limb comprising a member rigid to said leg on one side of the knee joint, a member rotatably mounted in said leg on the other side of said joint, and means on said last-named member for intermittently engaging said rigid member during rotation of said last-named member.

1,351,956. TOWEL-DISPENSING CABINET. WILLIAM P. MCCORKINDALE, Holyoke, Mass., assignor to Emily K. Dietz, Philadelphia, Pa. Filed Dec. 6, 1919. Serial No. 343,087. 1 Claim. (Cl. 211—29.)



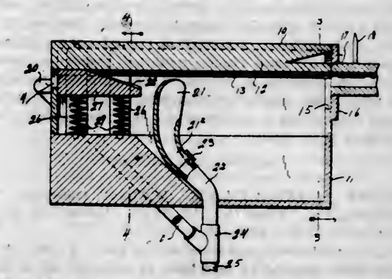
A dispensing cabinet for paper towels and the like consisting of a housing including side walls a top wall a rear wall and a bottom wall of less width than the width of the sides and extending from a point rearwardly of the center line of the container to the back wall, a pintle secured at its ends to the side walls and located between the forward edge of said bottom wall and the forward edges of the side walls, a front wall having on its lower end an extension constituting a bottom wall portion in its normal position and hingedly connected with said pintle, the front wall being adapted to be disposed against the forward edges of the side walls, and means for holding said front wall in its closed position, the extension of said front wall when in its normal position being disposed substantially in the same plane as the bottom wall and its rear edge being spaced forwardly from the forward edge of the bottom wall to provide a delivery opening, said container being adapted to receive a plurality of sheets so that the forward portions thereof will be supported by said pintle and the extension of said front wall.

1,351,957. [WITHDRAWN.]



1,351,958. SACK-FASTENER. FREDERICK MARKWICK, Detroit, Mich. Filed Dec. 11, 1919. Serial No. 343,993. 1 Claim. (Cl. 24—30.5.)

A sack fastener comprising a substantially circular frame having a U-shaped offset at one side provided with parallel arms, an arched latch-bar of circular cross section having eyes at its ends slidably surrounding said arms, a longitudinally curved fastening arm of circular cross section having an eye at one end pivotally surrounding the

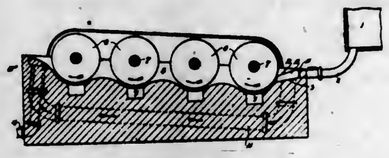


aforesaid frame and free to slide thereon to allow tightening of the fastening arm, the other end of said fastening arm having a hook engageable with said arched latch-bar.

1,351,959. FASTENING DEVICE FOR FENCE-WIRES. OTTO J. MINNICH, Boerne, Tex. Filed July 29, 1919. Serial No. 314,117. 1 Claim. (Cl. 256—52.)

In combination, an angle iron post having spaced pressed in V's in its angle portion, and a resilient rod adapted to slip into the corner of said post between said V's and the corner and retain wires in said pressed in portions, and provided with a bent back portion forming a hook to be inserted in the topmost of the said perforations from which said V's are pressed by the flexing of the body of the rod.

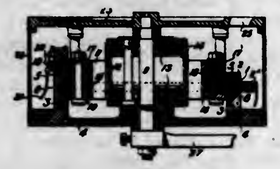
1,351,960. FLASH-ELIMINATOR. OSCAR C. MOYERS, Crosbyton, Tex., assignor of one-fourth to William A. Moyers, Crosbyton, Tex. Filed June 24, 1920. Serial No. 391,385. 4 Claims. (Cl. 89—31.)



1. In a flash eliminator for firearms, a hollow casing, provided with a vertically directed rib extending longi-

tudinally thereof, said rib having its under surface upwardly concaved, openings formed in the ends of said casing alining with the concave lower surface of said rib, means for securing the muzzle of a firearm in alinement with one of said apertures, and a projectile deflected vertically shiftable member arranged within said casing adjacent the other of said openings to normally close the same.

1,351,961. SOLUTION FOR TREATMENT OF IRON AND STEEL. THOMAS I. MURPHY, St. Lawrence, S. D. Filed May 4, 1918. Serial No. 232,574. 1 Claim. (Cl. 148—14.)



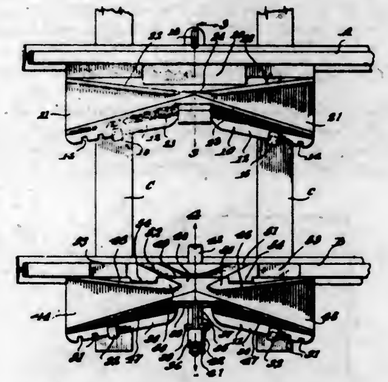
A solution for the treatment of iron or steel containing water 85%, coarse salt 11.7% dissolved therein, muriatic acid 1.9%, dissolved powdered alum .7%, and sal ammoniac .7%.

1,351,962. BEATING AND REFINING ENGINE. THOMAS HENRY NASH, St. Pauls Cray, England. Filed June 3, 1919. Serial No. 301,420. 7 Claims. (Cl. 92—25.)

1. A continuous beating and refining engine for pulp, stuff and the like, for use in the manufacture of paper including a series of beating rolls, means for causing said stuff to pass through said rolls, and means for causing said stuff to be returned and refed through said rolls at a different point along the width of the bed of the engine any predetermined number of times.

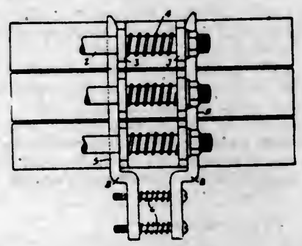
1,351,963. CONTACT OF ELECTRICAL-SWITCH GEARS. RODOLPH STUART O'NEIL, London, England, assignor to O'Neil's Recorder Syndicate Limited, London, England. Filed Jan. 24, 1920. Serial No. 353,764. 6 Claims. (Cl. 200—26.)

1. An electrical switch device; comprising in combination a pair of clamping rings in opposed relation to each other, a plurality of separate electrical contact members located between said rings, insulated therefrom, and adjustable in position in circumferential directions between said rings, and means for clamping said rings together to retain said contact members in the positions in which they have been placed.



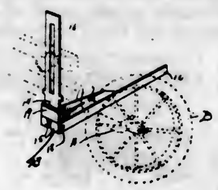
1,351,964. GARBAGE-CAN. MICHELE OROFINO, Philadelphia, Pa. Filed Oct. 13, 1919. Serial No. 330,364. 2 Claims. (Cl. 220—40.)

2. A receptacle comprising a can body, a pair of arms respectively secured to said body at opposite sides thereof, pins respectively held between said arms and said body, a bail connecting said arms, and a removable cover provided at each side with an opening, a laterally disposed passage and an open ended slot alined respectively with



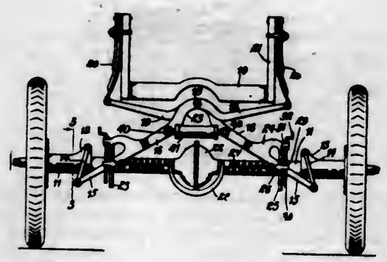
said pins, whereby said pins enter said passages to lock said cover to said body.

1,351,965. CAR-REPLACER. JAKOB PODIEN, Chicago, Ill. Filed July 9, 1919. Serial No. 309,748. 8 Claims. (Cl. 104—265.)



1. In a re-railer, the combination with rails and ties of a railroad, of a pair of members, means for attaching one of said members at the inner side of a rail, means for attaching the other of said members to the outer side of a rail, detachable means overlying the ball of the rail and associated with said last named member for guiding a wheel and flange across the rail to which the member is attached, and means for securing the members to the railroad ties.

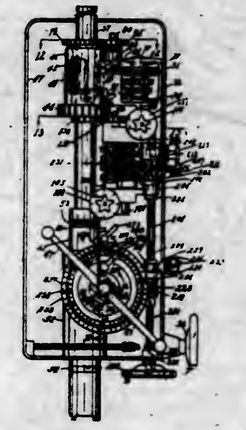
1,351,966. ADJUSTABLE CLAMP. MILTON L. RADTKE, Detroit, Mich. Filed June 16, 1919. Serial No. 304,696. 4 Claims. (Cl. 29—89.)



1. An adjustable clamp comprising a pair of clamping bars, and a plurality of bolts connecting corresponding end portions of said bars, said bolts being threaded into one of the bars and passing through oversize apertures in the other.

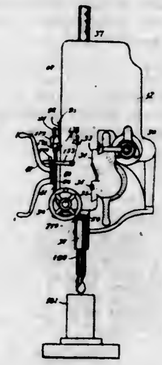
1,351,967. JOINT FOR METALLIC STRUCTURES. FRANK S. RECE, Dallas, Tex. Filed Aug. 20, 1919. Serial No. 318,837. 4 Claims. (Cl. 189—36.)

1. A structure having therein a longitudinal member having a web having an angularly extended terminal portion, a second member hingedly connected to the first named member adjacent said terminal portion, whereby said member shall abut against the terminal portion when the two members are turned at right angles to each other, and a collar on said second named member shiftable into a position to embrace and engage around said second named member and the terminal portion to hold the members in right angular position.



1,351,968. ANTIJOUNCE-SPRING CONSTRUCTION. JOHN J. REYNOLDS, Rantoul, Ill. Filed Feb. 15, 1918. Serial No. 217,343. 2 Claims. (Cl. 267—16.)

1. In a vehicle, a body, a front and a rear axle, two support levers pivoted intermediately of the body over each axle and extending divergently downward, laterally movable supports on each end of each axle connected to the outer ends of the respective levers constructed to permit considerable lateral movement of the levers with respect to the axle springs coengaged between the levers of each axle, the levers adjacent one axle having respective upper extensions toward the sides of the vehicle opposite their lower ends and weight supporting connections between the said extensions and the body; whereby the body may rock relatively to the said one axle, said body being pivotally supported directly upon the pivot of the levers adjacent the other of said axles fixed within certain limits with respect to the horizontal.

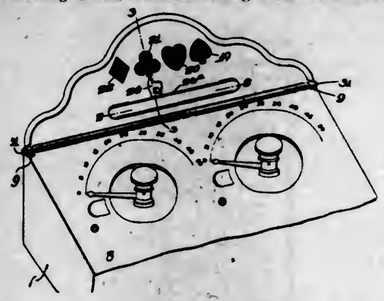


1,351,969. FEEDING MECHANISM FOR METAL-WORKING MACHINERY. AUGUSTUS M. SOSA and ALBERT E. ROBINSON, Cincinnati, and HERMAN W. SCHATZ, Norwood, Ohio, assignors to The American Tool Works Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Oct. 23, 1917. Serial No. 198,034. 20 Claims. (Cl. 77—32.)

1. In a metal drilling machine, the combination of a drill-spindle, means for rotating the same, a gear rotating with said drill-spindle, a variable speed gearing arranged for operative connection with said drill-spindle for feeding the same axially, a pair of axially movable gears arranged for connection respectively with said first-named gear and said variable speed gearing, and means for moving said pair of gears axially out of coactive relation with

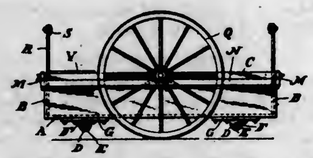
said first-named gear and said variable speed gearing and into coactive relation with the same.

1,351,970. FEEDING MECHANISM FOR METAL-WORKING MACHINERY. AUGUSTUS M. SOSA and ALBERT E. ROBINSON, Cincinnati, and HERMAN W. SCHATZ, Norwood, Ohio, assignors to The American Tool Works Company, Cincinnati, Ohio, a Corporation of Ohio. Original application filed Oct. 23, 1917, Serial No. 198,034. Divided and this application filed Feb. 17, 1919. Serial No. 277,597. 17 Claims. (Cl. 77—33.)



1. In feeding mechanism for metal working machinery, the combination of a tool-spindle, feeding means therefor comprising a face-plate and a rotatable member for feeding said tool-spindle, and means for causing inactive relation in said feeding means comprising a rocking member, an axially movable slide coacting therewith, said face-plate provided with a part adjustable about the axis of rotation of said rotatable member for actuating said slide, and resilient means acting to augment said last-named actuation during the end portion of said actuation.

1,351,971. TRUMP-INDICATING DEVICE. EDWARD STEIGERWALD, Philadelphia, Pa. Filed Feb. 2, 1920. Serial No. 355,718. 3 Claims. (Cl. 116—135.)



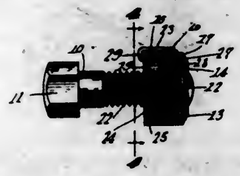
1. A device of the character described including a plate having symbol representations on its outer surface and a recess in its back; and an indicator having a resilient

portion frictionally slidable within said recess, said plate having a slot communicating with said recess and

leading to the outer surface of said plate and out of which the indicator projects; substantially as described.

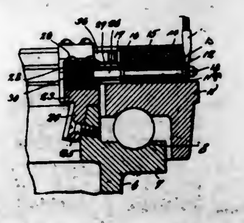
1,351,972. COMPOSITE RAILWAY-CAR. SYLVESTER N. STEWART, Dayton, Ohio. Filed Apr. 3, 1920. Serial No. 371,051. 1 Claim. (Cl. 105—215.)

A railway car comprising a body, a pair of flanged wheels at substantially the front and rear thereof, adapted to travel on rails, an additional pair of wheels intermediate the first mentioned pairs of wheels journaled rigidly to said body and adapted to travel on a road, the lowermost point of the intermediate pair of wheels extending below the flanged wheels.



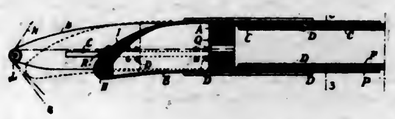
1,351,973. SWITCH-LOCK. LLOYD B. STONE, Tacoma, Wash., assignor to Star Device Manufacturing Company, King county, Wash. Filed June 16, 1919. Serial No. 304,531. 1 Claim. (Cl. 200—42.)

A switch comprising a base, a body secured thereto, having extensions on one end thereof, a slot extending longitudinally therein and transverse slots in the sides and bottom portion thereof, slides mounted in the transverse slots, two pairs of contact members having the contacts of each normally engaged, mounted on the extensions on either side of the body and adapted to be engaged by the slides, and a key having shoulders and recesses for coöperating with the slides to disengage the contacts of each pair of contact members.



1,351,974. NUT-LOCK. JOHN ARTHUR STUBBLEFIELD, Oregon City, Oreg. Filed Feb. 24, 1920. Serial No. 360,588. 2 Claims. (Cl. 151—25.)

1. In a nut lock, a bolt engaging nut having a bore to receive the bolt therein, a substantially triangular recess in the nut communicating with the bore thereof at one of its apices, the recess being closed at its outer side, a pin rigidly mounted in the end wall of the recess and extending into the same, a tapered pawl having a slot slidably and pivotally engaging the pin and having parallel end walls conforming to the shape of the slot, and a resilient member in the recess at the outer side thereof

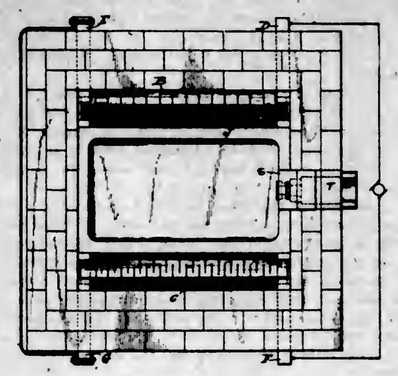


acting against said pawl and permitting movement thereof slidably to disengage from the bolt or pivotally at either side of the recess to permit turning of the nut in a direction opposite to the side at which the pawl is turned and prevent reverse turning, said pawl serving to lock the nut against turning in an intermediate position.

1,351,975. ELECTRIC-GENERATOR ATTACHMENT FOR WINDMILLS. HARRY H. TAYLOR, Hutchinson, Kans. Filed Aug. 5, 1919. Serial No. 315,525. 1 Claim. (Cl. 171—322.)

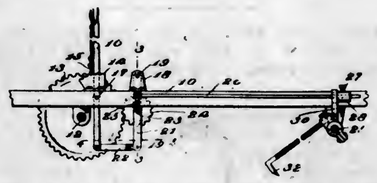
In a generator attachment for windmills, a support having a head, a brush holder comprising a circular body portion having an upper surface arranged in stepped formation, a depending lug secured to the head, said body portion having lateral openings formed therein, spring pressed brush members positioned in the openings, rotary contact rings coöperating with the brushes for conducting electricity, and means for revolving the rings.

1,351,976. FLYING-MACHINE. WILLIAM PHILLIPS THOMPSON, Liverpool, England. Filed Mar. 25, 1919. Serial No. 285,099. 7 Claims. (Cl. 244—12.)



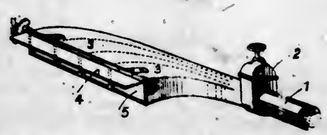
5. A tail box formed of side plates, means for easy movement, and coverings fixed to the side plates and open front, and means for propelling it forward, and means for bringing a strong pressure of wind against it, tending to drive it backward.

1,351,977. ELECTRIC FURNACE. JOHN THOMSON, Brooklyn, N. Y. Filed Nov. 19, 1919. Serial No. 339,119. 7 Claims. (Cl. 204—64.)



1. An electric furnace provided with a compounded, monolithic, zig-zag, carbon resistor formed of two limbs, the ends of each limb being connected to carbon terminals which pass out from the heating chamber to the exterior

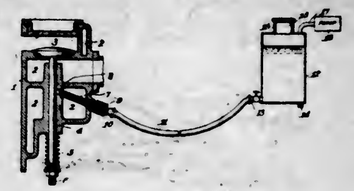
of the furnace, and a metallic connector, outside of the furnace-chamber, attached to one terminal of each of said



pair of terminals, whereby the limbs of said resistor may be electrically incited to series.

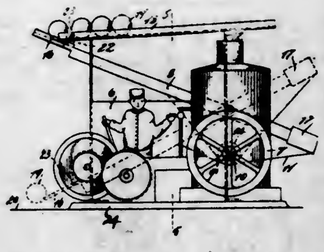
1,351,978. MECHANICAL MOVEMENT. WILLIAM P. ULRICH, Oslo, Minn. Filed Feb. 8, 1919. Serial No. 275,859. 4 Claims. (Cl. 74—14.)

1. A mechanism for converting continuous rotary motion into intermittent oscillatory motion, including a driven pinion, a driving pinion, means for moving the driven pinion into and out of engagement with the driving pinion, a rock shaft, and means actuated by the driven pinion for operating the rock shaft.



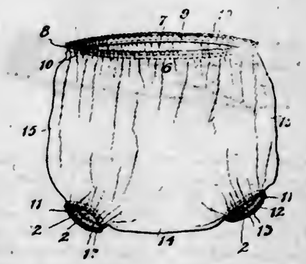
1,351,979. PROCESS AND APPARATUS FOR DREDGING BY SUCTION. MARCEL VALENTIN, Mexico, Mexico. Filed Jan. 3, 1919. Serial No. 269,501. 4 Claims. (Cl. 61—2.)

1. A suction head for dredging the beds of flowing streams, comprising a plurality of juxtaposed funnels connected together and adapted to rest upon the bed with their open mouths arranged in the path of the current, said funnels having their outlet portions curved laterally in the same direction and opening along a horizontal line perpendicular to the direction of flow of the current so as to concentrate along such line the suction created by the passage of the water through said funnels.



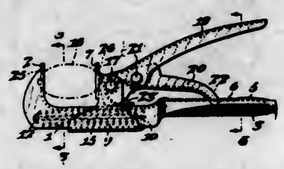
1,351,980. INTERNAL-COMBUSTION ENGINE. CHARLES WHITE, Glen Cove, N. Y. Filed Oct. 16, 1919. Serial No. 330,964. 4 Claims. (Cl. 123—198.)

1. In combination with an internal combustion engine provided with a valve which communicates with the interior of the cylinder, devices for removing carbon and the like from the valve and its stem comprising a reservoir for kerosene or similar carbon-removing material, having a sealing device, an air pump discharging into the upper



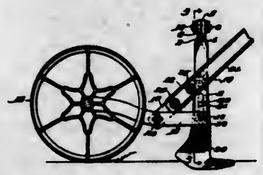
part of the reservoir and a pipe extending from the lower part of the reservoir and discharging against the stem of the valve.

1,351,981. TOY STEAM-SHOVEL. CARL F. ZIPF, Johnstown, Pa. Filed Feb. 11, 1920. Serial No. 357,809. 3 Claims. (Cl. 46—37.)



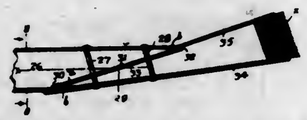
1. In a mechanical toy, an angularly disposed magazine to contain spherical elements and having an opening adjacent the lower end thereof to engage the spheres to prevent same from rolling out of the magazine, a gravity operated beam to remove the spheres one by one from the magazine, and means carried by the gravity operated beam, at the receiving end, to displace the spheres from the opening in the magazine, and cause same to roll onto said beam when said gravity operated beam is brought into position to receive a sphere from said magazine.

1,351,982. GARMENT-PROTECTOR. MARTIN ZWICKE, New York, N. Y., assignor to I. B. Kleinert Rubber Company, New York, N. Y., a Corporation of New York. Filed Sept. 18, 1919. Serial No. 324,356. 6 Claims. (Cl. 128—287.)



1. A garment formed from a flat blank, said blank being provided with leg openings formed in the body of the blank and entirely within the outline of the same, said garment being seamless and formed by gathering or shirring the blank around its entire outer edge to produce a bag-like body.

1,351,983. NUTCRACKER. SAMUEL L. ALLEN, Moorestown, N. J.; Sarah H. Allen, Charles J. Allen, Elisabeth R. Allen, Susan J. Allen, and Emily Allen Elfreth executors of said Samuel L. Allen, deceased. Filed June 22, 1916, Serial No. 105,119. Renewed Apr. 14, 1920. Serial No. 373,933. 3 Claims. (Cl. 146—3.)



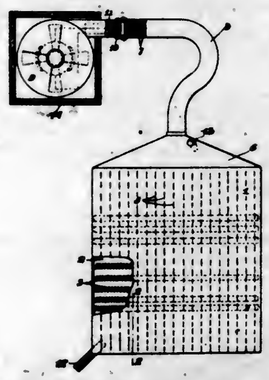
1. A nut cracker having a frame provided with a jaw and handle, a cross-head slidable on said frame and carrying a jaw in alinement with the jaw on said frame, a spring tending to force said jaws together, a handle pivoted to said cross-head, a pawl pivoted to said handle and arranged to engage said frame to effect the progressive approach of said jaws when said handles are relatively oscillated.

1,351,984. AGRICULTURAL IMPLEMENT. SAMUEL L. ALLEN, Moorestown, N. J.; Sarah H. Allen, Charles J. Allen, Elisabeth R. Allen, Susan J. Allen, and Emily Allen Elfreth executors of said Samuel L. Allen, deceased. Filed Feb. 5, 1917. Serial No. 146,653. 6 Claims. (Cl. 97—42.)

1. An implement of the class described, comprising frame members having transversely extending arms adjustably connected and provided with depending legs, arranged for attaching perpendicularly adjustable ground working tools, carrier supports connected with said legs, and diagonal braces connecting said legs and supports, and serving as handle brackets, said arms and legs being connected by intermediate portions which curve outwardly beyond the plane of said legs.

1,351,985. MUFFLER. HALVOR ANDRESEN, New York, N. Y., assignor to The Vacuum Muffler Corporation, New York, N. Y., a Corporation of New York. Filed May 24, 1917. Serial No. 170,626. 10 Claims. (Cl. 137—160.)

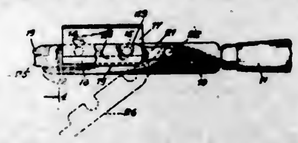
1. A muffler of the class described comprising in combination a longitudinally extending tubular member, and a member providing an inclined diaphragm, the outer portion of which diaphragm approaches approximately to within two millimeters of the inner wall of the longitudinally extending tubular member but is spaced from said wall a sufficient distance to permit the flow of gases through the space between the longitudinally extending outer member and the diaphragm.



2. A muffler comprising a casing having a longitudinally extending tubular portion and an inclined diaphragm secured to said casing, which inclined diaphragm extends adjacent to the wall of the longitudinally extending tubular portion and makes an acute angle of approximately 15 degrees with the longitudinally extending axis of said tubular portion, the construction being such that there is provided between the casing and the diaphragm a long continuous narrow passageway of two millimeters or less in width through which flow the gases passing through the muffler.

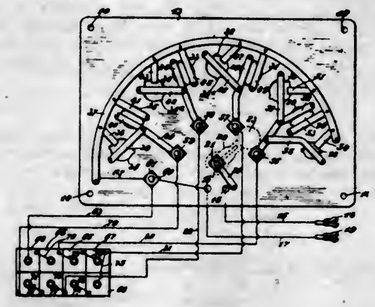
3. A muffler of the class described comprising a longitudinally extending tubular member and a member providing an inclined diaphragm portion that approaches the wall of the longitudinally extending tubular member so that there is defined between said members a narrow passageway of two millimeters or less in width.

4. A muffler of the class described comprising a longitudinally extending tubular member and a member providing an inclined diaphragm portion that approaches the wall of the longitudinally extending tubular member so that there is defined between said members a narrow passageway of approximately two millimeters or less in width, the construction being such that the smallest area for the flow of gases through the muffler is the area between said inclined diaphragm and the wall of said tubular member.



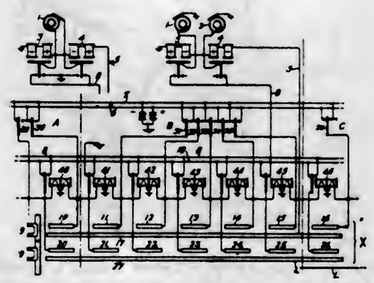
5. A muffler comprising in combination an outer member having therein an inclined diaphragm member for providing a relatively long narrow space through which gases flowing through the muffler must pass, a third member spaced from said diaphragm member, and means for supplying water to the space between said third member and said diaphragm member.

1,351,986. HOT APPLIANCE. HJALMAR V. BARCLAY, New York, N. Y. Filed May 22, 1918. Serial No. 236,022. 3 Claims. (Cl. 219—39.)



1. In a hot appliance, in combination, a hollow, flexible pad, having an inlet and an outlet, a blower, an electric heater, means for conveying air from said blower and heater to said inlet, and means for admitting regulated quantities of cool air to said inlet.

1,351,987. RAZOR-BLADE HOLDER. ANTHONY F. BARRO, New York, N. Y., assignor of one-half to Alphonse A. Dibblee, New York, N. Y. Filed Dec. 14, 1918. Serial No. 266,715. 1 Claim. (Cl. 30—25.)

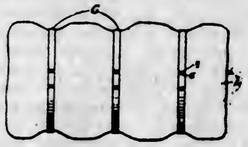


The combination, in a razor blade holder with a flat elongated plate having protruding spaced lugs on one of its faces and having a handle on one of its ends as well as having a shoulder on its second end, of a clamping element comprising a striplike body with a projecting arm pivoted to the flat plate adjacent to the handle so that the body and arm may be swung crosswise of the plate back and forth with relation to the lugs, said body having a lengthwise recess in opposition to the plate, and having spaced notches in one of its edges for reception of the lugs, and a hook on the end of the body opposite to its arm for detachably engaging the shoulder of the plate whereby the body and the plate will be releasably locked together.

1,351,988. ELECTRICAL TESTING DEVICE. CARL LOUIS BEGAS, Brooklyn, N. Y. Filed June 8, 1918. Serial No. 238,884. 5 Claims. (Cl. 175—183.)

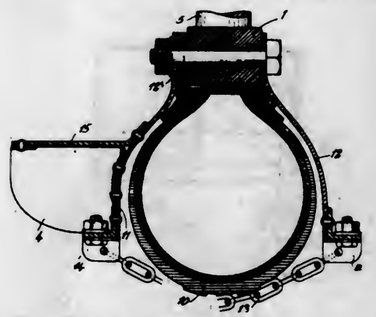
1. An electrical testing device, comprising a board provided with holes for receiving lamp bulbs to be tested, contact strips mounted upon said board for engaging contact members carried by said lamp bulbs, a battery made up of a plurality of cells connected together, and conductors extending from said contact strips to different cells of said battery.

1,351,989. TELEGRAPH SYSTEM. JOHN H. BELL, South Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Nov. 25, 1919. Serial No. 340,449. 4 Claims. (Cl. 178—63.)



1. In a telegraph transmitting system, a set of pole changers, a source of alternating current, a distributer having two groups of commutator segments, a pair of polarized relays connected to said source of alternating current and selectively controlled by the coöperation of said pole changers and one of said groups of segments for sending positive or negative half cycles of said alternating current to line through said second group of segments.

1,351,990. MANUFACTURE OF ETHYLIDENE DIACETATE. MAURICE BEUDET, Lyon, France, assignor to Societe Chimique des Usines du Rhone, Anciennement Gilliard P. Monnet et Cartier, Paris, France. Filed Mar. 22, 1919. Serial No. 284,373. 2 Claims. (Cl. 23—24.)

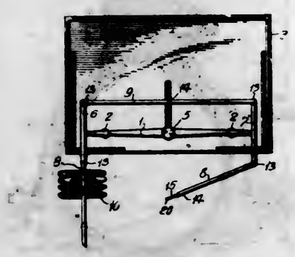


1. The process of purifying the crude products of the preparation of ethylidene diacetate obtained by the action of acetylene on acetic acid in presence of mercury compounds, consisting in decanting and diluting said crude products, agitating the solution with an organic solvent of ethylidene diacetate non miscible with water, washing and drying the solution, and separating the ethylidene diacetate by distillation.

1,351,991. CONNECTING MEANS FOR BALE-BANDS. EMANUEL V. BENJAMIN, New Orleans, La. Filed Aug. 15, 1916. Serial No. 115,081. 1 Claim. (Cl. 24—21.)

A bale-band having curved or arcuate overlapping end portions and connected together by rivets at said portions, said arcuate overlapping end portions being chamfered, toward the band, said rivets lying in the radius which is in the line of the longitudinal axis of the band and between the focus of the arc forming the extremities of the band and the periphery thereof.

1,351,992. WHEEL FOR POWER-DRIVEN WINTER-VEHICLES. KARL AUGUST BLYSTAD, Kongsvinger, Norway. Filed Dec. 5, 1919. Serial No. 342,799. 2 Claims. (Cl. 301—40.)

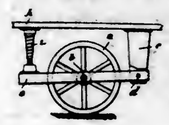


2. In a device of the kind described a supporting plate adapted to be secured to the side of a wheel felly and having a portion projecting outwardly of the periphery and offset laterally therefrom, and a traction plate consisting of an angle plate having its flanges disposed at right angles, one of said flanges being secured to the offset portion of the supporting plate and the other flange being substantially triangular in form with its apex toward the periphery of the wheel and projecting laterally away from said supporting plate and reinforcing flanges extending outwardly from the supporting plate above and below the traction plate.

1,351,993. TYPEWRITING-MACHINE. LEE S. BURRIDGE, deceased, late of New York, N. Y., by Francis O. Burridge, executor, New York, N. Y., assignor, by mesne assignments, to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Original application filed Sept. 27, 1915, Serial No. 52,594. Divided and this application filed Dec. 3, 1917. Serial No. 205,109. 4 Claims. (Cl. 197—91.)

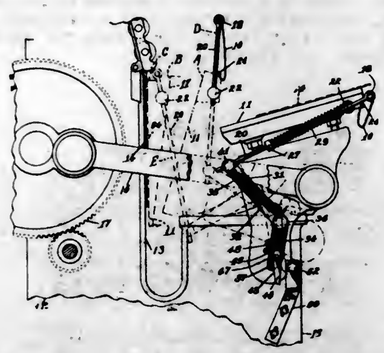
1. In a typewriting machine, in combination, a platen-carriage, letter-spacing mechanism therefor, including an escapement wheel and mechanism coöperating therewith to control its movements in normal letter-feeding direction, said wheel and controlling mechanism being so related as to permit a back-spacing rotation of said wheel in the reverse direction, and back-spacing mechanism for said wheel, comprising a back-spacing pawl, a movably mounted pawl-carrier therefor, means normally tending to move said pawl relatively to said carrier to a position such as to engage a tooth of said escapement wheel, a stop fixedly mounted on said carriage, an abutment on said pawl, normally held in engagement with said stop, and preventing movement of said pawl to its tooth-engaging relation, and means for moving said carrier so as to separate said abutment from said stop, to permit said pawl to be moved into tooth-engaging relation with said escapement wheel, and rotate said wheel in a reverse direction, to an extent such as to bring a different tooth of said escapement wheel into position to be engaged and held by said controlling mechanism.

1,351,994. DISPLAY-RACK. GEORGE F. COOPER, Detroit, Mich. Filed Feb. 13, 1918. Serial No. 216,982. 1 Claim. (Cl. 211—16.)



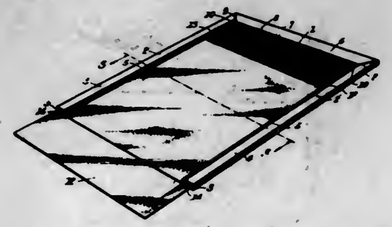
The combination of a cabinet having a base piece rotatable and bodily shiftable therein with an upright end post rigidly secured on each end of the base, a transverse end bar rigidly supported between its ends on the upper end of each post, upright sockets on the extremities of the end bars, and side rails connecting corresponding extremities of the end bars, each formed of a pair of tubular sections, one end of each being downturned and journaled in the socket of the end bar, whereby the section may be turned into alinement with the end bar, the free ends of the sections being detachably connectible in a flush joint to form a continuous side rail having a smooth unbroken exterior when they are turned into alinement with each other.

1,351,995. FIXED SEAT FOR USE IN CINEMAS, THEATERS, AND THE LIKE. PHILIP CORNISH, Leytonstone, England. Filed June 22, 1920. Serial No. 390,956. 4 Claims. (Cl. 155—130.)



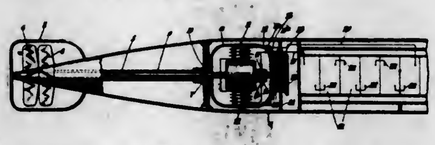
1. Seating arrangement for use in a cinema consisting of under frames adapted to be secured to the floor of the cinema and located at distances apart corresponding to a plurality of seats, vertically disposed members of approximately L-shape secured to said under frames, longitudinally disposed members secured to said vertically disposed members, and vertically disposed members of approximately L-shape secured to said longitudinally disposed members intermediate between the first mentioned approximately L-shaped members in positions corresponding to the ends of the separate seats.

1,351,996. MULTIPLE WHEEL FOR ROAD-VEHICLES. CAMILLO CORTE, Rome, Italy. Filed July 8, 1919. Serial No. 309,504. 2 Claims. (Cl. 280—124.)



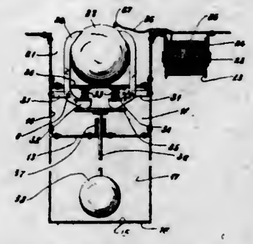
1. A vehicle wheel, comprising a plurality of rotatable elements arranged in alinement transversely of the vehicle and adapted to be spaced below the vehicle body, and resilient means for permitting independent vertical movement of said elements relative to the vehicle body.

1,351,997. GUARD FOR PRINTING-PRESSES. DAVID CURRY, New York, N. Y. Filed Apr. 26, 1919. Serial No. 292,818. 3 Claims. (Cl. 74—105.)



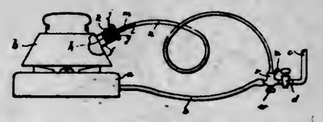
1. In a guard for a printing press having a vertically disposed type bed and having a platen operably movable toward and from the type bed, the combination with a frame slidably and pivotally mounted on the sides of the platen, of a flexible screen held to the frame and held to the platen for being adjusted upwardly and downwardly relative to the top of the platen, levers mounted on the platen for raising the frame, carrying pawls whereby the levers may be tripped near the closing movement of the platen, and springs for causing retracted adjustment of the frame and screen.

1,351,998. PHOTOGRAPHIC-FILM SHEATH. WILLIAM F. FOLMER, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed Nov. 26, 1919. Serial No. 340,862. 8 Claims. (Cl. 95—68.)



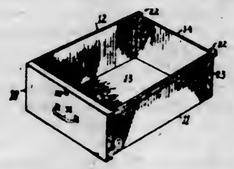
1. A sheath for photographic film consisting of a flat plate having at its edges flanges overhanging one surface thereof with the upper surfaces of the flanges parallel to the plate, means in connection with the flanges for holding the edges of film inserted in said sheath with a forward inclination, whereby the body of such a film will be held flat.

1,351,999. DRIVING MECHANISM. HARRY E. HEATH, Newark, N. J., assignor to Frederick Conlin, Elizabethport, N. J. Filed June 19, 1915. Serial No. 35,028. 1 Claim. (Cl. 172—36.)



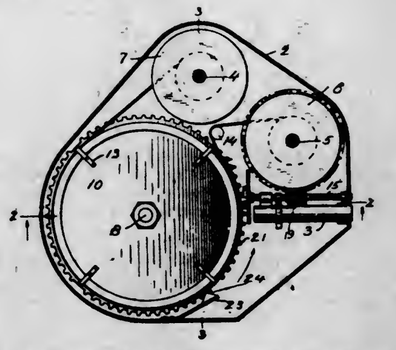
In combination, a motor armature and field winding, a rotatable shaft carrying one of said motor elements, a casing rotatably mounted on said shaft and carrying the other of said elements, hubs on said casing, a partition having a fixed bearing for one of said hubs, bevel gears mounted upon said casing and said shaft on opposite sides of said partition, and an intermediate gear carried by said partition and meshing with said first mentioned gears.

1,352,000. SUNKEN-SHIP INDICATOR. JOE HLAVATY, Jr., Wallis, Tex. Filed July 16, 1919. Serial No. 311,161. 2 Claims. (Cl. 9—9.)



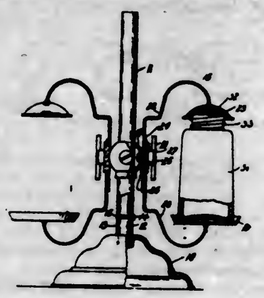
1. In a device of the class described, the combination with a freely rotatable drum, a cable wound thereon, and a float to which the free end of the cable is connected, of a casing in which said float is normally contained, said casing having a plurality of compartments, a pair of spring-impelled lever arms adapted to hold said float in confinement, a second float in said casing adapted to rise upon the entry of water into the lower of said compartments, and connections between said second float and said lever arms whereby the first float is released upon raising of the second float.

1,352,001. DEVICE FOR AUTOMATIC EXTINCTION OR DAMPENING OF THE FLAME IN GAS-COOKERS. ANDERS CHRISTIAN EMIL HOJGAARD, Copenhagen, Denmark. Filed Apr. 13, 1920. Serial No. 373,641. 9 Claims. (Cl. 126—351.)



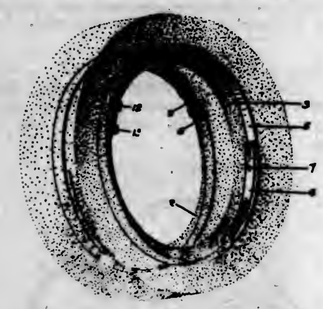
5. A gas supply controlling device, comprising in combination, a kettle having a spout, a flexible sleeve in communication at one end thereof with the gas supply and having at its opposite end a hood removably inserted into said spout, a flexible rod within said sleeve, means secured at one end of said rod for obstructing the passage of gas, and a spring-pressed piston secured to the opposite end of the rod and slidable within said hood.

1,352,002. KNOCKDOWN SHEET-METAL DRAWER. EMIL J. JONES, Jamestown, N. Y. Filed Apr. 26, 1920. Serial No. 376,623. 9 Claims. (Cl. 45—7.)



1. In a drawer, a front plate having inturned end and top and bottom flanges, spaced lugs on each of said end flanges having slots therein and spaced lugs on said bottom flange, drawer side plates and a bottom plate having similarly spaced slots to receive said lugs therethrough, a rear plate for the drawer head having locking lugs spaced to enter said slots in said end lugs to hold said part firmly in position, and a rear end plate for said drawer.

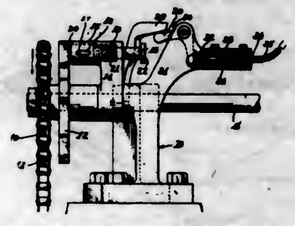
1,352,003. COMBINED MOTION-PICTURE CAMERA AND PROJECTOR. JOSEPH S. KENNARD, Jr., New York, N. Y. Filed Dec. 15, 1919. Serial No. 345,018. 2 Claims. (Cl. 88—17.)



1. In a picture-taking and projecting machine, the combination of a casing provided with a lens, means for supporting a pair of film spools, means for rotating one of said spools, a member mounted for rotation in said casing, a transparent annulus secured to said member in line with the lens and adapted to support a film during its passage from one spool to the other, and means for causing intermittent rotation of said member during the rotation of the spool.

1,352,004. CASTER. FRED KESSEL, New York, N. Y. Original application filed July 11, 1918, Serial No. 244,441. Divided and this application filed Dec. 30, 1918. Serial No. 268,806. 1 Claim. (Cl. 65—5.)

A device of the character described, comprising a base, a standard rising therefrom made of two sections, one of said sections being fixed to said base and the other one being rotatable on said fixed section, a condiment holder support upon said rotatable standard section including two oppositely extending resilient brackets, one of which is provided with a longitudinal slot and the other one with a hole, a clip drawn over the meeting ends of said brackets provided with an aperture in alinement with said hole, a clamping screw passing through said hole, slot and aperture into said rotatable standard section, a base carried by one of said brackets, and a cover fixed in alinement with said second-mentioned base to the other one of said brackets.

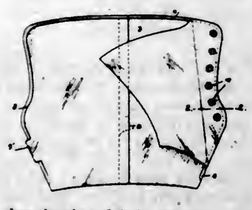


1,352,005. GRINDING-WHEEL-BALANCING DEVICE. THURE LARSSON, Worcester, Mass., assignor to Norton Company, a Corporation of Massachusetts. Filed Feb. 9, 1918. Serial No. 216,168. 11 Claims. (Cl. 74—6.)

6. In combination, an unbalanced grinding wheel having a peripheral surface and a balancing ring circumferentially movable to any position on said surface and adapted to clamp thereagainst for balancing the wheel.

1,352,006. CONTROLLING MEANS. WILLIAM W. LASKER, Brooklyn, N. Y., assignor to Powers Accounting Machine Company, New York, N. Y., a Corporation of Delaware. Filed Aug. 26, 1916. Serial No. 116,958. 3 Claims. (Cl. 74—46.)

1. In a device of the character described, the combination of a support; a bearing on said support; a shaft rotatable in said bearing; a driving means loosely mounted on said shaft and provided with projections; a lever fixed on said shaft; a locking member movably carried on said lever and yieldably pressed into the path of said projections; a cam fulcrumed on said support and yieldably moved into the path of said member and adapted on the rotation of said lever to withdraw the locking member out of the path of movement of said projections; a bell crank freely movable and adapted to move said cam from the path of said member; a control key; a flexible connection connected to said control key and operable to actu-



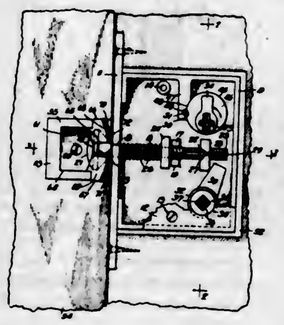
ate said bell crank, and a spring for yieldably retaining said control key in inactive position and for withdrawing said control key and the thereto connected flexible connection out of bell crank actuating position.

1,352,007. HEEL-BREASTING MACHINE. ROBERT E. LAUGHTON and PHILIP E. BARNES, Haverhill, Mass., assignors to Hamel Shoe Machinery Company, a Corporation of Massachusetts. Filed Oct. 17, 1918. Serial No. 258,492. 16 Claims. (Cl. 12—47.)

1. In a heel breasting machine, in combination, a work support, a knife reciprocable toward and from said support, an actuator for said knife, means normally operative to connect said knife to its actuator, and a work-contacting device supported independently of said knife and actuator and constructed and arranged to disconnect said connecting means.

1,352,008. RUBBER SHOE AND METHOD OF MAKING THE SAME. GEORGE L. LAWRENCE, Jr., Melrose, Mass., assignor to Boston Rubber Shoe Company, a Corporation of Massachusetts. Filed Mar. 26, 1920. Serial No. 369,044. 3 Claims. (Cl. 36—4.)

2. A rubber shoe having fabric quarters provided with a coating of rubber on their outer faces and vulcanized at their edges to the tongue and vamp, said quarters having



the fabric and rubber along their front edges and tops folded upon themselves to bring the outer coating of rubber into contact with the edge portions of the tongue and outer portions of the vamp along the joints of said edge portions, to provide a good bonding material at said joints between said members.

1,352,009. WRENCH. VICTOR A. LILLQUIST, Superior, Wis. Filed Nov. 17, 1919. Serial No. 338,602. 2 Claims. (Cl. 81—136.)

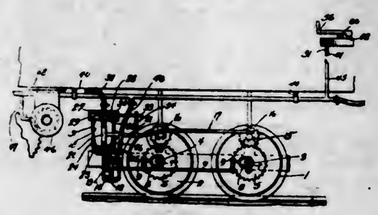
2. The combination with a wrench of the character described including a main shank with a fixed working jaw at one end and an L-shaped termination at the other end, a slidable shank carrying a working jaw for cooperative action with the other working jaw, and having teeth formed in the lower end thereof, a two part handle, and an expansive spiral spring intermediate of the end of the slidable shank and the L-shaped termination of the main shank, of a pivoted toothed lever intermediate of the two parts of the handle, engaging the toothed portion of the slidable shank for holding it in any predetermined position and an expansive spiral spring intermediate of the end of the first mentioned spiral spring and the L-shaped termination of the main shank, engaging the operative end of the lever and holding it normally extended adjacent said L-shaped extension.

1,352,010. DOOR-LOCK. WILLIAM A. LURIE, New Orleans, La. Filed Dec. 12, 1919. Serial No. 344,366. 5 Claims. (Cl. 70—29.)

4. In door locking mechanism, the combination of a lock frame secured to the door, a lock bolt extending through said frame and having a locking head at its outer end, a spring tending to shift said bolt inwardly, a lock barrel extended into said frame from the outside of the door, a wall in said frame adjacent said lock barrel having a pocket for receiving said barrel, a screw threading partly into said wall and said barrel for preventing rotation of said barrel, a key cylinder rotatable in said barrel and having an arm at its inner end within said frame, and an adjustable abutment on said bolt with which said tongue coöperates to shift said bolt outwardly.

1,352,011. SAFETY-RAZOR-BLADE HOLDER. FRANK MCEOWN, New York, N. Y. Filed Nov. 22, 1919. Serial No. 339,882. 5 Claims. (Cl. 30—25.)

2. A safety razor blade holder comprising a pair of relatively distended blade clamping members, and a slip cap normally engaging said members at the outer ends thereof when in clamped or distended position and



means on said members and said cap to prevent accidental removal of the cap.

1,352,012. TOOL-HANDLE. WALTER MCKENZIE, Tulsa, Okla. Filed May 25, 1918. Serial No. 236,571. 1 Claim. (Cl. 145—61.)

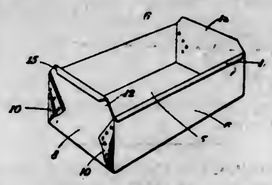
A handle comprising an annular series of wires intertwisted into a coil formation of smaller diameter intermediate of its length, the wires at the ends of the coil being continued straight and parallel with each other.

1,352,013. COMPRESSED-AIR PUMP. HENRY MANDELBAUM, Brooklyn, N. Y. Filed Apr. 18, 1919. Serial No. 291,117. 2 Claims. (Cl. 230—27.)

1. An air compressor including a reciprocatory piston, a piston rod attached to said piston, means for reciprocating said piston, a valve casing mounted upon said air compressor, a slide valve situated within said casing, a valve rod extending from said valve, an arm attached to said piston rod and having a slot adapted to receive the valve rod, a block situated within said slot, and means provided for forcing said block in frictional engagement with said valve rod.

1,352,014. PROCESS OF DYEING RAW SILK. EUGENE L. MAUPAI, New York, N. Y. Filed June 14, 1920. Serial No. 388,811. 3 Claims. (Cl. 8—5.)

1. The process of treating and dyeing grege silk, which consists in first hardening the silk threads with a metallic salt, thereupon washing the silk, and then dyeing the same with vat colors.



1,352,015. LIQUID POLISH. ARSENIO FERRER MENDEZ, Camajuani, Cuba. Filed Dec. 6, 1919. Serial No. 343,041. 3 Claims. (Cl. 134—24.)

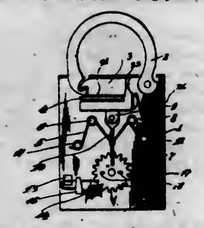
1. As a new article of manufacture a liquid comprising a drying oil, alcohol, banana spirit, camphor and gum-lac.

1,352,016. BOX. EDWIN S. MIX, Rochester, N. Y., assignor to North East Electric Company, Rochester, N. Y., a Corporation of New York. Filed Feb. 25, 1919. Serial No. 279,075. 1 Claim. (Cl. 220—97.)

A box formed of an integral blank of sheet-material bent upwardly to produce sides and ends; the ends projecting upwardly beyond the sides; and the surplus material at the corners being bent outwardly, doubled in the middle, and folded and secured against the ends of the

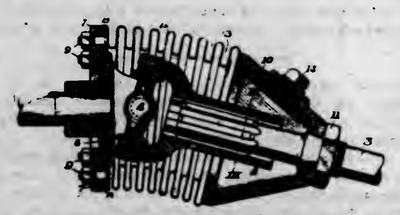
box, with a portion of said material bulging outwardly from the ends so as to provide abutments which coöperate

with the upwardly-projecting end-portions of a similar box when the boxes are stacked.



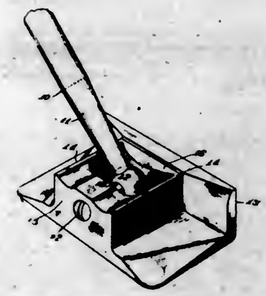
1,352,017. MULTIPLATE DRIVE-CHAIN. FRANK L. MORSE, Ithaca, N. Y., assignor to Morse Chain Company, Ithaca, N. Y., a Corporation of New York. Filed Sept. 8, 1917. Serial No. 190,283. 6 Claims. (Cl. 74—32.)

1. A multiplate drive chain having links comprising a plurality of plates interspersed with the plates of adjacent links, and spring means for exerting frictional resistance to the turning movement between adjacent links.



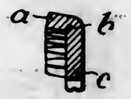
3. A multiplate drive chain having pintles and links comprising a plurality of plates interspersed upon the pintles with the plates of adjacent links, and a spring link plate inserted between the plates of certain of the links for pressing the same laterally.

1,352,018. LOCK. STANLEY MURASKI, Waterbury, Conn. Filed Sept. 18, 1919. Serial No. 324,345. 2 Claims. (Cl. 70—105.)



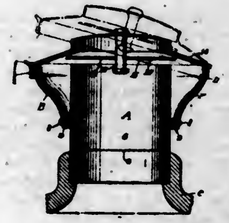
2. A lock comprising a shackle, a member slidable to engage said shackle, a finger pivotally suspended from said slidable member, springs having their tips contacting with said finger at mutually opposite sides, a disk having bosses on the surface thereof, said bosses adapted to engage said finger.

1,352,019. CASING FOR SHAFT-JOINTS. GEORGE F. MURPHY, Pittsburgh, Pa. Filed Oct. 29, 1918. Serial No. 260,083. 2 Claims. (Cl. 64—91.)



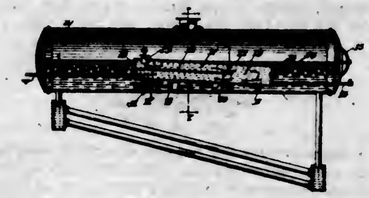
1. The combination with two shaft members connected by a universal joint, and one of said members also having a longitudinal slip-joint therein, of an oil-tight flexible casing connected to said members to rotate therewith and entirely surrounding and inclosing said joint, together with means whereby lubricant may be introduced into said casing, substantially as described.

1,352,020. GOLF-CLUB. ANDREW P. OLSON, Chicago, Ill. Filed Apr. 23, 1919, Serial No. 292,203. Renewed June 12, 1920. Serial No. 388,670. 3 Claims. (Cl. 46—4.)



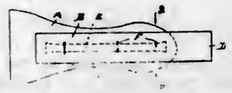
1. In a golf-club, a shaft, a putter-head having a playing face and a horizontal sole, a ball and socket joint between the shaft and top of the head to allow the free end of the shaft to move above the head in all directions about its pivotal point, and a pressure-releasing holding device to normally retain the shaft in fixed position.

1,352,021. MANUFACTURE OF TOOTHED BEVEL-GEAR WHEELS OR CROWN-WHEELS. OTTO R. OPPERMAN, London, England. Filed Dec. 29, 1919. Serial No. 348,246. 1 Claim. (Cl. 29—159.)



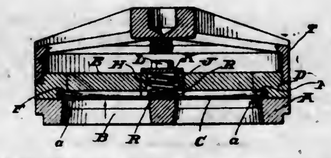
The improved method of manufacturing a toothed bevel gear or a crown wheel consisting in cutting the gear in the form of a spur-wheel, forming an annular groove in one side face of the wheel at the roots of the teeth to facilitate the bending over of the toothed portion and bending the teeth over at the required angle in the direction of the groove to form bevel or crown teeth.

1,352,022. BREATHER FOR GAS-ENGINES. ANTONIO PAJALIC, Dearborn, Mich. Filed Sept. 29, 1919. Serial No. 327,030. 5 Claims. (Cl. 121—194.)



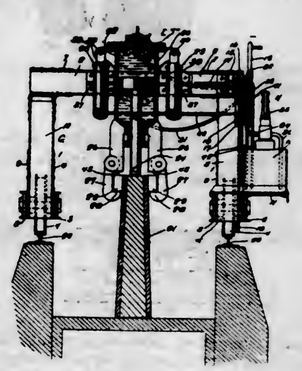
1. A breather for gas engines comprising an inner cylindrical tube open at both ends, having its lower open end communicating with the crank case and its upper open end constituting an outlet, an outer casing having its lower portion spaced from said inner casing, and supported thereon, and curving upwardly and away from said inner casing, and having a top section extending entirely across the upper open end of said inner section, a stem vertically depending from said upper section, and a disk valve mounted for vertical movement on said stem and adapted to normally close the upper open end of said inner casing, and to be operated by the pressure in said crank case to uncover said upper end, said disk valve being provided with a circumferential series of ports.

1,352,023. FEED-WATER HEATER AND PURIFIER. THOMAS T. PARKER, Brooklyn, N. Y. Filed Oct. 4, 1919. Serial No. 328,464. 2 Claims. (Cl. 122—428.)



1. In a feed-water heating and purifying structure for steam boilers, the combination with a steam and water drum, of an elongated casing having closed ends and arranged within and longitudinally of said drum, a horizontal partition within said casing extending from one of said ends toward and terminating short of the other end, to provide upper and lower longitudinal water passes, and also a common junction chamber therefor at one end of the casing, a feed-water supply inlet for the lower pass, a discharge outlet for the upper pass, said inlet and outlet being at the end of the casing remote from the junction chamber, and depending baffles located within said passes in proximity to the junction chamber.

1,352,024. SHANK-STIFFENER. JOSEPH E. PECKHAM, Newton Highlands, Mass. Filed Mar. 21, 1918. Serial No. 223,819. 3 Claims. (Cl. 36—76.)



1. A shank stiffener comprising a body portion, a resiliently-stiff reinforcing element seated on said body portion and scored to provide an anchoring groove for a staple, and a staple having its legs embedded in the body portion at either longitudinal edge of the reinforcing element and having its cross-bar lodged in said groove of the reinforcing element and securing said element against relative movement on said body portion.

1,352,025. PLATE-VALVE. WILLIAM PRELLWITZ, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Apr. 2, 1920. Serial No. 370,741. 8 Claims. (Cl. 277—46.)

7. A valve comprising a valve seat having a plurality of passage ways, plate valves adapted to be seated on the valve seat over said passage ways, a guard mounted on the valve seat over said valve plates, apertures in said guard passing through the same from face to face and adapted to lie opposite the valve plates, springs removably inserted in said apertures from the outside, and a guard plate removably connected to said guard for holding the springs in the apertures over the valve plates and applying compression to said springs.

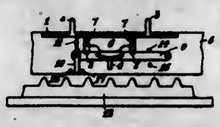
1,352,026. INGOT-STRIPPER. THORNTON W. PRICE, New York, N. Y. Filed Nov. 5, 1918. Serial No. 261,256. 12 Claims. (Cl. 22—95.)

3. A device of the class described comprising a stripper and a carriage therefor, the stripper including parts adapted to engage the mold and the ingot and being movable in opposite directions for stripping the mold from the ingot, and hydraulically operable means engaging between the carriage and said parts operable to adjust said parts relative to the carriage.

1,352,027. GARMENT. HENRY L. RISSMAN, Chicago, Ill. Filed Feb. 6, 1919. Serial No. 275,323. 1 Claim. (Cl. 2—62.)

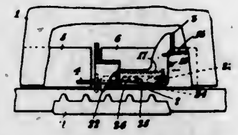
A coat having a collar and lapels, flaps forming continuations of and extending downwardly from said collar along the shoulders, said flaps being hidden beneath said lapels when the coat collar is down, said flaps being adapted to be crossed in front of the neck and to be entirely exposed to view when the coat is buttoned and the collar partly raised, and buttons on the coat for receiving the flaps and holding them in crossed position.

1,352,028. PHOTOGRAPHIC OBJECTIVE. FRANK E. ROSS, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed Mar. 17, 1919. Serial No. 283,198. 12 Claims. (Cl. 88—57.)



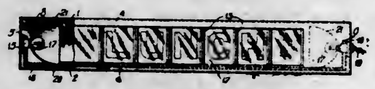
1. An objective consisting of two spaced components, one of which is positive and comprises two contacting

lenses and the other of which is negative and comprises three contacting lenses, the sum of the thicknesses of the



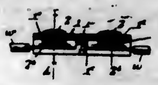
two components being at least one-eighth of the equivalent focal length of the objective.

1,352,029. CALCULATING-MACHINE. KARL VIKTOR RUDIN, Stockholm, Sweden. Filed Apr. 2, 1919. Serial No. 287,036. 2 Claims. (Cl. 235—63.)



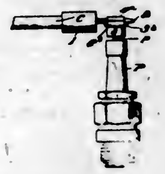
1. Calculating machine carriage shifting mechanism, comprising a finger bar arranged for longitudinal and for vertical movement, a shaft, a flap under the finger bar and having lateral arms pivotally mounted on the shaft, a lever bar pivotally mounted at one end, arranged under the flap and for vertical angular movement in a plane at right angles to that of the flap, and a spring-held tooth pivotally mounted at the free end of the lever bar, in combination with a rack and a locking lever, said locking lever being at right angles to and under the said lever bar.

1,352,030. STEP-BY-STEP MECHANISM IN CALCULATING-MACHINES. KARL VIKTOR RUDIN, Stockholm, Sweden. Filed Apr. 2, 1919. Serial No. 287,037. 2 Claims. (Cl. 235—63.)



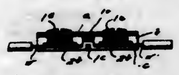
1. In a step-by-step mechanism for calculating machines of the class described, in combination with a toothed bar, a carriage and a locking element pivotally mounted thereon, a pair of members to actuate said locking element, said members being pivotally mounted, one of said members being slidably engaged with the locking element, and the other member having a tooth for engagement with said toothed bar and being slidably mounted on said pivot.

1,352,031. ILLUMINATED SIGN. GEORGE H. SCHAFFNER, Detroit, Mich. Filed Dec. 8, 1916. Serial No. 135,770. 1 Claim. (Cl. 40—132.)



An illuminated sign comprising a casing having a wall provided with a sight opening approximately the length of said casing, an angle support carried by the casing wall at the lower edge of the sight opening and extending throughout the length of said opening, an angle retaining member depending from the top of said casing adjacent the sight opening, said angle support and said retaining member having vertical flanges cooperating with the casing wall adjacent said angle support and said retaining member in providing an exhibitor holder, inter-exchangeable detachably held in the exhibitor holder of the casing at the sight opening thereof, lamp holders on the inner sides of the end walls of said casing, reflectors in the ends of said casing supported from the bottom thereof and said lamp holders, said reflectors confronting each other, and lamps in said holders and reflectors with electrical connections in the bottom of said casing connecting said lamps.

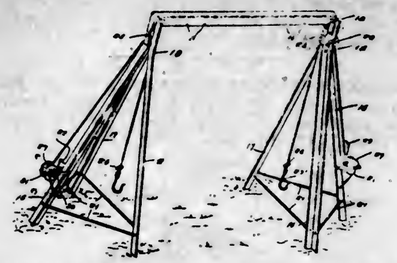
1,352,032. ELECTRICAL CONNECTOR. HOWARD B. SHERMAN, Battle Creek, Mich. Filed Jan. 22, 1919. Serial No. 272,472. 3 Claims. (Cl. 287—78.)



1. A connector for the purpose described, comprising a tubular body portion having screw threaded openings in its top and recesses in its inner side walls adjacent and of greater diameter than these openings, and a partition intermediate the said openings; screws engaging said openings and provided with flanges on their inner ends engaging said recesses to prevent withdrawal of the screws.

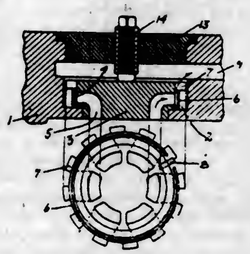
1,352,033. ELECTRICAL CONNECTION FOR SPARK-PLUGS, &c. HOWARD B. SHERMAN and FRANK D. MALTBY, Battle Creek, Mich.; said Maltby assignor to said Sherman. Filed Jan. 22, 1919. Serial No. 272,487. 5 Claims. (Cl. 173—259.)

3. In an electrical connection of the type specified, a cap adapted to be attached to a binding post and make electrical contact therewith; and a spring retainer plate extending across the upper end of the cap and having a central loop adapted to permit a terminal to be inserted between said plate and cap and to bind the terminal to the cap when so inserted, substantially as described.



1,352,034. PROCESS OF MAKING CONNECTORS. HOWARD B. SHERMAN, Battle Creek, Mich. Filed May 21, 1919, Serial No. 298,778. Renewed June 28, 1920. Serial No. 392,519. 8 Claims. (Cl. 29—156.)

1. In the process of making a tubular connector provided with screws; forming a blank provided with suitable threaded openings; engaging screws with the said threaded openings; and then completing the folding of the blank into tubular form to permanently retain the screws in the connector.



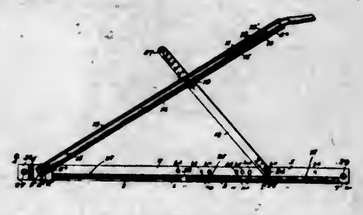
1,352,035. FARM-DERRICK. RAYMOND A. SMITH, Kinsley, Kans. Filed Mar. 10, 1920. Serial No. 364,808. 2 Claims. (Cl. 254—145.)

1. In a device of the class described, a plurality of supporting structures, a winding device carried by each of said structures, a cable connected with each winding device, a transverse element mounted on the upper end of each structure, a bar extending between the upper ends of the respective structures, said bar being provided with a plurality of slots for engaging the transverse elements

and permitting said structures to be spaced apart at variable distances and to be braced at their upper ends against lateral movement.

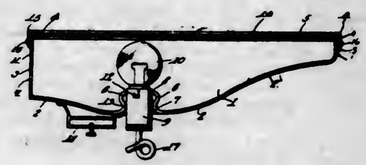
1,352,036. VALVE. WILLIAM A. SMITH, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Apr. 29, 1918. Serial No. 231,374. 7 Claims. (Cl. 251—119.)

1. In a valve for compressors, a valve body seated in a compressor wall, an annular seat on said valve body having a plurality of independent ports extending therethrough to a lateral face thereof, a resilient ring surrounding said seat and covering said ports, said ring being adapted to expand away from said seat to open said valve and means providing an annular passage for limiting the expansive movement of the valve.



1,352,037. FILM-RETOUCHING HOLDER. DEWEY E. STILES, Los Angeles, Calif. Filed July 21, 1919. Serial No. 312,308. 4 Claims. (Cl. 40—158.)

1. In a film-retouching holder comprising a frame, a light transmitting panel in the frame, and a slide having an opening and adapted to hold a film in place on the light transmitting panel, there being no obstruction to the passage of light rays through the frame.

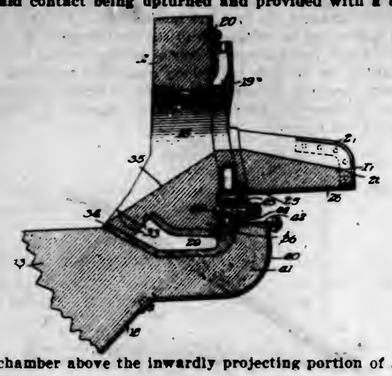


1,352,038. MANOMETER. ERNEST SZEKELY, Detroit, Mich., assignor to American Blower Company, Detroit, Mich., a Corporation of Michigan. Filed Mar. 7, 1918. Serial No. 221,008. 9 Claims. (Cl. 73—31.)

1. A device of the class described including a supporting base, a tube carrying frame pivotally connected with the base and adapted to be positioned at different inclinations, an inclined support or brace connected with the base and with the tube carrying frame, the connection of the inclined support or brace with one of said parts being adjustable whereby the angle of inclination of the tube carrying frame may be changed and the sensitiveness of the device varied, and indicating marks on that one of the parts to which the brace is adjustably connected said indicating marks denoting adjustments of the inclined support or brace member for obtaining certain degrees of sensitiveness of the device.

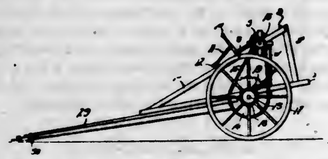
9. A device of the class described including a supporting base, a tube carrying frame connected with the base to be positioned at different angles of inclination, means for maintaining the tube carrying frame in different positions of adjustment, a U tube supported in the frame, a scale plate secured to the U tube between the legs thereof at one side of the tube, and means for adjustably securing the scale plate to the tube comprising a plate disposed opposite the scale plate at the opposite face of the tube and clamp screws connecting the plates together.

1,352,039. AUTOMOBILE SAFETY-SIGNAL. FRANK TOKANOS, Long Branch, N. J. Filed Jan. 3, 1920. Serial No. 349,278. 1 Claim. (Cl. 40—132.)



A device of the character described comprising a hollow casing provided with a plurality of air inlets and conforming to the shape of a human hand, and having its forward part formed open, a plurality of spring clamps struck from the metal forming the rear of said casing and projecting therein and adapted to support an electric lamp socket, a transparent panel secured to the forward part of the casing and covering the above mentioned opening, said panel being in the shape of a human hand, an angle plate secured to the casing and retaining the panel, and a clamp secured to the casing and adapted to secure the device to a vehicle.

1,352,040. ELECTRIC FURNACE. FREDERICK VON SCHLEGELL, Evanston, and WILLIAM B. LEWIS, Chicago, Ill. Filed Apr. 4, 1919. Serial No. 287,588. 27 Claims. (Cl. 204—64.)



1. The combination with an electric furnace having a melting chamber and a tap hole, of an electrical contact for said furnace projecting through the wall thereof, be-

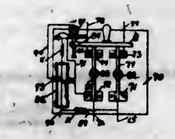
low said tap hole into said melting chamber, the outer end of said contact being upturned and provided with a cool-

ing chamber above the inwardly projecting portion of said contact.

1,352,041. REEL. CHARLES E. WALKER, Grand Rapids, Mich. Filed June 21, 1917, Serial No. 176,238. Renewed Mar. 17, 1920. Serial No. 366,690. 1 Claim. (Cl. 242—92.)

In a device of the class described, the combination of a carriage frame formed of angle bars which are L-shaped in cross section, converging end members fixed to said angle bars and extending upwardly therefrom adjacent one end of said frame, inclined angle bars connected to the remaining end of said frame and having their upper ends connected to the upper ends of the converging end members, thus forming a superstructure, a reel carried upon said inclined bars, means for rotating said reel, whereby the strain imparted to the support by said reel will tend to slightly collapse the superstructure for holding the same against expanding strain, the lower ends of said converging end members and said inclined bars engaging the carriage frame at the angles of the bars whereby the superstructure will be held against displacement.

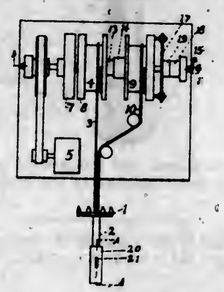
1,352,042. EDUCATIONAL CHART. FRED W. WALKER, Hulbert, Okla. Filed Sept. 5, 1917. Serial No. 189,752. 15 Claims. (Cl. 35—9.)



1. An educational chart including a frame having longitudinal guides arranged in spaced relation, chart belts carried by the frame and movable along the guides, longitudinal rollers mounted in the frame at the spaces between the guides and adapted for carrying charts and for exposing the same at the said spaces to coöperate with the chart belts, and means connected with the rollers and with the chart belts for moving the same simultaneously and independently.

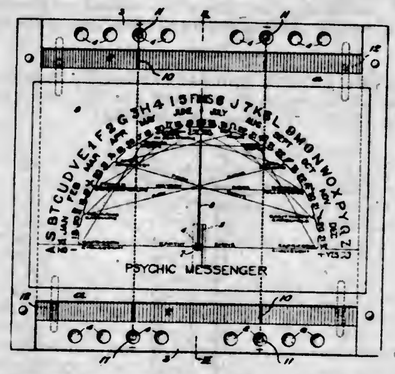
1,352,043. FUEL-SAVING DEVICE. EDWARD ERNEST WARD, Chicago, Ill. Filed Apr. 29, 1918, Serial No. 231,500. Renewed July 20, 1920. Serial No. 397,753. 1 Claim. (Cl. 110—49.)

In combination with a furnace, and cold air intake pipe thereof, a flue cap chamber, a hood positioned within the flue cap chamber of the furnace, a casing outside of the furnace, a pipe providing communication between the hood and casing, a rotary fan within the casing, a relatively short pipe providing communication between the casing and cold air pipe, said short pipe having an enlarged end portion, a mixing fan mounted in the enlarged portion, the blades thereof extending into the cold air pipe, a curved deflector plate secured to the inner wall of the relatively short pipe, the lower end of the deflector plate terminating at a point adjacent the path of travel of the mixing fan, for directing a blast of air onto the blades thereof.



1,352,044. ELECTRIC-CIRCUIT PROTECTOR. SYDNEY N. BARUCH, San Francisco, Calif., assignor to Baruch Electric Controller Corporation, San Francisco, Calif., a Corporation of California. Filed Apr. 12, 1915. Serial No. 20,756. 4 Claims. (Cl. 200—122.)

4. A device for releasably holding a switch in an electric circuit in closed position, comprising means for holding the switch closed, a flexible conductor in the circuit adapted to be heated by current therein, and means for flexing the conductor in one direction operative upon a predetermined flexure of said conductor for releasing said holding means.

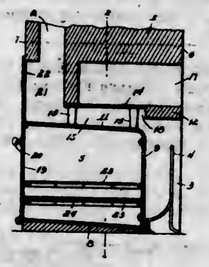


1,352,045. MECHANISM FOR DRIVING TOOLS. AARON E. BERGEY, Bazetta township, Trumbull county, Ohio. Filed Jan. 22, 1919. Serial No. 272,532. 10 Claims. (Cl. 254—135.)

1. In a mechanism for driving tools, a main friction clutch driving member, a control friction clutch driving member running in unison therewith, a main friction clutch driven member adapted to be driven by the said main friction clutch driving member, a control friction clutch driven member adapted to be driven by the said control friction clutch driving member and revolving normally in unison with the said main friction clutch driven member, and a clutch thrust mechanism connecting the two said friction clutch driven members, said clutch thrust mechanism being provided with a roller bearing

through which the clutch pressure is transmitted, said clutch thrust mechanism being constructed so that when the two said friction clutch driven members are turned out of unison in one direction the said main clutch members become engaged and when the said friction clutch driven members are turned out of unison in the opposite direction the said main clutch members become disengaged, substantially as described.

1,352,046. MESSAGE-INTERPRETING DEVICE. FREDERICK H. BLACK, Pittsburgh, Pa. Filed Mar. 5, 1920. Serial No. 363,495. 7 Claims. (Cl. 46—41.)



1. A message interpreting device consisting of a base having a bridge portion and an intervening slidable board member, a dial on the face of the bridge portion, a pointer having a stem pivoted in the base and bridge portion, and actuating gearing therefor between the slidable board member and the pointer stem.

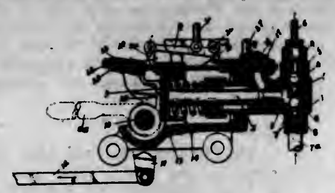
1,352,047. TONGUE-BALL. RUDOLF W. BOJE, Jr., Buffalo, N. Y. Filed Jan. 28, 1919. Serial No. 273,553. 1 Claim. (Cl. 46—40.)

A toy comprising an elastic hollow body of substantially spherical shape representing the head of a human being and having an elliptical shaped opening to provide a mouth, a projection formed on said body and disposed above the opening and shaped to form a nose, said body having eyes applied thereon and disposed on each side of the nose, and a tapered elastic member having one end closed and its open end secured to the interior of the body about the opening, so that said member may be projected and retracted in the body by squeezing and releasing the pressure on said body.

1,352,048. FIREPLACE HEATER AND COOKER. THOMAS CARTER, Belton, S. C. Filed May 3, 1918. Serial No. 232,333. 3 Claims. (Cl. 126—137.)

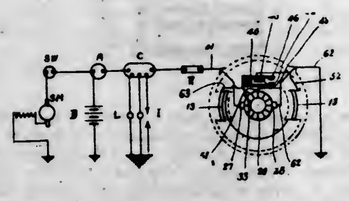
3. In a device of the class described, a wall having an opening therein extending from one of its faces to another thereof and an oven chamber above the opening, the said wall having a flue therein and communicating with said opening, a casing in said opening and having one of its walls arranged flush with one face of said wall and another of its walls spaced inwardly from the other face of said wall, a plate closing the bottom of said oven chamber and forming a flame passage above said casing and in communication with said flue, and a grate on one wall of said casing.

1,352,049. VAPORIZER FOR CARBURETERS. GEORGE B. CASS, Ottawa, Ohio. Filed Jan. 28, 1919, Serial No. 273,602. Renewed Jan. 13, 1920. Serial No. 351,251. 3 Claims. (Cl. 219—38.)



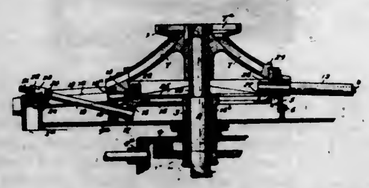
1. In a carbureter, a delivery tube having a lateral opening, an insolating bushing in said lateral opening, an L-shaped rod having one leg threaded and extending through the bushing, the remaining end extending longitudinally within the delivery tube, and a thermo-electric coil surrounding the last-mentioned end of the rod, one end of the coil being connected to the free extremity of the rod and the remaining end being grounded on the wall of the tube.

1,352,050. GOVERNING FUEL-PUMP. ADOLPH F. CHRISTMAS, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Sept. 28, 1918. Serial No. 256,129. 4 Claims. (Cl. 123—140.)



1. In a fuel pump for internal combustion engines, a plunger adapted to reciprocate within a cylinder to force motive fluid from a source of supply into a combustion chamber, means for actuating said plunger, a by-pass valve normally held closed, a device operatively connected to the plunger actuating means for opening the by-pass

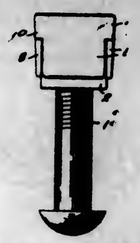
valve, and means controlled by a governor for controlling the opening of said by-pass valve at variable points toward



the end of the stroke of the plunger to vary the amount of fuel admitted to the combustion chamber.

1,352,051. REGULATING DEVICE FOR DYNAMO-ELECTRIC MACHINES. OLIVER F. CONKLIN, Detroit, Mich., assignor to Remy Electric Company, Anderson, Ind., a Corporation of Indiana. Filed Dec. 19, 1916. Serial No. 137,751. 8 Claims. (Cl. 171—229.)

3. In a system of regulation for dynamo-electric-machines, the combination with a variable speed dynamo; of means for regulating the output thereof in accordance with speed to obtain a predetermined characteristic based on the relation of speed and output; and separate temperature controlled means for modifying the operation of said regulating means whereby a different characteristic will be obtained.

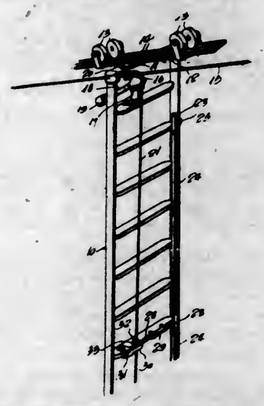


1,352,052. ROLL-ADJUSTING APPARATUS. GEORGE F. CRIPPEN, Ypsilanti, Mich., assignor to The Crippen Manufacturing Company, Mount Pleasant, Mich., a Corporation of Michigan. Filed May 9, 1918. Serial No. 233,519. 31 Claims. (Cl. 130—18.)

1. In an apparatus of the character described, the combination of an annular series of rotatable rolls arranged in pairs, one of the rolls of each pair being laterally adjustable relative to the other, and means arranged within the space at the inner ends of the series of rolls, forming driving means common to all of the adjustable rolls for simultaneously adjusting the same.

1,352,053. NUT-LOCK. JOHN W. CURTIN, Worcester, Mass. Filed Oct. 2, 1919. Serial No. 327,881. 1 Claim. (Cl. 151—29.)

In a device for locking a nut of ordinary construction on a bolt, the combination of a threaded bolt, having a blank end, and a locking cap device comprising a head having a central channel of suitable size to seat over the blank end of the bolt said channel having projecting inwardly tapering ribs adapted to cut grooves in a locking device on the blank end of the bolt, and side plates integral

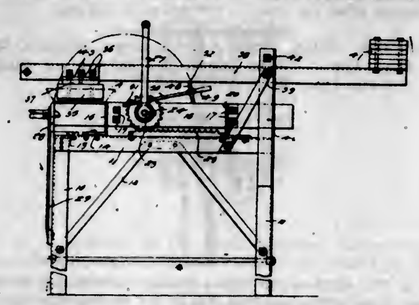


with the aforesaid head and adapted to engage over the sides of the nut and lock same in any position desired on the bolt.

1,352,054. FISH-BAIT. HENRY S. DILLS, Garrett, Ind. Filed Dec. 18, 1915. Serial No. 67,533. 3 Claims. (Cl. 43—40.)

1. In a fish-bait, the combination with the forward end of a bait body, of means having a part thereof attached to the bait body and further having an upright transversely extending wall adapted to form a resistance to the water and cause the body to wriggle or swing laterally and having a longitudinally inclined portion integral with the wall and projecting forwardly therefrom, the longitudinal axis of the inclined portion being in the vertical plane of the longitudinal axis of the body.

1,352,055. LADDER AND SAFETY-LOCK. ANTHONY DI SALVATORE, Scotia, N. Y. Filed Apr. 19, 1920. Serial No. 375,044. 7 Claims. (Cl. 228—52.)



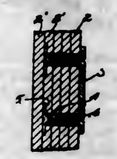
7. A traveling ladder, a lock for the same, an actuating line for the lock, means holding the line against movement to release the lock when the line is in its normal position, and means for moving the line out of its normal position for movement to release the lock.

1,352,056. BRICK-MACHINE. JAMES CARREL DOBBINS, Rock Hill, S. C. Filed Oct. 29, 1919. Serial No. 334,216. 5 Claims. (Cl. 25—41.)

1. A brick machine of the character described, comprising a main frame including a horizontally disposed upper portion having a forward mold board support, an

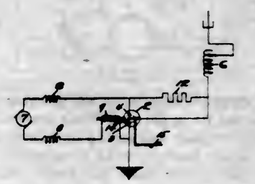
upright slotted wall along the rear of said support forming the rear mold wall, a front mold wall having a pivoted connection with the main frame and shiftable with respect thereto into and out of position opposing the rear mold wall, a series of lengthwise shiftable partitions rigidly connected to one another and the forward ends

of which are movably disposed in the slots of the rear mold wall, a mold board or pallet removably disposed between the front and rear mold walls, rigid connections between the said partitions, and manually actuated means for shifting the partitions forwardly and rearwardly on the main frame, as described.



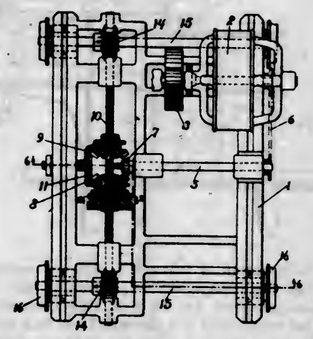
1,352,057. TREE-BARKING TOOL. ETHEL EVANS, Wenatchee, Wash. Filed Oct. 8, 1919. Serial No. 329,303. 6 Claims. (Cl. 145—1.)

1. In a tool as specified, the combination of a handle, a blade carried at one end of said handle and provided with a flat portion upon one side of the handle terminating in a straight sharpened edge, a portion of said blade extending upon the opposite side of the handle from said flat portion being curved and presenting outwardly a convexed surface.



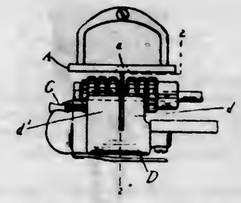
2. In a tool as specified, the combination of a handle, a blade carried at one end of said handle and provided with a flat portion upon one side of the handle terminating in a straight sharpened edge, a portion of said blade extending upon the opposite side of the handle from said flat portion being curved and presenting outwardly a convexed surface, said curved portion terminating in a concaved sharpened edge.

1,352,058. WATER-CLOSET SEAT. SAMUEL T. FROTHINGHAM, Allston, Mass., assignor to Fibre Manufacturing Company, Boston, Mass., a Corporation of Massachusetts. Filed Aug. 20, 1919. Serial No. 318,635. 2 Claims. (Cl. 4—18.)



1. The combination with a water closet seat formed of layers of material, of a hinge, an interiorly-threaded sleeve passing through a plurality of said layers, a flange on the inner end of said sleeve, said flange abutting one of said layers, and a screw passing through said hinge and threaded to said sleeve.

1,352,059. RADIOTELEGRAPHY. LEONARD F. FULLER, Palo Alto, Calif., assignor to Federal Telegraph Company, San Francisco, Calif., a Corporation of California. Original application filed Apr. 23, 1917, Serial No. 163,793. Patent No. 1,330,254, dated Feb. 10, 1920. Divided and this application filed Sept. 23, 1918. Serial No. 255,245. 7 Claims. (Cl. 250—19.)



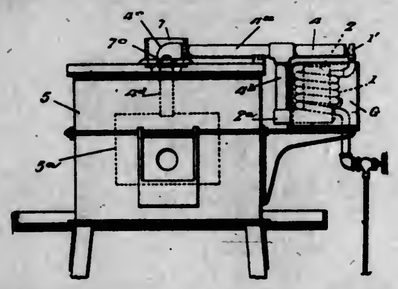
2. In an arc radio generator, two normally stationary electrodes between which an arc is formed and a third electrode movable into contact with one of the stationary electrodes.

1,352,060. CENTRIFUGAL BRAKE FOR POWER-TRUCKS. ARTHUR H. GIBSON, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed July 24, 1917. Serial No. 182,439. 10 Claims. (Cl. 188—185.)

1. In a power driven truck, in combination, a reversing mechanism and a centrifugal brake mounted thereon, having members to frictionally engage a non-rotating member of said reversing mechanism when the speed of said truck exceeds a maximum.

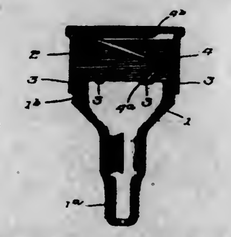
1,352,061. CLOTH-FEED MECHANISM FOR BLIND-STITCH SEWING-MACHINES. JACOB GOLDBERG, Cincinnati, Ohio, assignor to The Goldberg Padding Machine Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Sept. 3, 1919. Serial No. 321,372. 2 Claims. (Cl. 112—178.)

1. In a machine of the class described the combination of a support, a bridge pivoted at one end to the support,



and having in its opposite end a slot, and a set screw mounted in the support and having a reduced end passing through the slot, the slot and the reduced end being adapted to limit the movement of the bridge and being so proportioned that at one limit of movement of the bridge the machine is adapted for felling and at the other limit of movement is adapted for blind-stitching.

1,352,062. BOTTLE-STOPPER. PAUL J. HENTSCHEL, Baltimore, Md. Filed Feb. 12, 1920. Serial No. 358,012. 1 Claim. (Cl. 215—14.)

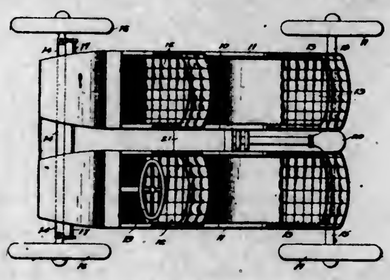


A bottle stopper comprising an integral disk of fibrous material having its upper and lower surface provided with substantially circular weakening indentations, or cuts, the line on the upper surface being arranged at a greater distance from the center than the lower, the indented line on the upper surface being deflected outward at one point to form a finger tab, a portion of the material of the disk adjacent said tab portion being removed.

1,352,063. KEROSENE-GAS-BURNING FURNACE. CLARENCE A. HILL, Columbus, Ohio, assignor to The Champion Kerosene-Burner Company, Kenton, Ohio, a Corporation of Ohio. Filed Nov. 7, 1919. Serial No. 336,376. 6 Claims. (Cl. 158—53.)

1. In combination, a furnace having an opening in its wall for the reception of a fuel gas supply pipe; a hydrocarbon gas generator having a mixing tube, and a supply pipe for conducting the mixture from this tube having an elbow and extending into the furnace through said opening; with a cup connected to the furnace and surrounding said opening and inclosing the elbow, and a non-heat conducting packing within this cup around such elbow, substantially as described.

1,352,064. COVER-LOCKING DEVICE FOR GREASE-CUPS. WILLIAM G. HOFMANN, Battle Creek, Mich., assignor to Howard B. Sherman, Battle Creek, Mich. Filed Oct. 29, 1918. Serial No. 260,195. 2 Claims. Cl. 184—48.)

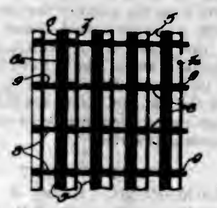


2. In combination a grease cup having an exteriorly threaded upper portion and provided with notches in the upper edge of such threaded portions; and a cover having an interiorly threaded portion adapted to engage the exteriorly threaded portion of the cup; with a helical spring having one end welded to the cover and its other end bent to form a downwardly projecting tooth adapted to ride upon the upper edge of the cover and engage the said notches when the cover is screwed onto the cup.

1,352,065. SIGN. PHILIP HOTTENSTEIN, Gleason, Wis. Filed Apr. 3, 1919. Serial No. 287,151. 4 Claims. (Cl. 40—145.)

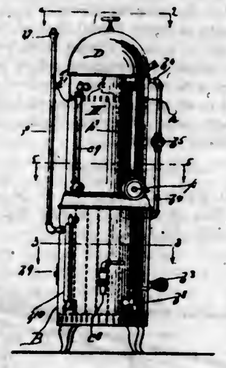
1. The combination with a tubular post having slots in its upper end, removable means for closing the ends of said slots, of a plurality of signs each having a portion arranged in one of said slots, each sign being provided with means at its inner end extending beyond a longitudinal edge of the sign whereby said means is disposed within the post to abut with the removable means to prevent accidental displacement of the sign.

1,352,066. AUTOMOBILE-BODY CONSTRUCTION. JOHN JAMES JONES, Wichita, Kans. Filed Nov. 5, 1918. Serial No. 261,246. 3 Claims. (Cl. 180—89.)



1. A motor car of the type described, including a four wheeled frame and a pair of laterally spaced substantially parallel bodies separated throughout their lengths with motive parts disposed between the bodies and accessible from either thereof.

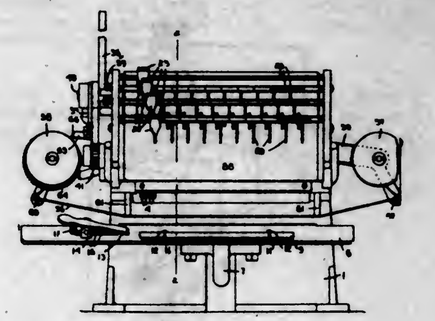
1,352,067. VERMIN-EXTERMINATOR. ISAAC N. KEYSER, Urbana, Ohio. Filed Mar. 9, 1920. Serial No. 364,424. 8 Claims. (Cl. 43—131.)



1. A vermin exterminator comprising a receptacle having an ingress opening in one of its walls, and a partition movably mounted in the receptacle for adjustment toward and from the ingress opening, said partition sub-dividing the interior of said receptacle into a poison-containing compartment and a non-poison-containing compartment, the latter being in direct communication with said ingress opening, said partition having an opening connecting said compartments, the aforesaid openings being arranged out of axial alinement with each other.

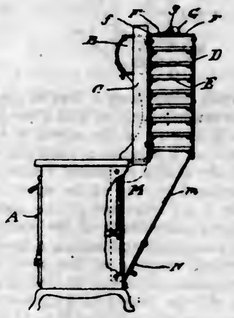
1,352,068. RADIATOR-CORE. ROBERT KLEINS, Chicago, Ill. Filed Sept. 24, 1918. Serial No. 255,505. 3 Claims. (Cl. 257—129.)

1. In a radiator of the kind described, coöperating plates for forming a radiator core unit, one of said plates being folded transversely at intervals to form laterally projecting leaves or walls and having longitudinally extending shallow grooves pressed into its face opposite to said walls, the other plate being flat and provided with outwardly extending depressed portions spaced longitudinally thereof similar to the spacing of said leaves and adapted to space the leaves of an adjacent plate, the hollow sides of said depressions being arranged opposite to said grooves and the said plates being adapted to be joined at their edges by soldering or otherwise, substantially as described.



1,352,069. COFFEE-URN. EDWARD KRONMAN, New York, N. Y. Filed Dec. 11, 1919. Serial No. 344,075. 5 Claims. (Cl. 53—3.)

1. A unitary water boiler and coffee urn of the character designated, comprising a basic boiler surmounted by a high temperature compartment heated by hot air boiler flue means, a coffee container positioned in said high temperature compartment, a hot water stand pipe connecting the lower portion of said boiler with the upper part of said coffee container, a valve interposed in said hot water stand pipe and a discharge pipe disposed within the boiler, repour piping connecting the lower portion of said coffee container with a spraying device in the upper part thereof, and a pump interposed in said repour piping for effecting a forced circulation of the liquid coffee.

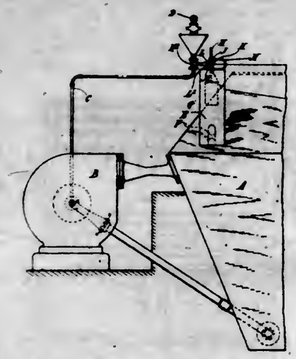


1,352,070. LISTING-MACHINE. GEORGE H. LANG, Boston, Mass. Filed Oct. 3, 1919. Serial No. 328,142. 18 Claims. (Cl. 101—96.)

1. In a listing machine the combination with a plurality of type wheels each having a toothed member rigid therewith, of an actuating key coöperating with each toothed member for setting the corresponding type wheel and

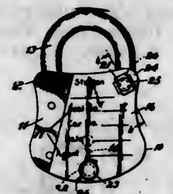
constructed to set said type wheel one step in either a forward or backward direction.

1,352,071. DRIER ATTACHMENT FOR STOVES. GEORGE M. LEEPER, Oakland, Oreg. Filed Jan. 2, 1920. Serial No. 349,107. 3 Claims. (Cl. 34—89.)



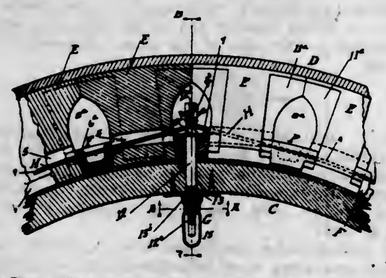
1. The combination with a stove or range provided above its top with a warming closet, of a drier applied to the stove in rear of its lower portion and the warming closet, comprising a drying chamber in rear of the warming closet and an air chamber below the drying chamber having as its front wall the rear wall of the stove and as its rear wall an inclined, reflecting plate which serves to support the drying chamber and having side parts which are attached to the sides of the stove, substantially as described.

1,352,072. APPARATUS FOR THE CONCENTRATION OF ORES. FLEURY JAMES LYSTER, Broken Hill, New South Wales, Australia, assignor, by mesne assignments, to Minerals Separation North American Corporation. Filed Nov. 18, 1916. Serial No. 132,059. 3 Claims. (Cl. 83—85.)



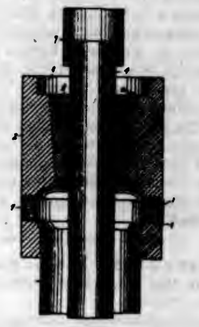
1. A froth-flotation ore-concentrating apparatus comprising a separating vessel, a pulp-agitating-and-aerating pump adapted to draw in air and introduce it into the pulp and deliver the aerated pulp to the separating vessel,

a float in the separating vessel, and means controlling the admission of air to the pump and controlled by the



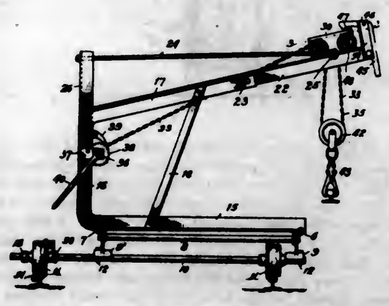
float to increase the feed of air to the pump as the liquid level rises in the separating vessel.

1,352,073. SEAL FOR LOCKS. IRA A. MCCORMACK, New York, N. Y. Filed Mar. 1, 1919. Serial No. 280,071. 1 Claim. (Cl. 70—97.)



A seal for a lock, comprising a fragile plate including two apertured extension members, said plate and members being adapted to be applied on the casing of a lock having a key hole as well as a shackle, a fixed pin with a head protruding from the casing in spaced relation to the key hole for being engaged by one of the apertured members of the plate, and a pin rotatable in the casing with the opening and closing movements of the shackle, said pin protruding from the casing and having a head over which the second apertured member of the plate is guided so that with the closing movement of the shackle on the casing the plate will be caused to be removably held on the casing by the pins whereby breakage of the plate will be required to obtain access to the key hole.

1,352,074. TIRE. JOSEPH N. MCFATE, Phoenix, Ariz., and HERBERT L. GLAZE, Los Angeles, Calif.; said Glaze assignor of four-tenths of his right to said McFate. Filed Apr. 23, 1918. Serial No. 230,338. 9 Claims. (Cl. 152—5.)

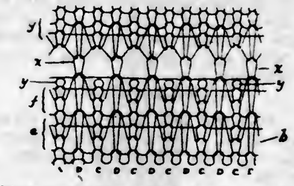


2. In a tire, a plurality of independent and interchangeable cushion members adapted to be disposed between the casing and the rim and having spaced base portions, while the outer ends thereof are enlarged longitudinally to arch over the said spaces and abut against each other, said outer ends being also formed with lateral abutments which are curved to fit the tread portion of the casing and recede from the sides of the casing at the base thereof to provide clearance spaces, spacer elements interposed between the bases of the cushion members and formed with inclined sides which have a wedge action upon the inner side walls of the casing to hold the casing in position upon the rim, and means for binding said cushion members and spacer elements down upon the rim of the wheel in continuous series.

1,352,075. CASING-HEAD. HENRY S. MCGARRY and JOHN D. CARR, Humble, Tex. Filed Mar. 28, 1919. Serial No. 285,921. 1 Claim. (Cl. 285—22.)

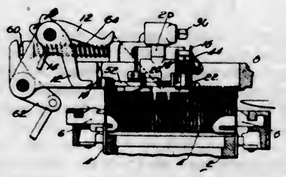
A device of the character described comprising a tubular member having an opening therethrough, provided to receive a pipe, said member being adapted to be screwed on the upper end of a well casing, and being provided with an annular recess in the upper end, a portion of the wall being formed with an upwardly inclined wall, and the covering adapted to fit into said recess and through which said pipe extends, said covering closing the openings through said tubular member.

1,352,076. RAIL-TRUCK. PATRICK H. MADDEN, Sparta, Wis. Filed May 8, 1918. Serial No. 233,241. 3 Claims. (Cl. 212—11.)



1. In a rail truck, the combination of a frame, carrying wheels for said frame spaced apart and arranged to run on the rails of a railway track and provided with means for retaining the truck on the track-rails, a supporting structure sustained by said frame comprising vertically extending members disposed entirely adjacent one side of the frame so as to leave space on the other side thereof to permit rails to be laid on and supported by the frame between the track rails and an elevated supporting member extending transversely from the vertical members over said clearance space and projecting beyond the track-rail at the side of the track adjacent said load-space, and rail-hoisting means whereby a load-rail may be lifted from the ground at one side of the track and deposited onto the frame so it will be supported thereon between the track-rails.

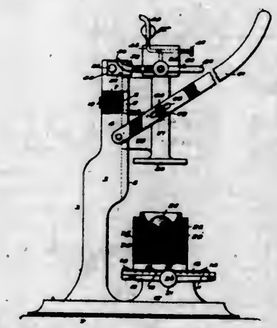
1,352,077. LANDING DEVICE FOR AEROPLANES. ERNEST L. MARTIN, Houston, Tex. Filed Feb. 26, 1920. Serial No. 361,496. 4 Claims. (Cl. 244—2.)



1. The combination with an aeroplane, of a landing device depending therefrom and including landing wheels pivotally connected to the fuselage and means for simultaneously adjusting said wheels laterally, in the same direction.

1,352,078. STOCKING. JAMES C. MATLACK, Philadelphia, Pa., assignor to Notaseme Hosiery Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Dec. 12, 1918. Serial No. 266,416. 6 Claims. (Cl. 66—4.)

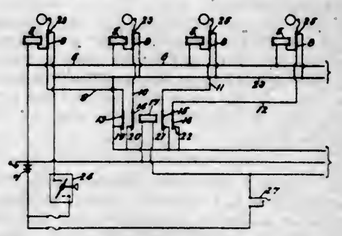
1. A stocking comprising a plain knit tubular part having a given number of stitches to a course, a relatively elastic rib top having a greater number of stitches to a course, the rib top adjacent the plain knit top comprising a series of plain knit wales and a series of tuck stitch wales alternating with the plain knit wales, the last loops of the tuck stitched wales being equally spaced apart and uniting the rib knit part to the equally spaced apart end loops of the plain tubular part, the last loops of the plain knit wales of the top being disconnected from the plain knit tubular part, said plain knit wales of the top being held from raveling by said tuck stitched wales.



1,352,079. FEEDING MEANS FOR CIRCULAR-KNITTING MACHINES. MAX C. MILLER, Cumberland Hill, R. I., assignor to Jenckes Knitting Machine Company, Pawtucket, R. I., a Corporation of Rhode Island. Filed Jan. 24, 1918. Serial No. 213,456. 10 Claims. (Cl. 66—12.)

1. A knitting machine, having, in combination, means for presenting yarns to and withdrawing them from the needles, two yarn holders for holding the ends of the idle yarns, and mechanism for successively opening the holders to receive the yarns withdrawn from the needles and for closing each holder before the other is opened.

10. A knitting machine, having, in combination, means for presenting yarns to and withdrawing them from the needles, a clamp for holding the idle yarns within the needles, and a series of guide pins in front of the clamp about different ones of which different yarns when presented to the needles may draw in a direction substantially at right angles to the bar.

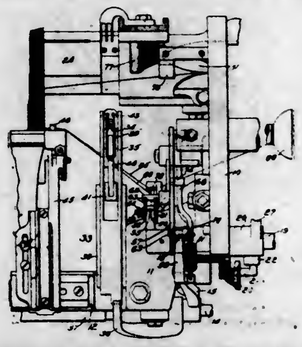


1,352,080. DENTAL CASTING-MACHINE. FELIX C. MONTUORI, Washington, D. C., assignor of one-half to Clyde M. Gearhart, Washington, D. C. Filed June 24, 1920. Serial No. 391,275. 12 Claims. (Cl. 22—69.)

1. In a dental casting machine, a hollow plunger having a blow pipe therein, means for supplying gas and air to said blow pipe and plunger and a valve casing mounted on the top of the plunger having a single valve for supplying and cutting off the feed of both gas and air to said plunger.

1,352,081. SIGNALING SYSTEM. JOHN F. MORAN, Jersey City, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 8, 1917. Serial No. 173,544. 2 Claims. (Cl. 177—7.)

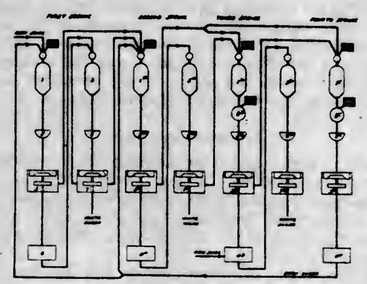
1. In a signaling system, a plurality of electrically-controlled bells, a source of current, circuits and connections for causing the operation of said bells from said source as single stroke signals, circuits and connections for causing the operation of said bells from said source as vibrating signals, and electrically-operated means for opening the circuits over which the single stroke operation is controlled during the operation of said bells as vibratory signals.



1,352,082. HOMOLOGUE OF TROPIN AND THE PROCESS OF PRODUCING SAME. EMIL MÜLLER, Basel, Switzerland, assignor to The Hoffmann-La Roche Chemical Works, New York, N. Y., a Corporation of New York. Filed Dec. 16, 1916. Serial No. 137,381. 3 Claims. (Cl. 23—24.)

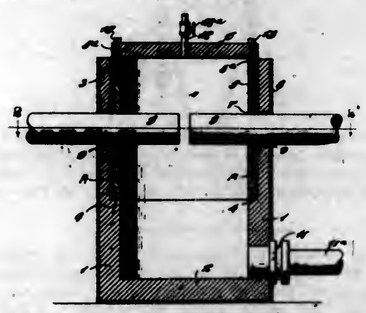
1. A homologue of tropin which may be formed by treating dihydroanhydroecgoninalkyl ester with sodium in a solution of absolute alcohol and is difficultly soluble in petroleum ether and easily soluble in ether, benzol, al-

cobol or water, which crystallizes from ligroin in long needles which melt at 85° C. and rotates the plane of polarized light to the right, whose hydrochlorid melts at 210° C. and is soluble in water and alcohol and insoluble in ether, and whose platinum compound and picrate are difficultly soluble in water.



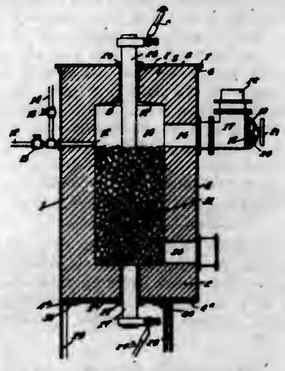
1,352,083. THREAD PARTING AND CLAMPING MECHANISM. JONAS NORTHROP, Hopedale, Mass., assignor to Hopedale Manufacturing Company, Milford, Mass., a Corporation of Massachusetts. Filed Mar. 8, 1918. Serial No. 221,110. 17 Claims. (Cl. 139—85.)

1. A loom having, in combination, weft replenishing mechanism, loom controlling devices, a filling fork located beside the replenishing mechanism, a fixed parting and clamping blade, movable parting and clamping blades normally closed, a shuttle feeler constructed to act as a thread hook to draw the outgoing and incoming filling ends toward the breast beam, means connected with the loom controlling devices to open the movable parting and clamping blades and to swing the shuttle feeler into shuttle feeling and filling and engaging position, a bunter on the lay arranged to push the shuttle feeler forward so that it may deliver the outgoing filling end to and close the movable parting and clamping blades to sever and hold the filling end.



15. A loom having, in combination, weft replenishing mechanism, loom controlling devices, a filling fork located on the replenishing side of the loom, and means for drawing the incoming filling end to a position out of the range of action of the filling fork and holding it in that position so that it will not interfere with the detecting action of the fork.

1,352,084. SUGAR PROCESS. RUDOLPH E. POSPISIL, Chippewa Falls, and EDMUND KUREK, Madison, Wis., assignors of two-thirds to said Kurek. Filed Dec. 27, 1915. Serial No. 68,636. 4 Claims. (Cl. 127—17.)

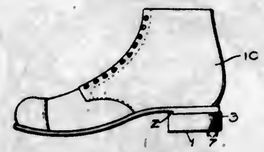


1. The process of making white granulated sugar which consists in treating the raw juice to recover the first strike of sugar therefrom, boiling in a vacuum pan the syrups from the first strike and a part of the dark sugar from the blank of a later strike, subjecting the same to water injections and raising the temperature to remove impurities, separating the crystals from the syrup, melting them and boiling the melted crystals in a vacuum pan to a massecuite and recovering the crystals therefrom.

1,352,085. PROCESS OF AND APPARATUS FOR PRODUCING CARBON AND GASEOUS FUEL. JAMES R. ROSE, Edgeworth, Pa. Continuation of application Serial No. 230,772, filed Apr. 25, 1918. This application filed Nov. 8, 1918. Serial No. 261,588. 16 Claims. (Cl. 204—31.)

1. The process of producing carbon which comprises introducing an aeriform hydrocarbon fluid into a generator heated by an electric arc thereby to raise the temperature of such fluid to a point sufficient to dissociate the fluid into solid carbon and a gas containing a preponderating amount of hydrogen.

1,352,086. PROCESS OF PRODUCING CARBON AND GASEOUS FUEL. JAMES R. ROSE, Edgeworth, Pa. Filed Dec. 26, 1918. Serial No. 268,390. 6 Claims. (Cl. 204—64.)



1. The process which comprises subjecting a mixture of hydrocarbon fluid, together with oxygen in proportion to produce incomplete combustion thereof, to discontinuous resistance material in an electric circuit, whereby the said fluid is dissociated into carbon and a gas containing a prepondering amount of hydrogen.

1,352,087. ELECTRIC BATTERY. OTTO E. RUHOFF, Madison, Wis., assignor to French Battery & Carbon Co., Madison, Wis., a Corporation of Wisconsin. Filed Nov. 21, 1918. Serial No. 263,593. 2 Claims. (Cl. 204—29.)
